NEF - Pacific Equity (the "Sub-Fund"), a sub-fund of NEF (the "Fund")

Class: R - LU0140696401

The Fund is an umbrella and multi manager fund managed by Nord Est Asset Management S.A. (the "Management Company")

Objectives and investment policy

The objective of the Sub-Fund is to achieve long term capital appreciation by mainly investing in securities of companies of the Pacific area.

The Sub-Fund is actively managed in reference to the benchmark MSCI AC Pacific Gross Total Return USD Index (EUR unhedged) (the "Benchmark"). The Benchmark is not replicated; it merely serves as a starting point for investment decisions. The investment manager seeks to outperform the Benchmark. The composition of the Fund and its performance may positively or negatively deviate significantly from the Benchmark.

Besides making direct investments, the Sub-Fund may also enter into options and futures transactions.

Income generated by the Sub-Fund is reinvested and included in the value of units.

Investors can buy or sell units of the Sub-Fund every day which is a bank business day in Luxembourg.

Recommendation: this Sub-Fund may not be appropriate for investors who plan to withdraw their money within 5 to 6 years.

Risk and reward profile

This indicator represents the annual historical volatility of the Sub-Fund.

Risk and reward category 6 reflects very high potential gains and/or losses for the portfolio. This is due to investments in equities on the pacific market.

Historical data, such as that used to calculate the synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.

The lowest risk category does not mean a risk-free investment.

Your initial investment is not guaranteed.

Risks materially relevant to the Sub-Fund which may not be captured by the indicator:

Operational risk: This is the risk of losses due to inadequate or malfunctioning internal procedures and systems, personnel

or external events. The introduction of new regulatory frameworks or changes to existing regulatory frameworks may also harm the Sub-Fund.

Financial, economic and political risks: Financial instruments are impacted by various factors, among others, the development of the financial market, the economic development of issuers who are themselves affected by the general world economic situation, and the economic and political conditions prevailing in each country.

Interest rate risk: An increase in interest rates may cause the value of fixed-income securities held by the Sub-Fund to decline. Bond prices and yields have an inverse relationship, when the price of a bond falls the yield rises.

Currency risk: The Sub-Fund invests in overseas markets. It can be affected by changes in exchange rates which may cause the value of your investment to decrease or increase.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Sub-Fund's returns because the Sub-Fund may be unable to transact at advantageous times or prices.

For a comprehensive description of the risks, please see the "Risk factors" section of the prospectus of the Fund (the "Prospectus").
