Note

Subscriptions to the Company's Shares are only valid if they are made in accordance with the provisions of the most recent prospectus accompanied by the most recent annual report available and, in addition, by the most recent semi-annual report if this was published after the most recent annual report. No parties are authorised to provide information other than that which appears in the prospectus or in the documents referred to in the prospectus as being available to the public for consultation.

This prospectus details the general framework applicable to all the Sub-Funds and should be read in conjunction with the factsheets for each Sub-Fund. These factsheets are inserted each time a new Sub-Fund is created and form an integral part of the prospectus. Potential investors are requested to refer to these factsheets prior to making any investment.

The prospectus will be regularly updated to include any significant modifications. Investors are advised to confirm with the Company that they are in possession of the most recent prospectus which can be obtained from the webpage www.nnip.com. In addition, the Company will provide upon request, free of charge, the most recent version of the prospectus to any Shareholder or potential investor.

The Company is established in Luxembourg and has obtained the approval of the competent Luxembourg authority. This approval should in no way be interpreted as an approval by the competent Luxembourg authority of either the contents of the prospectus or the quality of the Shares of the Company or the quality of the investments that it holds. The Company's operations are subject to the prudential supervision of the competent Luxembourg Authority.

The Company has not been registered under the United States Investment Company Act of 1940 as amended (the "Investment Company Act"). The Shares of the Company have not been registered under the United States Securities Act of 1933 as amended (the "Securities Act") or under the securities laws of any state of the United States of America and such Shares may be offered, sold or otherwise transferred only in compliance with the Securities Act and such state or other securities laws. The Shares of the Company may not be offered or sold within the United States or to or for the account of any US Person as defined in Rule 902 of Regulation S under the Securities Act.

Applicants may be required to declare that they are not US Persons and that they are neither acquiring Shares on behalf of US Persons nor acquiring Shares with the intent to sell them to US Persons.

The Shares of the Company may, however, be offered to investors that qualify as US Persons as defined under the Foreign Account Tax Compliance Act ("FATCA") under the condition that such investors do not qualify as US Persons according to Rule 902 of Regulation S under the Securities Act.

It is recommended that investors obtain information on the laws and regulations applicable in their country of origin, residence or domicile as regards an investment in the Company and that they consult their own financial or legal advisor or accountant on any issue relating to the contents of this prospectus.

The Company confirms that it fulfils all the legal and regulatory requirements applicable to Luxembourg regarding the prevention of money laundering and the financing of terrorism.

The Company's Board of Directors is responsible for the information contained in this prospectus on the date of its publication. Insofar as it can reasonably be aware, the Company's Board of Directors certifies that the information contained in the prospectus has been correctly and accurately

represented and that no information has been omitted which, if it had been included, would have altered the significance of this document.

The value of the Company's Shares is subject to fluctuations in a large number of elements. Any return estimates given or indications of past performance are provided for information purposes only and in no way constitute a guarantee of future performance. The Company's Board of Directors therefore warns that, under normal circumstances and taking into consideration the fluctuation in the prices of the securities held in the portfolio, the redemption price of Shares may be higher or lower than the subscription price.

The official language of this prospectus is English. It may be translated into other languages. In the event of a discrepancy between the English version of the prospectus and versions written in other languages, the English version will take precedence, except in the event (and in this event alone) that the law of a jurisdiction where the Shares are available to the public stipulates otherwise. In this case, the prospectus will nevertheless be interpreted according to Luxembourg law. Any settlement of disputes or disagreements with regard to investments in the Company shall also be subject to Luxembourg law.

THIS PROSPECTUS IN NO WAY CONSTITUTES AN OFFER OR SOLICITATION TO THE PUBLIC IN JURISDICTIONS IN WHICH SUCH AN OFFER OR SOLICITATION TO THE PUBLIC IS ILLEGAL. THIS PROSPECTUS IN NO WAY CONSTITUTES AN OFFER OR SOLICITATION TO A PERSON TO WHOM IT WOULD BE ILLEGAL TO MAKE SUCH AN OFFER OR SOLICITATION.

Glossary

Articles: The Articles of Association of the Company as amended from time to time.

Benchmark/Index (collectively “**Indices**”): The benchmark is a point of reference against which the performance of the Sub-Fund may be measured, unless otherwise stated. A Sub-Fund may have different Share-Classes and corresponding benchmarks and these benchmarks may be amended from time to time. Additional information on the respective Share-Classes is available for consultation on the website www.nnip.com. The benchmark may also be a guide to market capitalization of the targeted underlying companies and where applicable, this will be stated in the Sub-Fund’s investment objective and policy. The degree of correlation with the benchmark may vary from Sub-Fund to Sub-Fund, depending on factors such as the risk profile, investment objective and investment restrictions of the Sub-Fund, and the concentration of constituents in the benchmark. When a Sub-Fund invests into an Index, such Index should satisfy the requirements applicable to “financial indices” as defined in article 9 of the Luxembourg Grand Ducal Regulation of 8 February 2008 and in CSSF Circular 14/592.

Benchmark Regulation: Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014. According to the Benchmark Regulation, the Management Company has produced and maintains written plans setting out the actions that it would take in the event that a benchmark is materially changed or ceases to be provided. Those written plans may be obtained free of charge at the Company’s registered office. An overview of indices of the Company’s Sub-Funds, including confirmation whether the administrators of the indices are registered or intend to get themselves registered by 1st January 2020 at the latest with the competent authority under the Benchmark Regulation, is available in the Appendix II of the Company’s Prospectus.

Bond Connect: Bond Connect is a mutual market access scheme that allows investors from mainland China and overseas to trade in each other’s respective bond markets. Northbound trading allows overseas investors from Hong Kong and other regions to invest in the China interbank bond market through mutual access arrangements in respect of trading, custody and settlement.

Business Day: Every week day (Monday to Friday), except New Year’s day (January 1st), Good Friday, Easter Monday, Christmas (December 25th) and Boxing Day (December 26th).

CDSC: Contingent Deferred Sales Charge.

CET: Central European Time.

China A-Shares or A-Shares: Renminbi-denominated “A” Shares of companies listed on stock exchanges in mainland China.

CNH: Chinese offshore RMB traded outside the PRC.

CNY: Chinese onshore RMB traded within the PRC.

Company: NN (L) including all existing and future Sub-Funds.

CSRC: China Securities Regulatory Commission.

CSSF: *Commission de Surveillance du Secteur Financier* is the regulatory and Supervisory Authority of the Company in Luxembourg.

Cut-off: Cut-off time for receipt of subscription, redemption and conversion request: before 15.30 p.m. CET each Valuation Day, unless otherwise stated in the relevant Sub-Fund factsheet under “additional information”.

Depository: The assets of the Company are held under the safekeeping, cash flow monitoring and oversight duties of Brown Brothers Harriman (Luxembourg) S.C.A.

Distributor: Each distributor appointed by the Company which distributes or arranges for the distribution of Shares.

Dividend: Distribution of part or the whole of the net income, capital gain and/or capital attributable to a Share-Class of the Sub-Fund.

H-Share: Share of companies incorporated in the Chinese mainland that is listed on the Hong Kong Stock Exchange or other foreign exchange.

Historical Performance: Past performance information relating to each Sub-Fund is set out in the Key Investor Information Document. Past performance should not be seen as an indication of how a Sub-Fund will perform in the future and cannot in any way provide a guarantee of future returns.

Institutional Investors: An investor, within the meaning of Article 174 of the Luxembourg Law of 2010, which currently includes insurance companies, pension funds, credit establishments and other professionals in the financial sector investing either on their own behalf or on behalf of their clients who are also investors within the meaning of this definition or under discretionary management, Luxembourg and foreign collective investment schemes and qualified holding companies.

Investment Manager: Each of the Investment Managers appointed by the Company or the Management Company on behalf of the Company.

Key Investor Information Document: A standardized document, for each Share-Class, summarizing key information for Shareholders according to the Law of 2010.

Law of 2010: The Luxembourg law of 17 December 2010 relating to undertakings for collective investment, as amended and supplemented from time to time, including by the Luxembourg law of 10 May 2016 transposing Directive 2014/91/EU of the European Parliament and of the Council of 23 July 2014 amending Directive 2009/65/EC on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in Transferable Securities (UCITS) as regards depositary functions, remuneration policies and sanctions.

Management Company: The Company acting as designated Management Company of the Company within the meaning of the Law of 2010 and to which responsibility for investment management, administration and marketing has been delegated.

Member State: A member state of the European Union.

Mémorial: The Luxembourg *Mémorial C, Recueil des Sociétés et Associations*, as replaced since 1st June 2016 by the RESA, as defined below.

MiFID II: Directive 2014/65/EU of the European Parliament and of the Council of 15 May 2014 on markets in financial instruments and amending Directive 2002/92/EC and Directive 2011/61/EU.

Minimum Subscription and Holding Amount: The minimum investment levels for initial investments as well as minimum holding levels.

Money Market Instruments: Instruments normally dealt on the money market that are liquid and whose value can be accurately determined at any time.

Net Asset Value per Share: In relation to any Shares of any Share-Class, the value per Share determined in accordance with the relevant provisions described under the Chapter X “Net Asset Value” in Part III.

Nominees: Any Distributor which registers Shares in their own name while holding them for the benefit of the rightful owner.

OECD: Organisation for Economic Co-operation and Development.

Paying Agent: Each Paying Agent appointed by the Company.

Payment Date of subscription, redemption and conversion requests: Normally within three Business Days after the applicable Valuation Day, unless otherwise stated in the relevant Sub-Fund factsheet. This period may be extended or reduced upon approval of the Management Company.

Performance Fee: The performance related fee payable by a Sub-Fund to the Investment Manager.

PRC: People's Republic of China.

QFII: Qualified Foreign Institutional Investor as approved under and subject to the applicable Chinese regulations.

Reference Currency: The currency used for a Sub-Fund's performance measurement and accounting purposes.

Registrar and Transfer Agent: Each Registrar and Transfer Agent appointed by the Company.

Regulated Market: The market defined in item 14 of Article 4 of the European Parliament and the Council Directive 2004/39/EC of 21 April 2004 on markets in financial instruments, as well as any other market in an Eligible State which is regulated, operates regularly and is recognised and open to the public.

Repurchase Transaction: A transaction by which a Sub-Fund sells portfolio securities to a counterparty and simultaneously agrees to repurchase those securities back from the counterparty at mutually agreed time and price including a mutually agreed interest payment.

RESA: the *Recueil électronique des sociétés et associations*, the Luxembourg central electronic platform for legal publications replacing the Mémorial as of 1st June 2016.

Reverse Repurchase Transaction: A transaction by which a Sub-Fund purchases portfolio securities from a seller which undertakes to repurchase the securities at mutually agreed time and price, thereby pre-determining the yield to the Sub-Fund during the period when the Sub-Fund holds the instrument.

RMB: Renminbi, legal currency of the PRC. It is used to designate Chinese currency traded in the onshore (CNY) renminbi and the offshore (CNH) renminbi markets.

RQFII: Renminbi Qualified Foreign Institutional Investor as approved under and subject to the applicable Chinese regulations.

Securities Financing Transaction (or "SFT"): A securities financing transaction as defined in Regulation (EU) 2015/2365, as it may be amended and supplemented from time to time. The SFTs selected by the Board of Directors are the repurchase transactions, the reverse repurchase transactions and the securities lending transactions.

Securities Lending Transaction: A transaction by which a Sub-Fund transfers securities subject to a commitment that the borrower will return equivalent securities on a future date or when requested to do so by the transferor.

SEHK: Stock Exchange of Hong Kong Limited.

Shares: Shares of each Sub-Fund will be offered in registered form, unless otherwise decided by the Board of Directors. All Shares must be fully paid for and fractions will be issued up to 3 decimal places.

Share-Class: One, some or all of the Share-Classes offered by a Sub-Fund, whose assets will be invested in common with those of other Share-Classes, but which may have its own fee structure, Minimum Subscription and Holding Amount, Dividend policy, Reference Currency or other features.

Share-Class Overlay: A portfolio management technique applied on a Share-Class for Currency Hedged Share-Classes and Duration Hedged Share-Classes. The purpose of the Share-Class Overlay is to group all types of techniques that can be applied at Share-Class level.

Shareholder: Any person or entity owning Shares of a Sub-Fund.

SSE: Shanghai Stock Exchange.

Stock Connect: The mutual market access programme through which investors can deal in selected securities. At the time of the release of the prospectus the Shanghai – Hong Kong Stock Connect and the Shenzhen – Hong Kong Stock Connect programmes are operational. Stock Connect consists of a Northbound Trading link, through which Hong Kong and overseas investors may purchase and hold China A-Shares listed on the SSE and SZSE, and the Southbound Trading link, through which investors in Mainland China may purchase and hold Shares listed on the SEHK.

Sub-Fund: Umbrella funds are single legal entities comprising one or more Sub-Funds. Each Sub-Fund has its own investment objective and policy and consists of its own specific portfolio of assets and liabilities.

Sub-Investment Advisor: Each of the Sub-Investment Advisor that the Investment Manager hired to assist with the management of a client's particular investment portfolio.

Sub-Investment Manager: Each of the Sub-Investment Manager to which the Investment Manager delegated the investment management of the respective portfolio in full or part.

Supervisory Authority: The *Commission de Surveillance du Secteur Financier* in Luxembourg or the relevant Supervisory Authority in the jurisdictions where the Company is registered for public offering.

SZSE: Shenzhen Stock Exchange.

Total Return Swap: A derivative contract as defined in Regulation (EU) 648/2012, as it may be amended and supplemented from time to time, in which one counterparty transfers the total economic performance, including income from interest and fees, gains and losses from price movements, and credit losses, of a reference obligation to another counterparty.

Transferable Securities: Transferable Securities as defined in Art. 1 (34) of the Law of 2010.

UCI: An undertaking for collective investment.

UCITS: An undertaking for collective investment in transferable securities within the meaning of the UCITS Directive.

UCITS Directive: Directive 2009/65/EC of the European Parliament and of the Council on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities (UCITS), as amended and supplemented from time to time, including by Directive 2014/91/EU of the European Parliament and of the Council of 23 July 2014.

Valuation Day: Each Business Day, unless otherwise stated in the relevant fund factsheet.

II. Information on investments

General

The Company's sole object is to invest funds available to it in Transferable Securities and/or other liquid financial assets listed in Article 41 (1) of the Law of 2010, with a view to enabling its Shareholders to benefit from the results of its portfolio management. The Company must comply with the investment limits as laid out in part I of the Law of 2010.

The Company constitutes a single legal entity. In the context of its objectives, the Company may offer a choice of several Sub-Funds, which are managed and administered separately. The investment objective and policy specific to each Sub-Fund are set out in the factsheets relating to each Sub-Fund. Each Sub-Fund is treated as a separate entity for the purpose of the relations between Shareholders. In derogation of Article 2093 of the Luxembourg Civil Code, the assets of the specific Sub-Fund only cover the debts and obligations of that Sub-Fund, even those existing in relation to third parties.

The Company's Board of Directors may decide to issue one or more Share-Classes for each Sub-Fund. The fee structures, the Minimum Subscription and Holding Amount, the Reference Currency in which the Net Asset Value is expressed, the hedging policy and the eligible investor categories may differ depending on the different Share-Classes. The various Share-Classes may also be differentiated according to other elements as determined by the Company's Board of Directors.

The Company applies the "Responsible Investment Framework Policy" of NN Group. In line with this policy, the Company aims, wherever legally possible, not to invest directly, amongst others but not limited to, in companies directly involved in the development, production, maintenance or trade of controversial weapons or companies directly involved in the production of tobacco products as defined in the above mentioned policy. With respect to investments in third party funds (including ETFs and index funds), the exclusions defined by "Responsible Investment Framework Policy" of NN Group cannot be imposed upon these funds. NN Investment Partners will engage proactive discussions with these third parties to maximize adherence to the policy following applicable local laws and regulations. Additional information concerning the "Responsible Investment Framework Policy" of NN Group is available for consultation on the website www.nn-group.com.

Information particular to each Sub-Fund

The investment objectives and policies to be followed for each Sub-Fund are described in the factsheet of each Sub-Fund.

III. Subscriptions, redemptions and conversions

Shares may be subscribed, redeemed and converted through the Management Company, the Registrar and Transfer Agent, the Distributors and the Paying Agents of the Company. Fees and expenses relating to subscriptions, redemptions and conversions are indicated in each Sub-Fund factsheet.

Shares will be issued in registered form, unless otherwise decided by the Company's Board of Directors, and will be non-certificated. Shares may also be held and transferred through accounts maintained with clearing systems.

The subscription, redemption or conversion price is subject to any taxes, levies and stamp duty payable by virtue of the subscription, redemption or conversion by the investor.

All subscriptions, redemptions and conversions will be handled on the basis that the Net Asset Value of the Sub-Fund or Share-

Class will not be known or determined at the time of subscription, redemption or conversion.

If in any country in which the Shares are offered, local law or practice requires subscription, redemption and/or conversion orders and relevant money flows to be transmitted via local Paying Agents, additional transaction charges for any individual order, as well as for additional administrative services, may be charged to the investors by such local Paying Agents.

In certain countries in which the Shares are offered, Savings plans could be allowed. The characteristics (minimum amount, duration, etc.) and cost details about these Savings plans are available at the registered office of the Company upon request or in the legal offering documentation valid for the specific country in which the Savings plan is offered.

In the event of the suspension of the Net Asset Value calculation and/or the suspension of subscription, redemption and conversion requests, the requests received will be executed at the first applicable Net Asset Value upon the expiry of the suspension period.

The Company takes appropriate measures to avoid Late Trading, assuring that subscription, redemption and conversion requests will not be accepted after the time limit set for such requests in this Prospectus.

The Company does not authorise practices associated with Market Timing which is to be understood as an arbitrage method through which an investor systematically subscribes and redeems or converts Shares of the same Sub-Fund within a short time period, by taking advantage of time differences and/or imperfections or deficiencies in the method of determination of the Net Asset Value. The Company reserves the right to reject subscription, redemption and conversion requests from an investor that it suspects of employing such practices and, where applicable, to take the measures necessary to protect the interests of the Company and other investors.

Subscriptions

The Company accepts subscription requests on each Valuation Day unless otherwise stated in the Sub-Fund factsheet and according to the order Cut-off rules laid down in the Glossary or in Sub-Fund factsheets.

Shares are issued on the contractual settlement date. In case of subscriptions, Shares are issued within three Business Days after acceptance of the subscription request unless otherwise stated in the relevant Sub-Fund factsheet and/or the Glossary. This period may be extended or reduced upon approval of the Management Company.

The amount due may be subject to a subscription fee payable to the relevant Sub-Fund and/or the Distributor as described in more detail in the Sub-Fund factsheets.

The subscription amount is payable in the Reference Currency of the relevant Share-Class. Shareholders requesting to make the payment in another currency must bear the cost of any foreign exchange charges. The foreign exchange will be processed before the cash being sent to the respective Sub-Fund. The subscription amount is payable within the stated time limit for each Sub-Fund in the Glossary or the Sub-Fund factsheets.

The Board of Directors of the Company will be entitled at any time to stop the issuance of Shares. It may limit this measure to certain countries, Sub-Funds or Share-Classes.

The Company may limit or prohibit the acquisition of its Shares by any natural or legal person.

Redemptions

Shareholders may at any time request the redemption of all or part of the Shares they hold in a Sub-Fund.

The Company accepts redemption requests on each Valuation Day unless otherwise stated in the Sub-Fund factsheets and according to the order Cut-off rules laid down in the Glossary or in Sub-Fund factsheets. The amount due may be subject to a redemption fee payable to the relevant Sub-Fund and/or the Distributor as described in more detail in the Sub-Fund factsheets.

The usual taxes, fees and administrative costs will be borne by the Shareholder.

The redemption amount is payable in the Reference Currency of the relevant Share-Class. Shareholders requesting the redemption amount to be paid in another currency bear the costs of any foreign exchange charges. The foreign exchange will be processed before the cash being sent to the respective Shareholders. Neither the Company's Board of Directors nor the Depositary may be responsible for any lack of payment resulting from the application of any exchange control or other circumstances beyond their control which may limit or prevent the transfer abroad of the proceeds of the redemption of the Shares.

If redemption and/or conversion (with reference to their redemption proportion) applications exceed 10% of the total value of a Sub-Fund on a Valuation Day the Board of Directors of the Company may decide to suspend all redemption and conversion applications until adequate liquidity has been generated to serve these applications; such suspension not to exceed ten Valuation Days. On the Valuation Day following this period, these redemption and conversion applications will be given priority and settled ahead of applications received after this period.

Redemptions requests, once received, may not be withdrawn, except when the calculation of the Net Asset Value is suspended and in the case of suspension of the redemption as provided for in Part III: Additional Information, chapter XI "Temporary suspension of the calculation of the Net Asset Value and resulting suspension of dealing" during such suspensions.

In case of redemption requests of a "Y" Share-Class, Shares will be redeemed on basis of a First In First Out ("FIFO") principle so that the Shares first being redeemed are those Shares of the Sub-Fund which have been issued for the longest period for the relevant "Y" Share-Class with regards to the same redeeming investor.

The Company may proceed with the compulsory redemption of all the Shares if it appears that a person who is not authorised to hold Shares in the Company, either alone or together with other persons, is the owner of Shares in the Company, or proceed with the compulsory redemption of part of the Shares, if it emerges that one or several persons own(s) a proportion of the Shares in the Company to the extent that the Company may be subject to the tax laws of a jurisdiction other than Luxembourg.

Conversions

Subject to compliance with any condition giving access to (including any Minimum Subscription and Holding Amount) the Share-Class into which conversion is to be effected, Shareholders may request conversion of their Shares into Shares of the same Share-Class type of another Sub-Fund or into a different Share-Class type of the same/ another Sub-Fund. Conversions will be made on basis of the price of the original Share-Class to be converted to the same day Net Asset Value of the other Share-Class.

The redemption and subscription costs connected with the conversion may be charged to the Shareholder as indicated in each Sub-Fund's factsheet.

Applications for the conversion of Shares, once received, may not be withdrawn, except when the calculation of the Net Asset Value is suspended. If the calculation of the Net Asset Value of the Shares to be acquired is suspended after the Shares to be converted have already been redeemed, only the acquisition component of the conversion can be revoked during this suspension.

Conversion from a "Y" Share-Class into a non-"Y" Share-Class is not allowed and will be treated as redemptions followed by subscriptions. Conversions from a "Y" Share-Class into a "Y" Share-Class of another Sub-Fund are done on basis of the First In First Out ("FIFO simple") principle so that the Shares first being converted are those Shares of the Sub-Fund which have been issued for the longest period.

Restrictions on subscriptions and conversions

In order to inter alia protect existing Shareholders, the Board of Directors (or any delegate duly appointed by the Board of Directors) may, at any time, decide to close a Sub-fund or a Share-Class and not to accept any further subscriptions and conversions into the relevant Sub-fund or Share-Class (i) from new investors who have not yet already invested into the said Sub-fund or into the said Share-Class ("Soft Closure") or (ii) from all investors ("Hard Closure").

Decisions taken by the Board of Directors or its delegate on a closure may have immediate or non-immediate effect and be effective for non-determined period of time. Any Sub-fund or Share-Class may be closed to subscriptions and conversions without notice to Shareholders.

In relation thereto, a notification will be displayed on the website www.nnip.com and if applicable on other NN Investment Partners websites, and will be updated according to the status of the said Share-Classes or Sub-funds. The closed Sub-fund or Share-Class may be re-opened when the Board of Directors or its delegate deems the reasons to have the latter closed no longer applying.

The reason for a closure may be, without being restricted thereof, that the size of a given Sub-Fund has reached a level relative to the market it is invested into above which the Sub-fund cannot be managed according to the defined objectives and investment policy.

Subscriptions and redemptions in kind

The Company may, should a Shareholder so request, agree to issue Shares of the Company in exchange for a contribution in kind of eligible assets, subject to compliance with Luxembourg law and in particular the obligation to produce an independent auditor's evaluation report. The nature and type of eligible assets will be determined by the Company's Board of Directors on a case by case basis, provided that the securities comply with the investment objective and policy of the relevant Sub-Fund. Costs arising from such subscriptions in kind will be borne by the Shareholders who apply to subscribe in this way.

The Company may, following a decision taken by the Company's Board of Directors, make redemption payments in kind by allocating investments from the pool of assets with respect to the Share-Class or classes concerned up to the limit of the value calculated on the Valuation Day on which the redemption price is calculated. Redemptions other than those made in cash will be the subject of a report drawn up by the Company's independent auditor.

Redemption in kind is only possible provided that (i) equal treatment is afforded to Shareholders, (ii) the Shareholders concerned have so agreed and (iii) the nature and type of assets to be transferred are determined on a fair and reasonable basis and without harming the interests of the other Shareholders of the relevant Share-Class or classes. In this case, all costs arising from these redemptions in kind including, but not be limited to, costs

related to transactions and the report drawn up by the Company's independent auditor, will be borne by the Shareholder concerned.

IV. Fees, expenses and taxation

A. Fees payable by the Company

The following fees/costs shall be paid out of the assets of the relevant Sub-Funds, and, unless otherwise stated in the relevant Sub-Fund's factsheet, shall be charged at the level of each Share-Class as detailed below:

1. **Management Fees:** In remuneration for the management services it provides, the appointed Management Company, NN Investment Partners Luxembourg S.A., will receive a management fee as stipulated in each Sub-Fund factsheet and in the collective portfolio management agreement concluded between the Company and the Management Company. The maximum management fee level charged to the investors is indicated in each Sub-Fund factsheet. The Management Company pays the fees to the Investment Manager(s) and for certain Share-Classes, the Management Company reserves the right, at its discretion, to reallocate a part of the management fee to certain Distributors, including the Global Distributor, and/or Institutional Investors in compliance with applicable laws and regulations. In the event of investment in UCITS and other target UCIs and where the Management Company or the Investment Manager is paid a fee for the management of one or several Sub-Funds charged directly to the assets of these UCITS and other UCIs, such payments shall be deducted from the remuneration payable to the Management Company or the Investment Manager.
2. **Fixed Service Fees:** The fixed service fee ("Fixed Service Fee") is charged at the level of the Share-Classes for each Sub-Fund to cover the administration and safe-keeping of assets and other on-going operating and administrative expenses, as set out in the relevant Sub-Fund factsheet. The Fixed Service Fee is accrued at each calculation of the Net Asset Value at the percentage specified in the relevant Sub-Fund factsheet and is paid monthly in arrears to the Management Company. This Fixed Service Fee is fixed in the sense that the Management Company will bear the excess in actual expenses to any such fixed service fee charged to the Share-Class. Conversely, the Management Company will be entitled to retain any amount of service fee charged to the Share-Class which exceeds the actual related expenses incurred by the respective Share-Class over an extended period of time.

a. The Fixed Service Fee shall cover:

- i. costs and expenses for services rendered to the Company by the Management Company related to services not covered by the Management Fee above described and by service providers to which the Management Company may have delegated functions related to the daily Net Asset Value calculation of the Sub-Funds, and other accounting and administrative services, registrar and transfer agency functions, costs related to the distribution of the Sub-Funds, and to the registration of the Sub-Funds for public offering in foreign jurisdictions including fees due to supervisory authorities in such countries;
- ii. statements of fees and expenses related to other agents and service providers directly appointed by the Company including the Depositary, securities lending agents, principal or local Paying Agents,

listing agent and stock exchange listing expenses, auditors and legal advisors, directors' fees and reasonable out of pocket expenses of the directors of the Company;

- iii. other fees including formation expenses and costs related to the creation of new Sub-Funds, expenses incurred in the issue and redemption of Shares and payment of Dividends (if any) insurance, rating expenses as the case may be, share prices publication, costs of printing, reporting and publishing expenses including the cost of preparing, printing and distributing prospectuses, and other periodical reports or registration statements, and all other operating expenses, including postage, telephone, telex and telefax.

b. The Fixed Service Fee does not include:

- i. the costs and expenses of buying and selling portfolio securities and financial instruments;
- ii. brokerage charges;
- iii. non-custody related transaction costs;
- iv. interest and bank charges and other transaction related expenses;
- v. extraordinary Expenses (as defined below); and
- vi. the payment of the Luxembourg *taxe d'abonnement*.

