

# Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

DCI High Yield Corporate Bond Fund (Feeder): Class A Institutional USD Distributing

A sub-fund of DCI Umbrella Fund plc

ISIN: IE00BD6G9C71

DCI Umbrella Fund plc is self managed

## Objectives and Investment Policy

The Fund has been established as a feeder fund in accordance with the UCITS Regulations and invests at least 85% of its assets on a permanent basis in DCI High Yield Corporate Bond Fund (ICAV) (the "Master Fund"), a sub-fund of DCI UCITS ICAV. The Master Fund's objective is to produce returns, net of fees and expenses above the ICE BofAML US High Yield Constrained Index (Bloomberg: HUC0 Index).

Different share classes may have different interest rate profiles and currency denominations for hedging purposes. See the Prospectus and Fund Supplement for further details.

The Master Fund will invest in a diversified portfolio of fixed income instruments. This includes corporate bonds of companies worldwide and other debt instruments of varying duration issued by firms with equity traded on recognised exchanges. At least 75% of such instruments will be rated high yield.

The Master Fund may also buy and sell protection in credit default swaps (CDS). CDS are contracts which allow the transfer of credit risk from one party to the other. The CDS will have underlying exposure to the credit risk of companies worldwide. The aggregate

leverage of the Master Fund is not expected to exceed 350% of the Master Fund Net Asset Value when financial derivative instruments used for hedging purposes are taken into account.

The Fund and Master Fund can also invest in US government issued debt and cash deposits.

The Fund and Master Fund may hold both USD and non-USD denominated fixed income instruments and currency positions. Derivatives such as CDS, interest rate swaps, FX forwards and futures are used to take positions for investment or for hedging purposes. For full investment objectives and policy detail, please refer to the Prospectus and Fund Supplement.

Class A Institutional USD Distributing pays a dividend annually by January 30 each year.

Shares can be bought from and sold back to the Fund on any banking business day in Ireland when the Federal Reserve Bank in the US and the New York Stock Exchange are also open for business.

Please refer to the Prospectus and Fund Supplement for more detailed information.

## Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The Fund has a level 4 risk and reward profile because it is invested in the Master Fund which has a diversified portfolio of fixed income instruments with moderate interest rate risk.

The indicator is not a measure of the risk of capital loss but a measure of the fund's price movement over time.

The Fund is also subject to risks which are not included in the calculation of the risk-reward indicator associated with the following: Investing in or taking exposure in fixed income securities and derivatives offers an investor the chance to gain returns through

growing their capital. Nevertheless, there is a risk that the institution which issued the security will fail, which would result in a loss of income to the Fund, along with its initial investment. Fixed income values are likely to fall if interest rates rise.

There may be cases where the institution from which the Fund and/or the Master Fund buys an asset (usually a financial institution such as a bank or broker) fails to carry out its obligations which could also cause losses to the Fund.

There may be times where the issuer or guarantor of a fixed income security or derivatives, such as CDS, cannot meet its payment obligations. The credit rating and risks associated with the securities can change over time and therefore affect the performance of the Fund.

Changes in exchange rates may cause the value of investments to decrease or increase.

Certain derivatives may result in gains or losses that are greater than the original amount invested.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.50 %
Exit charge	0.50 %
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	0.65 %
Charges taken from the Fund under certain specific conditions	
Performance fee	No charge

The ongoing charges figure is an estimate as the share class has not yet launched. It is based upon expenses of the representative share class for the period ending 31 December 2017. The expenses may vary from year to year. Other share classes may incur higher or lower fees which will impact performance and returns.

The figure does not include portfolio transaction costs.

The Fund will charge an anti-dilution levy where on any day there are net redemption or subscription requests. The anti-dilution levy of 0.50% will apply to the net subscription or net redemption for the day. The proceeds of the anti-dilution levy are retained with the Fund with the aim of ensuring that transaction costs related to subscription and redemption activity are borne by the transacting investor and do not negatively impact existing investors. See the Prospectus and the Supplement for further information.

For more information about charges, please see the Prospectus and the Supplement covering this Fund.

## Past Performance

- The Fund was launched on 1 December 2016. This Share Class has currently not launched.
