JPM EUR Liquidity LVNAV W (flex dist.)

a Share Class of JPMorgan Liquidity Funds – EUR Liquidity LVNAV Fund

a Sub-Fund of JPMorgan Liquidity Funds

LU1540973689

The management company is JPMorgan Asset Management (Europe) S.à r.l.

Objectives and Investment Policy

Investment Objective: The Sub-Fund seeks to achieve a return in the Reference Currency in line with prevailing money market rates whilst aiming to preserve capital consistent with such rates and to maintain a high degree of liquidity.

Investment Policy: The Sub-Fund will invest its assets in short-term EUR-denominated Debt Securities, deposits with credit institutions and Reverse Repurchase Agreements.

The Sub-Fund may have exposure to investments with zero or negative yields in adverse market conditions.

The weighted average maturity of the Sub-Fund's investments will not exceed 60 days and the initial or remaining maturity of each Debt Security will not exceed 397 days at the time of purchase.

In addition to receiving a favourable assessment of their credit quality pursuant to the Management Company's Internal Credit Procedures, Debt Securities with a long-term rating will be rated at least "A" and Debt Securities with a short-term rating will be rated at least "A-1" by Standard & Poor's or otherwise similarly rated by another independent rating agency.

The Sub-Fund may also invest in unrated Debt Securities of comparable credit quality to those specified above.

The Sub-Fund aims to maintain a AAA rating, or equivalent, assigned by at least one rating agency.

When net investment income is positive, a dividend will normally be paid. When net investment income is negative, there will be no distribution. The negative net investment income will be accrued

and reflected in the Net Asset Value per Share of the Share Class which will therefore, under these circumstances, behave as an accumulating Share Class. The Net Asset Value per Share will not remain stable in such circumstances and Shareholders must be fully aware that the number of Shares they hold, and hence the value of their holding will decrease and when they redeem, they may get back less than they originally invested.

This Sub-Fund qualifies as a "Low Volatility Net Asset Value Money Market Fund" in accordance with Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on Money Market Funds as may be amended or replaced from time to time and therefore will comply with these guidelines.

Redemption and Dealing: Shares of the Sub-Fund may be redeemed on demand, with dealing normally on a daily basis.

Benchmark: 1 Week EUR LIBID.

The benchmark is a point of reference against which the performance of the Share Class may be measured. The Sub-Fund is actively managed.

Distribution Policy: This Share Class will normally pay dividends if the net investment income is positive. Distributions will not be paid if the net investment income is negative.

Risk and Reward Profile

Lower risk			Higher risk			
Potentially lower reward			Potentially higher reward			
1	2	3	4	5	6	7

The above rating is based on the historic volatility of the simulated Net Asset Value of this Share Class over the last five years and may not be a reliable indication of the future risk profile of this Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 1 because its simulated Net Asset Value has shown very low fluctuations historically.

Other material risks:

- The Sub-Fund's objective may not be achieved in adverse market conditions and Shareholders may get back less than they originally invested.

- The credit worthiness of unrated Debt Securities is not measured by reference to an independent credit rating agency.
- The counterparty of Reverse Repurchase Agreements may fail to meet its obligations which could result in losses to the Sub-Fund.