In case Sub-Funds of the Company invest in Shares issued by one or several other Sub-Funds of the Company or by one or several other Sub-Funds of a UCITS or a UCI managed by the Management Company the Fixed Service Fee may be charged to the investing Sub-Fund as well as to the target Sub-Fund.

In setting the level of the Fixed Service Fee the overall competitiveness in terms of ongoing charges and/or total expense ratio is considered in comparison with similar investment products, which may lead to a positive or negative margin for the Management Company.

3. **Performance Fees:** The Management Company may be entitled to receive a Performance Fee which is to be paid from the assets of the applicable Share-Class.

The factsheet of each Sub-Fund shows which Share-Classes may apply a Performance Fee, what the percentage of the Performance Fee is and the applicable Performance Target. If a Share-Class is denominated in another currency or applies special hedging techniques the Performance Target may be adjusted accordingly.

The Performance Fee of a particular Share-Class will be accrued on each Valuation Day ("t") and will either be crystallized and paid at the end of each financial year or if Shares are redeemed during the financial year Performance Fee will be crystallized however not paid until the end of each financial year, if the applicable Share-Class of the Sub-Fund exceeds the higher of the Performance Target and the relevant high water mark. Shares subscribed during the financial year will not contribute to the Performance Fee earned in the period preceding the subscription.

The Performance Fee is calculated based on the all time high water mark principle which means that a Performance Fee is calculated if the Net Asset Value per Share of the applicable Share-Class is higher compared to the Net Asset Value per Share at the end of previous financial years at which a Performance Fee was crystallized. In case no Performance Fee has been crystallized the high water mark

is equal to the launch price of the applicable Share-Class or will remain unchanged if Performance Fee was crystallized in previous financial years.

Under no circumstances the applicable Share-Classes will accrue a negative Performance Fee to compensate a decrease in value or underperformance. The Company does not apply equalization on Shareholder level with regard to the calculation of the Performance Fee.

The Board of Directors may close for subscriptions a Share-Class which applies a Performance Fee while redemptions will continue to be allowed. In this case a new Share-Class with high watermark which equals the launch price of the applicable new Share-Class may be made available for new subscriptions.

Calculation of the Performance Fee

The calculation of the Performance Fee is based on the following formula:

→ Performance Fee = Shares(t) x Rate(t) x [Base NAV(t) – RR(t)]

→ Shares(t): ‘Shares’ refers to the number of Shares outstanding on the Valuation Day (t) in the applicable Share-Class.

→ Rate(t): The ‘Rate’ is the percentage of the Performance Fee applicable to the Share-Class as indicated in the fund fact sheet.

→ Base NAV(t): The ‘Base NAV’ is the unswung NAV per share of the relevant Share-Class after deduction of all fees and taxes (excluding Performance Fees) but prior to accrual of Performance Fee and any corporate actions such as Dividend distributions on the Valuation Day (t).

→ RR(t): The ‘Reference Return’ of the applicable Share-Class on the Valuation Day (t) is the higher of the High Watermark or Performance Target.

→ High Water Mark (HWM): The ‘High Water Mark’ is the highest NAV per share since inception of the applicable Share-Class at which Performance Fee has been crystallised at the end of previous financial years; if no Performance Fee is crystallised the High Water Mark is equal to the launch price of the applicable Share-Class or will remain unchanged if Performance Fee was crystallized in previous financial years.

The HWM will be adjusted to reflect corporate actions such as Dividends distributions.

→ Performance Target(t): The Performance Target is the index as listed in the Appendix II of the Company’s Prospectus or hurdle rate as mentioned in the fact sheet of the Sub Fund, on the Valuation Day (t).

If a Share-Class is denominated in another currency or applies special hedging techniques the Performance Target will be adjusted accordingly.

The Performance Target is reset at the start of every financial year to the level of the NAV per share of the applicable Share-Class and will be adjusted to reflect corporate actions such as Dividends distributions.

Calculation Example:

	Example 1	Example 2
Performance Fee Rate	20%	20%
Base NAV	USD 50	USD 40

HWM	USD 40	USD 40
Performance Target	USD 45	USD 45
RR (higher of HWM and Performance Target)	USD 45	USD 45
Shares outstanding	100	100
Performance Fee Total	USD 100	USD 0
Performance Fee per Share	USD 1	USD 0

- Distribution fee:** In case of “J” and “Y” Share-Classes, the Management Company may be entitled to a distribution fee as further specified in the respective Sub-Fund factsheet. The Management Company may transfer all or part of the distribution fee received to Distributors who entered into specific distribution arrangements with the Management Company related to the distribution of the the “Y” Share-Class.
- Extraordinary Expenses:** Each of the Sub-Funds shall bear its own extraordinary expenses (“Extraordinary Expenses”) including, without limitation to, litigation expenses and the full amount of any tax, other than the *taxe d’abonnement*, levy, duty or similar charge imposed on the Sub-Funds or their assets that would not be considered as ordinary expenses. Extraordinary Expenses are accounted for on a cash basis and are paid when incurred and invoiced from the net assets of the relevant Sub-Fund to which they are attributable. The Extraordinary Expenses not attributable to a particular Sub-Fund will be allocated to all Sub-Funds to which they are attributable on an equitable basis, in proportion to their respective net assets.
- Share-Class Overlay Fees:** The Management Company may be entitled to receive a uniform Share-Class Overlay Fee of maximum 0.04% which is to be paid from the assets of the applicable Share-Class and based on actual costs. The Share-Class Overlay Fee is accrued at each calculation of the Net Asset Value and is set as a maximum in the sense that the Management Company may decide to lower the Overlay Fee charged to the respective Share-Class if economies of scale will allow. The Overlay Fee will be applicable to all the Currency Hedged Share-Classes and Duration Hedged Share-Classes. In case of Z and Zz Share-Classes those fees may be specified in the Special Agreement or Fund Management Services Agreement which will be levied and collected by the Management Company directly from the Shareholder and not charged directly to the respective Share-Class.

Other Fees

- The Management Company and/or the Investment Managers may receive compensation from the trading initiated by them on behalf of the Company because of the business they do with the Counterparties (e.g., bank, broker, dealer, OTC counterparty, futures merchant, intermediary, etc.). Under certain circumstances and in line with the Management Company and/or Investment Managers’ best execution policies, the Management Company and/or the Investment Managers will be permitted to cause the Company to pay higher transaction costs with one Counterparty than another Counterparty might have charged because they receive research or research commissions from that Counterparty. This can take the following forms:
 - Bundled brokerage fees** – In these cases, the Counterparties embed the price for their proprietary

research, such as analysts' opinions, comments, reports, analytics, or trade ideas, in the transaction costs for most financial instruments, including fixed income. In some cases, they may provide this service free of charge. The Counterparties do not explicitly price their research as a distinct service and therefore do not require their customers, such as the Company, Management Company and/or Investment Managers, to enter into contractual agreements to engage in any specific business with them. The Company, Management Company and/or Investment Managers' volume of transactions do not expressly correspond to the quantity or quality of research offered by the Counterparties. The research may be available to some or all of the Counterparties' customers at no additional cost (aside from the transaction cost for trading).

- b. Commission sharing agreements (CSA's) – The Management Company and/or Investment Managers may have entered into contractual agreements with the Counterparties, whereby the Counterparties are asked to separate part of the commissions generated by some of the Company's equity transactions (called 'unbundling') to pay for research provided by independent research providers. Unlike bundled brokerage fees, the volume of CSA transactions has a direct impact on the amount of research the Management Company and/or the Investment Managers are able to purchase from independent research providers. CSA's are generally not available for fixed income transactions.

Commission rates, brokerage fees, transaction costs as mentioned in this description are generally expressed in a percentage of transaction volume.

2. Inherent to the execution of the investment objective and policy are buy and sell transaction of securities (or "turning over" the portfolio). Costs linked to those transactions will be incurred, including but not be limited to, broker commissions, registration costs and taxes. A higher portfolio turnover may indicate higher transaction costs. These costs may affect the Sub-Fund's performance and are not part of on-going charges and/ or total expense ratio. If a Sub-Fund has a turnover ratio which can be considered as high this will be disclosed in the relevant Sub-Fund factsheet under "additional information". The Portfolio Turnover Ratio can be found in the annual report of the Company.
3. In an effort to optimise the performance of the Company and/or the relevant Sub-Funds, the Management Company may in certain circumstances pursue tax reclaim or relief opportunities that are not processed by the Depositary and that would otherwise be foregone. The provision of these specific services must be considered an additional service of the Management Company to the relevant Sub-Funds. In case of positive outcome, the Management Company may be entitled to receive a fee as consideration for such services. Such fee is a set percentage of the amounts of tax recovered or otherwise saved as a consequence of performing the service and amounts to maximum 15% of tax recovered or saved. In case the recovery is unsuccessful, the Company and/or the relevant Sub-Funds shall not be charged for the services provided to them.

B. Fees and expenses payable by Investors

Where applicable, depending on the particular information stipulated in the Sub-Fund factsheets, investors may be required to bear fees and expenses arising from subscriptions, redemptions or conversions. Those fees may be due to the Sub-

Fund and/ or the Distributor as stipulated in the Sub-Fund factsheet.

C. Taxation

The following summary is based on the current laws and customs in Luxembourg and may be subject to change. Investors are responsible for assessing their own tax position and are encouraged to seek advice from professionals on the applicable laws and regulations in particular those laws and regulations applicable to subscription, purchase, ownership (especially in case of corporate events including, but not be limited, to mergers or liquidations of Sub-Funds) and sale of Shares in their country of origin, residence or domicile.

1. Taxation of the Company in Luxembourg

No stamp duty or other tax is payable in Luxembourg on the issue of Company Shares.

The Company is subject to a *taxe d'abonnement* (subscription tax) at an annual rate of 0.05% on the net assets attributed to each Share-Class, such tax being payable quarterly on the basis of the value of the net assets at the end of each calendar quarter. However, this tax is reduced to 0.01% per annum on the net assets of money market Sub-Funds and on the net assets of Sub-Funds and/or Share-Classes reserved for Institutional Investors as prescribed by Article 174 (II) of the Law of 2010. The tax is not applied to the portion of assets invested in other Luxembourg undertakings for collective investment that are already subject to such tax. Under certain conditions, some Sub-Funds and/or Share-Classes reserved for Institutional Investors may be totally exempt from the *taxe d'abonnement* where these Sub-Funds invest in Money Market Instruments and in deposits with credit institutions.

The Company may be subject to withholding taxes at varying rates on Dividends, interest and capital gains, in accordance with the tax laws applicable in the countries of origin of such income. The Company may in certain cases benefit from reduced tax rates under double tax treaties which Luxembourg has concluded with other countries.

The Company qualifies as a taxable person for value added tax purposes.

2. Taxation of Shareholders in Luxembourg

Shareholders (with the exception of Shareholders who are resident or maintain a permanent establishment for tax purposes in Luxembourg) are generally not subject to any taxation in Luxembourg on their income, realised or unrealised capital gains, the transfer of Company Shares or the distribution of income in the event of dissolution.

Under the Council Directive 2003/48/EC on the taxation of savings income in the form of interest payments, transposed into Luxembourg legislation by the Law of 21 June 2005, non-resident natural persons may be subject to exchange of information with the tax authorities of their country of residence. The list of Sub-Funds being in scope of the Council Directive 2003/48/EC may be obtained free of charge at the Company's registered office.

3. Automatic exchange of information for tax purposes

Under this section, the term "Holder of Record" has to be understood as those persons and entities that appear as the registered Shareholders in the register of Shareholders of the Company as maintained by the Transfer Agent. The term "Automatic Exchange of Information" or "AEOI" is meant to include, inter alia, the following tax regimes:

- The Hiring Incentives to Restore Employment Act (commonly known as FATCA), the United States-Luxembourg intergovernmental agreement on FATCA and the associated Luxembourg legislation and rules, as applicable,

- Council Directive 2014/107/EU on mandatory automatic exchange of information in the field of taxation and the associated Luxembourg legislation and rules, as applicable.

The Company complies with AEoI regimes applicable in Luxembourg. Consequently, the Company or its delegates may need to:

- Perform a due diligence review of each Holder of Record to determine its tax status and, where required, to request additional information (such as the name, address, place of birth, place of incorporation, tax identification number, etc.) or documentation with respect to such Holders of Record. The Company will be entitled to redeem the Shares held by the Holders of Record which do not provide the required documentation on time or which otherwise do not comply with Luxembourg rules relating to AEoI. When permitted by the law, the Company may elect, at its sole discretion, to exclude from review certain Holders of Record whose holdings do not exceed \$50,000 (in case of individuals) or \$250,000 (in case of entities);
- Report data regarding Holders of Record and certain other categories of investors either to the Luxembourg tax authorities, who may exchange such data with the foreign tax authorities, or directly to the foreign tax authorities;
- Withhold tax on certain payments by (or on behalf of) the Company to certain persons.

Investors should be reminded that there could be adverse tax consequences due to noncompliance with AEoI regimes by intermediaries such as (Sub-) Depositaries, Distributors, Nominees, Paying Agents, etc. which the Company has no control over. Investors not domiciled for tax purposes in Luxembourg or investors investing through non-Luxembourg intermediaries should also be aware that they may be subject to local AEoI requirements which may be different from the ones outlined above. Investors are therefore encouraged to check with such third parties as to their intention to comply with various AEoI regimes.

4. Eligibility for the French *Plan d'Epargne en Actions*

To ensure eligibility for the French *Plan d'Epargne en Actions* ("PEA"), the following funds invest at least 75% of their net assets in equity securities issued by certain companies which have their head office in the European Union or in a country belonging to the European Economic Area that has signed a tax agreement with France including a clause on combating tax fraud (i.e. Iceland, Norway and Liechtenstein):

- NN (L) Euro High Dividend

V. Risk factors

Potential investors must be aware that the investments of each Sub-Fund are subject to normal and exceptional market fluctuations as well as other risks inherent in the investments described in each Sub-Fund's factsheet. The value of investments and the income generated thereof may fall as well as rise and there is a possibility that investors may not recover their initial investment.

In particular, investors' attention is drawn to the fact that if the objective of the Sub-Fund is long-term capital growth, depending on the investment universe, elements such as exchange rates, investments in the emerging markets, the yield curve trend, changes in issuers' credit ratings, the use of derivatives, investments in companies or the investment sector may influence volatility in such a way that the overall risk may

increase significantly and/or trigger a rise or fall in the value of the investments. A detailed description of the risks referred to in each Sub-Fund factsheet can be found in this prospectus.

It should also be noted that the Investment Manager may, in compliance with the applicable investment limits and restrictions imposed by Luxembourg law and in the best interest of Shareholders, temporarily adopt a more defensive attitude by holding more liquid assets in the portfolio. This could be as a result of the prevailing market conditions or on account of liquidation or merger events or when the Sub-Fund approached maturity. In such circumstances, the Sub-Fund concerned may prove to be incapable of pursuing its investment objective, which may affect its performance.

VI. Information and documents available to the public

1. Information

The Company is incorporated under the laws of the Grand Duchy of Luxembourg. By applying for subscription of Shares of the Company, the relevant investor agrees to be bound by the terms and conditions of the subscription documents including but not be limited to the prospectus and the Articles. This contractual relationship is governed by Luxembourg laws. The Company, the Management Company and Shareholders will be subject to the exclusive jurisdiction of the courts of Luxembourg to settle any dispute or claim arising out of or in connection with a Shareholder's investment in the Company or any related matter.

The Net Asset Value of the Shares of each class is made available to the public at the Company's registered office, the Depositary and other establishments responsible for financial services as of the first Business Day following the calculation of the aforementioned Net Asset Values. The Net Asset Value of the Shares of each class is also made available on the website www.nnip.com. The Company's Board of Directors will also publish the Net Asset Value using all the means that it deems appropriate, at least twice a month and at the same frequency as its calculation, in the countries where the Shares are offered to the public.

2. Documents

On request, before or after a subscription of Shares of the Company, the prospectus, the Key Investor Information Document, the annual and semi-annual report and the Articles may be obtained free of charge at the office of the Depositary and other establishments designated by it as well as at the Company's registered office. Further information on the portfolio composition of the Sub-Funds may be obtained under certain conditions by sending a written request to info@nnip.com. Access to such information should be granted on an equal treatment basis. Reasonable costs may be charged in this respect.

PART II: SUB-FUND FACTSHEETS

Share-Classes

The Company's Board of Directors may decide to create within each Sub-Fund different Share-Classes whose assets will be invested in common pursuant to the specific investment objective and policy of the relevant Sub-Fund, but which may have any combination of the following features:

- Each Sub-Fund may contain D, I, M, N, O, P, Q, R, S, T, U, V, X, Y, Z and Zz Share-Classes, which may differ in the Minimum Subscription Amount, minimum holding amount, eligibility requirements, and the fees and expenses applicable to them as listed for each Sub-Fund.
- Each Share-Class may be offered in the Reference Currency of the relevant Sub-Fund, or may be denominated in any currency, and such currency denomination will be represented as a suffix to the Share-Class name.
- Each Share-Class may be either currency hedged (see definition of "Hedged Share-Class" hereafter) or unhedged. Share-Classes that are currency hedged will be identified with the suffix "(hedged)".
- Each Share-Class may have a reduced duration (see definition of "Duration Hedged Share-Class" hereafter). Share-Classes that have a reduced duration will be identified with the suffix "Duration" or "Duration Hedged".
- Each Share-Class may also have different dividend policies as described in the Part III: "Additional information" of the Company's prospectus, Chapter XIV. "Dividends". Distribution or Capitalisation Share-Classes may be available. For Distribution Share-Classes, the Company's Board of Directors of the Company can decide to pay Dividends on a monthly, quarterly, bi-annually or annually basis. Dividends may be paid in cash or in additional Shares (stock) by the respective Share-Class.
- Each Share-Class may be offered with or without Performance Fee provided that a Performance Fee level is mentioned in the factsheet of the respective Sub-Fund.

For the exhaustive list of existing classes of Shares available, please refer to the below website:

<https://nnip.com/advisor/LU/en/Funds/Existing-share-classes.htm>

- "D": Ordinary Share-Class intended for individual investors in the Dutch market. Subscription and conversion fees are not applicable for this Share-Class type.
- "I": Share-Class reserved for Institutional Investors. "I" Share-Class will only be issued to subscribers who have completed their subscription form in compliance with the obligations, representations and guarantees to be provided regarding their status as an Institutional Investor, as provided for under Article 174 of the Law of 2010. Any subscription application for Share-Class "I" will be deferred until such time as the required documents and supporting information have been duly completed and provided.
- "M": Share-Class reserved for Institutional Investors yet differing from Share-Class "I" in that it attracts a maximum management fee of 1.5% and a subscription fee of maximum 5%. It is distributed by affiliates to the Management Company, or at the discretion of the Board of Directors, by distributors and/or in certain countries where market conditions require this fee structure.

"N":

Ordinary Share-Class that does not pay any rebates and is intended for individual investors in the Dutch market. The maximum management fee for Share-Class "N" is lower than the maximum management fee for Share-Class "P" as per the maximum management fee levels mentioned in each Sub-Fund factsheet. The fixed service fee for Share-Class "N" is equal to the fixed service fee for Share-Class "P" as per the fixed service fee levels mentioned in each Sub-Fund factsheet. Subscription and conversion fees are not applicable for this Share-Class type.

"O":

Share-Class intended for individual investors who are clients of Distributors who have signed, at the discretion of the Management Company, an O Share-Class agreement with the Management Company in relation to their clients' investment in the Company. Neither retrocessions nor rebates are paid. The maximum management fee for Share-Class "O" is lower than the maximum fee for Share-Class "P". The fixed service fee for Share-Class "O" is equal to the fixed service fee for Share-Class "P". The maximum subscription fee and conversion fee for Share-Class "O" is equal to maximum subscription fee and conversion fee of Share-Class "P". Management fee, fixed service fee, subscription fee and conversion fee of each Sub-Fund are mentioned in each Sub-Fund factsheet.

"P":

Ordinary Share-Class intended for individual investors.

"Q":

Share-Class reserved for Institutional Investors. Neither retrocessions nor rebates are paid. The maximum management fee for Share-Class "Q" is lower than the maximum fee for Share-Class "I". The fixed service fee for Share-Class "Q" is equal to the fixed service fee for Share-Class "I". Subscription and conversion fees are not applicable for this Share-Class type. Management fee, fixed service fee and subscription fee of each Sub-Fund are mentioned in each Sub-Fund factsheet.

"R":

Ordinary Share-Class that does not pay retrocessions or rebates and is intended for individual investors who are clients of Distributors, providers of investment services or financial intermediaries who provide:

- a) Independent investment advice and/or portfolio management services within the meaning of MiFID II or applicable national legislation, or
- b) Investment services and activities within the meaning of MiFID II or applicable national legislation, have separate fee arrangements with their clients in relation to those services and activities provided and, as per the terms of those fee arrangements, do not or are not eligible to receive and retain any retrocession or rebate from the relevant Share-Class.

The maximum management fee for Share-Class "R" is lower than the maximum management fee for Share-Class "P" as per the maximum management fee levels mentioned in each Sub-Fund factsheet. The fixed service fee for Share-Class "R" is equal to the fixed service fee for Share-Class "P" as per the fixed service fee levels mentioned in each Sub-Fund factsheet. The maximum subscription and conversion fees for Share-Class "R" are equal to those of Share-Class "P" as mentioned in each Sub-Fund factsheet.

- "S": Share-Class intended for corporate beneficial owners with a Minimum Subscription Amount of EUR 1,000,000 subject to subscription tax of 0.05% per year on net assets.
- "T": Share-Class reserved for Institutional Investors yet differing from Share-Class "I" in that it attracts a lower or equal management fee and a subscription fee of maximum 5%. It is distributed by affiliates to the Management Company, or at the discretion of the Board of Directors, by distributors and/or in certain countries where market conditions require this fee structure.
- "U": Share-Class for which no rebates will be paid and which is reserved for selected Institutional Investors with their headquarters based in Switzerland, for the purpose of discretionary management that, at the discretion of the Management Company, entered into a special U Share-Class agreement with the Management Company in relation to their investment in the Company. The maximum management fee, Performance Fee, if applicable, and Fixed Service Fee for Share-Class "U" is not higher than the maximum management fee, Performance Fee, if applicable, and Fixed Service Fee for Share-Class "I", as mentioned in each Sub-Fund factsheet. Subscription and conversion fees are not applicable for this Share-Class type.
- "V": Share-Class reserved for Institutional Investors yet differing from Share-Class "I" in that it attracts a higher management fee.
- "X": Ordinary Share-Class intended for individual investors yet differing from Share-Class "P" in that it attracts a higher management fee and is distributed in certain countries where market conditions require a higher fee structure.
- "Y": Share-Class intended for individual investors who are clients of Distributors that entered into specific distribution arrangements with the Management Company subject to a Contingent Deferred Sales Charge ("CDSC"). The maximum management fee and the fixed service fee of the "Y" Share-Class are as high as the fees for the "X" Share-Class, as per the fee levels mentioned in each Sub-Fund factsheet. The "Y" Share-Class is however different from the "X" Share-Class in that it will apply an additional distribution fee of 1%. The distribution fee is payable monthly in arrears on the basis of the average daily Net Asset Value of the relevant "Y" Share-Class. No subscription fee is applicable for subscriptions into the "Y" Share-Class. A CDSC fee will be deducted from redemption proceeds for redemptions of Shares made within the first three years of the initial subscription order date. The CDSC fee rate will decrease depending on the holding period of the redeeming Shares and is applied on the lower of the original subscription price or of the redemption price of the relevant Shares multiplied by the number of redeeming Shares:
- | | |
|---------------------------------------|-------|
| Up to one year: | 3,00% |
| Over one year and up to two years: | 2,00% |
| Over two years and up to three years: | 1,00% |
| Over three years: | 0% |
- Shares of the "Y" Share-Classes will automatically be converted into Shares of a "X" Share-Class of the same Sub-Fund after three years at no cost.
- "Z": Share-Class reserved for Institutional Investors that, at the discretion of the Management Company, have signed a special management agreement ("Special

Agreement") with the Management Company in addition to their subscription agreement in relation to their investment in the Fund. For this Share-Class, the management fee is not charged to the Share-Class. Instead, a specific management fee will be levied and collected by the Management Company directly from the Shareholder as determined in the Special Agreement. Such specific management fee may vary among holders of this Share-Class. Calculation method and payment frequency for the specific fees will be separately stipulated in each Special Agreement and are therefore only accessible for the respective parties to these agreements. This Share-Class will be charged a service fee ("Service Fee") to cover the administration and safe-keeping of assets and other on-going operating and administrative expenses. The Service Fee covers and excludes the same elements as set out in this prospectus for the Fixed Service Fee. The Management Company will be entitled to retain any amount of Service Fee charged to the Share-Class which exceeds the actual related expenses incurred by the respective Share-Class. The investment in this Share-Class requires a minimum holding amount of EUR 5,000,000 or the equivalent in another currency. If the investment has dropped below the minimum holding amount following the execution of a redemption, transfer or conversion request, the Management Company may require the relevant Shareholder to subscribe additional Shares in order to reach the set minimum holding amount. If the Shareholder does not respond to such request, the Management Company will be entitled to redeem all the Shares held by the respective Shareholder.

"Zz": Share-Class reserved for Institutional Investors yet differing from Share-Class "Z" in that, a fund management services fee covering the management fee, the Service Fee and any other fees will be levied and collected by the Management Company directly from the Shareholder as determined in the fund management services agreement ("Fund Management Services Agreement") signed with the Management Company at its discretion. Such specific fund management fee may vary among holders of this Share-Class. Calculation method and payment frequency for the specific fees will be separately stipulated in each Fund Management Services Agreement and are therefore only accessible for the respective parties to these agreements.

Currency Hedged Share-Classes

Where a Share-Class is described as currency hedged (a "Currency Hedged Share-Class"), the intention will be to hedge full or part of the value of the net assets in the Reference Currency of the Sub-Fund or the currency exposure of certain (but not necessarily all) assets of the relevant Sub-Fund into either the Reference Currency of the Currency Hedged Share-Class, or into an alternative currency.

It is generally intended to carry out such hedging through the use of various derivative financial instruments including, but not be limited to, Over The Counter ("OTC") currency forward contracts and foreign exchange swap agreements. Profits and losses associated with such hedging transactions will be allocated to the applicable Currency Hedged Share-Class or classes.

The techniques used for Share-Class hedging may include:

- i. Hedging transactions to reduce the effect of fluctuations in the exchange rate between the currency in which the Share-Class is denominated and the Reference Currency of the relevant Sub-Fund ("Base Currency Hedging");
- ii. Hedging transactions to reduce the effect of fluctuations in the exchange rate between the currency exposure arising from the holdings of the relevant Sub-Fund and the currency in which the Share-Class is denominated ("Portfolio Hedging at Share-Class Level");
- iii. Hedging transactions to reduce the effect of fluctuations in the exchange rate between the currency exposure arising from the holdings of the relevant index and the currency in which the Share-Class is denominated ("Index Hedging at Share-Class Level");
- iv. Hedging transactions to reduce the effect of fluctuations in the exchange rate based on correlations between currencies arising from the holdings of the relevant Sub-Fund and the currency in which the Share-Class is denominated ("Proxy Hedging at Share-Class Level").

