KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

OBJECTIVE AND INVESTMENT POLICY

Objective

The fund's objective is total return, with an emphasis on high current income but also considering capital appreciation, measured in U.S. dollars.

Investment Policy

The fund invests primarily (at least 70%) in below investment grade debt instruments of issuers located in developed and emerging market countries. The fund generally focuses its investments in corporate debt instruments, but may also invest in government or other non-corporate debt instruments. The fund may use derivatives for hedging and/or investment purposes but will not extensively or primarily use derivatives.

The fund's benchmark, BofA Merrill Lynch Global High Yield – Constrained Index (USD Hedged), is indicated for performance comparison only. Although the fund's investments will generally be represented in the benchmark, components are likely to be weighted differently from the benchmark and the fund is likely to invest outside of the benchmark to take advantage of attractive investment opportunities. The fund is actively

managed within its objectives and the investment strategy will not restrict the extent to which portfolio holdings may deviate from the benchmark. It is expected that the fund's deviation from the benchmark will be significant.

Distributions

Income (net of fund expenses) will be distributed to shareholders.

Redeeming Shares

You may sell your shares on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading.

Terms to Understand

Debt instruments represent obligations of corporations, governments, and other entities to repay money borrowed.

Derivatives are financial contracts whose value is based on the value of one or more underlying indicators or the difference between underlying indicators.

RISK AND REWARD PROFILE

This rating system is based on how much the returns of the class have varied over the past 5 years. Where 5 years' performance history is not available the data consists of historical returns representative of the fund, benchmark returns or returns for another class with the same currency as appropriate. Past returns may not be a reliable indicator of the future risk and reward profile of the class, and the rating may change over time based on the more recent returns. A fund in the lowest category does not mean a risk-free investment.

Lower risk

Typically lower rewards

Higher risk

Typically higher rewards

The fund is in category 3 because there has been low fluctuations in the fund's return historically.

Debt Instruments Risk: Prices of debt instruments can vary significantly in response to changes in interest rates and the credit quality of the issuers of its investments, and to issuer, market, economic, industry, political, and regulatory conditions. These risks may be higher where the fund invests in a

specific country or region or invests in below investment grade debt instruments.

Emerging Markets Risk: Emerging markets can be more volatile and less liquid than more developed markets.

Currency Risk: Changes in currency rates can significantly affect the value of your investment, and may also affect the financial condition of the issuers in which the fund invests.

Derivatives Risk: Derivatives can be highly volatile and can involve leverage. Gains or losses from derivatives can be substantially greater than the derivatives' original cost.

Other Risks

The rating does not reflect the risk that these factors, as well as other factors such as liquidity, counterparty, and operational risks change over time and can affect the fund's returns differently in the future.

The fund may not achieve its objective and/or you could lose money on your investment in the fund. For more information about the fund's risks, please see "Fund Profiles" and "Risk Factors" in the prospectus.
