**SRI EURO PREMIUM HIGH YIELD,
a compartment of GENERALI INVESTMENTS SICAV**
Class: E, Share: X (Accumulation) ISIN: LU0169275384
This SICAV is managed by Generali Investments Luxembourg S.A.

Objectives and Investment Policy

The objective of the Fund is to achieve capital growth and outperform its Benchmark by investing mainly in high-yield debt securities and debt related securities denominated in Euro - seeking to capture a significant portion of the upside in this investment universe, through a sustainable and responsible investment process.

The Fund shall mainly invest (and can be fully invested) in Euro denominated debt and debt-related securities of any kind, having Sub-Investment Grade Credit Rating. However, the Investment Manager may temporarily increase the credit quality of the Fund's portfolio to counteract an increase in market volatility.

The Fund may also invest up to 30% of its net assets in bank deposits, Money Market Instruments, as well as in high-yield debt and debt-related securities denominated in non-Euro currencies.

Investments in the following instruments are allowed up to the Fund's net assets below thresholds:

- convertible bonds: 10%;
- contingent convertible bonds: 20%;
- distressed/defaulted securities (i.e. securities having a rating CCC+ from S&P or any equivalent grade of other credit rating agencies): 10%;
- equities and other participation rights: 10%;
- other funds: 10%.

The Fund may also invest into "Rule 144A" and/or Regulation S securities, which in accordance with US Law are not registered with the US Securities and Exchange Commission (SEC).

Eligible securities are identified based on a proprietary sustainable and responsible investment process, including an ethical filter and an ESG

(Environmental, Social & Governance) scoring, defined by the Investment Manager and covering at least 90% of the Fund's portfolio. The Investment Manager then selects securities based on the fundamental analysis of the issuers, offered yields and market conditions, in order to offer attractive financial returns, while displaying, a higher aggregate ESG score.

The Fund may use standardized credit default swaps and the total obligation may not exceed 100% of the Fund's net assets.

The Fund is actively managed and references the Benchmark by seeking to outperform it. The Benchmark constitutes the initial Fund investment universe, to a limited extent, the Investment Manager can invest in instruments that are not components of the Benchmark.

The Investment Manager has full discretion over the composition of the Fund's portfolio and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the ones of the Benchmark.

The Fund may use financial instruments and derivatives for hedging purposes, for efficient portfolio management purposes and for investment purposes.

The Fund is open-ended. You may redeem shares of the Fund on any Luxembourg business day.

The Share Class makes no dividend payment.

Benchmark: ICE BofA BB-B Euro High Yield net return.

Risk and Reward Profile

This indicator represents the annual historical volatility of the Fund over a 5-year period. Its aim is to help investors understand the uncertainties attached to gains and losses that may have an impact on their investment.

The Fund's diversified exposure to interest rate and foreign currency risks explains its classification in this category.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time. The lowest risk category does not mean "risk free". Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Credit Risk: The Fund invests a substantial portion of its assets in bonds. The issuers may become insolvent, whereby the bonds may lose a major part of their value or their value entirely.

Liquidity Risk: Risk related to a limited market activity that could not allow the Fund to sell or buy underlying investments in suitable conditions.

Counterparty Risk: The Fund primarily concludes derivatives trades with various contracting parties. There is a risk that counterparties may no longer be able to honour their payment or settlement obligations.

Operational Risk and Depositary Risk: The Fund may fall victim to fraud or other criminal acts. It may also incur losses due to misunderstandings or errors by employees of the management company, the depositary or external third parties. Finally, its' management or the custody of its' assets can be adversely affected by external events such as fires, natural disasters etc.

Sustainable Finance: Currently, there is not universally accepted framework or list of factors to consider to ensure that investments are sustainable. Legal and regulatory framework governing sustainable finance is still under development. The lack of common standards may result in different approaches to set and achieve ESG (environmental, social, and governance) objectives. Applying ESG criteria to the investment process may exclude securities of certain issuers for non-financial reasons and, therefore, may forgo some market opportunities available to funds that do not use ESG or sustainability criteria.