Investors should be aware that any currency hedging process may not give a precise hedge, and may lead to over-hedged or under-hedged positions, which may involve additional risks as described in Part III: Additional information", Chapter II. "Risks linked to the investment universe: detailed description". The Management Company ensures that hedged positions do not exceed 105% and do not fall below 95% of the portion of the net asset value of the Currency Hedged Share-Class which is to be hedged against currency risk. Investors should note that an investment in a Currency Hedged Share-Class may have remaining exposure to currencies other than the currency against which the Share-Class is hedged.

Furthermore, Investors' attention is drawn to the fact that the hedging at Share-Class level is distinct from the various hedging strategies that the Investment Manager may use at portfolio level.

The list of available Currency Hedged Share-Classes is available on www.nnip.com.

Duration Hedged Share-Classes

Where a Share-Class is described as duration hedged (a "Duration Hedged Share-Class"), the intention will be to minimize the interest rate sensitivity through reducing the duration of that Share-Class of the Sub-Fund to close to zero.

It is generally intended to carry out such hedging through the use of various derivative financial instruments including, but not be limited to, futures, Over the Counter ("OTC") forward contracts and interest rate swap agreements.

Profits and losses associated with such hedging transactions will be allocated to the applicable Duration Hedged Share-Class or classes. Investors should be aware that any duration hedging process may not give a precise hedge nor is a full hedge searched for in each

case. After the hedging process, investors in the Duration Hedged Share-Classes will have a duration which deviates from the main Share-Class of the respective Sub-Fund.

If the value of the assets of a Duration Hedged Share-Class falls below EUR 10,000,000 the hedge is not guaranteed and the Company's Board of Directors may decide to close the relevant Share-Class as further detailed in Part III "Additional information", Chapter XV "Liquidations, mergers and contributions of Sub-Funds or Share-Classes".

The list of available Duration Hedged Share-Classes is available on www.nnip.com.

Following ESMA opinion* on Share-Classes of UCITS, neither existing Shareholders nor new investors can subscribe in the Duration Hedged Share-Classes after 30 July 2018.

*For additional information, you can visit:

<https://www.esma.europa.eu/press-news/esma-news/esma-advocates-common-principles-setting-share-classes-in-ucits-funds>

Minimum Subscription and Holding Amount

The Board of Directors has set, unless otherwise stated in each relevant Sub-Fund factsheet the Minimum Subscription and Holding Amounts per Share-Class as listed below.

Share-Class	Minimum subscription amount	Minimum holding amount
D	-	-
I	EUR 250,000, which may be spread over all the Company's Sub-Funds	EUR 250,000, which may be spread over all the Company's Sub-Funds
M	-	-
N	-	-
O	-	-
P	-	-
Q	EUR 100,000,000	EUR 100,000,000
R	-	-
S	EUR 1,000,000	EUR 1,000,000
T	-	-
U	EUR 5,000,000	EUR 5,000,000
V	-	-
X	-	-
Y	-	-
Z	EUR 5,000,000	EUR 5,000,000
Zz	EUR 5,000,000	EUR 5,000,000

The Management Company has the discretion, from time to time, to waive or reduce any applicable Minimum Subscription and Holding Amounts.

The Management Company has the right to require a Shareholder to make additional subscriptions in order to reach the required Minimum Holding Amount only if, as a result of the execution of a redemption order, transfer or conversion of Shares requested by the Shareholder, the holding of the said Shareholder falls below

the required Minimum Holding Amount. In case the Shareholder does not comply with this request, the Management Company shall be entitled to repurchase all Shares held by the Shareholder. Under the same circumstances, the Management Company may convert Shares of one Share-Class into Shares of another Share-Class from the same Sub-Fund with higher fees and charges.

If as a result of a redemption, conversion or transfer, a Shareholder is owner of a small balance of Shares, which is considered as a value not above EUR 10 (or the equivalent amount in another currency), the Management Company may decide at its sole discretion to redeem such position and repay the proceeds to the Shareholder.

Typical Investor Profile

The Management Company has defined the following three categories - Defensive, Neutral and Dynamic - when describing the investment horizon for the investor and anticipated volatility of the Sub-Funds.

Categories	Definitions
Defensive	Sub-Funds in the Defensive category are typically suitable for investors with a short investment horizon. These Sub-Funds are intended as a core investment where there is a low expectation of capital loss and where income levels are expected to be regular and stable.
Neutral	Sub-Funds in the Neutral category are typically suitable for investors with at least a medium investment horizon. These Sub-Funds are intended as a core investment where there is exposure to the fixed income securities markets as defined in the individual Sub-Fund's investment policy and where investment is principally made in markets subject to moderate volatility.
Dynamic	Sub-Funds in the Dynamic category are typically suitable for investors with a long term investment horizon. These Sub-Funds are intended to provide additional exposure for more experienced investors where a high proportion of the assets may be invested in equity, or equity-related securities, or in bonds rated below Investment Grade in markets which may be subject to high volatility.

The descriptions defined in the above categories should be considered as indicative and do not provide any indication of likely returns. They should only be used for comparison purpose with other Sub-Funds of the Company.

The Profile of the Typical Investor for an individual Sub-Fund is indicated in each Sub-Fund factsheet under the section "Typical Investor Profile".

Investors are encouraged to consult their financial advisor prior to investments in Sub-Funds of the Company.

NN (L) AAA ABS

Introduction

The Sub-Fund was launched on 4 October 2013.

Investment objective and policy

The aim of this Sub-Fund is to invest predominantly in Asset Backed Securities ('ABS') with the highest possible credit rating assigned by independent rating organisations such as Standard & Poors, Moody's and Fitch. Measured over a period of several years the Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

ABS are debt securities where the right for interest and principal is backed by an underlying pool of assets or its revenue. The economic risks and benefits of the collateral are transferred, directly or indirectly, by an enterprise, financial institution or other vehicle by the means of a securitisation program to the issuing party. Collateral or revenue of the collateral could be linked, but not limited, to residential mortgages, credit card loans, student loans and lease contracts. The securities will be at least rated AA-/Aa3 at the time of the purchase. When selecting investments, the Investment Manager shall analyse, maintain and update the credit rating of securities and shall ensure that their credit and liquidity profiles are not negatively impacted. The Investment Manager will always take the quality and diversity of issuers and sectors, along with the maturity date, into consideration.

ABS instruments are exposed to risks, such as to credit risk and liquidity risk, which are derived from the quality of the associated collateral; and legal risk which relate to complex operations. In the event of occurrence of these risks the net asset value may be adjusted up or down. Due to the specificities of these instruments, this Sub-Fund will only be available for Institutional Investors.

Investments shall be made in markets globally. However, to limit currency risk, any currency risk resulting from securities held in other denominations than the fund's Reference Currency (Euro) will, in principle, be hedged back to Euro. This may be carried out by hedging the currency risk in relation to the euro of assets denominated in currencies other than the euro, through the use of the techniques and financial instruments described in Part III "Additional information", Chapter IV "Techniques and instruments".

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, Rule 144 A securities, units of UCITS and other UCIs and deposits as described in Chapter III "Investment restrictions", section A "Eligible investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps

- forward currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices and baskets of securities.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the financial instruments used to reach investment objectives is considered medium. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is high. The Sub-Fund's liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in a specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II "Sub-Fund Factsheets".

NN (L) Absolute Return Bond

Introduction

This Sub-Fund was launched with effect from 29 August 2014 following the merger with ING (L) Patrimonial Target Return Bond, a Sub-Fund of ING (L) Patrimonial SICAV.

Investment objective and policy

The objective of the Sub-Fund is to achieve returns higher than the index as listed in the Appendix II of the Company's Prospectus by selecting the best fixed-income investment opportunities in terms of absolute performance, while remaining in a controlled risk environment and implementing loss risk management in the event of a downturn.

The Sub-Fund will invest a minimum of 2/3 of its assets in fixed-income securities of all types, Money Market Instruments and/or derivative financial instruments, contingent convertible securities (up to a maximum of 10% of the Sub-Fund's net assets), structured products, units of UCITS and/or units of other UCIs with underlying fixed income securities. However, any investment in UCITS and UCIs may not exceed a total of 10% of the net assets.

Fixed-income Transferable Securities and/or Money Market Instruments issued or guaranteed by the governments of the Netherlands, Germany, Italy, Spain, Belgium, France, the United States of America, Canada, Australia, the United Kingdom, Japan, Korea and/or New Zealand, and their local public authorities may represent more than 35% of the net asset value of the Sub-Fund, provided such exposure does comply with the principle of risk spreading described in Art. 45 (1) of the Law of 2010. The Sub-Fund may be exposed to various exchange risks linked to investments in securities denominated in currencies other than that of the Sub-Fund or in derivative instruments with underlying exchange rates or currencies.

The Sub-Fund may also invest up to 1/3 of its assets in instruments such as equities, warrants, other structured products, other derivative financial instruments and units of UCITS or UCIs.

By derogation to the provisions of Chapter IV "Techniques and Instruments" of Part III of this prospectus, the Sub-Fund may use derivative financial instruments for the purpose of hedging in order to ensure efficient portfolio management and to achieve the objectives of the Sub-Fund. The Sub-Fund may also invest in any derivative financial instruments authorised by Luxembourg law, including, but not limited to the following:

- Derivative financial instruments linked to market fluctuations such as call and put options, swaps and securities futures contracts, Indices, baskets of securities or any other financial instrument;
- Derivative financial instruments of all types linked to exchange rate or currency fluctuations, such as currency futures contracts or currency call and put options, currency swaps, currency futures transactions and false risk hedging through which the Sub-Fund carries out a hedging transaction in its Reference Currency (Index or Reference Currency) against exposure to a single currency by selling or buying another currency closely linked to its Reference Currency;
- Derivative financial instruments linked to interest rate risks, such as call and put options on interest rates, interest rate swaps, future rate agreements, interest rate futures transactions, swaptions – whereby a counterparty receives a fee in exchange for processing a future swap at a rate previously agreed should a certain contingent event arise, for example where future rates are set according to a reference Index – , and caps and floors for which the seller, in exchange for a premium paid in advance, agrees to

compensate the buyer if interest rates go above or below a strike price at certain pre-defined dates during the lifetime of the agreement;

- Derivative financial instruments linked to credit risks, namely credit derivatives, designed to isolate and transfer the credit risk associated with a given reference rate, such as credit spread derivatives credit default swaps, whereby the counterparty (the buyer of the protection) pays a periodic fee in exchange for a contingent payment by the seller of the protection after a reference issuer experiences a credit incident. The buyer of the protection must either sell certain bonds issued by the reference issuer at par value (or at another reference value or at a determined strike price) when a credit incident occurs, or receive payment in cash based on the difference between the market price and the reference price. A credit incident is commonly defined as a drop in the rating awarded by a rating agency, bankruptcy, insolvency, sequestration, debt restructuring or payment default. Credit default swaps may involve higher risk than direct investments in bonds. The credit default swap market may sometimes be less liquid than bond markets.

The Sub-Fund may invest in securities traded on Bond Connect. Bond Connect is a market facilitating investment to the Chinese bond market. The risks associated to investments through Bond Connect are detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The Sub-Fund will not invest in distressed securities.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the financial instruments used to reach investment objectives is considered medium. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is medium. The Sub-Fund's liquidity risk is set to medium. Liquidity risks may arise when a specific underlying investment is difficult to sell. No guarantee is provided as to the recovery of the initial investment. The risk associated with derivative financial instruments is detailed in Part III "Additional information", Chapter II "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

Definitions and considerations relating to risks

The declassification of a listed fixed-income transferable security, adverse publicity or investor perception may reduce the value and liquidity of the security, particularly in a lacklustre market. Non-investment grade fixed-income Transferable Securities may have sizable leverage effects and involve considerable default risk. The Sub-Fund may be affected by changes to current interest rates and by considerations linked to credit risk. In general, interest rate market trends affect the value of Sub-Fund assets insofar as the price of fixed income Transferable Securities increases when interest rates drop and decreases when interest rates rise.

Generally speaking, short-term securities are less sensitive to changes in interest rates than long-term securities. An economic recession may adversely affect the financial conditions of issuers and the market value of high-yield fixed-income Transferable Securities issued by these issuers.

The capacity of the issuer to fulfil its commitments may be adversely affected by developments specific to the issuer, by its incapacity to live up to expectations or by the lack of additional funding. In the event of issuer bankruptcy, the Sub-Fund may suffer losses and have to bear expenses.

In addition, non-investment grade securities tend to be more volatile than top-rated fixed-income securities. Consequently, adverse developments may have a larger impact on the price of non-investment grade fixed income Transferable Securities than on top-rated fixed-income securities.

The Sub-Fund may invest in securities from issuers with various types of financial or return difficulties and representing various types of specific risk. Investments in shares or fixed-income Transferable Securities issued by companies or institutions with such problems include, in particular, issuers with large capital requirements or with negative net value, or issuers currently, previously or in the process of restructuring or becoming insolvent or bankrupt Securities issued by small capitalisation companies may lose liquidity from time to time, they may be more volatile in the short term and the differences between purchase price and sale price may be greater during bear market phases. Investments in small capitalisations may involve higher risks than for large capitalisations. Small cap securities may be affected by more sudden and unpredictable market trends than larger or more established companies or than the general market average. These companies have limited product lines, markets and resources or may target a relatively limited group. The overall development of these companies requires a substantial period of time.

Furthermore, many small companies trade their securities less frequently and in lower quantities and may therefore be subject to more erratic price trends than more well-established companies. Securities issued by small caps may also be more sensitive to market trends than those issued by large caps. These factors explain the above-average fluctuations in the Net Asset Value of Shares in this Sub-Fund.

The following considerations are particularly important for certain market segments or certain emerging markets. The Sub-Fund may invest in certain market segments or emerging markets typical of poorer or less developed countries with low levels of economic development and/or low capital markets and high share prices and monetary volatility. The prospects for economic growth of many of these markets are considerable and they have the potential to outstrip those of developed markets during bullish periods. However, volatility with respect to prices and currencies is generally higher for the emerging markets. Some governments have considerable influence on the private economic sector and there are many political and social uncertainties in these developing countries. Another risk common to most of these countries is the fact that their economies are extremely export-oriented, making them highly dependent on international trade. Overburdened infrastructures and obsolete financial systems also present a risk for certain countries and may cause environmental problems. Some economies are also highly dependent on commodities exports and are therefore vulnerable to price fluctuations in raw materials due to various factors. In certain unfavourable social and political contexts, governments have carried out expropriations and nationalisations, confiscated property, intervened in the financial markets and in trade payments, imposed restrictions on foreign investors and controlled exchanges. This type of intervention may re-occur in the future. In addition to deductions at source on investment income, some emerging markets may impose different capital

gains taxes on foreign investors. Generally speaking, the accounting, auditing and financial reporting methods used in the emerging markets differ considerably from those in developed markets. Compared to developed markets, some emerging markets have little regulation or control over investor activity.

The financial markets of developing countries are not as large as in developed countries and offer much lower transaction volumes, which leads to high price volatility and a lack of liquidity. There may be a high concentration of financial capitalisation and transaction volumes on a limited number of issuers representing a restricted number of industries.

There may also be a high concentration of investors and financial intermediaries. These factors may adversely affect the chronology and valuation of Sub-Fund investments or the sale thereof. Practices relating to the regulation of securities transactions in emerging markets involve higher risk than in developed markets, particularly due to the fact that the Sub-Fund will need to use less well-capitalised brokers and counterparties. Moreover, the custody and recording of assets is often unreliable. Payment times may induce the Sub-Fund to forego investment opportunities if the Sub-Fund is not in a position to acquire or sell its securities. The Depositary is responsible for duly selecting and monitoring the correspondent banks in all relevant markets, in accordance with the regulations and legislation applicable under Luxembourg law. In certain emerging markets, registers are not subject to effective government monitoring and are not always independent of issuers. There are risks of fraud, negligence, issuer influence or denial of property. Combined with other factors, they may generate the total loss of a shareholder's registration. The Sub-Fund would in this case be incapable of asserting said shareholder's right to compensation.

While the factors outlined above may generate higher risk, depending on the individual market segment and the emerging market in question, these risks may be reduced by decreasing the correlation between the activities of these markets and/or the diversification of investments within the Sub-Fund.

In the event of investment in initial public offerings or new debt instruments, the price of securities in the initial public offerings or debt instruments are often subject to large and unpredictable price fluctuations compared to other securities.

Structured products are Transferable Securities organised solely with a view to restructuring the investment characteristics of certain other investments (underlying investment) and are issued by first-class financial institutions. These institutions issue Transferable Securities (structured products) that are backed up by or linked to the interests of the underlying investment. The Sub-Fund may invest in all types of structured products, including, in particular, but not limited to, equity structured products, structured products with protected capital and structured products including, inter alia, underlying investments issued by companies recommended by the NN Group. The underlying investments must be in line with the investment objective of the Sub-Fund as previously outlined and must be taken into account when determining the investment limits set out in Chapter III "Investment restrictions" of Part III of this prospectus. Structured products are exposed to risks linked to underlying investments and are subject to higher volatility than direct investments in the underlying investments.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II: "Sub-Fund Factsheets".

NN (L) Alternative Beta

Introduction

This Sub-Fund is launched on 9 June 2008.

Investment objective and policy

The Sub-Fund aims to replicate hedge fund Index returns combining a limited set of traditional and liquid financial market betas only, by using sophisticated modelling techniques and by dynamically managing the allocation. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

For this purpose, exposures to the relevant markets is mainly taken (i.e. at least 2/3 of its net assets) through a broad range of Indices by investing in linear (e.g. Total Return Swaps, futures, forwards) and non-linear derivative financial instruments (e.g. options), cash instruments, fixed income instruments (e.g. cash, money market, bonds, deposits). All underlying assets are eligible investments under the meaning of the UCITS Directive and as more detailed under Chapter III, Section A in the Part III of this prospectus. In no circumstances, the Sub-Fund will invest in hedge funds.

Fixed-income Transferable Securities and/or Money Market Instruments issued or guaranteed by the government of the United States of America and its local public authorities may represent more than 35% of the net asset value of the Sub-Fund, provided such exposure does comply with the principle of risk spreading described in Art. 45 (1) of the Law of 2010.

The Sub-Fund can be exposed to a broad range of asset classes and risk factors such as equity, currency, fixed income, commodities and volatility (non exhaustive list). The investment decisions are mainly model driven, and will be dynamically managed. The model that is being used is designed to identify an optimal set and combination of relevant market factors that can explain the historical returns of a non-investable hedge fund Index ("HFRI") while having forward looking explanatory power as well. Non-investable hedge fund Index includes not only hedge funds that are still open for investments but also hedge funds that are closed for investments meaning that the returns are not accessible. The management decisions for this product are driven by the model outcomes with a strong focus on efficient implementation.

The Sub-Fund may lastly invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets – and convertible bonds), Money Market Instruments, deposits and currencies, units of UCITS and other UCIs. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

The Sub-Fund may have recourse to financial derivative instruments for hedging purposes, for efficient portfolio management and/or as part of the investment strategy of the Sub-Fund. The Sub-Fund may therefore invest in all derivative financial instruments authorised by Luxembourg law, including (not exclusively):

- Derivative financial instruments linked to market fluctuations such as call and put options, swaps and securities futures contracts, Indices, baskets of securities or any other financial instruments, Contracts For Differences ("CFD") that are derivative financial instruments linked to an arrangement made in a futures contract whereby differences in settlement are made through cash payments,

rather than the delivery of physical securities and Total Return Swaps that are derivative financial instruments linked to a swap agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains.

- Derivative financial instruments linked to exchange rate or currency fluctuations of all types, such as currency futures contracts or currency call and put options, currency swaps, currency futures transactions and proxy hedging through which the Sub-Fund carries out a cover transaction in its Reference Currency (Index or Reference Currency) against exposure in a single currency by selling or buying another currency closely linked to its Reference Currency.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach the investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to medium. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II "Sub-Fund Factsheets".

NN (L) Asia ex Japan Equity Opportunities

Introduction

The Sub-Fund will be launched upon the decision of the Board of Directors of the Company.

Investment objective and policy

The Sub-Fund invests predominantly in a diversified portfolio comprised of equities issued by companies established, listed or traded in the Asian region (except Japan and Australia). Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III "Additional information", Chapter III "Investment Restrictions", Section A "Eligible investments". However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

The Sub-Fund may invest up to 20% of its net assets in China A-Shares issued by companies incorporated in the PRC via Stock Connect. The Sub-Fund may therefore be subject to PRC risks, including but not limited to, geographical concentration risk, risk of change in PRC political, social or economic policy, liquidity and volatility risk, RMB currency risk and risks relating to PRC taxation. The Sub-Fund is also subject to specific risks applicable to investing via Stock Connect such as quota limitations, suspension in trading, price fluctuations in China A-Shares when in particular Stock Connect is not trading but PRC market is open, and operational risk. Stock Connect is relatively new, hence some regulations are untested and subject to change, which may adversely affect the Sub-Fund. The risks associated to investments in A-Shares are detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance.

Investments in a specific geographical area are more concentrated than investments in various geographical areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risk linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

Warning

Investors' attention is drawn to the fact that an investment in the Shares of this Sub-Fund involves a higher level of risk than that generally found on the majority of markets in Western Europe, North America or other developed countries.

These risks include:

- political risk: i.e. the instability and volatility of the political environment and situation;
- economic risk: i.e. high inflation rates, risks linked to investments in recently privatised companies, monetary depreciation, little movement on the financial markets;
- legal risk: insecurity with respect to the law and general difficulty in getting laws recognised and/or passed;
- tax risk: in some of the aforementioned States, taxes may be very high and there is no guarantee whatsoever that the legislation will be interpreted in a uniform and consistent manner.
- The local authorities are often vested with a discretionary power to create new taxes, which may sometimes be applied retrospectively.

There is also the risk of loss due to the shortage of adequate systems in place for transfer, valuation, settlement and accounting as well as securities registration, the safekeeping of securities and the liquidation of transactions, with such risks being less common in Western Europe, North America and other developed countries. It should be noted that the correspondent bank or banks will not always be legally liable for or be in a position to pay damages resulting from the acts or omissions of its representatives or employees. As a result of the risks explained above, volatility and illiquidity are much higher for investments when the market capitalisation in these States is lower than that of developed markets.

Typical investor profile:

The Sub-Fund particularly targets neutral investors as defined in Part II "Sub-Fund Factsheets".

NN (L) Asia Income

Introduction

This Sub-Fund, launched with effect from 10 December 2001 under the name ING (L) Invest New Asia following a contribution of the assets of the “New Asia Equity” Sub-Fund (launched on 24 May 1994) of the ING International SICAV, absorbed the following Sub-Funds on 16 May 2003: ING (L) Invest Philippines (launched on 21 June 1999), ING (L) Invest Korea (launched on 16 March 1998), ING (L) Invest Indonesia (launched on 16 June 1997) and ING (L) Invest Singapore & Malaysia (launched on 11 August 1997). ING (L) Invest New Asia absorbed the ING (L) Invest India Sub-Fund (launched on 9 December 1996) on 23 May 2003 and the BBL Invest, BBL Invest Asian Growth and BBL Invest Thailand Sub-Funds on 22 September 2003. This Sub-Fund has been renamed as NN (L) Asia Income with effect from 1 October 2015 following change in its investment objective and policy.

Investment objective and policy

The Sub-Fund’s primary objective is to provide investors with a high level of income. Capital appreciation is the Sub-Fund’s second investment objective. Measured over a period of several years this Sub-Fund aims to generate a substantial portion of its total returns through dividends on the ordinary shares held in the portfolio and income from derivatives.

The Sub-Fund seeks to achieve its investment objectives by investing its assets under management predominantly in a diversified portfolio comprised of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund’s net assets – and convertible bonds) issued by companies established, listed or traded in the Asian region (except Japan and Australia). The performance of this Sub-Fund is not measured against any index. However for performance comparison purposes, the Sub-Fund uses a reference Index as listed in the Appendix II of the Company’s Prospectus.

The Sub-Fund seeks to generate gains from dividends on the ordinary shares held in the portfolio and from premiums generated by selling options on equities and Indices, especially, but not limited to the HSI Index and the Kospi 200 Index.

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund’s net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

The Sub-Fund may invest up to 20% of its net assets in China A-Shares issued by companies incorporated in the PRC via Stock Connect. The Sub-Fund may therefore be subject to PRC risks, including but not limited to, geographical concentration risk, risk of change in PRC political, social or economic policy, liquidity and volatility risk, RMB currency risk and risks relating to PRC taxation. The Sub-Fund is also subject to specific risks applicable to investing via Stock Connect such as quota limitations, suspension in trading, price fluctuations in China A-Shares when in particular Stock Connect is not trading but PRC market is open, and operational risk. Stock Connect is relatively new, hence some regulations are untested and subject to change, which may adversely affect the Sub-Fund. The risks associated to investments in A-Shares are detailed in Part III “Additional information”,

Chapter II: “Risks linked to the investment universe: detailed description”.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III “Additional information”, Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund’s liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund’s performance. Investments in a specific geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III “Additional information”, Chapter II: “Risks linked to the investment universe: detailed description”.

The global exposure of this Sub-Fund is determined using the commitment method.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II “Sub-Fund Factsheets”.

NN (L) Asian Debt (Hard Currency)

Introduction

The Sub-Fund was launched on 29 April 2011 under the name of ING (L) Renta Fund Asian Debt. The Sub-Fund absorbed the following Sub-Fund: Asian Debt (29 April 2011) a Sub-Fund of the ING (L) Renta Fund SICAV.

Investment objective and policy

This Sub-Fund aims to generate returns by actively managing a portfolio comprised predominantly of bonds and Money Market Instruments denominated in US Dollars issued by Asian issuers, e.g. Singapore, Malaysia, Thailand, Indonesia, South Korea, Taiwan, the Philippines, India, Hong Kong, China and other countries in the same geographical area. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), contingent convertible securities (up to a maximum of 20% of the Sub-Fund's net assets), Money Market Instruments, Rule 144 A securities, units of UCITS and other UCIs and deposits as described in Chapter III "Investment restrictions", section A "Eligible investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, please note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps
- forward currency contracts and currency options.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

This Sub-Fund is intended for well-informed investors seeking to invest part of their portfolio in growing Asian markets offering attractive long-term investment opportunities. However, these markets involve an above-average degree of risk.

As these investments are subject to specific factors, they cannot be compared to investments made in the major industrialized countries. In the past, some developing countries have suspended or halted the payment of their external debt, including both the interest and the capital, with respect to issuers from the public and private sectors. These factors may also result in the positions held by the Sub-Fund becoming less liquid, or even illiquid.

The Sub-Fund may invest in securities traded on Bond Connect. Bond Connect is a market facilitating investment to the Chinese bond market. The risks associated to investments through Bond Connect are detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is high. The Sub-Fund's liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact the Sub-Fund's performance. Investments in a specific geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II "Sub-Fund Factsheets".

NN (L) Asian High Yield

Introduction

The Sub-Fund was launched on 28 April 2014.

Investment objective and policy

This Sub-Fund shall invest primarily (minimum 2/3) in high yield bonds issued in Asia ex Japan or from companies with the majority of business exposure in Asia ex Japan. These bonds are different from traditional "Investment Grade" bonds in that they are issued by companies presenting a greater risk in terms of their ability to fully honour their commitments, which explains why they offer a higher return. Measured over a period of several years the aim of this Sub-Fund is to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

It is stipulated that any liquid assets held on an ancillary basis will not be taken into account when calculating the above-mentioned limit of two thirds.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), contingent convertible securities (up to a maximum of 10% of the Sub-Fund's net assets) Money Market Instruments, Rule 144 A securities, units of UCITS and other UCIs and deposits as described in Chapter III "Investment restrictions", section A "Eligible investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps
- forward currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices and baskets of securities.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

As these investments are subject to specific factors, they cannot be compared to investments made in the major industrialized countries. In the past, some developing countries have suspended or halted the payment of their external debt, including both the interest and the capital, with respect to issuers from the public and private sectors. These factors may also result in the positions held by the Sub-Fund becoming less liquid, or even illiquid.

