JPM Global Short Duration Bond I2 (dist) - EUR (hedged)

a Share Class of JPMorgan Funds – Global Short Duration Bond Fund. The management company is JPMorgan Asset Management (Europe) S.à r.l.

Objectives, Process and Policies

INVESTMENT OBJECTIVE

To achieve a return in excess of global short duration bond markets by investing primarily in global investment grade short-term debt securities, using derivatives where appropriate.

Investment approach

- Uses a globally integrated research driven investment process that focuses on analysing fundamental, quantitative and technical factors across countries, sectors and issuers.
- Combines top down asset allocation and bottom-up security selection targeting diversified sources of portfolio return – including sector rotation, security selection, currencies and yield curve positioning.
- Invests across all sectors of short-term global investment grade debt which includes government, government related, corporate and securitised debt.

Benchmark uses and resemblance

- Performance comparison.
- Basis for relative VaR calculations.

The Sub-Fund is actively managed. The majority of issuers in the Sub-Fund are likely to be represented in the benchmark because the Investment Manager uses it as a basis for portfolio construction, but has some discretion to deviate from its composition and risk characteristics within indicative risk parameters.

The Sub-Fund will resemble the composition and risk characteristics of its benchmark; however, the Investment Manager's discretion may result in performance that differs from the benchmark.

POLICIES

Main investment exposure At least 67% of assets invested, either directly or through derivatives, in investment grade short-term debt securities (including MBS/ABS) of issuers anywhere in the world, including emerging markets.

The Sub-Fund is expected to invest between 5% and 20% of its assets in mortgage-backed securities (MBS) and/or asset-backed securities (ABS). MBS

which may be agency (issued by quasi US government agencies) and non-agency (issued by private institutions) refers to debt securities that are backed by mortgages, including residential and commercial mortgages, and ABS refers to those that are backed by other types of assets such as credit card debt, car loans, consumer loans and equipment leases.

The weighted average duration of the portfolio will typically not exceed three years and the remaining duration of each investment will typically not exceed five years at the time of purchase.

The Sub-Fund may invest in covered bonds to a limited extent and from time to time may have exposure to below investment grade securities as a result of credit downgrades.

The Sub-Fund may invest in onshore debt securities issued within the PRC through China-Hong Kong Bond Connect.

Derivatives Used for: investment purposes; efficient portfolio management; hedging. Types: see [Sub-Fund Derivatives Usage](#) table under [How the Sub-Funds Use Derivatives, Instruments and Techniques](#) in the Prospectus. TRS including CFD: none. Global exposure calculation method: relative VaR. Expected level of leverage from derivatives: 150% Indicative only. Leverage may significantly exceed this level from time to time.

Currencies Sub-Fund Base Currency: USD. Currencies of asset denomination: any. Hedging approach: typically hedged to Base Currency.

This Share Class seeks to minimise the effect of exchange rate fluctuations between the Sub-Fund's Base Currency and the Share Class Currency.

Redemption and Dealing Shares of the Sub-Fund may be redeemed on demand, with dealing normally on a daily basis.

Distribution Policy This Share Class normally pays an annual dividend in September based on reportable income. This Share Class intends to qualify as a reporting fund under UK tax law for offshore funds.

Risk and Reward Profile

The above rating is based on the historic volatility of the simulated Net Asset Value of this Share Class over the last five years and may not be a reliable indication of the future risk profile of this Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 2 because its simulated Net Asset Value has shown low fluctuations historically.
