Man GLG Pan-European Equity Growth Class D C NOK Shares

(ISIN:IE00BYVQ5J86) Man GLG Pan-European Equity Growth (the 'Fund') is a sub-fund of Man Funds plc (the 'Company').

Man Asset Management (Ireland) Limited, part of Man Group plc, is the Manager of the Company.

Objectives and investment policy

- The Fund's objective is to provide medium to long term capital growth.
- The Fund will typically hold between 30-40 positions.
- The Fund is a concentrated long-only fund which invests in shares of European companies (or companies which derive a predominant part of their revenues from activities in Europe). The Investment Manager, through the application of detailed screening criteria, seeks to invest in companies which are either established market leaders in their industries or which demonstrate a competitive advantage in new and underdeveloped markets with the majority of the portfolio invested in the former.
- The Fund will have a Pan-European focus including the UK and will not focus on any industry or sector.
- The Fund may actively use financial derivative instruments (ie instruments whose prices are dependent on one or more underlying assets (''FDI'')) to achieve the investment objective, for hedging against anticipated movements in a market or a security, or where it is more economically effective than directly holding the underlying asset. The use of FDI may multiply the gains or losses made by the Fund on a given investment or on its investments generally. FDI may allow the Fund to obtain market exposure in excess of the value of the Fund's assets (leverage).
- The Fund may also invest up to one third in a number of other assets including money market instruments, debt securities, other funds, cash and other liquid assets. Debt securities can be issued by either government or corporate issuers. The Fund may increase its holdings of cash and other liquid assets in times of market turbulence.
- Investment in the Fund may be suitable for investors seeking medium to long-term capital growth with an investment horizon of at least five years.
- The Fund may actively use FDI to provide investors with the currency risk associated with the underlying investments of the Fund, or of an appropriate benchmark.
- Any income earned on investments will be added to the value of investors' shares and investors can buy and sell their shares on each dealing day of the Fund.

Risk and reward profile

Lower risk ← → Higher risk

Typically lower rewards — Typically higher rewards

1	2	3	4	**5**	6	7

- The lowest category does not mean 'risk free'.
- The risk and reward profile is not guaranteed and may change over time.
- Historical data may not be a reliable indication for the future.
- The risk category for this share class is 5 as funds of this nature engage in strategies that typically have a moderate to high volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the Manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.

The following risks may not be fully captured by the risk and reward profile:

- The use of FDI involves additional risks: (i) FDI may be highly sensitive to price movements of the asset on which they are based; (ii) a counterparty to a non-exchange traded FDI may not meet its payment obligations in the event of default; (iii) the use of FDI may result in increased leverage. These risks may lead to significant losses.
- Liquidity characteristics of non-exchange listed investments can be irregular, and may result in higher than anticipated costs to liquidate the investment.
- A limited number of investments may be held which can increase the volatility of performance.
- The Fund is a specialist geographic regional fund which, as a result, may carry greater risk than a more internationally diversified portfolio.
- The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets and therefore the value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.

A complete description of risks is set out in the prospectus section entitled 'Certain Investment Risks'.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	Up to 5.00%
Exit charge	None

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	1.70%

Charges taken from the fund under certain specific conditions

Performance fee	None

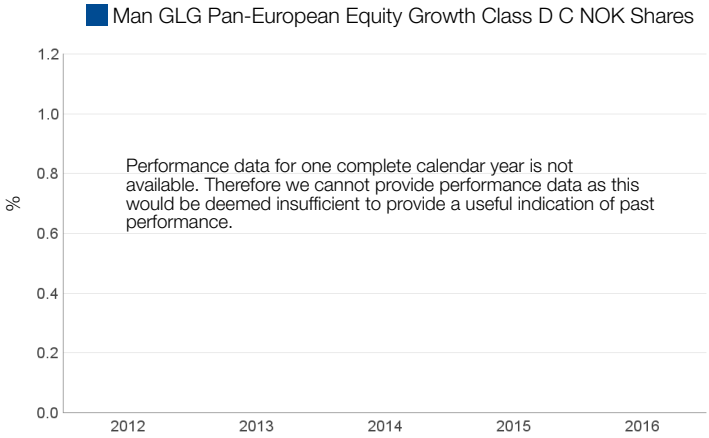

The entry charge shown is a maximum figure and in some cases you might pay less. Please refer to your financial advisor or the distributor for the actual charges.

As this share class has not had a full year of performance, the ongoing charges figure is an estimated figure.

This figure may vary from year to year. It excludes performance fees (where applicable) and portfolio transaction costs, except in the case of an entry/ exit charge paid by the Fund when buying or selling units in another sub-fund.

For detailed information on charges and fees please see the 'Fees and Expenses' section of the prospectus.