Note: ratings are awarded by reputable credit rating agencies to fixed income instruments that can be traded on the markets. These ratings give a fair idea of the credit risk associated with the issuing entities: the lower the rating, the higher the credit risk. To compensate for this risk, however, a company with such a rating will offer high-yield bonds. Ratings awarded by ratings agencies range from AAA (almost no risk) to CCC (very high risk of defaulting). The rating varies from BB+ to CCC for the high yield

markets. With this in mind, this Sub-Fund is intended for well-informed investors who are aware of the degree of risk linked to their chosen investments.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other financial instruments used to reach the investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is high. The Sub-Fund's liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in a specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II "Sub-Fund Factsheets".

NN (L) Banking & Insurance

Introduction

The Sub-Fund was launched on 25 August 1997. On 8 April 2011, the Sub-Fund absorbed ING (L) Invest European Banking & Insurance (launched on 25 May 1998).

Investment objective and policy

The Sub-Fund essentially invests (minimum 2/3) in a diversified portfolio of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund's net assets – and convertible bonds) issued by companies in the financial sector. In particular, companies carrying out their business activity in the following industries are included: banks, consumer finance, investment banking and brokerage, asset management and insurance. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may invest a maximum of 25% of its net assets in equities and other participation rights traded on the Russian market – the "Moscow Interbank Currency Exchange – Russian Trade System" (MICEX-RTS).

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's

liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. Investments in a specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II "Sub-Fund Factsheets".

NN (L) Belgian Government Bond

Introduction

The Sub-Fund was launched on 17 June 2011. The Sub-Fund absorbed the following Sub-Fund: Belgium Government Euro (17 June 2011) a Sub-Fund of the ING (L) Renta Fund II SICAV.

Investment objective and policy

The Sub-Fund aims to generate returns by investing in Belgian government bonds. The average lifetime of the portfolio will exceed three years. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

Fixed-income Transferable Securities and/or Money Market Instruments issued or guaranteed by the governments of Belgium and/or Germany, and their local public authorities may represent more than 35% of the net asset value of the Sub-Fund, provided such exposure does comply with the principle of risk spreading described in Art. 45 (1) of the Law of 2010.

The Sub-Fund may also invest in other Transferable Securities (including warrants on Transferable Securities up to a maximum of 10% of the Sub-Fund's net assets), Money Market Instruments Rule 144 A securities, units of UCITS and other UCIs and deposits as described in Chapter III "Investment restrictions", section A "Eligible investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps
- credit default swaps
- forward currency contracts and currency options.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other financial instruments used to reach investment objectives is considered medium. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is low. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell.

Investments in a specific geographic area are more concentrated than investments in various geographical areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

Typical investor profile

The Sub-Fund particularly targets neutral investors as defined in Part II "Sub-Fund Factsheets".

NN (L) Commodity Enhanced

Introduction

This Sub-Fund was launched on 27 July 2010.

Investment objective and policy

The objective of this Sub-Fund is to deliver an efficient exposure to a diversified commodity portfolio and to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund aims to achieve this objective by investing into:

- (1) A dedicated Index named Commodity Enhanced Curve Index, which is a diversified commodity Index designed to outperform the Bloomberg Commodity (Excess Return) Index. The Commodity Enhanced Curve Index seeks outperformance by positioning its commodity exposure at various points on the commodity futures curve according to a proprietary algorithm designed and maintained by NN Investment Partners.

The investment into the Index is realised through Index swaps with high rated counterparties. These swaps allow the Sub-Fund to receive the return of the Commodity Enhanced Curve Index in exchange for the payment of a fixed fee.

The counterparty risk arising from the swap is limited by engaging in a daily collateral exchange process with swap counterparties. The Sub-Fund has also the possibility to close-out the swaps at any time.

In order to achieve its objectives, the Sub-Fund may also use futures and swaps on the Bloomberg Commodity (Excess Return) Index.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

The Sub-Fund will not acquire physical commodities directly.

- (2) A portfolio of Transferable Securities and/or Money Market Instruments issued or guaranteed by the United States of America for more than 35% of the Net Asset Value, provided such exposure does comply with the principle of risk spreading described in Art. 45 (1) of the Law of 2010.

With a view to achieving the investment objectives, the Sub-Fund may lastly invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets – and convertible bonds), Money Market Instruments, deposits and currencies, units of UCITS and other UCIs. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant. The Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the financial instruments used to reach the investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to medium. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in a specific geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II "Risk linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II "Sub-Fund Factsheets".

NN (L) Communication Services

Introduction

The Sub-Fund was launched on 6 November 1995. The Sub-Fund absorbed the following Sub-Funds: ING (L) Invest Mobile Telecom (23 May 2003) and ING (L) Invest European Telecom (8 April 2011). This Sub-Fund has been renamed as NN (L) Communication Services with effect from following change in its investment objective and policy.

Investment objective and policy

The Sub-Fund essentially invests (minimum 2/3) in a diversified portfolio of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund's net assets – and convertible bonds) issued by companies in the communication services sector. Explicitly included are internet media companies (including but not limited to social media platforms, search engines, interactive home entertainment, online streaming services) along with companies offering mainly fixed, wireless and mobile telecommunication services, as well as fibre optic cable network and/or high bandwidth communication services. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may invest a maximum of 25% of its net assets in equities and other participation rights traded on the Russian market – the "Moscow Interbank Currency Exchange – Russian Trade System" (MICEX-RTS).

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by

various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. Investments in a specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

NN (L) Consumer Goods

Introduction

On 9 May 2003, this Sub-Fund (launched on 20 November 1997 under the name ING (L) Invest Shopping) absorbed the ING (L) Invest Free Time Sub-Fund (launched on 21 June 1999).

Investment objective and policy

The Sub-Fund essentially invests (minimum 2/3) in a diversified portfolio of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund's net assets – and convertible bonds) issued by companies in the consumer discretionary sector. In particular, companies carrying out their business activity in the following industries are included:

- automobiles & auto components;
- consumer durables & apparel (household durables, leisure equipment & products, textiles & apparels);
- hotels, restaurants and leisure;
- media;
- distributors (wholesalers, internet and catalogue retail, multiline retail, speciality retail).

Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may invest a maximum of 25% of its net assets in equities and other participation rights traded on the Russian market – the "Moscow Interbank Currency Exchange – Russian Trade System" (MICEX-RTS).

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments;
- Index futures and options;
- interest rate futures, options and swaps;
- performance swaps;
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. Investments in a specific theme are more concentrated than investments in various themes. NN (L) Emerging Europe Equity

Introduction

This Sub-Fund was launched with effect from 10 December 2001 following the contribution of the assets of the “Emerging Europe Equity” Sub-Fund (launched on 21 March 2000) of the ING International SICAV. On 22 September 2003, the Sub-Fund absorbed the BBL Invest Emerging Europe Sub-Fund. On 8 April 2011, ING (L) Invest Emerging Europe absorbed ING (L) Invest Balkan (launched on 21 January 2008).

Investment objective and policy

The Sub-Fund essentially invests (minimum 2/3) in a diversified portfolio of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund’s net assets – and convertible bonds) issued by companies established, listed or traded in any emerging European country. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company’s Prospectus.

The Sub-Fund may invest in equities and other participation rights traded on the Russian market – the “Moscow Interbank Currency Exchange – Russian Trade System” (MICEX-RTS).

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund’s net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments;
- Index futures and options;
- interest rate futures, options and swaps;
- performance swaps;
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III “Additional information”, Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered as high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund’s

liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund’s performance. Investments in a specific geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III “Additional information”, Chapter II: “Risk linked to the investment universe: detailed description”.

Warning

Investors’ attention is drawn to the fact that an investment in the Shares of this Sub-Fund involves a higher level of risk than that generally found on the majority of markets in Western Europe, North America or other developed countries.

These risks include:

- political risk: i.e. the instability and volatility of the political environment and situation;
- economic risk: i.e. high inflation rates, risks linked to investments in recently privatised companies, monetary depreciation, little movement on the financial markets;
- legal risk: insecurity with respect to the law and general difficulty in getting laws recognised and/or passed;
- tax risk: in some of the aforementioned States, taxes may be very high and there is no guarantee whatsoever that the legislation will be interpreted in a uniform and consistent manner. The local authorities are often vested with a discretionary power to create new taxes, which may sometimes be applied retrospectively.

There is also the risk of loss due to the shortage of adequate systems in place for transfer, valuation, settlement and accounting as well as securities registration, the safekeeping of securities and the liquidation of transactions, with such risks being less common in Western Europe, North America and other developed countries. It should be noted that the correspondent bank or banks will not always be legally liable for or be in a position to pay damages resulting from the acts or omissions of its representatives or employees.

As a result of the risks explained above, volatility and illiquidity are much higher for investments when the market capitalisation in these States is lower than that of developed markets.

The global exposure of this Sub-Fund is determined using the commitment method.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II “Sub-Fund Factsheets”.

NN (L) Emerging Markets Corporate Debt

Introduction

Investment objective and policy

The aim of this Sub-Fund is to provide emerging market corporate bond exposure by investing in a diversified portfolio consisting mainly of fixed income Transferable Securities, Rule 144A securities, Money Market Instruments, derivatives and deposits. Fixed income securities and Money Market Instruments will be mainly issued by public or private issuers in developing countries ("emerging markets") in the Americas (including the Caribbean), Central Europe, Eastern Europe, Asia, Africa and the Middle East. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may be exposed to various exchange rate risks linked to investments in securities denominated in currencies other than that of the Sub-Fund or in derivative instruments with underlying exchange rates or currencies.

Transferable Securities, issued by the public and/or private sector, primarily include fixed rate bonds, floating rate bonds, bonds with warrants and convertible bonds, bonds resulting from the restructuring of syndicated loans or bank loans, and subordinated bonds. The term "Money Market Instruments" mainly, but not exclusively, includes investments in deposits, commercial papers, short-term bonds, treasury certificates and securitised bonds.

The Sub-Fund may invest directly, up to 25% of its net assets, in securities traded on the Russian market – the "Moscow Interbank Currency Exchange – Russian Trade System" (MICEX-RTS) as well as indirectly in Russian securities and Eurobonds traded on Regulated Markets as defined in the Part III "Additional information", Chapter III of this prospectus.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to a maximum of 10% of the Sub-Fund's net assets), contingent convertible securities (up to a maximum of 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III "Additional information", Chapter III "Investment Restrictions", Section A) "Eligible investments". However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

The Sub-Fund may have recourse to financial derivative instruments for hedging purposes, for efficient portfolio management and/or as part of the investment strategy of the Sub-Fund. The Sub-Fund may therefore invest in all derivative financial instruments authorised by Luxembourg law, including (but not exclusively):

- Derivative financial instruments linked to market fluctuations such as call and put options, swaps and securities futures contracts, Indices, baskets of securities or any other financial instruments, and Total Return Swaps that are derivative financial instruments linked to a swap agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains.
- Derivative financial instruments linked to exchange rate or currency fluctuations of all types, such as currency futures contracts or currency call and put options, currency swaps, currency futures transactions and false risk cover through which the Sub-Fund carries out a cover transaction in its

Reference Currency (Index or Reference Currency) against exposure in a single currency by selling or buying another currency closely linked to its Reference Currency.

- Derivative financial instruments linked to interest rate risks, such as call and put options on interest rates, interest rate swaps, future rate agreements, interest rate futures transactions, swaptions whereby a counterparty receives a fee in exchange for processing a future swap at a rate previously agreed should a certain contingent event arise, for example where future rates are set according to a reference Index.
- Derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices and baskets of securities.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

As these investments are subject to specific factors, they cannot be compared to investments made in the major industrialized countries. In the past, some developing countries have suspended or halted the payment of their external debt, including both the interest and the capital, with respect to issuers from the public and private sectors. These factors may also result in the positions held by the Sub-Fund becoming less liquid, or even illiquid.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other financial instruments used to reach the investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is high. The Sub-Fund's liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact the Sub-Fund's performance. Investments in specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund will be determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II "Sub-Fund Factsheets".

NN (L) Emerging Markets Debt (Hard Currency)

Introduction

The Sub-Fund was launched on 29 April 2011. The Sub-Fund absorbed the following Sub-Fund: Emerging Markets Debt (Hard Currency) (29 April 2011) a Sub-Fund of the ING (L) Renta Fund SICAV and the ING (L) Flex Emerging Markets Debt (US Dollar) (23 September 2011) a former Sub-Fund of NN (L) Flex SICAV (formerly ING (L) Flex).

Investment objective and policy

The aim of this Sub-Fund is to make diversified investments, mainly (minimum 2/3 of the portfolio) in Transferable Securities and fixed income Money Market Instruments issued by public or private issuers in low or middle-income developing countries. These countries are often referred to as the "emerging markets". The majority of investments are to be carried out in South and Central America (including the Caribbean), Central Europe, Eastern Europe, Asia, Africa and the Middle East. More specifically, investments will be made in countries where the manager is able to assess the specific political and economic risks and in countries that have undertaken certain economic reforms and which have reached certain growth objectives. This Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

It is stipulated that any liquid assets held on an ancillary basis will not be taken into account when calculating the above-mentioned limit of two thirds.

Transferable Securities, issued by the public and/or private sector, primarily include fixed rate bonds, floating rate bonds, bonds with warrants and convertible bonds, bonds resulting from the restructuring of syndicated loans or bank loans (e.g. "Brady" bonds) and subordinated bonds. The term "Money Market Instruments" mainly, but not exclusively, includes investments in deposits, commercial papers, short-term bonds, treasury certificates and securitised bonds. This list is not exhaustive.

The Sub-Fund will not invest in Russian shares, bonds or Money Market Instruments whose settlement/delivery can only be carried out via a Russian system. However, the Sub-Fund may invest in Russian bonds and Money Market Instruments whose settlement/delivery can be carried out via Clearstream or Euroclear.

Investments shall only be made in the currencies of OECD member countries. However, the manager shall, in principle, hedge the currency risk inherent in these investments. This may be carried out by hedging the currency risk in relation to the Reference Currency of assets denominated in currencies other than the Reference Currency, through the use of the techniques and financial instruments described in Part III "Additional information", Chapter IV "Techniques and instruments". Investors should be aware that any currency hedging process may not give a precise hedge. Furthermore, there is no guarantee that the hedging will be totally successful. Investors in the Hedged Share-Classes may have exposure to currencies other than the currency of the Hedged Share-Class.

"Hard Currency" refers to the Sub-Fund's investment currencies. The assets in which the Sub-Fund invests are denominated in the currencies of economically developed and politically stable countries which are members of the OECD.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to a maximum of 10% of the Sub-Fund's net assets), contingent convertible securities (up to a maximum of 10% of the Sub-Fund's net assets), Money Market Instruments, Rule 144A Transferable Securities, units of UCITS and other UCIs and deposits as described in Part III "Additional information", Chapter

III "Investment Restrictions", Section A) "Eligible investments". However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps
- forward currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices and baskets of securities.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

As these investments are subject to specific factors, they cannot be compared to investments made in the major industrialised countries. In the past, some developing countries have suspended or halted the payment of their external debt, including both the interest and the capital, with respect to issuers from the public and private sectors.

These factors may also result in the positions held by the Sub-Fund becoming less liquid, or even illiquid.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other financial instruments used to reach the investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is high. The Sub-Fund's liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II “Sub-Fund Factsheets”.

NN (L) Emerging Markets Debt (Local Bond)

Introduction

The Sub-Fund was launched on 29 April 2011. The Sub-Fund absorbed the following Sub-Fund: Emerging Markets Debt (Local Bond) (29 April 2011) a Sub-Fund of the ING (L) Renta Fund SICAV.

Investment objective and policy

The aim of this Sub-Fund is to invest in a diversified portfolio comprised predominantly of fixed income securities, Money Market Instruments, derivatives and deposits, with strategic emphasis on emerging market interest rate duration exposure and/or emerging market currency risk exposure. Fixed income securities and Money Market Instruments will be predominantly issued by and/or denominated or having exposure in the currencies of developing countries ("emerging markets") in Latin America, Asia, Central Europe, Eastern Europe, Africa and the Middle East. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may be exposed to various exchange rate risks linked to investments in securities denominated in currencies other than that of the Sub-Fund or in derivative instruments with underlying exchange rates or currencies.

Furthermore, a maximum of 1/3 of the net assets of the Sub-Fund may be invested in fixed income Transferable Securities, derivatives and Money Market Instruments issued by other countries, including OECD member states. These investments will be denominated and have exposure to hard currencies (e.g. Euro, US dollar).

The Sub-Fund may invest directly, up to 25% of its net assets, in securities traded on the Russian market – the "Moscow Interbank Currency Exchange – Russian Trade System" (MICEX-RTS) as well as indirectly in Russian securities and Eurobonds traded on Regulated Markets as defined in the Part III "Additional information", Chapter III of this prospectus.

Furthermore, the fund may invest in structured products, i.e. Transferable Securities as defined in Article 41 (1) of the Law of 2010, in order to access certain specific markets and to overcome problems linked to taxation and custody which arise when investing in the markets of developing countries.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to a maximum of 10% of the Sub-Fund's net assets), contingent convertible securities (up to a maximum of 10% of the Sub-Fund's net assets) and asset-back securities up to a maximum of 20% of the Sub-Fund's net assets, Rule 144A Transferable Securities, units of UCITS and other UCIs and deposits as described in Chapter III "Investment Restrictions" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

The Sub-Fund may have recourse to financial derivative instruments for hedging purposes, for efficient portfolio management and/or as part of the investment strategy of the Sub-Fund. The Sub-Fund may therefore invest in all derivative financial instruments authorised by Luxembourg law, including (not exclusively):

- Derivative financial instruments linked to market fluctuations such as call and put options, swaps and securities futures contracts, Indices, baskets of securities or any other financial instruments, and Total Return Swaps that

are derivative financial instruments linked to a swap agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains.

- Derivative financial instruments linked to exchange rate or currency fluctuations of all types, such as currency futures contracts or currency call and put options, currency swaps, currency futures transactions and false risk cover through which the Sub-Fund carries out a cover transaction in its Reference Currency (Index or Reference Currency) against exposure in a single currency by selling or buying another currency closely linked to its Reference Currency.
- Derivative financial instruments linked to interest rate risks, such as call and put options on interest rates, interest rate swaps, future rate agreements, interest rate futures transactions, swaptions whereby a counterparty receives a fee in exchange for processing a future swap at a rate previously agreed should a certain contingent event arise, for example where future rates are set according to a reference Index, caps and floors and for which the seller, in exchange for a premium paid in advance agrees to compensate the buyer if interest rates go above or below a strike price at certain pre-defined dates during the lifetime of the agreement.
- Derivative financial risks linked to credit risks, namely credit default derivatives, such as credit default swaps, Indices and baskets of securities.

The Sub-Fund may invest in securities traded on Bond Connect. Bond Connect is a market facilitating investment to the Chinese bond market. The risks associated to investments through Bond Connect are detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other financial instruments used to reach the investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is high. The Sub-Fund's liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. Investments in specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

NN (L) Emerging Markets Debt (Local Currency)

Introduction

The Sub-Fund was launched on 29 April 2011. The Sub-Fund absorbed the following Sub-Fund: Emerging Markets Debt (Local Currency) (29 April 2011) a Sub-Fund of the ING (L) Renta Fund SICAV.

Investment objective and policy

The aim of this Sub-Fund is to make diversified investments in fixed income Transferable Securities, Money Market Instruments, derivatives and deposits, predominantly denominated in or having exposure to the currencies of low or middle-income developing countries ("emerging markets") in Latin America, Asia, Central Europe, Eastern Europe, Africa and the Middle East. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may be exposed to various exchange rate risks linked to investments in securities denominated in currencies other than that of the Sub-Fund or in derivative instruments with underlying exchange rates or currencies.

Furthermore, a maximum of 1/3 of the net assets of the Sub-Fund may be invested in fixed income Transferable Securities, Money Market Instruments, derivatives and deposits denominated in or having an exposure to hard currencies (e.g. Euro, US dollar).

The Sub-Fund may invest directly, up to 25% of its net assets, in securities traded on the Russian market – the "Moscow Interbank Currency Exchange – Russian Trade System" (MICEX-RTS) as well as indirectly in Russian securities and Eurobonds traded on Regulated Markets as defined in Part III "Additional information", Chapter III "Investment restrictions".

The term "fixed income Transferable Securities" mainly, but not exclusively, includes fixed interest bonds, variable interest bonds, bonds with warrants, convertible bonds and subordinated bonds. The term "Money Market Instruments" mainly, but not exclusively, includes commercial papers, short-term bonds, treasury certificates and securitised bonds. Furthermore, the fund may invest in structured products, i.e. Transferable Securities as defined in Article 41 (1) of the Law of 2010, in order to access certain specific markets and to overcome problems linked to taxation and custody which arise when investing in the markets of developing countries.

The fund may hold cash and similar assets on an ancillary basis.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to a maximum of 10% of the Sub-Fund's net assets), contingent convertible securities (up to a maximum of 10% of the Sub-Fund's net assets), asset back securities up to a maximum of 20% of the Sub-Fund's net assets, Rule 144A Transferable Securities, units of UCITS and other UCIs and deposits as described in Part III "Additional information", Chapter III "Investment Restrictions", Section A) "Eligible investments". However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

The Sub-Fund may have recourse to financial derivative instruments for hedging purposes, for efficient portfolio management and/or as part of the investment strategy of the Sub-Fund. The Sub-Fund may therefore invest in all derivative financial instruments authorised by Luxembourg law, including (not exclusively):

- Derivative financial instruments linked to market fluctuations such as call and put options, swaps and securities futures contracts, Indices, baskets of securities or any other financial instruments, and Total Return Swaps that are derivative financial instruments linked to a swap agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains.
- Derivative financial instruments linked to exchange rate or currency fluctuations of all types, such as currency futures contracts or currency call and put options, currency swaps, currency futures transactions and false risk cover through which the Sub-Fund carries out a cover transaction in its Reference Currency (Index or Reference Currency) against exposure in a single currency by selling or buying another currency closely linked to its Reference Currency.
- Derivative financial instruments linked to interest rate risks, such as call and put options on interest rates, interest rate swaps, future rate agreements, interest rate futures transactions, swaptions whereby a counterparty receives a fee in exchange for processing a future swap at a rate previously agreed should a certain contingent event arise, for example where future rates are set according to a reference Index, caps and floors and for which the seller, in exchange for a premium paid in advance agrees to compensate the buyer if interest rates go above or below a strike price at certain pre-defined dates during the lifetime of the agreement.
- Derivative financial instruments linked to credit risks, namely credit default derivatives, such as credit default swaps, Indices and baskets of securities.

Investments in emerging markets are subject to specific factors, they cannot be compared to investments made in the major industrialised countries. In the past, some developing countries have suspended or halted the payment of their external debt, including both the interest and the capital, with respect to issuers from the public and private sectors.

These factors may also result in the positions held by the Sub-Fund becoming less liquid, or even illiquid.

The Sub-Fund may invest in securities traded on Bond Connect. Bond Connect is a market facilitating investment to the Chinese bond market. The risks associated to investments through Bond Connect are detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other financial instruments used to reach the investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is high. The Sub-Fund's liquidity risk is set to high. Liquidity risks may

arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. Investments in a specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

NN (L) Emerging Markets Debt Opportunities

Introduction

The Sub-Fund was launched on 15 July 2015 following the merger with “NN (L) Patrimonial Emerging Markets Debt Opportunities”, a Sub-Fund of NN (L) Patrimonial.

Investment objective and policy

This Sub-Fund is focused on emerging markets. The portfolio will mainly invest in emerging markets debt directly via Transferable Securities and/or indirectly via funds and/or Exchange Traded Funds (“ETF”).

Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company’s Prospectus.

Tactical asset allocation overlay is added to exploit short term deviations from long-term asset allocation.

Emerging Markets debt will be issued by government related bodies and/or by companies domiciled or having registered offices in an emerging market country and/or which carry out a preponderant part of their activity in emerging markets.

Emerging markets include South and Central America (including the Caribbean), Central Europe, Eastern Europe, Asia, Africa and the Middle East. This Sub-Fund may also invest, on an ancillary basis, in non-emerging markets asset classes.

This Sub-Fund is mainly invested in eligible worldwide investments as defined below:

The Sub-Fund may invest in Transferable Securities (including warrants on Transferable Securities up to a maximum of 10% of the Sub-Fund’s net assets), contingent convertible securities (up to a maximum of 10% of the Sub-Fund’s net assets), Money Market Instruments, Rule 144A securities, units of UCITS and other UCIs and deposits, as described in this prospectus in Part III “Additional information”, Chapter III “Investment Restrictions”, Section A “Eligible investments”. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

The Sub-Fund may be exposed to various exchange risks linked to investments in securities denominated in currencies other than that of the Sub-Fund or in derivative instruments with underlying exchange rates or currencies.

By derogation to the provisions of Chapter IV “Financial Techniques and Instruments” of Part III of this prospectus, the Sub-Fund may use derivative financial instruments for the purpose of hedging in order to ensure efficient portfolio management and to achieve the objectives of the Sub-Fund.

The Sub-Fund may also invest in any derivative financial instruments authorised in Luxembourg law, including, but not limited to, the following:

- Derivative financial instruments linked to market fluctuations such as call and put options, swaps and securities futures contracts, Indices, commodity Indices, baskets of securities or any other financial instruments and Total Return Swaps that are derivative financial instruments linked to a swap agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains;
- Derivative financial instruments of all types linked to exchange rate or currency fluctuations, such as currency

futures contracts or currency call and put options, currency swaps, currency futures transactions and proxy hedging through which the Sub-Fund carries out a hedging transaction in its Reference Currency (Index or Reference Currency) against exposure to a single currency by selling or buying another currency closely linked to its Reference Currency.

- Derivative financial instruments linked to interest rate risks, such as call and put options on interest rates, interest rate swaps, future rate agreements, interest rate futures transactions, swaptions –whereby a counterparty receives a fee in exchange for processing a future swap at a rate previously agreed should a certain contingent event arise, for example where future rates are set according to a reference Index-, and caps and floors for which the seller, in exchange for a premium paid in advance, agrees to compensate the buyer if interest rates go above or below a strike price at certain pre-defined dates during the lifetime of the agreement;
- Derivative financial instruments linked to credit risks, namely credit derivatives, designed to isolate and transfer the credit risk associated with a given reference rate, such as credit spread derivatives credit default swaps, whereby the counterparty (the buyer of the protection) pays a periodic fee in exchange for a contingent payment by the seller of the protection after a reference issuer experiences a credit incident. The buyer of the protection must either sell certain bonds issued by the reference issuer at par value (or at another reference value or at a determined strike price) when a credit incident occurs, or receive payment in cash based on the difference between the market price and the reference price. A credit incident is commonly defined as a drop in the rating awarded by a rating agency, bankruptcy, insolvency, sequestration, debt restructuring or payment default. Credit default swaps may involve higher risk than direct investments in bonds. The credit default swap market may sometimes be less liquid than bond markets.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in this prospectus in Part III “Additional information”, Chapter II “Risks linked to the investment universe: detailed description”.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

As these investments are subject to specific factors, they cannot be compared to investments made in the major industrialized countries. In the past, some developing countries have suspended or halted the payment of their external debt, including both the interest and the capital, with respect to issuers from the public and private sectors. These factors may also result in the positions held by the Sub-Fund becoming less liquid, or even illiquid.

The Sub-Fund may invest in securities traded on Bond Connect. Bond Connect is a market facilitating investment to the Chinese bond market. The risks associated to investments through Bond Connect are detailed in Part III “Additional information”, Chapter II: “Risks linked to the investment universe: detailed description”.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is high. The Sub-Fund's liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. No guarantee is provided as to the recovery of the initial investment. The risk associated with derivative financial instruments is detailed in in Part III "Additional information", Chapter II "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II "Sub-Fund Factsheets".

