COMMENTARY

European equities struggled to make much headway in May. Investors were unsettled by a bond market sell-off early in the month. As the month progressed, sentiment deteriorated as the focus shifted to growing uncertainty as to the outcome of talks between Greece and its international creditors.

Fund holdings Danske, UBS and ING performed strongly in May. All three banks reported solid first-quarter results helped by cost saving initiatives and stronger results from their trading divisions.

Total and Repsol were key detractors. Shares in both oil companies declined as the Brent crude oil price fell in May, following its recovery from multi-year lows in January. After a period of strong share price appreciation, and despite its first-quarter results meeting expectations, German chemicals company BASF fell in May as investors took profits.

RISK STATISTICS

RISK TYPE	VALUE	GLOSSARY
Beta	0.97	A measure of the fund volatility in comparison to the market. A beta of less than 1 implies that the fund will be less volatile than the market whilst a beta greater than 1 implies the fund is more volatile than the market.
Information Ratio	-0.88	A measure of the manager's ability to generate excess and consistent returns relative to the funds benchmark. The greater the IR, the more consistent a manager is.
Volatility	9.60	A measure of the funds dispersion of returns. A higher volatility implies that a fund's return is spread over a larger range of values whilst a lower volatility implies that a funds return is spread over a smaller range of values.
Tracking Error	2.05	A measure of how closely the fund follows its benchmark. A passive fund should have a tracking error close to zero, while an actively managed fund would normally have a higher tracking error.
Sharpe Ratio	2.09	A measure of the fund's risk-adjusted performance. The greater the fund's Sharpe ratio, the better its risk-adjusted performance has been.
