## Simplified Prospectus

### Robeco Lux-o-rente

<b>Important Information</b>	<p>This simplified prospectus contains key information about Robeco Lux-o-rente (hereinafter the "Company"). If you would like more information before you invest, please consult the most recent full prospectus (hereinafter the "Full Prospectus"). Unless defined in this document, defined terms shall bear the same meaning as in the Full Prospectus. For details about the Company's holdings, please see the most recent report.</p> <p>Robeco Lux-o-rente is a Luxembourg investment company incorporated as a "société anonyme" on 2 June 1994. The Company is organized under Part I (UCITS) of the Luxembourg law of 20 December 2002 (as amended) (hereinafter the "2002 Law") as a "Société d'Investissement à Capital Variable", for an unlimited period.</p> <p>The rights and duties of the investor as well as the legal relationship with the Company are laid down in the Full Prospectus and the articles of incorporation of the Company. The Full Prospectus and the periodical reports may be obtained free of charge from the Company.</p>
<b>Investment objective and policy</b>	<p>The investment objective of the Company is to provide a high total return.</p> <p>The Company will invest primarily (in other words, at any time at least two thirds of its total assets) in bonds and other marketable debt securities and instruments (which may include short dated fixed or floating rate securities) of issuers from any member State of the OECD or (supranational) issuers guaranteed by one or more member States of the OECD and with a minimal rating of "A", as measured by Standard &amp; Poor's or other recognized credit rating agencies. The Company may not invest in equity securities provided however that the Company may invest up to 10 % of its net assets in shares of other UCITS/UCI. The Company may invest up to 25 % of its net assets in convertible bonds or option linked bonds, and up to one third of its net assets in money market instruments. The portfolio's duration will be actively managed to realise the highest possible investment return.</p> <p>The Company's investment strategy is entirely driven by a proprietary model. This proprietary model combines economic and technical variables to assess the attractiveness of the various bond markets and is based on six input factors: (i) the valuation of a bond market, measured by the slope of its yield curve; (ii) the trend of global bond markets in the previous period; (iii) mean reversion, measured by the performance of bond markets compared to each other; (iv) developments in the equity markets as an indicator of expectations regarding economic growth; (v) the development of commodity prices as a measure of future inflation; and (vi) the seasonal pattern.</p> <p>Taking positions in currencies other than the EUR is not one of the Company's principal objectives. The Company may hold ancillary liquid assets comprising cash and cash equivalents (including money market instruments).</p> <p>The Company will invest in financial derivative instruments for hedging and optimal portfolio management purposes but also to actively take positions in the global bond, money market and currency markets. In case the Company uses derivatives for other</p>

	<p>purposes than duration and/or currency adjustments, the underlying of such investments respects the investment policy. The buying or selling of exchange traded and over-the-counter derivatives are permitted, including but not limited to futures (including but not limited to interest rate futures, bond futures, swap note futures), options, swaps (including but not limited to interest rate swaps, credit default swaps ("CDS"), index swaps, CDS basket swaps and cross currency swaps) and currency forwards.</p> <p>Whilst using their best endeavours to attain the Company's investment objective, the Directors cannot guarantee whether and to what extent the investment objective will be achieved. Investors should thus consider an investment in the Company in the longer term perspective of realising an enhanced total return.</p> <p>Further details are provided in the Full Prospectus.</p>																																		
<b>Company's risk profile</b>	<p>The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, exchange rates, interest rates, liquidity and inflation). The Company's investments are subject to market fluctuations. No assurance can, therefore, be given that the Company's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Company will not fall below its value at the time of acquisition.</p>