Fund type

Investments in fixed-income asset classes.

NN (L) Emerging Markets Debt Short Duration (Hard Currency)

Introduction

The Sub-Fund was launched on 29 March 2018.

Investment objective and policy

The Sub-Fund's aim is to make diversified investments, predominantly (minimum 2/3 of the portfolio) in fixed income transferable securities and money market instruments issued by public or private issuers in low or middle-income developing countries. These countries are often referred to as the "emerging markets countries". The average weighted lifetime of the portfolio will not exceed three years.

The majority of investments are to be carried out in South and Central America (including the Caribbean), Central Europe, Eastern Europe, Asia, Africa and the Middle East. More specifically, investments will be made in countries where the manager is able to assess the specific political and economic risks and in countries that have undertaken certain economic reforms and which have reached certain growth objectives. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

It is stipulated that any liquid assets held on an ancillary basis will not be taken into account when calculating the above-mentioned limit of two thirds.

Transferable Securities, issued by the public and/or private sector, primarily include fixed rate bonds, floating rate bonds, bonds with warrants and convertible bonds, bonds resulting from the restructuring of syndicated loans or bank loans (e.g. "Brady" bonds) and subordinated bonds. The term "Money Market Instruments" mainly, but not exclusively, includes investments in deposits, commercial papers, short-term bonds, treasury certificates and securitised bonds. This list is not exhaustive.

The Sub-Fund's investment universe includes securities whose credit quality is investment grade and/ or below investment grade. Within that universe the Investment Manager may also select non-rated securities for which an internal rating is assigned. The internal rating assigned is then reviewed on an ongoing basis as any other rated debt security. The Investment Manager aims to keep the average rating of the Sub-Fund portfolio at BBB- or better.

The Sub-Fund will not invest in Russian shares, bonds or Money Market Instruments whose settlement/delivery can only be carried out via a Russian system. However, the Sub-Fund may invest in Russian bonds and Money Market Instruments whose settlement/delivery can be carried out via Clearstream or Euroclear.

"Hard Currency" refers to the Sub-Fund's investment currencies. The assets in which the Sub-Fund invests are denominated in the currencies of economically developed and politically stable countries which are members of the OECD.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities, contingent convertible securities up to a maximum of 10% of the Sub-Fund's net assets and unrated bonds up to a maximum of 20% of the Sub-Fund's net assets), Money Market Instruments, Rule 144A Transferable Securities, units of UCITS and other UCIs and deposits as described in Part III "Additional information", Chapter III "Investment Restrictions", Section A) "Eligible investments". However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were

invested in the underlying assets because of the higher volatility of the value of the warrant.

The Sub-Fund will not invest in instruments rated below B-/B3 as assigned by independent rating organisations such as Standard & Poor's, Moody's and/or Fitch, or equivalent as determined by the Investment Manager if the instrument is not rated.

If an instrument is rated by only one of the foregoing rating agencies, that rating shall apply. If it is rated by two or more of such rating agencies, the second best rating shall apply.

Any security that is subsequently downgraded below B-/B3 or equivalent may continue to be held for a period of six months unless it represents more than 3% of the Sub-Funds' net assets, in which case it shall be sold immediately.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps
- forward currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices and baskets of securities.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

As these investments are subject to specific factors, they cannot be compared to investments made in the major industrialised countries. In the past, some developing countries have suspended or halted the payment of their external debt, including both the interest and the capital, with respect to issuers from the public and private sectors.

These factors may also result in the positions held by the Sub-Fund becoming less liquid, or even illiquid.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with bonds and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is high.

The Sub-Fund's liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in a specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional

information”, Chapter II: “Risks linked to the investment universe: detailed description”.

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III “Additional information”, Chapter IV: Techniques and instruments, A: General Provisions.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II “Sub-Fund Factsheets”.

NN (L) Emerging Markets Equity Opportunities

Introduction

The Sub-Fund was launched on 11 December 2015.

Investment objective and policy

The Sub-Fund mainly invests in a diversified portfolio of equities issued by companies that are either established, listed or traded in any emerging country in Latin America (including the Caribbean), Asia (excluding Japan), Eastern Europe, the Middle East and Africa, or have a substantial portion of their revenues or profits coming from emerging markets. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may invest a maximum of 25% of its net assets in equities and other participation rights, such as American depositary receipts and global depositary receipts, traded on the Moscow Interbank Currency Exchange – Russian Trade System.

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144 A Securities.

The Sub-Fund may also invest on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets.

The Sub-Fund may invest up to 20% of its net assets in China A-Shares issued by companies incorporated in the PRC via Stock Connect. The Sub-Fund may therefore be subject to PRC risks, including but not limited to, geographical concentration risk, risk of change in PRC political, social or economic policy, liquidity and volatility risk, RMB currency risk and risks relating to PRC taxation. The Sub-Fund is also subject to specific risks applicable to investing via Stock Connect such as quota limitations, suspension in trading, price fluctuations in China A-Shares when in particular Stock Connect is not trading but PRC market is open, and operational risk. Stock Connect is relatively new, hence some regulations are untested and subject to change, which may adversely affect the Sub-Fund. The risks associated to investments in A-Shares are detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance.

Investments in a specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risk linked to the investment universe: detailed description".

Warning

Investors' attention is drawn to the fact that an investment in the Shares of this Sub-Fund involves a higher level of risk than that generally found on the majority of markets in Western Europe, North America or other developed countries.

These risks include:

- political risk: i.e. the instability and volatility of the political environment and situation;
- economic risk: i.e. high inflation rates, risks linked to investments in recently privatised companies, monetary depreciation, little movement on the financial markets;
- legal risk: insecurity with respect to the law and general difficulty in getting laws recognised and/or passed;
- tax risk: in some of the aforementioned States, taxes may be very high and there is no guarantee whatsoever that the legislation will be interpreted in a uniform and consistent manner. The local authorities are often vested with a discretionary power to create new taxes, which may sometimes be applied retrospectively.

There is also the risk of loss due to the shortage of adequate systems in place for transfer, valuation, settlement and accounting as well as securities registration, the safekeeping of securities and the liquidation of transactions, with such risks being less common in Western Europe, North America and other developed countries. It should be noted that the correspondent bank or banks will not always be legally liable for or be in a position to pay damages resulting from the acts or omissions of its representatives or employees. As a result of the risks explained above, volatility and illiquidity are much higher for investments when the market capitalisation in these States is lower than that of developed markets.

The global exposure of this Sub-Fund is determined using the commitment method.

Typical investor profile

The Sub-Fund particularly targets neutral investors as defined in Part II "Sub-Fund Factsheets".

NN (L) Emerging Markets High Dividend

Introduction

This Sub-Fund was launched on 15 May 2007 under the name of ING (L) Invest Asia Pacific High Dividend. The Sub-Fund absorbed the following Sub-Fund: ING (L) Invest Emerging Markets (19 November 2012).

Investment objective and policy

The Sub-Fund essentially invests (minimum 2/3 of the Sub-Fund's net assets) in a diversified portfolio of equities or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund's net assets – and convertible bonds) or both, issued by companies established, listed or traded in any emerging or developing country in Latin America (including the Caribbean), Asia (excluding Japan), Eastern Europe, the Middle East and Africa and offering an attractive dividend yield. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may invest a maximum of 25% of its net assets in equities and other participation rights, such as American depositary receipts and global depositary receipts, traded on Russian market – the "Moscow Interbank Currency Exchange – Russian Trade System" (MICEX-RTS).

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144 A Securities.

The Sub-Fund may also invest (maximum 1/3 of the Sub-Fund's net assets), on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits which may or may not be related to the minimum 2/3 of the Sub-Fund's net assets as referred to in the above. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets.

The Sub-Fund may invest up to 20% of its net assets in China A-Shares issued by companies incorporated in the PRC via Stock Connect. The Sub-Fund may therefore be subject to PRC risks, including but not limited to, geographical concentration risk, risk of change in PRC political, social or economic policy, liquidity and volatility risk, RMB currency risk and risks relating to PRC taxation. The Sub-Fund is also subject to specific risks applicable to investing via Stock Connect such as quota limitations, suspension in trading, price fluctuations in China A-Shares when in particular Stock Connect is not trading but PRC market is open, and operational risk. Stock Connect is relatively new, hence some regulations are untested and subject to change, which may adversely affect the Sub-Fund. The risks associated to investments in A-Shares are detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. Investments in a specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risk linked to the investment universe: detailed description".

Warning

Investors' attention is drawn to the fact that an investment in the Shares of this Sub-Fund involves a higher level of risk than that generally found on the majority of markets in Western Europe, North America or other developed countries.

These risks include:

- political risk: i.e. the instability and volatility of the political environment and situation;
- economic risk: i.e. high inflation rates, risks linked to investments in recently privatised companies, monetary depreciation, little movement on the financial markets;
- legal risk: insecurity with respect to the law and general difficulty in getting laws recognised and/or passed;
- tax risk: in some of the aforementioned States, taxes may be very high and there is no guarantee whatsoever that the legislation will be interpreted in a uniform and consistent manner. The local authorities are often vested with a discretionary power to create new taxes, which may sometimes be applied retrospectively.

There is also the risk of loss due to the shortage of adequate systems in place for transfer, valuation, settlement and accounting as well as securities registration, the safekeeping of securities and the liquidation of transactions, with such risks being less common in Western Europe,

North America and other developed countries. It should be noted that the correspondent bank or banks will not always be legally liable for or be in a position to pay damages resulting from the acts or omissions of its representatives or employees. As a result of the risks explained above, volatility and illiquidity are much higher for investments when the market capitalisation in these States is lower than that of developed markets.

NN (L) Energy

Introduction

The Sub-Fund was launched on 20 November 1997.

Investment objective and policy

The Sub-Fund essentially invests (minimum 2/3) in a diversified portfolio of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund's net assets – and convertible bonds) issued by companies in the energy sector. In particular, companies carrying out their business activity in the following industries are included:

- oil and gas (exploration, production, refining and/or transportation of oil and gas);
- energy equipment and services (manufacture and supply of oil drilling equipment and other energy-related equipment and services).

Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may invest a maximum of 25% of its net assets in equities and other participation rights traded on the Russian market – the "Moscow Interbank Currency Exchange – Russian Trade System" (MICEX-RTS).

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development

of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. Investments in a specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risk linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

Warning

Investors' attention is drawn to the fact that an investment in the Shares of this Sub-Fund involves a higher level of risk than that generally found on the majority of markets in Western Europe, North America or other developed countries.

These risks include:

- political risk: i.e. the instability and volatility of the political environment and situation;
- economic risk: i.e. high inflation rates, risks linked to investments in recently privatised companies, monetary depreciation, little movement on the financial markets;
- legal risk: insecurity with respect to the law and general difficulty in getting laws recognised and/or passed;
- tax risk: in some of the aforementioned States, taxes may be very high and there is no guarantee whatsoever that the legislation will be interpreted in a uniform and consistent manner. The local authorities are often vested with a discretionary power to create new taxes, which may sometimes be applied retrospectively.

There is also the risk of loss due to the shortage of adequate systems in place for transfer, valuation, settlement and accounting as well as securities registration, the safekeeping of securities and the liquidation of transactions, with such risks being less common in Western Europe, North America and other developed countries. It should be noted that the correspondent bank or banks will not always be legally liable for or be in a position to pay damages resulting from the acts or omissions of its representatives or employees.

As a result of the risks explained above, volatility and illiquidity are much higher for investments when the market capitalisation in these States is lower than that of developed markets.

NN (L) Euro Covered Bond

Introduction

The Sub-Fund was launched on 19 March 2012.

Investment objective and policy

This Sub-Fund aims to generate returns by mainly investing in a portfolio of covered bonds and Money Market Instruments denominated in Euro. Covered bonds are secured, senior, debt securities of an issuer, usually a bank, that provide investors with recourse to both the issuer and the underlying, dynamic collateral pool. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

When selecting investments the Investment Manager shall analyse, maintain and update the credit rating of future investments and shall ensure that the average rating of the portfolio is BBB - or better. The Investment Manager will always take the quality and diversity of issuers and sectors, along with the maturity date, into consideration.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), contingent convertible securities (up to a maximum of 10% of the Sub-Fund's net assets), Money Market Instruments, Rule 144 A securities, units of UCITS and other UCIs and deposits as described in Chapter III "Investment restrictions", section A "Eligible investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps
- forward currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices and baskets of securities.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other financial instruments used to reach the investment objectives is considered medium. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development

of issuers who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is medium. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in a specific geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

Typical investor profile

The Sub-Fund particularly targets neutral investors as defined in Part II "Sub-Fund Factsheets".

NN (L) Euro Credit

Introduction

The Sub-Fund was launched on 29 April 2011. The Sub-Fund absorbed the following Sub-Fund: Eurocredit (29 April 2011) a Sub-Fund of the ING (L) Renta Fund SICAV.

Investment objective and policy

This Sub-Fund aims to generate returns via the active management of a portfolio of bonds and Money Market Instruments issued mainly by financial institutions and companies by investing a minimum of 2/3 in bonds and Money Market Instruments denominated in euro. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

When selecting investments the Investment Manager shall analyse, maintain and update the credit rating of future investments and shall ensure that the average rating of the portfolio is BBB - or better. The manager will always take the quality and diversity of issuers and sectors, along with the maturity date, into consideration.

It is stipulated that any liquid assets held on an ancillary basis will not be taken into account when calculating the above-mentioned limit of two thirds.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), contingent convertible securities (up to a maximum of 10% of the Sub-Fund's net assets), Money Market Instruments, Rule 144 A securities, units of UCITS and other UCIs and deposits as described in Chapter III "Investment restrictions", section A "Eligible investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps
- forward currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices and baskets of securities.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

Potential investors should note that the type of investments carried out in this Sub-Fund involve a relatively higher level of risk than investments in similar Sub-Funds investing in government bonds and money-market instruments.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other financial instruments used to reach the investment objectives is considered medium. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers underlying investments is medium. The Sub-Fund's liquidity risk is set to medium. Liquidity risks may arise when a specific underlying investment is difficult to sell. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

NN (L) EURO Equity

Introduction

This Sub-Fund was launched with effect from 20 December 2001. The Sub-Fund absorbed the following Sub-Funds: ING (L) Invest Portugal (11 April 2003), ING (L) Invest Greece (11 April 2003), ING (L) Invest Top 30 Euro (11 April 2003), ING (L) Invest Spanish Equity (11 April 2003), BBL Invest Italy (29 September 2003), BBL Invest Spain (29 September 2003) and ING (L) Invest Dutch Equity (8 April 2011).

Investment objective and policy

The Sub-Fund essentially invests (minimum 2/3) in a diversified portfolio of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund's net assets – and convertible bonds) issued by companies listed on stock exchanges in the Euro zone. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in a specific geographic area are more concentrated than investments in

various geographic areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II "Sub-Fund Factsheets".

NN (L) Euro Fixed Income

Introduction

The Sub-Fund was launched on 29 April 2011. The Sub-Fund absorbed the following Sub-Fund: Euro (29 April 2011) a Sub-Fund of the ING (L) Renta Fund SICAV.

Investment objective and policy

This Sub-Fund aims to generate returns via the active management of a portfolio of bonds and Money Market Instruments by investing primarily (minimum 2/3) in bonds and Money Market Instruments denominated in euro. Measured over a period of several years the Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

It is stipulated that any liquid assets held on an ancillary basis will not be taken into account when calculating the above-mentioned limit of two thirds.

Fixed-income Transferable Securities and/or Money Market Instruments issued or guaranteed by the governments of the Netherlands, Germany, Italy, Spain and/or France, and their local public authorities may represent more than 35% of the net asset value of the Sub-Fund, provided such exposure does comply with the principle of risk spreading described in Art. 45 (1) of the Law of 2010.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), contingent convertible securities (up to a maximum of 10% of the Sub-Fund's net assets), Money Market Instruments, Rule 144 A securities, units of UCITS and other UCIs and deposits as described in Chapter III "Investment restrictions", section A "Eligible investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps
- forward currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices and baskets of securities.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other financial instruments used to reach the investment objectives is considered medium. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is medium. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in a specific geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

NN (L) Euro High Dividend

Introduction

The Sub-Fund was launched on 8 March 1999 under the name 'Euro High Yield'.

Investment objective and policy

The purpose of this Sub-Fund is to increase the value of the capital invested by investing predominantly in equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund's net assets – and convertible bonds) listed on stock exchanges of countries in the Eurozone offering an attractive dividend yield. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

This Sub-Fund invests on a permanent basis a minimum of 75% of its net assets in equity securities issued by companies which have their head office in the European Union or in countries belonging to the European Economic Area that have signed a tax agreement with France including a clause on combating tax fraud (i.e. Iceland, Norway, Liechtenstein), offering an attractive dividend yield.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in a specific

geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

NN (L) Euro Income

Introduction

This Sub-Fund was launched on 1 September 2005.

Investment objective and policy

The Sub-Fund's objective is to provide investors with capital growth and an attractive level of income by predominantly allocating its assets to a diversified portfolio of shares and other equity related securities combined with a derivatives overlay strategy.

The Sub-Fund is expected to behave vis a vis the index, as listed in the Appendix II of the Company's Prospectus, as follows:

- The equity part of the Sub-Fund's portfolio aims to outperform the index as listed in the Appendix II of the Company's Prospectus over a period of several years. Equity investments are made predominantly in ordinary shares and/or other equity related securities denominated in euro (warrants on transferable securities – up to a maximum of 10% of the Sub-Fund's net assets – and convertible bonds) issued by companies established, listed or traded in Eurozone markets.
- As a part of the overlay derivatives strategy, the Sub-Fund will sell call options ("call overwriting") and receive in exchange option premium, which can be distributed. The derivatives overlay is expected to reduce the volatility of the total returns (including dividends) of the Sub-Fund compared with the index as listed in the Appendix II of the Company's Prospectus and it is expected to provide some risk mitigation in negative markets. The Sub-Fund is expected to deliver better returns, adjusted for risk, than the index as listed in the Appendix II of the Company's Prospectus over a period of several years. This strategy will typically underperform a similar portfolio without derivatives in periods when the underlying stock prices are rising, and outperform when the underlying stock prices are falling.

The underlying of the derivatives is expected to be the Eurostoxx 50 Index, although other underlying Indices and/or stocks/shares may be used when deemed more appropriate to reach the Sub-Fund's investment objectives. Other derivatives may also be used to reach its investment objectives, such as equity Index futures

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: Risks linked to the investment: detailed description in this prospectus.

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other transferable securities (including warrants on transferable securities up to 10% of the Sub-Fund's net assets), money market instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on transferable securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in a specific geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

NN (L) Euro Liquidity

Introduction

The Sub-Fund was launched on 29 April 2011. The Sub-Fund absorbed the following Sub-Fund: Euro Liquidity (29 April 2011) a Sub-Fund of the ING (L) Renta Fund SICAV.

The Sub-Fund qualifies as “Short-Term Money Market Fund” in accordance with the Guidelines issued on 19 May 2010 (ref. CESR/10-049) on a common definition of European money market funds, as they may be amended and supplemented from time to time.

The Sub-Fund complies with all the requirements of this classification, and more particularly:

- the Weighted Average Life (WAL) of the portfolio (i.e. the weighted average of the remaining life (maturity) of each security held in the Sub-Fund) is maximum 120 days;
- the Weighted Average Maturity (WAM) of the portfolio (which is a measure of the length of time to maturity of all of the underlying securities in the Sub-Fund weighted to reflect the relative holdings in each instrument, assuming that the maturity of a floating rate instrument is the time remaining until the next interest rate reset to the money market rate) is maximum 60 days;
- the Sub-Fund will limit investments in securities to those with a residual maturity which, at the date of subscription by the Sub-Fund, do not exceed 397 days;
- the Sub-Fund selects Money Market Instruments or deposits which have been awarded one of the two highest available Short-Term credit ratings by each recognised credit rating agency (S&P, Moody's and Fitch) that has rated the instrument or, if the instrument is not rated, it is of an equivalent quality determined by the Management Company's internal rating process.

Investment objective and policy

The investment objective and policy of this Sub-Fund is to achieve an attractive return in relation to the euro money market rate by investing in Money Market Instruments and deposits with credit institutions, as set out below and to generate a return above the index as listed in the Appendix II of the Company's Prospectus. The recommended investment horizon is at least two months, with the intention of maintaining liquidity and protecting the capital invested. In order to achieve this objective, the Sub-Fund may invest in:

- all types of Money Market Instruments, whether or not they are classified as Transferable Securities, including floating rate notes, short-term bonds and Money Market Instruments issued in euro and whose initial or residual maturity does not exceed twelve months at the time of purchase, taking into account all the underlying financial instruments, or whose interest rate, by virtue of the issuing conditions governing these securities, is subject to at least one adjustment per year depending on the market conditions;
- deposits denominated in euro in accordance with the specifications stated in Part III, Chapter III “Investment restrictions”, Section A “Eligible investments”, 1, g;
- regulated asset backed securities (ABS) having a residual maturity of up to and including 397 days and asset backed commercial papers (ABCP) up to a maximum of 20% of the net assets;

- UCITS and other Luxembourg UCIs investing in the assets listed above (i.e. Money Market Instruments and deposits), up to a maximum of 10% of the net assets;
- derivative financial instruments, in order to efficiently manage interest rate risk.

Money Market Instruments issued or guaranteed by the governments of Belgium and/or France, and their local public authorities may represent more than 35% of the net asset value of the Sub-Fund, provided such exposure does comply with the principle of risk spreading described in Art. 45 (1) of the Law of 2010.

Shareholders' attention is drawn to the risks linked to these investments and, more particularly, the risks linked to investments in bonds, Money Market Instruments, deposits, UCITS and other UCIs, derivatives and cash. A description of the risks incurred is set out in Part III “Additional information”, Chapter II “Risks linked to the investment universe: detailed description” of this prospectus.

This Sub-Fund is intended for investors seeking an investment with a low risk profile. However, the “marked to market” valuation of the Sub-Fund means that the Net Asset Value will fluctuate in line with the movements of the money market curve and any changes in issuers' credit quality. There is therefore no capital guarantee and investors may not necessarily recover the amount initially invested.

Risk profile of the Sub-Fund

The overall market risk associated with the Money Market Instruments used to reach the investment objective and policy is considered low. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is low. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in a specific geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III “Additional information”, Chapter II: “Risks linked to the investment universe: detailed description”.

The global exposure of this Sub-Fund is determined using the commitment method.

Typical Investor Profile

The Sub-Fund particularly targets defensive investors as defined in Part II “Sub-Fund Factsheets”.

NN (L) Euro Long Duration Bond

Introduction

The Sub-Fund was launched on 29 April 2011. The Sub-Fund absorbed the following Sub-Fund: Euro Long Duration (29 April 2011) a Sub-Fund of the ING (L) Renta Fund SICAV.

Investment objective and policy

This Sub-Fund aims to generate returns by actively managing a portfolio invested primarily (minimum 2/3) in long-duration debt securities denominated in euro and, measured over a period of several years, to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

It is stipulated that any liquid assets held on an ancillary basis will not be taken into account when calculating the above-mentioned limit of two thirds.

Fixed-income Transferable Securities and/or Money Market Instruments issued or guaranteed by the governments of the Netherlands, Germany, Italy, Spain and/or France, and their local public authorities may represent more than 35% of the net asset value of the Sub-Fund, provided such exposure does comply with the principle of risk spreading described in Art. 45 (1) of the Law of 2010.

The Sub-Fund may also invest in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), contingent convertible securities (up to a maximum of 10% of the Sub-Fund's net assets), Money Market Instruments, Rule 144 A securities and shares/units of UCITS and other UCIs as described in Chapter III "Investment restrictions", section A "Eligible investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps
- forward currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- Derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices, and baskets of securities.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other financial instruments used to reach the investment objectives is considered medium. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is medium. The Sub-Fund's liquidity risk is set to medium. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in a specific geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

Typical investor profile

The Sub-Fund particularly targets neutral investors as defined in Part II "Sub-Fund Factsheets".

NN (L) Euro Short Duration

Introduction

The Sub-Fund was launched on 29 April 2011. The Sub-Fund absorbed the following Sub-Fund: Euro Short Duration (29 April 2011) a Sub-Fund of the ING (L) Renta Fund SICAV.

Investment objective and policy

The Sub-Fund aims to generate returns by investing in Euro-denominated bonds. The average lifetime of the portfolio will not exceed three years. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

Fixed-income Transferable Securities and/or Money Market Instruments issued or guaranteed by the governments of the Netherlands, Germany, Italy, Spain, Belgium and/or France, and their local public authorities may represent more than 35% of the net asset value of the Sub-Fund, provided such exposure does comply with the principle of risk spreading described in Art. 45 (1) of the Law of 2010. The Sub-Fund may also invest in other Transferable Securities (including warrants on Transferable Securities up to a maximum of 10% of the Sub-Fund's net assets), Money Market Instruments, Rule 144 A securities, units of UCITS and other UCIs and deposits as described in Chapter III "Investment restrictions", section A "Eligible investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps
- credit default swaps
- forward currency contracts and currency options.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other financial instruments used to reach investment objectives is considered medium. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is medium. The Sub-Fund's liquidity risk is set to medium. Liquidity

risks may arise when a specific underlying investment is difficult to sell. Investments in a specific geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

NN (L) Euro Sustainable Credit

Introduction

The Sub-Fund was launched on 22 October 2014.

Investment objective and policy

This Sub-Fund aims to generate returns by actively managing a portfolio of debt securities and Money Market Instruments issued mainly by financial institutions and companies. It will invest predominantly in euro-denominated debt securities and Money Market Instruments from issuers pursuing policies of sustainable development observing social and environmental principles. When selecting investments the Investment Manager shall analyse, maintain and update the credit rating of future investments and shall ensure that the average rating of the portfolio is BBB- or better. The manager will always take into consideration the quality and diversity of issuers and sectors along with the maturity date. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may also invest in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), contingent convertible securities (up to a maximum of 10% of the Sub-Fund's net assets), Rule 144 A securities and shares/units of UCITS and other UCIs as described in Chapter III "Investment restrictions", section A "Eligible investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps
- forward currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices and baskets of securities.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds or other financial instruments used to reach the investment objectives is considered medium. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is medium. The Sub-Fund's liquidity risk is set to medium. Liquidity risks arise when a specific underlying investment is difficult to sell. No guarantee is provided as to the

recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

NN (L) Euromix Bond

Introduction

The Sub-Fund was launched on 29 April 2011. The Sub-Fund absorbed the following Sub-Fund: Euromix Bond (29 April 2011) a Sub-Fund of the ING (L) Renta Fund SICAV.

Investment objective and policy

The Sub-Fund aims to generate returns via the active management of a portfolio of bonds by investing primarily (minimum of 2/3) in bonds issued by issuers established in European Union countries and denominated in Euro. These countries strictly include Member States of the European Union which are part of the Euro area. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

It is stipulated that any liquid assets held on an ancillary basis will not be taken into account when calculating the above-mentioned limit of two-thirds (2/3).

Fixed-income Transferable Securities and/or Money Market Instruments issued or guaranteed by the governments of the Netherlands and/or Germany, and their local public authorities, may represent more than 35% of the net asset value of the Sub-Fund, provided such exposure does comply with the principle of risk spreading described in Art. 45 (1) of the Law of 2010. The Sub-Fund may also invest on an ancillary basis in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, Rule 144A securities, units of UCITS and other UCIs and deposits described in Chapter III "Investment Restrictions", section A "Eligible Investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets.

Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of a higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps
- forward currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices and baskets of securities.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other financial instruments used to reach the investment objectives is considered medium. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is low. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact the Sub-Fund's performance. Investments in a specific geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

NN (L) European ABS

Introduction

The Sub-Fund will be launched upon the decision of the Board of Directors of the Company.

