Fund details

Investment Manager	Patrick Kolb
Fund launch date	02.05.2013
Share class launch date	02.10.2017
Share class	MBH
Share class currency	EUR
Distribution policy	accumulating
Fund domicile	Luxembourg
ISIN	LU1692472852
Benchmark	No benchmark

Originally the fund was launched as of Oct. 19th 2006 as a FCP fund.

Investment Policy

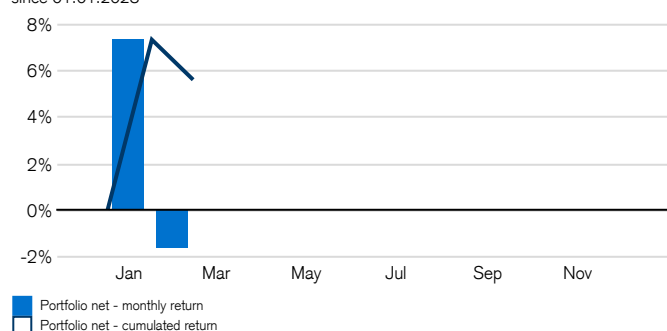

The fund assets are invested worldwide in companies that are primarily active in Technology, Healthcare and Industrials, and that offer products and services related to health prevention/protection and environmental safety, IT security, transportation safety, and crime prevention.

Past performance does not predict future returns. Neither simulated nor historical performance is a reliable indicator for current or future performance.

Potential Risks

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- Credit risk: Issuers of assets held by the Fund may not pay income or repay capital when due. Part of the Fund's investments may have considerable credit risk.
- Liquidity risk: Assets cannot necessarily be sold at limited cost in an adequately short timeframe. The Fund's investments may be prone to limited liquidity. The Fund will endeavor to mitigate this risk by various measures.
- Counterparty risk: Bankruptcy or insolvency of the Fund's derivative counterparties may lead to payment or delivery default.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks.
- Sustainability risks: Sustainability risks are environmental, social or governance events or conditions that can have a material negative effect on the return, depending on the relevant sector, industry and company exposure.

The product's investment objectives, risks, charges and expenses, as well as more complete information about the product, are provided in the prospectus (or relevant offering document), which should be read carefully before investing.

The full offering documentation including complete information on risks may be obtained free of charge from a Credit Suisse client advisor, representative, or, where applicable, via Fundsearch (credit-suisse.com/fundsearch).

The investment promoted in this marketing material concerns the acquisition of units or shares in a fund and not of any underlying assets. The underlying assets are owned by the fund only.

² The actual risk can vary significantly if you redeem at an early stage and you may get back less. The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets. Be aware of currency risk if your reference currency differs from the currency of the Product. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. Investors shall note that the Product may be exposed to further risks such as operational, counterparty, political, sustainability and legal risks that are not included in the Summary Risk Indicator. This Product does not include any protection from future market performance so you could lose some or all of your investment.

Performance commentary

The fund outperformed against the MSCI World ESG Leaders Index in the last month. Referring to our subthemes, the strongest contributor was IT Security because the market sentiment was too pessimistic, in our opinion, and the companies in this segment reported in general better-than-feared quarterly results. On the other side, the weakest contributor was Environmental Security. We think this was mainly due to the overall pessimistic sentiment. On a stock level, the best contributor was Palo Alto Networks. This IT security company published better-than-expected quarterly results, with revenues growing 26% led by their strong products in Next-Generation Security (NGS) growth and execution. On the other side, the weakest contractor was Gen Digital. Despite better-than-expected quarterly numbers, the market reaction was negative, mainly due to the cautious macro guidance.

