Benefits

Clients benefit from a diversified USD bond portfolio offering attractive return potential.

The fund combines active duration and yield-curve management with sector and security selection.

The portfolio is subject to strict risk management processes.

Ideal building block for bond portfolios or as the bond component of a balanced portfolio.

Risks

Changes in interest rates have an effect on the value of the portfolio. Long-term investments are subject to greater fluctuations in value than medium-term bonds and money market instruments. This requires corresponding risk tolerance and capacity. All investments are subject to market fluctuations. Every fund has specific risks, which can significantly increase under unusual market conditions. The fund can use derivatives, which may result in additional risks (particularly counterparty risk).

Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Investor Information Document (KIID), Prospectus and any applicable local offering document prior to investing. For a definition of financial terms refer to the glossary available at www.ubs.com/glossary.