Investment objective and policy

The Sub-Fund aims to generate returns by predominantly investing in Euro denominated European Asset Backed Securities (ABS). ABS are debt securities where the right for interest and principal is backed by an underlying pool of assets or its revenue. The economic risks and benefits of the pool of assets are transferred, directly or indirectly, by an enterprise, financial institution or other vehicle by the means of a securitization program to the issuing party. The pools of assets will include, but will not be limited to, residential mortgages, credit card loans, student loans and lease contracts.

The Sub-Fund will invest in securities with a minimum rating of investment grade at the time of purchase. A security will be deemed to be investment grade if it has a rating of BBB-/Baa3 as assigned by independent rating organisations such as Standard and Poor's, Moody's and/or Fitch. The targeted average rating of the Sub-Fund will be maintained at A/A2. Securities that are downgraded below investment grade should be sold within 90 days, unless selling is not in the best interest of the investors due to market circumstances.

The Sub-Fund will be broadly diversified by, amongst others, issuer, type of collateral and countries. The Sub-Fund will maintain a minimum allocation of 10% to the most liquid ABS asset classes (prime and high grade ratings rated between AAA/Aaa and AA-/Aa3 as assigned by independent rating organisations).

Each investment will be selected through a process combining sector allocation and in-depth fundamental analysis. Top-down and bottom-up approaches will complement each other and drive a stock-picking approach that seeks to both avoid a downgrade or default and anticipate performance developments.

Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

Investments will be made in European markets. To limit currency risk, any security denominated in another currency than the Sub-Fund's reference currency (Euro) will, in principle, be hedged back to Euro. This may be carried out through the use of the techniques and financial instruments described in Part III of the prospectus under Chapter IV "Techniques and instruments".

The Sub-Fund may also invest, on an ancillary basis, in other transferable securities, money market instruments, units of UCITS and other UCIs and deposits as described in Chapter III "Investment restrictions" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on transferable securities or money market instruments
- futures and options on stock exchange indices
- futures, options and interest rate swaps
- performance swaps
- (forward) currency contracts, currency futures contracts and transactions, currency call and put options, and currency swap

- derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps, indices and baskets of securities.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the financial instruments used to reach investment objectives is considered medium. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is high. The Sub-Fund's liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in a specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

Investors should be aware that ABS securities have different investment characteristics compared to traditional debt securities. These include, but are not limited to, a higher frequency in interest and principal payments (often monthly or quarterly), the incidence and risk of prepayment and extension of the principal, linked to the optionality of the prepayment and extension of the underlying pool of assets. Prepayment risk is the risk associated with the early unscheduled return of the principal. Extension risk, conversely, is the risk of a security's expected maturity lengthening in duration due to the deceleration of prepayments.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II "Sub-Fund Factsheets".

NN (L) European Equity

Introduction

This Sub-Fund was launched following a contribution of the assets of the “European Equity” Sub-Fund (launched on 17 October 1997) of the ING International SICAV, as well as the merger with the ING (L) Invest Europe Sub-Fund, with effect from 20 December 2001. The Sub-Fund absorbed the following Sub-Funds on 29 September 2003: BBL Invest Scandinavia, BBL Invest United Kingdom and BBL Invest Switzerland. And on 8 April 2011: ING (L) Invest European Sector Allocation (launched on 19 April 1999).

Investment objective and policy

The Sub-Fund invests predominantly in a diversified portfolio comprised of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund’s net assets – and convertible bonds) issued by companies established, listed or traded in any European country. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company’s Prospectus.

The Sub-Fund may invest a maximum of 25% of its net assets in equities and other participation rights traded on the Russian market – the “Moscow Interbank Currency Exchange – Russian Trade System” (MICEX-RTS).

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund’s net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III “Additional information”, Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves

affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund’s liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund’s performance. Investments in a specific geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III “Additional information”, Chapter II: “Risks linked to the investment universe: detailed description”.

The global exposure of this Sub-Fund is determined using the commitment method.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II “Sub-Fund Factsheets”.

NN (L) European High Dividend

Introduction

The Sub-Fund was launched on 1 December 2004.

Investment objective and policy

The purpose of this Sub-Fund is to increase the value of the capital invested by investing predominantly in European equities and or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund's net assets – and convertible bonds) offering an attractive dividend yield. These equities are issued by companies established, listed or traded in any European country. Issuers are companies whose head office or main business activity is based in Europe. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

This Sub-Fund invests its net assets predominantly in European equities issued by issuers as described above and offering an attractive dividend yield in European countries.

The Sub-Fund may invest a maximum of 25% of its net assets in equities and other participation rights traded on the Russian market – the "Moscow Interbank Currency Exchange – Russian Trade System" (MICEX-RTS).

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific

underlying investment is difficult to sell. Investments in a specific geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

NN (L) European High Yield

Introduction

The Sub-Fund was launched on 6 August 2010.

Investment objective and policy

This Sub-Fund shall invest primarily in high yield bonds denominated in European currencies. These bonds are different from traditional "Investment Grade" bonds in that they are issued by companies presenting a higher risk in terms of their ability to fully honour their financial commitments, which explains why they offer a higher return. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), contingent convertible securities (up to a maximum of 10% of the Sub-Fund's net assets), Money Market Instruments, Rule 144 A securities, units of UCITS and other UCIs and deposits as described in Chapter III "Investment restrictions", section A "Eligible investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps
- forward currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- financial derivative instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices and baskets of securities and currency options.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

Note: ratings are awarded by reputable credit rating agencies to fixed income instruments that can be traded on the markets. These ratings give a fair idea of the credit risk associated with the issuing entities: the lower the rating, the higher the credit risk. To compensate for this risk, however, a company with such a rating will offer high-yield bonds. Ratings awarded by ratings agencies range from AAA (highest rating) to CCC (very high risk of defaulting). The rating varies from BB+ to CCC for the high yield markets. With this in mind, this Sub-Fund is intended for well-informed investors who are aware of the degree of risk linked to their chosen investments.

Securities lending and repurchase agreements

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other financial instruments used to reach the investment objectives is considered high. These instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is high. The Sub-Fund's liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. Investments in specific geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund will be determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II "Sub-Fund Factsheets".

NN (L) European Participation Equity

Introduction

The Sub-Fund was launched on 27 November 2017 following the merger with "Delta Lloyd L European Participation Fund", a Sub-Fund of Delta Lloyd L.

Investment objective and policy

The Sub-Fund invests mainly in a portfolio comprised of equities issued by companies established, listed or traded in any European country. Investments in equities will predominantly be made in companies whose market capitalisation is relatively limited in size (i.e. 'small caps'). The sub-fund seeks to achieve substantial holdings in a limited number of small companies. Therefore, the Sub-Fund's performance does not always follow general market trends.

The Sub-Fund may invest a maximum of 25% of its net assets in equities and other participation rights traded on the Russian market – the "Moscow Interbank Currency Exchange – Russian Trade System" (MICEX-RTS).

The Sub-Fund may also invest, on an ancillary basis, in other transferable securities (including warrants on transferable securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets.

The Sub-Fund may have recourse to financial derivative instruments for hedging purposes and for efficient portfolio management. The Sub-Fund may use financial derivative instruments including, but not limited to, the following:

- options and futures on transferable securities or money market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to the use of financial derivative instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. Investments in a specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II "Sub-Fund Factsheets".

NN (L) European Real Estate

Introduction

This Sub-Fund was launched on 20 December 1993 under the name ING (L) Invest Europa Immo (formerly Europa Fund Immo). The new name took effect on 23 May 2003.

Investment objective and policy

The Sub-Fund essentially invests (minimum 2/3) in a diversified portfolio of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund's net assets – and convertible bonds) issued by companies established, listed or traded in any European country and operating in the real estate sector. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may invest a maximum of 25% of its net assets in equities and other participation rights traded on the Russian market – the "Moscow Interbank Currency Exchange – Russian Trade System" (MICEX-RTS).

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to medium. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's

performance. Investments in a specific geographic area and theme are more concentrated than investments in various geographic areas and themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

NN (L) European Sustainable Equity

Introduction

The Sub-Fund was launched on 19 December 2013.

Investment objective and policy

The Sub-Fund essentially invests in a diversified portfolio comprised of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the net assets of the Sub-Fund – and convertible bonds) issued by companies that pursue a policy of sustainable development and that combine the respect of social principles (such as human rights, non-discrimination, the fight against child labour) and environmental principles with their focus on financial targets. The selection of portfolio holdings is based on the companies that best fulfil the combination of these criteria, largely determined by a “best-in-class” approach. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company’s Prospectus.

The Sub-Fund may invest a maximum of 25% of its net assets in equities and other participation rights traded on the Russian market – the “Moscow Interbank Currency Exchange – Russian Trade System” (MICEX-RTS).

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund’s net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III “Additional information”, Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund’s liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund’s performance. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is

detailed in Part III “Additional information”, Chapter II: “Risks linked to the investment universe: detailed description”.

The global exposure of this Sub-Fund is determined using the commitment method.

NN (L) First Class Multi Asset

Introduction

The Sub-Fund was launched on 28 November 2014.

Investment objective and policy

The investment strategy applies a flexible approach designed to respond to rapidly changing market environments. The Investment Manager will mainly gain exposures to traditional asset classes (such as for example stocks, bonds and cash) either directly or via financial derivatives instruments, mutual funds and ETFs, resulting in a diversified portfolio. The investments in high quality fixed income investments, Money Market Instruments and cash or cash equivalents will be at least 50% of the net assets. The Sub-Fund aims to provide positive investment returns and to outperform the index as listed in the Appendix II of the Company's Prospectus over a full market cycle within a strictly defined risk budget and a focus on downside risk mitigation.

In order to achieve its objectives, the Sub-Fund can take long and short positions (short positions via derivative instruments only).

The Sub-Fund may invest in a wide range of asset classes and financial instruments (including financial derivative instruments) in order to achieve its investment objective, including but not limited to the following:

- Investments in Transferable Securities (including warrants on Transferable Securities up to a maximum of 10% of the Sub-Fund's net assets), bonds, equities, Money Market Instruments, Rule 144A securities, units of UCITS and other UCIs and deposits, as described in the full prospectus in Part III "Additional information", Chapter III "Investment Restrictions", Section A "Eligible investments". Where the Sub-Fund invests in warrants on Transferable Securities, the Net Asset Value may fluctuate more than if the Sub-Fund was invested in the underlying assets because of the higher volatility of the value of the warrant;
- Investments in asset-back securities will be limited to 20% and investments in UCITS and UCIs may not exceed a total of 10% of the net assets;
- Investments in Real Estate via equities and/or other Transferable Securities issued by companies operating in the real estate sector, as well as via units of UCITS and other UCIs, or via derivatives;
- Exposure to commodities either via derivatives on commodity Indices that comply with requirements defined in the ESMA Guidelines 2014/937, or via Exchange Traded Commodities (ETC) that comply with Art. 41 (1) (a) of the Law of 2010 and/or via units of UCITS and other UCIs. The Sub-Fund will not acquire physical commodities directly;
- Derivative financial instruments including, but not limited to, the following:
 - options and futures on Transferable Securities or Money Market Instruments
 - Index futures and options
 - interest rate swaps, futures and options
 - performance swaps
 - credit default swaps
 - forward currency contracts and currency options.

The Sub-Fund may invest up to 20% of its net assets in China A-Shares issued by companies incorporated in the PRC via Stock Connect. The Sub-Fund may therefore be subject to PRC risks, including but not limited to, geographical concentration risk, risk of change in PRC political, social or economic policy, liquidity and volatility risk, RMB currency risk and risks relating to PRC taxation.

The Sub-Fund is also subject to specific risks applicable to investing via Stock Connect such as quota limitations, suspension in trading, price fluctuations in China A-Shares when in particular Stock Connect is not trading but PRC market is open, and operational risk. Stock Connect is relatively new, hence some regulations are untested and subject to change, which may adversely affect the Sub-Fund. The risks associated to investments in A-Shares are detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

Investments made in China A Shares through the Stock Connect program and Chinese debt through Bond Connect may total up to 20% of the Sub-Fund's net assets. The Sub-Fund may be subject to PRC risks, including but not limited to, geographical concentration risk, risk of change in PRC political, social or economic policy, liquidity and volatility risk, RMB currency risk and risks relating to PRC taxation. Depending of the asset class, investments through either of these markets may be subject to specific risks, including but not limited to, quota limitations, suspension in trading, currency risk and operational risk. Both Stock Connect and Bond Connect are in the development stage, hence some regulations are untested and subject to change, which may adversely affect the Sub-Fund. The risks associated to investments in A-Shares and Bond Connect are detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the financial instruments used to reach investment objectives is considered medium. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is medium. The Sub-Fund's liquidity risk is set to medium. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact the Sub-Fund's performance. No guarantee is provided as to the recovery of the initial investment. The risk associated with derivative financial instruments is detailed in Part III "Additional information", Chapter II "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

Typical investor profile

The Sub-Fund particularly targets neutral investors as defined in Part II "Sub-Fund Factsheets".

NN (L) First Class Multi Asset Premium

Introduction

The Sub-Fund was launched on 19 May 2014.

Investment objective and policy

The investment strategy applies a flexible investment approach designed to respond to rapidly changing market environments. The Investment Manager will mainly get exposure to traditional asset classes (such as for example stocks, bonds and cash) either directly or via financial derivatives instruments, mutual funds and ETFs, resulting in a diversified portfolio. The Sub-Fund aims to provide positive investment returns and to outperform the index as listed in the Appendix II of the Company's Prospectus over a full market cycle within a strictly defined risk budget.

In order to achieve its objectives, the Sub-Fund can take long and short positions (short positions via derivative instruments only).

The Sub-Fund may invest in a wide range of asset classes and financial instruments (including financial derivative instruments) in order to achieve its investment objective, including but not limited to the following:

- Investments in Transferable Securities (including warrants on Transferable Securities up to a maximum of 10% of the Sub-Fund's net assets), bonds, equities, Money Market Instruments, Rule 144A securities, units of UCITS and other UCIs and deposits, as described in Part III "Additional information", Chapter III "Investment Restrictions", Section A "Eligible investments". Where the Sub-Fund invests in warrants on Transferable Securities, the Net Asset Value may fluctuate more than if the Sub-Fund was invested in the underlying assets because of the higher volatility of the value of the warrant;
- Investments in asset-back securities will be limited to 20% and investments in UCITS and UCIs may not exceed a total of 10% of the net assets;
- Investments in Real Estate via equities and/or other Transferable Securities issued by companies operating in the real estate sector, as well as via units of UCITS and other UCIs, or via derivatives;
- Exposure to commodities either via derivatives on commodity Indices that comply with requirements defined in the ESMA Guidelines 2014/937, or via Exchange Traded Commodities (ETC) that comply with Art. 41 (1) (a) of the Law of 2010 and/or via units of UCITS and other UCIs. The Sub-Fund will not acquire physical commodities directly;
- Derivative financial instruments including, but not limited to, the following:
 - options and futures on Transferable Securities or Money Market Instruments
 - Index futures and options
 - interest rate swaps, futures and options
 - performance swaps
 - credit default swaps
 - forward currency contracts and currency options.

The Sub-Fund may invest in Transferable Securities and/or Money Market Instruments issued or guaranteed by the United States of America, United Kingdom or Germany for more than 35% of the Net Asset Value individually, provided such exposure does comply with the principle of risk spreading described in Art. 45 (1) of the Law of 2010.

The Sub-Fund may invest up to 20% of its net assets in China A-Shares issued by companies incorporated in the PRC via Stock Connect. The Sub-Fund may therefore be subject to PRC risks,

including but not limited to, geographical concentration risk, risk of change in PRC political, social or economic policy, liquidity and volatility risk, RMB currency risk and risks relating to PRC taxation. The Sub-Fund is also subject to specific risks applicable to investing via Stock Connect such as quota limitations, suspension in trading, price fluctuations in China A-Shares when in particular Stock Connect is not trading but PRC market is open, and operational risk. Stock Connect is relatively new, hence some regulations are untested and subject to change, which may adversely affect the Sub-Fund. The risks associated to investments in A-Shares are detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

Investments made in China A Shares through the Stock Connect program and Chinese debt through Bond Connect may total up to 20% of the Sub-Fund's net assets. The Sub-Fund may be subject to PRC risks, including but not limited to, geographical concentration risk, risk of change in PRC political, social or economic policy, liquidity and volatility risk, RMB currency risk and risks relating to PRC taxation. Depending of the asset class, investments through either of these markets may be subject to specific risks, including but not limited to, quota limitations, suspension in trading, currency risk and operational risk. Both Stock Connect and Bond Connect are in the development stage, hence some regulations are untested and subject to change, which may adversely affect the Sub-Fund. The risks associated to investments in A-Shares and Bond Connect are detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is high. The Sub-Fund's liquidity risk is set to medium. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. No guarantee is provided as to the recovery of the initial investment. The risk associated with derivative financial instruments is detailed in Part III "Additional information", Chapter II "Risks linked to the investment universe: detailed description".

This strategy may result in a high level of leverage. At the time of release of the current prospectus, the level of leverage is expected to reach a maximum level of 650% of the Sub-Fund's Net Asset Value. As requested by the Regulation, it is to be noted that this range of leverage is calculated by summing the notional of the derivatives used – without taking into account any netting and hedging arrangements that the Sub-Fund may have in place even though these arrangements are used for risk reduction purposes. For information purpose, the computation of the expected level of leverage resulting from the Commitment methodology, as set out in ESMA's Guidelines 10-788, is also performed. At the time of release of the current prospectus, the level of leverage obtained from Commitment methodology is

expected to reach a maximum level of 400% of the Sub-Fund's Net Asset Value. Contrary to the prior methodology, the Commitment methodology allows, in certain circumstances, the consideration of netting and hedging transactions. As such the Management Company considers that the level of leverage obtained from the commitment approach better reflects and captures the level of market risk of the Sub-Fund. For additional information on leverage, please refer to Part III "Additional information", Chapter IV of the prospectus."

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

NN (L) First Class Protection

Introduction

The Sub-Fund was launched on 27 May 2011 under the name ING (L) Index Linked Fund Continuous Click Fund Euro. The Sub-Fund absorbed the following Sub-Funds: Continuous Click Euro (27 May 2011) a Sub-Fund of the ING Index Linked Fund SICAV, ING (L) Index Linked Fund Protected Mix 70 (14 December 2012), ING (L) Index Linked Fund Protected Mix 80 (14 December 2012) and ING (L) Index Linked Protected Mix 90 (14 December 2012).

Investment objective and policy

The objective of the Sub-Fund is to partially participate in the upside potential of a well-known European Equity Index, while trying to maintain on a daily basis 90% of the highest Net Asset Value reached in the preceding 365 calendar days through dynamic allocation between transferable equity and fixed income securities. This means, in principle, that an investor in the Sub-Fund can expect the Net Asset Value not to decrease more than 10% within any given period of 365 calendar days. This "protection level" will be published on the website www.nnip.com each Valuation Day. However this does not constitute a guarantee of capital preservation. Net Asset Values calculated in the period before 1. November 2012 are not taken into account for the calculation of the protection level.

Equity securities shall be understood as equities that form part of a well-known European Equity Index that is composed of European companies characterized by a relatively large market capitalization and free float thereby assuring easy tradability and liquidity. Futures, options, warrants, over the counter ("otc") options, swap contracts and future contracts on this Index can also be used instead, within the limits as described in the first paragraph of Part III "Additional information", Chapter IV "Techniques and Instruments" of this prospectus.

Fixed income securities shall be understood as all types of fixed income securities that are compliant with article 41 of the Law of 2010, such as fixed-interest bonds, floating-rate bonds, medium term notes, issued by governments, local authorities, supranational bodies or corporations based in EU and OECD member states and denominated in their respective currencies, directly and or through investment funds, repo's or reversed repo transactions, in accordance with Part III "Additional information", Chapter III "Investment Restrictions" and IV "Techniques and Instruments" of this prospectus and in Money Market Instruments, such as Certificates of Deposit (CD's), Commercial Papers (CP's) as well as time deposits.

The protection level is maintained through systematical adjustment of the allocation between equity and fixed income securities in reaction to developments on the equity and capital market. No guarantee is given to the investors whether the objective will be realised although all relevant measures of protection will be taken. In case of unusually unfavorable market circumstances (such as prolonged adverse market movements) the Board of Directors reserves the right to amend the investments in the portfolio of the Sub-Fund (which could include a reset of the applicable Net Asset Value used in the calculation of the protection level), should it be deemed necessary in order to be able to achieve the investment objectives and to safeguard the Shareholders' interests. The Sub-Fund will adhere to the investment restrictions as outlined in Part III "Additional information", Chapter III "Investment Restrictions".

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk Profile of the Sub-Fund

The overall market risk associated with the financial instruments used to reach the investment objectives is considered medium. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is medium. The Sub-Fund's liquidity risk is set to medium. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in a specific geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the use of financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

Investor Profile

The Sub-Fund particularly targets neutral investors as defined in Part II "Sub-Fund Factsheets".

Fund type

Optimising the upside of a portfolio by dynamic allocation between equity and fixed income whilst providing downward protection.

NN (L) First Class Yield Opportunities

Introduction

The Sub-Fund was launched on 9 July 2013.

Investment objective and policy

This Sub-Fund will primarily invest in a broad range of bonds including but not limited to Emerging Markets Debt, High Yield Debt, Investment-Grade Corporate Bonds, Covered Bonds, Government Bonds, and Asset-Backed Securities. It may allocate in an opportunistic way to the different bond asset classes, within a strong risk controlled environment. Measured over a period of several years, the Sub-fund aims to achieve returns higher than the index as listed in the Appendix II of the Company's Prospectus.

The fund can take long and short positions (short positions via derivative instruments only) in order to achieve its objectives.

Fixed-income Transferable Securities and/or Money Market Instruments issued or guaranteed by the governments of Germany, the United States of America and their local public authorities may represent more than 35% of the net asset value of the Sub-Fund, provided such exposure does comply with the principle of risk spreading described in Art. 45 (1) of the Law of 2010. The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), contingent convertible securities (up to a maximum of 10% of the Sub-Fund's net assets), Money Market Instruments, Rule 144 A securities, units of UCITS and other UCIs and deposits as described in Chapter III "Investment restrictions", section A "Eligible investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps
- forward currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- derivative financial instruments linked to credit risks (namely credit derivatives such as credit default swaps), Indices and baskets of securities.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other financial instruments used to reach the investment objectives is considered high. These financial instruments are impacted by

various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is high. The Sub-Fund's liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in a specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

The Sub-Fund may invest in securities traded on Bond Connect. Bond Connect is a market facilitating investment to the Chinese bond market. The risks associated to investments through Bond Connect are detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II "Sub-Fund Factsheets".

NN (L) Food & Beverages

Introduction

The Sub-Fund was launched on 19 August 1996. On 8 April 2011, ING (L) Invest Food & Beverages absorbed ING (L) Invest European Food & Beverages (launched on 23 March 1998),

Investment objective and policy

The Sub-Fund essentially invests (minimum 2/3) in a diversified portfolio of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund's net assets – and convertible bonds) issued by companies in the consumer staples sector. In particular, companies carrying out their business activity in the following industries are included:

- producers and distributors of food, beverages and tobacco;
- manufacturers of household products and personal products;
- food and pharmaceutical distributors.

Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may invest a maximum of 25% of its net assets in equities and other participation rights traded on the Russian market – the "Moscow Interbank Currency Exchange – Russian Trade System" (MICEX-RTS).

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is

considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions each country. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. Investments in a theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

NN (L) Frontier Markets Debt (Hard Currency)

Introduction

This Sub-Fund was launched on 9 December 2013.

Investment objective and policy

The aim of this Sub-Fund is to undertake diversified investments, mainly in transferable fixed income securities and fixed income Money Market Instruments issued by public or private issuers in low or middle-income developing countries. These countries are often referred to as “emerging frontier debt markets”. Typically, frontier economies are at the early stage of development and are expected to grow faster than emerging or developed economies. Frontier markets typically have lower market capitalization and lower ratings than emerging markets. The majority of investments are undertaken in South and Central America (including the Caribbean), Central Europe, Eastern Europe, Asia, Africa and the Middle East. More specifically, investments will be made in countries where the Investment Manager is able to assess the specific political and economic risks and in countries that have undertaken certain economic reforms and which have reached certain growth objectives. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company’s Prospectus.

The Sub-Fund may be exposed to various exchange rate risks linked to investments in securities denominated in currencies other than that of the Sub-Fund or in derivative instruments with underlying exchange rates or currencies.

Transferable Securities, issued by the public and/ or private sector, primarily include fixed rate bonds, floating rate bonds, bonds with warrants and convertible bonds, bonds resulting from the restructuring of syndicated loans or bank loans (e.g. “Brady” bonds) and subordinated bonds. The term “Money Market Instruments” mainly, but not exclusively, includes investments in deposits, commercial papers, short-term bonds, treasury certificates and securitized bonds. This list is not exhaustive.

The Sub-Fund will not invest in Russian shares, bonds or Money Market Instruments whose settlement/ delivery can only be carried out via a Russian system. However, the Sub-Fund may invest in Russian bonds and Money Market Instruments whose settlement/ delivery can be carried out via Clearstream or Euroclear.

Investments shall mainly be made in the currencies of OECD member countries. However, the Investment Manager shall, in principle, hedge the currency risks inherent in the investments denominated in OECD currencies. This may be carried out by hedging the currency risk in relation to the Reference Currency of assets denominated in currencies other than the Reference Currency, through the use of techniques and financial instruments described in Part III “Additional information”, Chapter IV of this prospectus. Investors should be aware that any currency hedging process may not give a precise hedge. Furthermore, there is no guarantee that the hedging will be totally successful. Investors in the Hedged Share-Classes may have exposure to currencies other than the currency of the Hedged Share-Class.

“Hard Currency” refers to the Sub-Fund’s investment currencies. The assets in which the Sub-Fund mainly invests are denominated in the currencies of economically developed and politically stable countries which are members of the OECD.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to a maximum of 10% of the Sub-Fund’s net assets), contingent convertible securities (up to a maximum of 10% of the Sub-Fund’s net assets), Money Market Instruments, Rule 144A Transferable Securities, units of UCITS and other UCIs and deposits as described in Part III of this prospectus, III. “Investment

Restrictions”, (A) “Eligible investments”. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on stock exchange Indices
- futures, options and interest rate swaps
- performance swaps
- (forward) currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices and baskets of securities.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

As these investments are subject to specific factors, they cannot be compared to investments made in the major industrialized countries. In the past, some developing countries have suspended or halted the payment of their external debt, including both the interest and the capital, with respect to issuers from the public and private sectors. These factors may also result in the positions held by the Sub-Fund becoming less liquid, or even illiquid.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers underlying investments is high. The Sub-Fund’s liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in a specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III “Additional information”, Chapter II: “Risks linked to the investment universe: detailed description”.

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III “Additional information”, Chapter IV: Techniques and instruments, A: General Provisions.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II “Sub-Fund Factsheets”.

NN (L) Global Bond Opportunities

Introduction

The Sub-Fund was launched on 29 April 2011 under the name ING (L) Renta Fund World. The Sub-Fund absorbed the following Sub-Funds: World (29 April 2011) a Sub-Fund of the ING (L) Renta Fund SICAV and ING (L) Renta Fund Australian Dollar (13 January 2012).

