SANTANDER GO NORTH AMERICAN
EQUITY
a sub-fund of SANTANDER SICAV

Class
B

ISIN
LU0082926121

The management company is
Santander Asset Management
Luxembourg S.A.

Objectives and Investment Policy

Objective: The investment objective of the Sub-Fund is to invest in a diversified portfolio of securities issued by US and Canadian companies in order to outperform the S&P 500® Index (the "Benchmark") on a net of fees basis over a three to five year period.

Investment policy: The Sub-Fund will typically invest in the equities of well-established, large-capitalization companies using a bottom-up stock selection process. The Investment Manager will favour well-known companies with sustainable competitive advantages with the ability to redeploy capital at high rates of return. The Sub-Fund will also invest in companies that are considered underappreciated by the market.

The Sub-Fund will invest mainly in equities (including American Depositary Receipts (ADRs) and Global Depositary Receipts (GDRs)), although depending on the opportunities in the markets it can also invest in exchange traded and over-the-counter options, futures and other financial derivative instruments.

On an ancillary basis, up to 10% of its assets may be invested in debt securities convertible into common shares, preference shares, warrants on securities and other equity-linked securities. The Sub-Fund may invest up to 10% of its net assets in securities issued by non-US and non-Canadian companies.

The Sub-Fund may invest part of its assets in cash and money market instruments to facilitate transactions and flows. The Sub-Fund may invest up to 10% of its net assets in exchange traded funds qualifying as UCITS. The Sub-Fund will continuously invest at least 51% of its net assets directly or indirectly via UCITS and/or other UCIs in equity assets, excluding depository receipts and financial derivative instruments.

The Sub-Fund is actively managed and does neither track the Benchmark nor uses it for portfolio allocation purposes. The reason for referring to the Benchmark in this investment policy is to indicate that it is used for performance comparison purposes only.

Net asset value calculation frequency: Daily, any full Business day.

Subscription, conversion and redemption applications lodged with the Registrar and Transfer Agent in Luxembourg on any Dealing Day (whereas a "Dealing Day" is any full Business Day preceding a Valuation Day) before 16:00 Luxembourg time (the "cut off time"), will be processed on that Dealing Day, using the net asset value per Share determined on the next Valuation Day for the relevant Class.

This is an accumulation share class in USD.

Recommendation: This Sub-Fund may not be appropriate for investors who plan to withdraw the money within 3 years.

Risk and Reward Profile

Less reward, less risk

High reward, high risk

The number indicated above is the fund's **Synthetic Risk Reward Indicator**, a way of illustrating the risk and reward profile of a fund by using historic performance data. Please be aware, this value can change over time and it may not be a reliable indication of the fund's future risk profile. In addition, the lowest category does not mean a risk-free investment.

A ranking of **6** means this fund typically has a high level of volatility, meaning that the fund's value could potentially fluctuate dramatically over a short period of time in either direction.

Investors should be aware of the following risks:

Derivatives Risk: The fund is permitted to use derivative instruments. The value of derivatives can be volatile and may result in gains or losses in excess of the amount required initially to establish a position.

Market Risk: Investments in the fund are subject to market fluctuations that could cause the value of a particular investment to change in a way that is detrimental to the fund's value.

Operational Risk: It refers to a failure or delay in the system, processes and controls of the Sub-Fund or its service providers (including all safekeeping of assets) which could lead to losses for the Sub-Fund.

Currency Risk: Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations.
