Multi Asset Solution

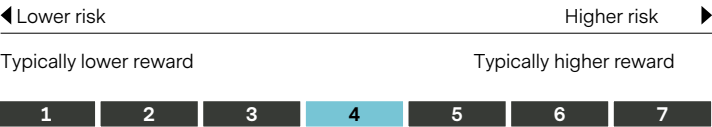

ISIN	LU1481721022	a sub-fund of Vontobel Fund
Share Class	C	This fund is managed by Vontobel Asset Management S.A., which is part of Vontobel Group.
Currency	EUR	This fund is authorised in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and investment policy

This actively managed sub-fund aims to achieve steady capital growth. It is categorized as Article 8 SFDR.

- The sub-fund may invest a majority of its net assets worldwide, in the following asset classes: up to 100% in interest-bearing securities, including up to 20% asset-backed or mortgage-backed securities; up to 10% in contingent convertible bonds (CoCo-Bonds); up to 50% in equities and equity-like securities; up to 40% indirectly, in accordance with the legal requirements, in the alternative asset class, especially real estate, commodities and precious metals. In doing so, one or more asset classes may not be taken into account. The sub-fund can also invest up to 30% in products and instruments linked to dividends, volatility, inflation and the like. These latter investments, combined with the alternative asset class, may not comprise more than 40% of the net assets. The sub-fund may also conduct active currency management.
- All of the above investments can also be made indirectly via derivative instruments or eligible investment funds. Investments made via investment funds may amount up to 100% of the sub-fund's net assets. The sub-fund may temporarily invest up to 100% of its net assets in money market instruments and cash.
 - The sub-fund may use derivatives to achieve the investment objective and for hedging purposes.
 - The sub-fund is not managed with reference to a benchmark. The portfolio manager has full investment discretion within the predefined investment limits.
 - Any income generated will be reinvested and included in the value of your shares.
 - Buying and selling securities entails transaction costs payable in addition to the charges listed.
 - Redemption of shares: daily when banks in Luxembourg are open for normal business (see prospectus for details and exceptions).

Risk and reward profile

The indicator above does not signal the risk of a potential loss, but indicates the fluctuations in the sub-fund's share price in the past.

- The share class is assigned to this category because its share price can fluctuate moderately due to the investment policy applied.
- The historical data used to calculate the profile cannot be used as a reliable guide to the future risk profile of the sub-fund.
- The risk category shown is not guaranteed and may change.
- Even the lowest risk category is not entirely free of risk.

When assigning a sub-fund's share class to a risk category, it may be the case that not all risks are taken into account. Such risks include risks in connection with exceptional market events, operational errors,

legal and political events. You can find a detailed list of the risks in the "Notice regarding special risks" section in the general part of the sales prospectus. The following risks have no direct influence on this category, but may still be important:

- Securities with a lower credit quality means a higher risk that an issuer may fail to meet its obligations. The investment value may fall if an issuer's credit rating is downgraded.
- Using derivatives creates significant leverage and entails valuation risks and operational risks. Leverage magnifies gains but also losses. Over-the-counter derivatives involve corresponding counterparty risks.
- Asset-backed and mortgage-backed securities, and their underlying receivables are often intransparent. The sub-fund may also be subject to a higher credit and/or prepayment risk.
- A company's stock price may be adversely affected by changes in the company, its industry or economic environment and prices can change quickly. Equities typically involve higher risks than bonds and money market instruments.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs for managing, marketing and distributing it. These charges reduce the return on your investment.
