Nordea Fund of Funds - Balanced

Investment objective and policy of the Sub-fund

The investment policy of the Sub-fund aims to preserve the investor's capital and to provide an adequate rate of return on the investment.

The Sub-fund's investment objective is to invest its net assets in other Target Funds of the open ended type which primarily invest in shares, bonds, cash or other transferable securities. Thus, the Sub-fund is a fund of funds.

The Sub-fund can choose between a very wide range of investment funds in order to compose a portfolio which offers the ideal mix of risk and return. The composition of the portfolio depends on the market expectations of the Management Company and will reflect the recommended asset composition at any time for investors with a certain risk profile.

Risks are reduced by investing in a range of Target Funds, which themselves also have to comply with risk diversification requirements. The Sub-fund will thus represent a uniquely well-diversified investment.

This Sub-fund will regularly invest between 25% and 75% of its Net Asset Value in Equity Funds.

The Sub-fund may hold ancillary liquid assets in all currencies in which investments are effected.

The Sub-fund may use derivatives either to perform Absolute Hedging or Relative Hedging. Both approaches are further described under the section "Investment Techniques and Instruments" of the chapter "Investment Restrictions" of the full Prospectus.

The Sub-fund may also employ the instruments and techniques (including financial instruments) as described in the section "Investment Restrictions" in the full Prospectus.

The Sub-fund is established for an indefinite period.

Profile of the typical investor

This Sub-fund is suitable for the investor who considers investment funds as a convenient way of participating in capital market developments. This investor is comfortable with moderate risk and return potential. He prefers some stability and more average returns. The investor should be able to accept moderate temporary losses. The Sub-fund is suitable for the investor who can set aside the invested capital for at least 2-3 years.

Base Currency

The Base Currency of this Sub-fund will be EUR.

Reference index

The Sub-fund will not compare its performance against a reference index.

No guarantee can be given with respect to the performance of the Sub-funds or the return of capital. The past performance of a Sub-fund is no indication for the future performance of the respective Sub-fund. Furthermore, changes in exchange rates may also cause the value of shares in the Shareholder's base currency to go up or down.

Taxation of the Company and its shareholders

Under Luxembourg law, there are currently no Luxembourg income, withholding or capital gains taxes payable by the Company. The Company is, however, subject to the following taxes:

- an annual subscription tax of 0.05% ("Taxe d'Abonnement") calculated on the aggregate Net Asset Value of the outstanding Private Shares of the Company;
- an annual subscription tax of 0.01% calculated on the aggregate Net Asset Value of the outstanding Institutional Shares of the Company.

The Taxe d'Abonnement is calculated and payable at the end of each quarter. The value of the assets represented by the units held in other Luxembourg undertakings for collective investment that already pay a Taxe d'Abonnement will be exempted from any Taxe d'Abonnement.

On 3 June 2003 the European Union agreed on the implementation of the Council Directive 2003/48/EC (the "Savings Tax Directive"). The Savings Tax Directive applies to the whole European Union ("EU"), furthermore, a number of other countries and territories have agreed to introduce rules similar to those of the EU. The Savings Tax Directive is applicable to interest income as defined in the Savings Tax Directive, when the interest income – as a main rule – is received by an individual who is resident in an EU country and holds a bank account in another country that has agreed to implement the Savings Tax Directive. The Savings Tax Directive may therefore have an effect on the individual Shareholder taxation level, either as a withholding tax on (part of) the gains realised at disposal of the shares or as a withholding tax on any distributions.

Prospective investors should keep themselves informed of the taxes applicable to the acquisition, holding and disposal of shares of the Company and to distributions in respect thereof under the laws of the countries of their citizenship, residence or domicile before they subscribe, convert or redeem any shares of the Company.