Market comments

In February, global equities markets declined, driven by the following factors: 1) Some macro data came in stronger than expected: In the US, the labor market continues to be strong. Job growth in January surged to 517,000, while the jobless rate fell to a new low of 3.4%. 2) Inflation rates for January declined but still remained at elevated levels. In the US, the consumer price index fell to 6.4%. In the Eurozone, inflation fell to 8.6%, and in the UK, this number dropped to 10.1%. 3) Central banks continued to raise interest rates: The US Federal Reserve hiked interest rates by 25 bps, and the European Central Bank and the Bank of England raised interest rates by 50 bps each (source: Bloomberg). Salient news in the security and safety space: On February 3, 2023, a freight train carrying hazardous materials derailed in East Palestine, Ohio, US. Several railcars burned for more than two days, and then emergency crews conducted a controlled burn of several railcars at the request of state officials, which released hydrogen chloride and phosgene into the air. Nearly 2,000 residents of eastern Ohio had to be evacuated, and an emergency response was initiated from agencies in Ohio, Pennsylvania, and West Virginia (source: Reuters, AP News, both on 07.02.2023). According to the Chair of the US National Transportation Safety Board (NTSB), this derailment might have been avoided if the railway company's alarm system had given engineers an earlier warning that bearings were overheating (source: Reuters, 24.02.2023). In addition, bird flu has become a cause for concern in Europe, where more and more birds and mammals are affected by the H5N1 virus. The Swiss government experts speak of a "real pandemic," fearing a mutation of the virus spreading to humans. Experts consider it particularly important that wild birds do not come into contact with domestic poultry. The question now is whether the virus can be transmitted to humans if it mutates. According to the BBC, an 11-year-old girl in Cambodia died from the country's first-known human case of bird flu in nine years. The World Health Organization said that reports of bird flu in humans are "worrying" (sources: NZZ am Sonntag, 03.02.2023; BBC, 24.02.2023; The Guardian, 24.02.2023). And finally, Tesla voluntarily recalled 362,758 vehicles and warns that its experimental driver-assistance software, marketed as Full Self-Driving Beta, may cause crashes. Tesla said it would deliver an over-the-air software update to cars to address the issues (source: CNBC, 16.02.2023). These examples show that the relevance of security and safety is critical to every organization and that prevention is the best strategy for mitigating security and safety risks.

Comments on transactions

We did not do any significant transactions. In the last month, we did some rebalancing by slightly reducing the transportation security segment and investing the proceeds in IT Security.

This commentary is intended only to describe past performance of the investment strategy. The strategy invests in individual securities which are owned in the strategy as part of a carefully constructed and diversified portfolio. The information presented in this commentary may be based on the assessment of CS' portfolio managers. Market developments described in this document are subject to a number of risks and uncertainties and are neither reliable indicators nor a guarantee of future results/performance. The information in this commentary may change after the date of issuance of this document without notice and should not be construed as a recommendation to buy or sell individual securities named herein.

ESG Approach

This fund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088). It applies the CSAM Sustainable Investing Policy (www.credit-suisse.com/esg), including norms-based, values-based and business conduct exclusions, to combine ESG factors with traditional financial analysis to make an ESG adjusted risk-return assessment, which serves as the basis for the portfolio construction. For further information about the ESG investment criteria and the sustainability-related aspects of the fund please consider the legal and regulatory documents of the fund (such as, e.g., the prospectus) and visit www.credit-suisse.com/esg. In addition to sustainability-related aspects, the decision to invest in the fund should take into account all objectives and characteristics of the fund as described in its prospectus, or in the information which is to be disclosed to investors in accordance with applicable regulations.

Certain data points are provided for mere transparency purposes and are not linked to a specific ESG investment process, nor to CSAM ESG methodology. For details about the fund's ESG decision-making process, please refer to the fund's prospectus.

ESG Overview

According to MSCI ESG methodology

	Portfolio
ESG Rating	AA
ESG Quality score	7.84
Environmental score	5.44
Social score	4.99
Governance score	6.25
Coverage for Rating/Scoring	98.52%
Weighted Average Carbon Intensity (Tons of CO2e/\$M sales)	30.28
Coverage for Carbon Intensity	98.94%

Note: The total carbon intensity figure shown in this section may be higher than the total in the breakdown graph. This is because the figure is normalized, and actual weights are inflated because of limited data coverage. For further information on the MSCI methodology for the above listed ESG data points, please refer to the glossary.

Top 10 positions - ESG Characteristics

In terms of the fund's total economic exposure. Certain data points disclosed in this table are provided for mere transparency purposes and are not linked to a specific ESG investment process, nor to CSAM ESG methodology. AA	37.41	<div></div>
A	22.34	<div></div>
BBB	26.46	<div></div>
BB	6.13	<div></div>
B	1.32	<div></div>
CCC	0.50	<div></div>
Not ratable	1.06	<div></div>
No data coverage	0.42	<div></div>

Note: For further information on MSCI's ESG rating methodology and the difference between categories "not ratable" and "no data coverage", please refer to the glossary.

Asset breakdown by ESG controversy flag

In % of fund total economic exposure to investee companies. Source: MSCI

	in %	Portfolio
Green	81.75	<div></div>
Yellow	7.45	<div></div>
Orange	9.74	<div></div>
Red	-	<div></div>

Note: Exposure to investee companies represents 98.94% of portfolio weight for this share class. MSCI only provides data on ESG controversies for corporate issuers. Any remaining instruments (e.g., government bonds) are excluded from this breakdown. For further information on MSCI's ESG controversy flag methodology, please refer to the glossary.