Investment objective and policy

This Sub-Fund aims to generate returns through a diversification of its investments in international bonds, including but not be limited to, government bonds, high yield bonds, emerging markets debt and Money Market Instruments from across the globe, denominated in various currencies. The aim is to offer significant monetary diversification at an international level and to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

Fixed-income Transferable Securities and/or Money Market Instruments issued or guaranteed by the governments of the Netherlands, the United States of America, the United Kingdom, Japan, Germany, France, Italy, Spain, Canada, Australia, Korea and/or New Zealand, and their local public authorities may represent more than 35% of the net asset value of the Sub-Fund, provided such exposure does comply with the principle of risk spreading described in Art. 45 (1) of the Law of 2010. The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), contingent convertible securities (up to a maximum of 10% of the Sub-Fund's net assets), Money Market Instruments, Rule 144 A securities, units of UCITS and other UCIs and deposits as described in Chapter III "Investment restrictions", section A "Eligible investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps
- forward currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices and baskets of securities.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

This Sub-Fund may invest directly or indirectly in Transferable Securities or instruments issued by low or middle-income developing countries, known as the "emerging markets".

As these investments are subject to specific factors, they cannot be compared to investments made in the major industrialised countries. In the past, some developing countries have suspended or halted the payment of their external debt, including both the

interest and the capital, with respect to issuers from the public and private sectors.

These factors may also result in the positions held by the Sub-Fund becoming less liquid, or even illiquid.

The Sub-Fund may also invest in asset-backed securities (ABS) and mortgage-backed securities (MBS) for more than 20% of the Sub-Funds' net assets, the majority of which are investment grade at the time of purchase, but can fall below investment grade during the holding period, in which case it is at the discretion of the Investment Manager to either sell or keep the securities. ABS and MBS are securities that represent a claim on the cash flows from the underlying collateral. The collateral of the ABS and MBS securities in which the Sub-Fund invests consists mainly of loans such as residential and commercial mortgage loans, auto loans and credit card loans. These securities are traded on regulated markets and can use derivative instruments such as currency and interest rate swaps for hedging purposes. ABS and MBS are generally liquid when rated investment grade. Liquidity may, however, deteriorate if for example ratings fall or the issue size decreases. As a result the Investment Manager may have difficulties to sell the securities or may even be forced to sell them at a significant discount to market value. Liquidity risk is usually greater for thinly traded securities such as lower-rated securities, securities that were part of a small issue or securities that have recently had their credit rating downgraded. ABS and MBS issues are generally most liquid during the period right after their issuance when they benefit from the highest trading volume.

The Sub-Fund may invest in securities traded on Bond Connect. Bond Connect is a market facilitating investment to the Chinese bond market. The risks associated to investments through Bond Connect are detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Definition and considerations related to leverage

The Management Company monitors the level of leverage emanating from the usage of financial derivative instruments. In accordance with regulations, such leverage is obtained by summing the notional of the derivatives used (hereafter "gross leverage") without taking into account any netting and hedging arrangements. For the avoidance of doubt, this means that derivatives referring to the same underlying asset, whose net exposure leaves no material residual risk for the Sub-Fund, will add to the gross leverage; similarly, a derivative used for hedging purposes will also be counted in the gross leverage. At the time of release of the current prospectus, the gross leverage is expected to reach a maximum level of 1,400% of the Sub-Fund's Net Asset Value.

Investors must be aware that the Sub-Fund makes extensive use of derivatives, both for hedging and for taking active positions. Reasons for making extensive use of derivatives are described hereafter:

- The investment strategy of the Sub-Fund is based on the philosophy that the risk/return profile should not depend on a small number of views or positions. Consequently, the Sub-Fund will typically take many, relatively small, uncorrelated positions rather than a few large positions;
- Due to the investment philosophy, the Sub-Fund typically takes many so-called "relative value trades". These positions express views on the difference between various interest

rates, currencies or credit spreads rather than expressing views on “outright directional positions”. Relative value trades have “long” and “short” legs, meaning the amount of derivatives used at least double the amount used for outright directional positions.

Investors must also be aware that the gross leverage, while providing an indication of the amount of derivatives used relative to the Sub-Fund’s Net Asset Value, may however lead to results that are not representative of the economic exposure of the Sub-Fund. By summing the notionals of the derivatives, used without taking into account any netting and hedging arrangements, the ratio may fail to capture the risk associated with the use of derivatives.

For additional information on leverage, please refer to the Part III “Additional information”, Chapter IV of the prospectus.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other financial instruments used to reach the investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is high. The Sub-Fund’s liquidity risk is set to medium. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund’s performance. No guarantee is provided as to the recovery of the initial investment. Investors should be aware that investments in this Sub-Fund may involve an extensive use of financial derivative instruments. The risk associated with the financial derivative instruments is detailed in this prospectus Part III “Additional information”, Chapter II: “Risks linked to the investment universe: detailed description”.

The global exposure of this Sub-Fund will be determined using the VaR method as further detailed in Part III “Additional information”, Chapter IV: Techniques and instruments, A: General Provisions.”

NN (L) Global Convertible Bond

Introduction

The Sub-Fund was launched on 23 April 2018.

Investment objective and policy

The Sub-Fund invests mainly in convertible bonds issued by companies in all sectors located globally, including both developing and emerging markets. A convertible bond is a debt instrument which can be exchanged for shares on or before maturity. The Sub-Fund's investment universe includes securities whose credit quality is investment grade and/ or below investment grade (BB+ to CCC). Within that universe the Investment Manager may also select non-rated securities for which an internal rating is assigned. The internal rating assigned is then reviewed on an ongoing basis as any other rated debt security. The Investment Manager aims to keep the average rating of the Sub-Fund portfolio at BB or better. Over the business cycle, this Sub-Fund aims to outperform the index as listed in the Appendix II of the Company's Prospectus. To achieve this, a bottom-up and top-down research-driven process is combined with a rule-based risk framework to construct an optimal diversified portfolio. The Investment Manager shall, in principle, hedge the currency risk inherent in these investments. This may be carried out by hedging the currency risk in relation to the reference currency of assets denominated in currencies other than the reference currency, through the use of the techniques and financial instruments described in Part III "Additional information", Chapter IV "Techniques and instruments". Investors should be aware that any currency hedging process may not give a precise hedge. Furthermore, there is no guarantee that the hedging will be totally successful. Investors in the Hedged Share-Classes may have exposure to currencies other than the currency of the Hedged Share-Class.

The Sub-Fund may also invest, on an ancillary basis, in other transferable securities and convertible securities (including shares preference shares, convertible shares, convertible preference shares and warrants on transferable securities), contingent convertible securities (up to a maximum of 10% of the Sub-Fund's net assets), money market instruments, Rule 144 A securities, units of UCITS and other UCIs and deposits as described in Chapter III "Investment restrictions", section A "Eligible investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets.

Where the Sub-Fund invests in warrants on transferable securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on transferable securities or money market instruments
- futures and options on stock exchange Indices
- futures, options and interest rate swaps
- performance swaps
- (forward) currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices and baskets of securities.

Securities lending and repurchase agreements

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the financial instruments used to reach the investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is high. The Sub-Fund's liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description". The global exposure of this Sub-Fund is determined using the commitment approach as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

NN (L) Global Convertible Income

Introduction

This Sub-Fund was launched upon the decision of the Board of Directors of the Company.

Investment objective and policy

The Sub-Fund aims to generate income and long term capital growth. The Sub-Fund invests mainly in convertible bonds issued by companies in all sectors located globally, including both developing and emerging markets. A convertible bond is a debt instrument which can be exchanged for shares on or before maturity. The Sub-Fund seeks to generate income from coupons received on convertible bonds in the portfolio and from premiums generated by selling options on the underlying shares. The Sub-Fund's investment universe includes securities whose credit quality is investment grade and/ or below investment grade (BB+ to CCC). Within that universe, the Investment Manager may also select non-rated securities for which an internal rating is assigned. The internal rating assigned is then reviewed on an ongoing basis as any other rated debt security. The Investment Manager aims to keep the average rating of the Sub-Fund portfolio at BB or better. The performance of the Sub-Fund is not measured against any Index. In order to achieve its objectives, the Sub-Fund makes use of a bottom-up and top-down research-driven process combined with a rules-based risk framework to construct an optimal diversified portfolio. The Investment Manager shall, in principle, hedge the currency risk inherent in these investments. This may be carried out by hedging the currency risk in relation to the reference currency of assets denominated in currencies other than the reference currency, through the use of the techniques and financial instruments described in Part III "Additional information", Chapter IV "Techniques and instruments". Investors should be aware that any currency hedging process may not give a precise hedge. Furthermore, there is no guarantee that the hedging will be totally successful. Investors in the Hedged Share-Classes may have exposure to currencies other than the currency of the Hedged Share-Class.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities and convertible securities (including convertible preference shares), money market instruments, units of UCITS and other UCIs and deposits as described in Chapter III "Investment restrictions", section A "Eligible investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets.

Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or money market instruments
- futures and options on stock exchange Indices
- futures, options and interest rate swaps
- total return swap or other financial derivative instruments with similar characteristics
- (forward) currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps and credit default swap indices.

The Sub-Fund will not invest in CoCos, asset-backed securities (ABS), mortgage-backed securities (MBS), defaulted and distressed securities.

Securities lending and repurchase agreements

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the financial instruments used to reach the investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is high. The Sub-Fund's liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description". The global exposure of this Sub-Fund is determined using the commitment approach as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

NN (L) Global Convertible Opportunities

Introduction

This Sub-Fund was launched with effect from 1 April 2015 following the merger with ING Funds - ING Convertible Select Global, a Sub-Fund of ING Funds.

Investment objective and policy

The Sub-Fund invests mainly in convertible bonds and equity linked securities issued by companies in all sectors located globally, including both developing and emerging markets. The Sub-Fund's investments, which include for a substantial proportion below investment grade and unrated bonds, are based on in-depth corporate analysis whereby the Sub-Fund seeks to anticipate both negative and positive developments in the companies' financial and business strength, including its ability to meet its debt obligations. This Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus. The index is not used as basis for portfolio construction.

The Investment Manager shall, in principle, hedge the currency risk inherent in these investments. This may be carried out by hedging the currency risk in relation to the Reference Currency of assets denominated in currencies other than the Reference Currency, through the use of the techniques and financial instruments described in Part III "Additional information", Chapter IV "Techniques and instruments". Investors should be aware that any currency hedging process may not give a precise hedge. Furthermore, there is no guarantee that the hedging will be totally successful. Investors in the Hedged Share-Classes may have exposure to currencies other than the currency of the Hedged Share-Class.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), contingent convertible securities (up to a maximum of 10% of the Sub-Fund's net assets), Money Market Instruments, Rule 144 A securities, units of UCITS and other UCIs and deposits as described in Chapter III "Investment restrictions", section A "Eligible investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets.

Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on stock exchange Indices
- futures, options and interest rate swaps
- performance swaps
- (forward) currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices and baskets of securities.

Securities lending and repurchase agreements

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the financial instruments used to reach the investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is high. The Sub-Fund's liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description". The global exposure of this Sub-Fund is determined using the commitment approach as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

NN (L) Global Equity Absolute Return

Introduction

The Sub-Fund will be launched upon the decision of the Board of Directors of the Company.

Investment objective and policy

The objective of the Sub-Fund is to achieve capital appreciation while remaining in a controlled risk environment with an aim to maintain low volatility. Measured over a period of three years, this Sub-Fund aims to beat the index as listed in the Appendix II of the Company's Prospectus and intends to deliver absolute performance that has a relatively low correlation with equity markets.

The Sub-Fund aims to achieve its investment objective by mainly investing in equity, equity related securities such as but not limited to American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs"), and financial derivative instruments providing exposure to the performance of underlying equity and equity related securities, including but not limited to equity swaps (both single name and Index swaps), contracts for difference, equity Index futures etc.

In order to provide a return uncorrelated to the underlying markets, the Sub-Fund will follow a market neutral portfolio strategy by primarily using long and short financial derivative instruments, so that, under normal market conditions, the total value of the long positions will be approximately matched by the total value of the short positions. Hence, under normal market conditions, the Sub-Fund may hold long equity exposure of maximum 125% of its net assets by means of financial derivative instruments and other assets permissible under Article 41 (1) of the Law of 2010 and short exposure of maximum 125% of its net assets by means of cash-settled financial derivative instruments.

As a part of the investment process, the Sub-fund will take long positions, either via direct lines or financial derivatives instruments, in equities, equity-related securities and equity Indices that appear attractive, whereas short positions will be taken via the use of financial derivative instruments in equities, and equity Indices that appear unattractive. Derivative positions are taken mainly by using equity Index futures and cash settled swap agreements replicating the financial performance of the underlying equity or equity Index. By a swap agreement one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains.

The Sub-Fund may use financial derivative instruments for the purpose of hedging, ensure efficient portfolio management and to achieve the objectives of the Sub-Fund. The Sub-Fund may use the following types of derivatives (non-exhaustive list):

- options and futures on Transferable Securities or Money Market Instruments;
- Index futures and options;
- forward currency contracts and currency options;
- interest rate futures, options and swaps;
- performance swaps.

A universe of diversified global equity stocks (including emerging markets) listed or traded on recognised exchanges will be assessed with no intention to concentrate investments in any one geographical region or sector. Each investment shall be selected through a systematic stock selection process based on fundamental and style factors including but not limited to momentum, value and quality. Momentum intends to benefit from the tendency of the performance to persist, Value intends to

benefit from perceived incorrect valuations, Quality intends to benefit from companies that have a competitive advantage and are efficiently managed. The investment process aims to generate a highly diversified market neutral portfolio with favourable risk return characteristics, selecting long and short positions, from global equity markets.

The counterparty risk arising from the use of swaps is limited by engaging with highly rated counterparties only and by the daily collateral exchange process (please refer Part III "Additional information", Chapter IV "Techniques and instruments", Section D "Use of collateral"). The Sub-Fund has also the possibility to close-out the swaps at any time.

On an ancillary basis, the Sub-Fund may also invest in a broad range of other instruments including but not limited to fixed-income securities, Transferable Securities (including warrants on Transferable Securities up to a maximum of 10% of the Sub-Fund's net assets), bonds, cash or cash equivalents, Money Market Instruments, convertible bonds, Rule 144A securities, units of UCITS and other UCIs and deposits, as described in Part III "Additional information", Chapter III "Investment Restrictions", Section A "Eligible investments". However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets.

Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected Credit Risk, the risk of failure of the counterparty, of underlying investments is low. The Sub-Fund's liquidity risk is set to medium. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact the Sub Fund's performance. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

Typical investor profile:

The Sub-Fund particularly targets neutral investors as defined in Part II "Sub-Fund Factsheets".

NN (L) Global Equity Impact Opportunities

Introduction

The Sub-Fund was launched on 18 April 2006. The Sub-Fund absorbed the following Sub-Fund: ING (L) Invest Europe Growth (13 January 2012).

Investment objective and policy

The Sub-Fund invests mainly in a diversified portfolio of equities and/or Transferable Securities (warrants on Transferable Securities – up to 10% of the Sub-Fund's net assets – and convertible bonds) issued by companies domiciled, listed or traded anywhere in the world. The Sub-Fund aims to invest in companies that generate a positive social and environmental impact alongside a financial return. The Sub-Fund strives to add value through company analysis, engagement and impact measurement. For financial performance comparison the index as listed in the Appendix II of the Company's Prospectus is used by the Sub-Fund as a reference in the long run. The Index is not used as a basis for portfolio construction.

The Sub-Fund may invest a maximum of 25% of its net assets in equities and other participation rights traded on the Russian market – the "Moscow Interbank Currency Exchange – Russian Trade System" (MICEX-RTS).

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

The Sub-Fund may invest up to 20% of its net assets in China A-Shares issued by companies incorporated in the PRC via Stock Connect. The Sub-Fund may therefore be subject to PRC risks, including but not limited to, geographical concentration risk, risk of change in PRC political, social or economic policy, liquidity and volatility risk, RMB currency risk and risks relating to PRC taxation. The Sub-Fund is also subject to specific risks applicable to investing via Stock Connect such as quota limitations, suspension in trading, price fluctuations in China A-Shares when in particular Stock Connect is not trading but PRC market is open, and operational risk. Stock Connect is relatively new, hence some regulations are untested and subject to change, which may adversely affect the Sub-Fund. The risks associated to investments in A-Shares are detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional

information", Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II "Sub-Fund Factsheets".

NN (L) Global High Dividend

Introduction

The Sub-Fund was launched on 15 April 2002.

Investment objective and policy

The Sub-Fund essentially invests (minimum 2/3) in a diversified portfolio of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund's net assets – and convertible bonds) issued by companies established, listed or traded in any country worldwide which offer an attractive dividend yield. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may invest a maximum of 25% of its net assets in equities and other participation rights traded on the Russian market – the "Moscow Interbank Currency Exchange – Russian Trade System" (MICEX-RTS).

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

The Sub-Fund may invest up to 20% of its net assets in China A-Shares issued by companies incorporated in the PRC via Stock Connect. The Sub-Fund may therefore be subject to PRC risks, including but not limited to, geographical concentration risk, risk of change in PRC political, social or economic policy, liquidity and volatility risk, RMB currency risk and risks relating to PRC taxation. The Sub-Fund is also subject to specific risks applicable to investing via Stock Connect such as quota limitations, suspension in trading, price fluctuations in China A-Shares when in particular Stock Connect is not trading but PRC market is open, and operational risk. Stock Connect is relatively new, hence some regulations are untested and subject to change, which may adversely affect the Sub-Fund. The risks associated to investments in A-Shares are detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation, and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

NN (L) Global High Yield

Introduction

The Sub-Fund was launched on 29 April 2011. The Sub-Fund absorbed the following Sub-Fund: Global High Yield (29 April 2011) a Sub-Fund of the ING (L) Renta Fund SICAV.

Investment objective and policy

This Sub-Fund shall invest primarily (minimum 2/3) in high yield bonds issued anywhere in the world. These bonds are different from traditional "Investment Grade" bonds in that they are issued by companies presenting a risk in terms of their ability to fully honour their commitments, which explains why they offer a higher return. Measured over a period of several years the aim of this Sub-Fund is to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

It is stipulated that any liquid assets held on an ancillary basis will not be taken into account when calculating the above-mentioned limit of two thirds.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), contingent convertible securities (up to a maximum of 10% of the Sub-Fund's net assets), Money Market Instruments, Rule 144 A securities, units of UCITS and other UCIs and deposits as described in Chapter III "Investment restrictions", section A "Eligible investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps
- forward currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices and baskets of securities.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

Note: ratings are awarded by reputable credit rating agencies to fixed income instruments that can be traded on the markets. These ratings give a fair idea of the credit risk associated with the issuing entities: the lower the rating, the higher the credit risk. To compensate for this risk, however, a company with such a rating will offer high-yield bonds. Ratings awarded by ratings agencies range from AAA (almost no risk) to CCC (very high risk of defaulting). The rating varies from BB+ to CCC for the high yield markets. With this in mind, this Sub-Fund is intended for well-informed investors who are aware of the degree of risk linked to their chosen investments.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other financial instruments used to reach the investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is high. The Sub-Fund's liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. Investments in a specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II "Sub-Fund Factsheets".

NN (L) Global Inflation Linked Bond

Introduction

The Sub-Fund was launched on 29 April 2011 under the name ING (L) Renta Fund Euro Inflation Linked. The Sub-Fund absorbed the following Sub-Fund: Euro Inflation Linked (29 April 2011) a Sub-Fund of the ING (L) Renta Fund SICAV. This Sub-Fund was renamed into ING (L) Renta Fund Global Inflation Linked and the investment objectives as well as the Sub-Fund's risk profile will be amended.

Investment objective and policy

This Sub-Fund aims to generate returns via the active management of a portfolio mainly composed of investment grade inflation-linked bonds and Money Market Instruments whose nominal value generally adjusts according to the rate of inflation therefore offering protection against movements linked to inflation. More precisely, the portfolio is mainly invested in government bonds and Money Market Instruments as well as bonds and Money Market Instruments issued by the local public authorities of OECD countries, or by international public bodies to which one or more Member States of the European Union belong, or by companies and financial institutions established in one or more OECD member states. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

Fixed-income Transferable Securities and/or Money Market Instruments issued or guaranteed by the governments of the United Kingdom, the United States of America, the Netherlands, Germany, Italy, Spain, France, Canada, Australia, Japan, Korea and/or New Zealand, and their local public authorities may represent more than 35% of the net asset value of the Sub-Fund, provided such exposure does comply with the principle of risk spreading described in Art. 45 (1) of the Law of 2010.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, Rule 144 A securities, units of UCITS and other UCIs and deposits as described in Chapter III "Investment restrictions", section A "Eligible investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps
- forward currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices and baskets of securities.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

The Sub-Fund may invest in securities traded on Bond Connect. Bond Connect is a market facilitating investment to the Chinese bond market. The risks associated to investments through Bond Connect are detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other financial instruments used to reach the investment objectives is considered medium. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is medium. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

This strategy may result in a high level of leverage. At the time of release of the current prospectus, the level of leverage is expected to reach a maximum level of 500% of the Sub-Fund's Net Asset Value. As requested by the Regulation, it is to be noted that this range of leverage is calculated by summing the notionals of the derivatives used – without taking into account any netting and hedging arrangements that the Sub-Fund may have in place even though these arrangements are used for risk reduction purposes. For information purpose, the computation of the expected level of leverage resulting from the Commitment methodology, as set out in ESMA's Guidelines 10-788, is also performed. At the time of release of the current prospectus, the level of leverage obtained from Commitment methodology is expected to reach a maximum level of 300% of the Sub-Fund's Net Asset Value. Contrary to the prior methodology, the Commitment methodology allows, in certain circumstances, the consideration of netting and hedging transactions. As such the Management Company considers that the level of leverage obtained from the commitment approach better reflects and captures the level of market risk of the Sub-Fund. For additional information on leverage, please refer to Part III "Additional information", Chapter IV of the prospectus.

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II "Sub-Fund Factsheets".

NN (L) Global Investment Grade Credit

Introduction

This Sub-Fund was launched on 14 May 2012.

Investment objective and policy

This Sub-Fund aims to generate returns via the active asset management of a portfolio of primarily debt securities and Money Market Instruments issued mainly by financial institutions and companies and denominated in OECD currencies. It is stipulated that any liquid assets held on an ancillary basis will not be taken into account when calculating this limit. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), contingent convertible securities (up to a maximum of 10% of the Sub-Fund's net assets), Money Market Instruments, Rule 144 A securities, units of UCITS and other UCIs and deposits as described in Chapter III "Investment restrictions", section A "Eligible investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, please note that the net asset value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps
- (forward) currency contracts, currency futures contracts and transactions, currency call and put options, and currency swap
- derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices and baskets of securities.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

Potential investors should note that the type of investments carried out in this Sub-Fund involve a relatively higher level of risk than investments in similar Sub-Funds investing in government bonds

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other financial instruments used to reach the investment objectives is considered medium. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the

economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is medium. The Sub-Fund's liquidity risk is set to medium. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

NN (L) Global Real Estate

Introduction

This Sub-Fund was launched on 2 May 2006.

Investment objective and policy

The Sub-Fund invests in a diversified portfolio of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund’s net assets – and convertible bonds) issued by companies established, listed or traded in any country worldwide and operating in the real estate sector. The Investment Manager will select companies whose main revenue or activity is linked to property, real estate management and/ or development. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company’s Prospectus.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund’s net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of the prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III “Additional information”, Chapter II: “Risks linked to the investment universe: detailed description”.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund’s liquidity risk is set to medium. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund’s performance. Investments in a specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III “Additional information”, Chapter II: “Risks linked to the investment universe: detailed description”.

The global exposure of this Sub-Fund is determined using the commitment method.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II “Sub-Fund Factsheets”.

NN (L) Global Sustainable Equity

Introduction

The Sub-Fund was launched on 19 June 2000 under the name of ING (L) Invest Sustainable Growth.

Investment objective and policy

The Sub-Fund invests predominantly in a diversified portfolio comprised of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the net assets of the Sub-Fund – and convertible bonds) issued by companies that pursue a policy of sustainable development and that combine the respect of social principles (such as human rights, non-discrimination, the fight against child labour) and environmental principles with their focus on financial targets. The selection of portfolio holdings is based on the companies that best fulfil the combination of these criteria, largely determined by a “best-in-class” approach. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company’s Prospectus.

The Sub-Fund may invest a maximum of 25% of its net assets in equities and other participation rights traded on the Russian market – the “Moscow Interbank Currency Exchange – Russian Trade System” (MICEX-RTS).

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund’s net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III “Additional information”, Chapter II: “Risks linked to the investment universe: detailed description”.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund’s liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund’s performance. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is

detailed in Part III “Additional information”, Chapter II: “Risks linked to the investment universe: detailed description”.

The global exposure of this Sub-Fund is determined using the commitment method.

NN (L) Greater China Equity

Introduction

This Sub-Fund was launched on 30 August 1999 under the name ING (L) Invest Taiwan. The new name took effect on 23 May 2003. On 22 September 2003, the Sub-Fund absorbed the BBL Invest Hong Kong & China Sub-Fund.

Investment objective and policy

The Sub-Fund essentially invests (minimum 2/3) in a diversified portfolio of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund's net assets – and convertible bonds) issued by companies established, listed or traded in any of the following emerging countries: the People's Republic of China, Hong Kong and Taiwan. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

The Sub-Fund may invest up to 20% of its net assets in China A-Shares issued by companies incorporated in the PRC via Stock Connect. The Sub-Fund may therefore be subject to PRC risks, including but not limited to, geographical concentration risk, risk of change in PRC political, social or economic policy, liquidity and volatility risk, RMB currency risk and risks relating to PRC taxation. The Sub-Fund is also subject to specific risks applicable to investing via Stock Connect such as quota limitations, suspension in trading, price fluctuations in China A-Shares when in particular Stock Connect is not trading but PRC market is open, and operational risk. Stock Connect is relatively new, hence some regulations are untested and subject to change, which may adversely affect the Sub-Fund. The risks associated to investments in A-Shares are detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to medium. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. Investments in a specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

NN (L) Green Bond

Introduction

The Sub-Fund was launched on 24 February 2016.

Investment objective and policy

This Sub-Fund aims to generate returns by managing a portfolio of mainly green bonds and Money Market Instruments mainly denominated in Euro. Green bonds are any type of bond instruments where the proceeds will be applied to finance or re-finance in part or in full new and/or existing projects that are beneficial to the environment. These bonds are mainly issued by Supra-nationals, Sub-sovereigns, Agencies and corporates.

When selecting investments the Investment Manager shall analyse, maintain and update the credit rating of future investments and shall ensure that the average rating of the portfolio is BBB- or better. Investments in bonds with a higher risk (with a quality rating lower than BBB-) may not exceed 10% of the Sub-Fund's net assets. The Investment Manager will always take into consideration the quality and diversity of issuers and sectors along with the maturity date. Measured over a period of 5 years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may also invest in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets) contingent convertible securities (up to a maximum of 10% of the Sub-Fund's net assets), Rule 144 A securities and shares/units of UCITS and other UCIs as described in Chapter III "Investment restrictions", section A "Eligible investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps
- forward currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices and baskets of securities.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds or other financial instruments used to reach the investment objectives is considered medium. These financial instruments are impacted by

various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is medium. The Sub-Fund's liquidity risk is set to medium. Liquidity risks arise when a specific underlying investment is difficult to sell. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

Typical investor profile:

The Sub-Fund particularly targets neutral investors as defined in Part II "Sub-Fund Factsheets".

Fund type

Investments in fixed income instruments.

NN (L) Green Bond Short Duration

Introduction

The Sub-Fund will be launched upon the decision of the Board of Directors of the Company.

Investment objective and policy

This Sub-Fund aims to generate returns by managing a portfolio of mainly green bonds and Money Market Instruments mainly denominated in Euro. Green bonds are any type of bond instruments where the proceeds will be applied to finance or re-finance in part or in full new and/or existing projects that are beneficial to the environment. These bonds are mainly issued by supra-nationals, sub-sovereigns, agencies and corporates.

