

## KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

# Investec Global Quality Equity Income Fund

A sub-fund of Investec Global Strategy Fund  
Managed by Investec Asset Management Luxembourg S.A.

Class A Accumulation shares hedged in euros  
ISIN: LU1570387701

### Objectives and investment policy

The Fund aims to provide income and long-term capital growth.

The Fund invests primarily in the shares of companies around the world.

The Fund invests in a blend of shares and is not restricted in its choice of companies either by size, industry or geography.

The Fund focuses investment on shares deemed by the Investment Manager to be of high quality i.e. companies which have provided sustainably high levels of return on invested capital and free cash flow (a company's cash earnings after its capital expenditures have been accounted for).

The Investment Manager uses a currency hedging strategy (an investment technique which aims to protect the value of an investment against currency movements) that aims to align returns in this currency share class with those achieved in the currency that the Fund's investments are valued in.

The Investment Manager is free to choose how the Fund is invested and does not manage it with reference to an index.

Any income due from your investment is reflected in the value of your shares rather than being paid out.

You can buy or sell shares in the Fund on any business day in Luxembourg and the UK, as defined in the Investec Global Strategy Fund's ("IGSF") prospectus (section 3).

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short to medium term.

### Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

The Fund appears towards the middle of the Risk and Reward Indicator scale. This is because it invests in the shares of companies, whose values tend to fluctuate more widely.

#### Risks that may not be fully captured by the Risk and Reward Indicator:

**Concentrated portfolio:** The Fund invests in a relatively small number of individual holdings. This may mean the value of the Fund may fluctuate more widely than more broadly invested funds.

**Currency exchange:** Changes in the relative values of different currencies may adversely affect the value of the Fund's investments and any related income.

**Derivatives:** The use of derivatives is not intended to increase the overall level of risk in the Fund. However, the use of derivatives may still lead to large changes in the value of the Fund and includes the potential for large financial loss.

**Developing market:** Some of the countries in which the Fund invests may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.

**Equity investment:** The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

**Third party operational:** The Fund's operations depend on third parties. Investors in the Fund may suffer disruption or financial loss in the event of third-party operational failure.

The full list of the Fund's risks are contained in Appendix 1 of the IGSF prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry charge shown is the most you might pay, in some cases you might pay less. You can find out actual entry charges from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. The Fund's annual report for each financial year will include detail on the exact charges made. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see Appendix 1 of the IGSF prospectus.