Carbon emission intensity contribution by GICS sector

Tons of CO2 equivalent emission intensity (GHG scopes 1 & 2) per \$m sales, weighted by portfolio exposure to sectors according to the GICS sector split. Source: MSCI

	Portfolio	Portfolio
Industrials	16.94	<div></div>
Health Care	6.55	<div></div>
Information Technology	3.97	<div></div>
Consumer Discretionary	2.47	<div></div>
Others	0.03	<div></div>
Total	29.96	

Note: Security weighted data coverage is 98.94% for the portfolio. The total shown in this section may be lower than the one in the 'ESG Overview' section. This is because the figures in this breakdown are not normalized and use the actual weights. For further information on the Carbon emission intensity, please refer to the glossary.

Glossary

Accumulating	Indicates a regular reinvestment of the dividends received in the portfolio itself
Annualized Risk	Annualized risk is a statistic, which is used to measure the risk of a fund by describing the range of returns, which were achieved in the observation period are most likely to be achieved. Greater volatility implies greater risk.
Carbon emission intensity	The weighted average emissions intensity, which is provided by MSCI ESG, divides the Scopes 1 & 2 emissions in tons of CO ₂ -equivalent by million \$ sales. Intensities are broken down by GICS sector and are security weighted.
ESG aware	This product undertakes investments that explicitly assess and integrate the sustainability characteristics of companies in the investment process.
ESG benchmark	A ticked 'ESG benchmark' box reflects that the ESG section in this document compares the ESG performance of the portfolio with an ESG index. In case the box is not ticked, this means that the ESG section in this document compares the ESG performance of the portfolio with a non-ESG index. The investor shall read the legal documentation of the Fund to understand how the benchmark is used. In any case, a ticked 'ESG benchmark' box does not mean that the ESG benchmark is used to attain the ESG strategy of the fund.
ESG Controversy Flag	ESG Controversy Flag is designed to provide timely and consistent assessments of ESG controversies involving publicly traded companies and fixed income issuers. A controversy case is typically a one-off event such as an environmental oil spill, an accident, or allegations such as safety issues in a production facility. Controversy flags can be red, orange, yellow or green. Red indicates that a company is involved in one or more very severe controversies. Orange indicates that a company has been involved in one or more recent severe structural controversies that are ongoing. Yellow indicates that the company is involved in severe-to-moderate level controversies. Green indicates that the company is not involved in any major controversies. For further information on the methodology, please refer to www.msci.com/our-solutions/esg-investing/ .
ESG Quality score	The ESG Quality score, based on MSCI ESG scores of underlyings, is measured on a scale from 0 (very poor) to 10 (very good). It does not correspond directly to the underlying Environment, Social and Governance Pillar scores. The Pillar scores are derived on an absolute basis, while the portfolio ESG Quality score is adjusted by MSCI ESG to reflect the industry-specific level of ESG risk exposure. According to the MSCI methodology, additional adjustments are made based on the positive (upward) and negative (downward) ESG trends (or ESG rating momentum), as well as portfolio exposure to ESG laggards. As Pillar scores are absolute, and the portfolio ESG Quality score is relative, the first cannot be averaged to derive the latter. The coverage rate is security weighted.
Issuer ESG Rating	Company and Government ESG Ratings, which are provided by MSCI ESG, are measured on a scale from AAA (highest rating) to CCC (lowest rating). Company ESG Ratings are based on the issuer's exposure to industry specific ESG risks and its ability to mitigate those risks relative to peers. Company ESG Ratings are calculated on an industry relative basis while the underlying individual E, S and G Ratings are absolute. Hence, the ESG Rating cannot be seen as an average of the individual E, S and G Ratings. Government ESG Ratings identify a country's exposure to and management of ESG risk factors and explain how these factors might impact the long-term sustainability of its economy. They are derived from 0-10 scores on underlying factors in the E, S and G pillars. For further information on the MSCI methodology, please refer to www.msci.com/our-solutions/esg-investing/ .
GICS	Global Industry Classification Standard
ITD	Inception-to-date
LuxFLAG ESG	For more information about the methodology and label validity, please visit luxflag.org . Validity: 01 January 2023 - 31 December 2023. Investors must not rely on this label with regard to investor protection issues and LuxFLAG does not incur any liability related to financial performance or default of the fund.
MSCI ESG Methodology	For further information on the methodology applied to assess the ESG characteristics of the investments, please refer to www.msci.com/our-solutions/esg-investing/
Not ratable / No data coverage	Where MSCI considers an asset type for ESG analysis but data on an economic exposure is unavailable due to a lack of data from the data vendor, the investment falls under the category "No data coverage". Where MSCI considers an asset type out of scope for ESG analysis (e.g. Cash, Currency), the economic exposure falls under the category "Not ratable". For further information regarding excluded asset types, please refer to www.msci.com/our-solutions/esg-investing/ .
Ongoing Charges	The calculation of the ongoing charge is based on the Committee of European Securities Regulators/10-674 Directive. For a maximum of 12 months from December 31, 2020, the ongoing charges figure is based on estimated expenses. From December 2021, the ongoing charges figure is based on last year's expenses for the year ending December 2021. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment undertaking
Portfolio ESG Rating	Discrepancies may exist between the portfolio-level ESG Rating calculated by CSAM applying the MSCI methodology (provided in this factsheet) and the ESG Ratings displayed by other providers (e.g., MSCI ESG fund ratings). There are two main reasons for these potential deviations: (1) CSAM uses updated month-end holdings data as basis for its calculation, and (2) CSAM uses the underlying security data (e.g., exposures to target funds or to convertible bonds), thus applying a look-through approach where possible. The coverage rate is security weighted. For further information on the MSCI methodology, please refer to www.msci.com/our-solutions/esg-investing/ .
Sustainable investment objective	Where the 'sustainable investment objective' box is ticked, this means that the product implements CSAM investment strategies that allocate capital into companies that offer solutions to society's challenges and meet a sustainable investment objective. The sustainable investment objective is achieved through a dedicated investment process focusing on investments in themes and sectors whose economic activities address specific ESG challenges. An unticked box reflects that the product does not aim to meet a sustainable investment objective.

