Where the Share Class currency is different to that of the Benchmark currency, the Benchmark returns have been converted into the currency of the corresponding Share Class using a hedging method. This adjusts the benchmark returns to account for interest rates differences between the two countries and the spot FX impact on unexpected returns.

Past performance does not predict future returns. Net performance figures reflect the reinvestment of all dividends and earnings, and the deduction of investment management and performance fees. In addition, the typical fees and expenses charged to a fund will offset the funds trading profits. The specific fee structure for BlueBay Funds - BlueBay Global High Yield Bond Fund I - GBP (MIDiv) is detailed in the Key Investor Information document or the Fund's prospectus.

Investment Objective

The Fund aims to make a return for you through a mixture of generating income and growing the amount you originally invested. It mainly invests in bonds that pay a fixed interest.

Investment Policy

The is actively managed and fund targets better returns than its benchmark, the ICE BofA Merrill Lynch Global High Yield Constrained Index, fully hedged against USD. There are no restrictions on the extent to which the fund's portfolio and performance may deviate from the ones of the benchmark. As part of the investment process, the Investment Manager has full discretion over the composition of the fund's portfolio and may take exposure to companies, countries or sectors not included in the benchmark. At least two-thirds of the fund's investments will be in fixed income bonds which pay a comparatively high income, rated below investment grade by a credit rating agency. At least half of the fund's investments will be in fixed income bonds issued by companies/governments based in the United States. Up to 20% of the fund's assets may be invested in securities issued by governments, banks and corporates in Latin America and Asia respectively. The fund may use derivatives (such as futures, options and swaps, which are linked to the rise and fall of other assets) to obtain, increase or reduce exposure to underlying assets and may thus create gearing which may result in greater fluctuations of the value of the fund.

The Fund meets the conditions set out in Article 6 of the Sustainable Finance Disclosure Regulation as Sustainability Risks are integrated into the investment decision making process. Full details of the Fund's ESG framework are available online - www.bluebay.com/en/investment-expertise/esg/approach/

Risk Considerations

- At times, the market for high yield bonds may dry up, which could make it difficult to sell these bonds, or the fund may only be able to sell them at a discount
- There may be cases where an organisation with which we trade assets or derivatives (usually a financial institution such as a bank) may be unable to fulfil its obligations, which could cause losses to the fund
- Investing in high yield bonds offers you the chance to gain higher returns through growing your capital and generating income. Nevertheless, there is a greater risk that the organisation which issued the bond will fail, which would result in a loss of income to the fund along with its initial investment
- BlueBay could suffer from a failure of its processes, systems and controls – or from such a failure at an organisation on which we rely in order to deliver our services – which could lead to losses for the fund

Notes

Spread Duration – is a bond's price sensitivity to spread changes.
