

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Barclays Bond Euro Convertible Share Class C Acc EUR (ISIN: LU0098103822), (SEDOL: 5714908)

a sub fund of Barclays Funds.

Objectives & Investment Policy

The aim is to maximise the value of and the income arising from your investment.

The Fund is actively managed and invests in tradable debt (known as convertible or exchangeable bonds or notes), warrants (financial contracts under which the Fund can buy shares at a future date and usually at a fixed price) and other financial instruments which may be converted into shares issued by companies established in Europe or other developed countries worldwide.

The Fund will buy tradable debt denominated in Euro but may also buy non-Euro debt which, for the most part, will be managed so that its return is delivered to the Fund in Euro.

The Fund may use financial contracts (derivatives) to help achieve its aim, manage risk, reduce costs or improve results.

Income is not distributed and is rolled up (accumulated) into the value of your investment.

You may sell your investment on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 4 because of the high range and frequency of price movements (volatility) of the underlying investments in which the Fund invests.

The following are additional risks not covered by the risk and reward category.

The Fund may purchase securities which have the right to be converted into shares. The return on these securities is usually less than the return on the underlying share.

The Fund may invest in bonds/debt issued by entities considered to be more likely to default (sub-investment grade). If an issuer does default this may result in loss to the Fund.

The Fund may use financial contracts (known as derivatives) in an attempt to reduce risk (hedging) or for investment purposes. It may be that the use of derivatives causes share prices to fluctuate which may in turn result in loss to the Fund.

The assets in which the Fund invests may be denominated in a currency other than the currency of the shares in the Fund and/or the currency of your investment. Currency fluctuations may strongly affect the value of your investment.

Fluctuations in interest rates may affect the value of your investment.

Tradable debt (bonds) are interest rate sensitive, meaning that the range and frequency of price movements may be significant due to various factors, including changes in interest rates, the creditworthiness of the issuer and the ease with which similar investments may be bought or sold (liquidity).

The Fund is not guaranteed and your investment is at risk. You may lose some or all of your investment. Future legal or regulatory change could have a substantial adverse effect on the fund and your investment.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