Warning statements

Swinging Single Pricing	For more details, please refer to the relevant chapter "Net Asset Value" of the fund's prospectus
Performance start date	Performance calculation and presentation start with the first full month of an invested strategy. This can lead to a difference in launch and performance start dates.
PRIIP SRI	The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets.

ESG Notes

The figures contained in this section are not audited. Where ESG related information, statements and scorings are made in this document, CS may have, partially or entirely, relied on publicly available information, internally developed data and/or information obtained from other third-party sources which CS believes to be reliable. CS' ability to verify such ESG objectives may be limited by the reliability of the data available in respect of the underlying assets and the status of the regulations in relation to tracking and providing such data. CS has not independently verified any information obtained from these public and third-party sources and cannot make any representations or warranties as to its accuracy, completeness or reliability. It is possible that the data from ESG data providers may be incorrect, unavailable, or not fully updated. This is especially true where CS has limited access to data from external parties regarding the underlying elements of an investment, for example due to a lack of look-through data. Such data gaps could result in an incorrect assessment of a sustainability practice and/or related sustainability risks and opportunities. Investors shall not use the ESG data provided in this document for the sake of meeting their own regulatory disclosure or reporting requirements. CS cannot make any guarantee about the content or completeness of such ESG disclosures, which remain subject to change and cannot be relied upon. In particular, CS shall not be liable for any errors or omissions in connection with any ESG data herein, or for any direct, indirect, special, punitive, consequential or any other damages (including lost profits). In the absence of a standardized, industry-wide ESG classification system, CS has developed its own ESG framework (the "CS Sustainable Investment Framework"). Therefore, investors should note that the ESG classification of the fund reflects CS' opinion and is based on the CS Sustainable Investment Framework which classification may vary from the classification made by third parties. The fact that a fund follows the CS Sustainable Investment Framework does not necessarily mean that it meets the investors overall investment objectives, nor their sustainability preferences. Given that sustainability regulations and guidelines are still developing, CS may need to review certain ESG classifications/descriptions as industry practices change and as more regulatory guidance becomes available. The ESG-performance of a portfolio might also differ from its financial performance and CS cannot make any representation as to the correlation between financial and ESG performance. Sustainability-related practices also differ by region, industry and ESG issue and are continually evolving. Consequently, sustainability-related practices may change over time. Similarly, new local sustainability requirements may result in additional compliance costs, disclosure obligations or other restrictions on the fund. CS' view on the appropriate classification may also evolve over time, including in response to regulatory guidance or changes in industry approach to classification.