When selecting investments the Investment Manager shall analyze, maintain and update the credit rating of future investments and shall ensure that the average rating of the portfolio is BBB- or better. Investments in bonds with a higher risk (with a quality rating lower than BBB-) may not exceed 10% of the Sub-Fund's net assets. The Investment Manager will always take into consideration the quality and diversity of issuers and sectors along with the maturity date. The Sub-fund aims to hedge its interest rate risk by keeping the average portfolio duration between 1 and 3 years. A hedge consists of taking an offsetting position in a related security, such as a futures contract. Duration is the fund's weighted average time till maturity. A higher duration means a higher interest rate sensitivity. Although the Sub-Fund does not intend to measure its performance against an index, it uses for portfolio construction the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may also invest in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets) and shares/units of UCITS and other UCIs as described in Chapter III "Investment restrictions", section A "Eligible investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

Furthermore, the Sub-Fund may also invest in asset-backed securities (ABS) and mortgage-backed securities (MBS).

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- total return swap or other financial derivative instruments with similar characteristics
- forward currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps and credit default swap indices.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

The Sub-Fund will not invest in CoCos, defaulted and distressed securities.

Securities lending and repurchase agreements

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds or other financial instruments used to reach the investment objectives is considered medium. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is medium. The Sub-Fund's liquidity risk is set to medium. Liquidity risks arise when a specific underlying investment is difficult to sell. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

NN (L) Health Care

Introduction

The Sub-Fund was launched with effect 10 June 1996. The Sub-Fund absorbed the following Sub-Funds: ING (L) Invest European Health Care (8 April 2011) and ING (L) Invest Biotechnology (18 July 2011).

Investment objective and policy

The Sub-Fund essentially invests (minimum 2/3) in a diversified portfolio of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund's net assets – and convertible bonds) issued by companies in the health care sector. In particular, companies carrying out their business activity in the following industries are included:

- health care equipment and services (including manufacturers of health care equipment and supplies, distributors of health care products, providers of basic health care services or owners and operators of health care facilities);
- research, development, production and marketing of pharmaceuticals or biotechnological products.

Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may invest a maximum of 25% of its net assets in equities and other participation rights traded on the Russian market – the "Moscow Interbank Currency Exchange – Russian Trade System" (MICEX-RTS).

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

The Sub-Fund adopts an active management approach by taking overweight and underweight positions versus the index on certain elements (e.g. sub-sectors, individual companies and currencies) and to generate performance by combining fundamental research and quantitative analysis. Investors should be aware that the Sub-Fund's investment universe is concentrated and, as a result, the Sub-Fund portfolio is concentrated. This will typically result in a

comparable composition and return profile of the Sub-fund and its index.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. Investments in a specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II "Sub-Fund Factsheets".

NN (L) Industrials

Introduction

This Sub-Fund was launched on 26 August 2002.

Investment objective and policy

The Sub-Fund essentially invests (minimum 2/3) in a diversified portfolio of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund's net assets – and convertible bonds) issued by companies in the industrial sector. In particular, companies carrying out their business activity in the following industries are included:

- manufacture and distribution of capital goods (including aerospace & defence, building products, construction and engineering, electrical equipment, industrial conglomerates, machinery, trading companies and distributors);
- the provision of commercial services (including printing, data processing, employment services, environmental services and office services and supplies);
- the provision of transportation services (including airlines, couriers, marine, road and rail transport and transportation infrastructure).

Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may invest a maximum of 25% of its net assets in equities and other participation rights traded on the Russian market – the "Moscow Interbank Currency Exchange – Russian Trade System" (MICEX-RTS).

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. Investments in specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II "Sub-Fund Factsheets".

NN (L) Information Technology

Introduction

This Sub-Fund was launched with effect 12 January 1998 under the name of ING (L) Information Technology. The Sub-Fund absorbed the following Sub-Funds: ING (L) Invest Internet (9 May 2003), ING (L) Invest Nasdaq (13 September 2006), ING (L) Invest IT (13 September 2006) and ING (L) Invest New Technology Leaders (8 April 2011).

Investment objective and policy

The Sub-Fund essentially invests (minimum 2/3) in a diversified portfolio of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund's net assets – and convertible bonds) issued by companies in the information technology sector that stand to benefit from the development, progress and use of technologies. In particular, companies carrying out their business activity in the following industries are included:

- technology software & services, including companies that primarily develop software in various fields such as the internet, application software, IT systems and/or database management and companies that provide information technology consulting and services.
- technology hardware and equipment, including manufacturers and distributors of communications equipment, computers and peripherals, electronic equipment and instruments and equipment for the manufacture of semiconductors and related products.

Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may invest a maximum of 25% of its net assets in equities and other participation rights traded on the Russian market – the "Moscow Interbank Currency Exchange – Russian Trade System" (MICEX-RTS).

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities, as described on page 1 of this prospectus). The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: Risks linked to the investment universe: detailed description in this prospectus.

NN (L) Japan Equity

Introduction

This Sub-Fund was launched with effect from 17 December 2001 following a contribution of the assets of the “Japanese Equity” Sub-Fund (launched on 17 October 1997) of the ING International SICAV. The Sub-Fund absorbed the BBL Invest Japan Sub-Fund on 22 September 2003.

Investment objective and policy

The Sub-Fund essentially invests (minimum 2/3) in a diversified portfolio of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund’s net assets – and convertible bonds) issued by companies established, listed or traded in Japan. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company’s Prospectus.

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund’s net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III “Additional information”, Chapter II: “Risks linked to the investment universe: detailed description”.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund’s liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in a specific geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the

financial derivative instruments is detailed in Part III “Additional information”, Chapter II: “Risk linked to the investment universe: detailed description”.

The global exposure of this Sub-Fund is determined using the commitment method.

NN (L) Latin America Equity

Introduction

This Sub-Fund was launched, with effect from 10 December 2001, following a contribution of the assets of the “Latin America Equity” Sub-Fund (launched on 24 May 1994) of the ING International SICAV. The Sub-Fund absorbed the ING (L) Invest Brazil Sub-Fund (launched on 17 January 2000) on 17 April 2003 and the BBL Invest Latin America Sub-Fund on 22 September 2003.

Investment objective and policy

The Sub-Fund essentially invests (minimum 2/3) in a diversified portfolio of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund’s net assets – and convertible bonds) issued by companies established, listed or traded in Latin America (including the Caribbean). Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company’s Prospectus.

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund’s net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps

NN (L) Materials

Introduction

This Sub-Fund (launched on 20 November 1997 under the name ING (L) Invest Chemicals) absorbed the ING (L) Invest Metals & Mining Sub-Fund (launched on 7 February 1994) on 23 May 2003. On 8 April 2011, ING (L) Invest Materials absorbed ING (L) Invest European Materials (launched on 4 September 2000), formerly named ING (L) Invest European Cyclical.

Investment objective and policy

The Sub-Fund essentially invests (minimum 2/3) in a diversified portfolio of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund's net assets – and convertible bonds) issued by companies in the materials sector. In particular, companies carrying out their business activity in the following industries are included: chemicals, construction materials, containers and packaging, metals and mining (including steel), paper and forest products. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may invest a maximum of 25% of its net assets in equities and other participation rights traded on the Russian market – the "Moscow Interbank Currency Exchange – Russian Trade System" (MICEX-RTS).

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by

various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-

Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. Investments in a specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risk linked to the investment universe: detailed description".

NN (L) Multi Asset Factor Opportunities

Introduction

The Sub-Fund was launched on 22 March 2016.

Investment objective and policy

The Sub-Fund aims to provide long term capital appreciation by investing in a set of factors (like momentum, value, carry and volatility) which are captured with rule-based long/short strategies. Factors display certain characteristics that are important in explaining their returns:

- Momentum intends to benefit from the tendency that an asset's relative performance will continue in the near future;
- Value intends to benefit from perceived incorrect valuations by buying undervalued assets and selling overvalued assets;
- Carry intends to benefit from the tendency that instruments with higher yields outperform those with lower yields;
- Volatility intends to benefit from the tendency that volatility is trading at a higher level than the volatility that will be realized.

Measured over a period of five years, this Sub-Fund aims to beat the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund seeks to achieve its investment objective by primarily using long and short financial derivative instruments on a broad range of asset classes such as equities, fixed-income, currencies and commodity Indices. The Sub-Fund may also use the derivatives for hedging purposes.

The Sub-Fund may use the following types of derivatives (non-exhaustive list):

- options and futures on Transferable Securities or Money Market Instruments;
- Index futures and options;
- interest rate futures, options and swaps;
- forward currency contracts and currency options;
- performance swaps.

The Sub-Fund's portfolio may entirely be composed of cash or cash equivalents for the purpose of funding derivative instruments.

Performance swaps are used to allow the Sub-Fund to receive the return of an Index in exchange for the payment of a fixed fee. These underlying Indices comply with the requirements defined in ESMA guidelines 2014/937.

For exposure to commodities, the Sub-Fund intends to make use of a series of commodity Indices, including but not limited to the Bloomberg BCOM Index and Bloomberg BCOM Capped Indices.

Next to the Bloomberg commodity Indices, exposure to commodities may also be achieved via the use of a dedicated Index named Commodity Enhanced Curve Index, which is a diversified commodity Index designed to outperform the Bloomberg Commodity (Excess Return) Index. The Commodity Enhanced Curve Index seeks outperformance by positioning its commodity exposure at various points on the commodity futures curve according to a proprietary algorithm designed and maintained by NN Investment Partners.

The Sub-Fund will not acquire physical commodities directly.

For efficient portfolio management purposes, the volatility premium arising from other asset classes such as equities, fixed-income and currencies may also be achieved via the use of performance swaps whose underlying is composed of a basket of short options (calls and puts) with maturities ranging between one day and three months. For equities, the underlying markets of these options are major stock Indices which include but are not

limited to S&P 500, FTSE 100, Eurostoxx 50 and Nikkei 225. Futures on the same markets are embedded in the basket to hedge the market risk exposure. Similar strategies may be applied on currency rates and fixed-income.

The counterparty risk arising from the use of swaps is limited by engaging with highly rated counterparties only and by the daily collateral exchange process (please refer Part III "Additional information", Chapter IV "Techniques and instruments", Section D "Use of collateral"). The Sub-Fund has also the possibility to close-out the swaps at any time.

Fixed-income Transferable Securities and/or Money Market Instruments issued or guaranteed by the governments of the United States of America, the United Kingdom, Japan, Germany, France, Italy, Canada, Spain, Australia and/or Korea, and their local public authorities may represent more than 35% of the net asset value of the Sub-Fund, provided such exposure does comply with the principle of risk spreading described in Art. 45 (1) of the Law of 2010. The Sub-Fund may also invest in a broad range of other instruments, including, but not limited to equities, Transferable Securities (including warrants on Transferable Securities up to a maximum of 10% of the Sub-Fund's net assets), contingent convertible securities (up to a maximum of 10% of the Sub-Fund's net assets), bonds, Money Market Instruments, 144A securities, units of UCITS and other UCIs and deposits, as described in Part III "Additional information", Chapter III "Investment Restrictions", Section A "Eligible investments". However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Investments in asset-backed securities will however be limited to 20% of its net assets.

Where the Sub-Fund invests in warrants on Transferable Securities, the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Definition and considerations related to leverage

The Management Company monitors the level of leverage emanating from the usage of financial derivative instruments. In accordance with regulations, such leverage is obtained by summing the notionals of the derivatives used (hereafter "gross leverage") without taking into account any netting and hedging arrangements. For the avoidance of doubt, this means that derivatives referring to the same underlying asset, whose net exposure leaves no material residual risk for the Sub-Fund, will add to the gross leverage; similarly, a derivative used for hedging purposes will also be counted in the gross leverage. At the time of release of the current prospectus, the gross leverage is expected to reach a maximum level of 1,300% of the Sub-Fund's Net Asset Value.

Investors must be aware that the Sub-Fund makes extensive use of derivatives, both for hedging and for taking active positions. Reasons for making extensive use of derivatives are described hereafter:

The investment strategy of the Sub-Fund is based on the philosophy that the risk/return profile should not depend on a small number of views or positions. Consequently, the Sub-Fund will typically take many, relatively small, uncorrelated positions rather than a few large positions.

Due to the investment philosophy, the Sub-Fund can take so-called "relative value trades". These positions express views on

the difference between various interest rates, equity markets, currencies or commodities rather than expressing views on “outright directional positions”. Relative value trades have “long” and “short” legs, meaning the amount of derivatives used at least double the amount used for outright directional positions.

Investors must also be aware that the gross leverage, while providing an indication of the amount of derivatives used relative to the Sub-Fund’s Net Asset Value, may however lead to results that are not representative of the economic exposure of the Sub-Fund. By summing the notionals of the derivatives used without taking into account any netting and hedging arrangements, the ratio may fail to capture the risk associated with the use of derivatives.

The expected maximum level of leverage is an indicator and not a regulatory limit. The Sub-Fund’s level of leverage may temporarily be higher than the expected maximum level as long as it remains in line with its risk profile and complies with its VaR limit. For example, as a result of a large outflow, the portfolio manager may consider it is more efficient to trade new Forex forwards as opposed to closing existing ones. That would lead to additional trades, hence increasing the level of leverage, while there is no impact on market risk.

For additional information on leverage, please refer to the Part III “Additional information”, Chapter IV of the prospectus.

Risk profile of the Sub-Fund

The overall market risk associated with the instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund’s liquidity risk is set to medium. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact the Sub Fund’s performance. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III “Additional information”, Chapter II: “Risks linked to the investment universe: detailed description”.

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III “Additional information”, Chapter IV: Techniques and instruments, A: General Provisions.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II: “Sub-Fund Factsheets”. The Sub-Fund is suitable for investors who are looking for long term capital growth and are capable of assessing the risks linked to this Sub-Fund and to sustain a medium-long term loss. The Sub-Fund is explicitly not suitable for purchase by retail investors without pre-assessment from a licensed entity about the merits or risks of the investments or their suitability prior to investing in the Sub-Fund.

NN (L) Multi Asset High Income

Introduction

The Sub-Fund was launched on 28 December 2015.

Investment objective and policy

The Sub-Fund aims to provide an attractive level of regular income and/ or capital appreciation in the longer term by investing in a portfolio of income generating securities and through the use of other financial instruments. The Sub-Fund seeks to achieve its investment objective by investing mainly in a globally diversified portfolio of debt securities (including but not limited to high yield bonds and emerging market debt), Real Estate Investment Trusts (REITs) and shares. In order to obtain exposure to these asset classes, the Sub-Fund may invest directly in securities and/or indirectly via units of UCITS and other UCIs. Within a strong risk controlled environment, the asset allocation may be made opportunistically among these asset classes.

The Sub-Fund may invest in Transferable Securities (including warrants on Transferable Securities up to a maximum of 10% of the Sub-Fund's net assets), contingent convertible securities (up to a maximum of 10% of the Sub-Fund's net assets), bonds, equities, Money Market Instruments, 144A securities, units of UCITS and other UCIs and deposits, as described in Part III "Additional information", Chapter III "Investment Restrictions", Section A "Eligible investments". Investments in asset-back securities will however be limited to 20% of its net assets.

Where the Sub-Fund invests in warrants on Transferable Securities, the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

The Sub-Fund may be exposed to various exchange risks linked to investments in securities denominated in currencies other than that of the Sub-Fund or in derivative instruments with underlying exchange rates or currencies.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers

of underlying investments is high. The Sub-Fund's liquidity risk is set to medium. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. No guarantee is provided as to the recovery of the initial investment. The risk associated with derivative financial instruments is detailed in Part III "Additional information", Chapter II "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II "Sub-Fund Factsheets".

NN (L) Prestige & Luxe

Introduction

The Sub-Fund was launched on 12 January 1998. On 8 April 2011, ING (L) Invest Prestige & Luxe absorbed ING (L) Invest Global Brands (launched on 2 June 1998), the latter absorbed ING (L) Invest Futuris on 17 April 2003.

Investment objective and policy

The Sub-Fund essentially invests (minimum 2/3) in a diversified portfolio of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund's net assets – and convertible bonds) issued by companies associated with "Prestige & Luxury" brand names that occupy a solid international market position.

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. Investments in a specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional

information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II "Sub-Fund Factsheets".

NN (L) US Credit

Introduction

The Sub-Fund was launched on 29 April 2011. The Sub-Fund absorbed the following Sub-Fund: Corporate USD (29 April 2011) a Sub-Fund of the ING (L) Renta Fund SICAV.

Investment objective and policy

This Sub-Fund aims to generate returns via the active asset management of a portfolio of debt securities and Money Market Instruments issued mainly by financial institutions and companies and denominated primarily (minimum 2/3) in US dollars. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

It is stipulated that any liquid assets held on an ancillary basis will not be taken into account when calculating the above-mentioned limit of two thirds.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), contingent convertible securities (up to a maximum of 10% of the Sub-Fund's net assets), Money Market Instruments, Rule 144 A securities, units of UCITS and other UCIs and deposits as described in Chapter III "Investment restrictions", section A "Eligible investments" of Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, please note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

When selecting investments the Investment Manager shall analyse, maintain and update the credit rating of future investments and shall ensure that the average rating of the portfolio is BBB- or better. The manager will always take the quality and diversity of issuers and sectors, along with the maturity date, into consideration.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps
- forward currency contracts, currency futures contracts and transactions, currency call and put options, and currency swap
- derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices and baskets of securities.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

Potential investors should note that the type of investments carried out in this Sub-Fund involve a relatively higher level of risk than investments in similar Sub-Funds investing in government bonds.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other financial instruments used to reach the investment objectives is considered medium. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is medium. The Sub-Fund's liquidity risk is set to medium. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in a specific geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

Typical investor profile:

The Sub-Fund particularly targets neutral investors as defined in Part II "Sub-Fund Factsheets".

NN (L) US Enhanced Core Concentrated Equity

Introduction

This Sub-Fund was launched on 17 October 1997 following a contribution of the assets of the “North American Equity” Sub-Fund of the NN (L) International SICAV (formerly ING (L) Invest North America). The new name took effect on 23 May 2003. On 22 September 2003, the Sub-Fund absorbed the BBL Invest America Sub-Fund.

Investment objective and policy

The Sub-Fund essentially invests (minimum 2/3) in a diversified portfolio of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund’s net assets – and convertible bonds) issued by companies established, listed or traded in the United States of America. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company’s Prospectus.

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund’s net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III “Additional information”, Chapter II: “Risks linked to the investment universe: detailed description”.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund’s liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in a specific geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the

recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III “Additional information”, Chapter II: “Risks linked to the investment universe: detailed description”.

NN (L) US Factor Credit

Introduction

The Sub-Fund was launched on 29 April 2011 under the name of NN (L) US Fixed Income after absorbing the following Sub-Fund: Dollar (29 April 2011) a Sub-Fund of the ING (L) Renta Fund SICAV. This Sub-Fund was renamed "NN (L) US Factor Credit" on 1st November 2017.

Investment objective and policy

This Sub-Fund aims to generate returns via the active management of a portfolio of bonds and money market instruments by investing primarily (minimum 2/3) in bonds and money market instruments denominated in US dollars.

The Sub-Fund will not invest in instruments rated below BBB-/Baa3 as assigned by independent rating organizations such as Standard & Poor's, Moody's and/or Fitch, or equivalent as determined by the Investment Manager if the instrument is not rated. If an instrument is rated by only one of the foregoing rating agencies, that rating shall apply. If it is rated by two or more of such rating agencies, the second best rating shall apply. Any security that is subsequently downgraded below BBB-/Baa3 or equivalent may continue to be held for a period of six months unless it represents more than 3% of the Sub-Funds' net assets, in which case it shall be sold immediately.

The Sub-Fund follows a systematic approach by investing in a set of factors (like value, carry and low-risk) which are captured with rule-based long only strategies.

Factors are certain characteristics of bonds that are structural drivers of their future returns. For example:

- Value intends to benefit from perceived incorrect valuations resulting in bonds that are cheap to fundamentals outperforming expensive bonds
- Carry intends to benefit from the tendency that bonds with higher yields outperform those with lower yields;
- Low-risk intends to benefit from the tendency that stable, low risk bonds outperform those with higher risks.

Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may also invest, on an ancillary basis, in other transferable securities such as warrants on transferable securities and contingent convertible securities, each respectively up to 10% of the Sub-Fund's net assets, as well as in money market instruments and Rule 144 A securities. Furthermore, the sub-fund may invest in deposits and units of UCITS and other UCIs; however, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. The risks associated with these financial instruments are detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

It is stipulated that any liquid assets held on an ancillary basis will not be taken into account when calculating the above-mentioned limit of two thirds.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps

- forward currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- derivative financial instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices and baskets of securities.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other financial instruments used to reach the investment objectives is considered medium. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country.

Expected credit risk, the risk of failure of the issuers of underlying investments is medium. The Sub-Fund's liquidity risk is set to medium. Liquidity risks may arise when a specific underlying investment is difficult to sell. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

NN (L) US Growth Equity

Introduction

The Sub-Fund was launched on 20 October 2006.

Investment objective and policy

The aim of this Sub-Fund is to outperform US large caps and market Indices. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund will invest a minimum of two-thirds of its net assets in the shares of companies which have their principal office in the United States or carry out a major portion of their business activity in the United States.

The Sub-Fund is designed to provide returns adjusted to high levels of risk in all market conditions. Our bottom-up strategy consists of selecting shares via rigorous fundamental research. A quantitative filter based on the manager's fundamental signals is initially applied to a universe of approximately 1,000 blue-chip companies.

The manager then carries out a more detailed fundamental analysis on the highest-rated shares. Decisions to buy and sell are made based on the manager's qualitative judgement. In both phases, the process is guided by momentum, market perception and valuation.

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development

of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in a specific geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

NN (L) US High Dividend

Introduction

The Sub-Fund was launched on 14 March 2005.

Investment objective and policy

The Sub-Fund invests its net assets predominantly in a diversified portfolio comprised of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the net assets of the Sub-Fund – and convertible bonds) issued by companies established, listed or traded in the US and offering an attractive dividend rate. Issuers are companies whose head office or main business activity is based in the United States. Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in a specific geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional

information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II "Sub-Fund Factsheets".

NN (L) US High Yield

Introduction

The Sub-Fund was launched on 11 December 2017.

Investment objective and policy

This Sub-Fund shall invest predominantly in high yield bonds denominated in US Dollar currency. These bonds are different from traditional "Investment Grade" bonds in that they are issued by companies presenting a higher risk in terms of their ability to fully honor their financial commitments, which explains why they offer a higher return. Measured over a period of several years this Sub-Fund aims to outperform the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may also invest, on an ancillary basis, in other transferable securities such as (including warrants on transferable securities, contingent convertible securities and distressed debt securities, each respectively up to 10% of the Sub-Fund's net assets, as well as in money market instruments and Rule 144 A securities. Furthermore, the sub-fund may invest in deposits and units of UCITS and other UCIs; however, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. The risks associated with these financial instruments are detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on transferable securities or money market instruments
- futures and options on Indices
- futures, options and interest rate swaps
- performance swaps
- forward currency contracts, currency futures contracts and transactions, currency call and put options, and currency swaps
- financial derivative instruments linked to credit risks, namely credit derivatives, such as credit default swaps, Indices and baskets of securities and currency options.

The Sub-Fund will not actively invest in equities but may receive equities from a restructuring or other corporate action. Such equities are intended to be sold as soon as possible taking into account the best interests of the investors.

Note: ratings are awarded by reputable credit rating agencies to fixed income instruments that can be traded on the markets. These ratings give a fair idea of the credit risk associated with the issuing entities: the lower the rating, the higher the credit risk. To compensate for this risk, however, a company with such a rating will offer high-yield bonds. Ratings awarded by ratings agencies range from AAA (highest rating) to CCC (very high risk of defaulting). The rating varies from BB+ to CCC for the high yield markets. With this in mind, this Sub-Fund is intended for well-informed investors who are aware of the degree of risk linked to their chosen investments.

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the bonds and other

financial instruments used to reach the investment objectives is considered high. These instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is high. The Sub-Fund's liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. Investments in specific geographic area are more concentrated than investments in various geographic areas. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

The global exposure of this Sub-Fund will be determined using the VaR method as further detailed in Part III "Additional information", Chapter IV: Techniques and instruments, A: General Provisions.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II: SUB-FUND FACTSHEETS.

NN (L) Utilities

Introduction

The Sub-Fund was launched on 11 January 1999.

Investment objective and policy

The Sub-Fund essentially invests (minimum 2/3) in a diversified portfolio of equities and/or Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of the Sub-Fund's net assets – and convertible bonds) issued by companies in the utilities sector. In particular, companies carrying out their business activity in the following industries are included:

- electricity, gas or water;
- diversified utility providers and independent electricity producers (independent producers and/or distributors of electricity).

Measured over a period of several years this Sub-Fund aims to beat the performance of the index as listed in the Appendix II of the Company's Prospectus.

The Sub-Fund may invest a maximum of 25% of its net assets in equities and other participation rights traded on the Russian market – the "Moscow Interbank Currency Exchange – Russian Trade System" (MICEX-RTS).

The Sub-Fund reserves the right to invest up to 20% of its net assets in Rule 144A Securities.

The Sub-Fund may also invest, on an ancillary basis, in other Transferable Securities (including warrants on Transferable Securities up to 10% of the Sub-Fund's net assets), Money Market Instruments, units of UCITS and other UCIs and deposits as described in Part III of this prospectus. However, investments in UCITS and UCIs may not exceed a total of 10% of the net assets. Where the Sub-Fund invests in warrants on Transferable Securities, note that the Net Asset Value may fluctuate more than if the Sub-Fund were invested in the underlying assets because of the higher volatility of the value of the warrant.

With a view to achieving the investment objectives, the Sub-Fund may also use derivative financial instruments including, but not limited to, the following:

- options and futures on Transferable Securities or Money Market Instruments
- Index futures and options
- interest rate futures, options and swaps
- performance swaps
- forward currency contracts and currency options.

The risks linked to this use of derivative financial instruments for purposes other than hedging are described in Part III "Additional information", Chapter II: "Risks linked to the investment universe: detailed description".

Securities lending and repurchase agreements (opérations à réméré)

The Sub-Fund may also engage in securities lending and repurchase agreements.

Risk profile of the Sub-Fund

The overall market risk associated with the equities and other financial instruments used to reach investment objectives is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves

affected by the general world economic situation and the economic and political conditions in each country. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. Investments in a specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. The risk associated with the financial derivative instruments is detailed in Part III "Additional information", Chapter II: "Risk linked to the investment universe: detailed description".

The global exposure of this Sub-Fund is determined using the commitment method.

Warning

Investors' attention is drawn to the fact that an investment in the Shares of this Sub-Fund involves a higher level of risk than that generally found on the majority of markets in Western Europe, North America or other developed countries.

These risks include:

- political risk: i.e. the instability and volatility of the political environment and situation;
- economic risk: i.e. high inflation rates, risks linked to investments in recently privatised companies, monetary depreciation, little movement on the financial markets;
- legal risk: insecurity with respect to the law and general difficulty in getting laws recognised and/or passed;
- tax risk: in some of the aforementioned States, taxes may be very high and there is no guarantee whatsoever that the legislation will be interpreted in a uniform and consistent manner. The local authorities are often vested with a discretionary power to create new taxes, which may sometimes be applied retrospectively.

There is also the risk of loss due to the shortage of adequate systems in place for transfer, valuation, settlement and accounting as well as securities registration, the safekeeping of securities and the liquidation of transactions, with such risks being less common in Western Europe, North America and other developed countries. It should be noted that the correspondent bank or banks will not always be legally liable for or be in a position to pay damages resulting from the acts or omissions of its representatives or employees.

As a result of the risks explained above, volatility and illiquidity are much higher for investments when the market capitalisation in these States is lower than that of developed markets.

Typical investor profile

The Sub-Fund particularly targets dynamic investors as defined in Part II "Sub-Fund Factsheets".

PART III: ADDITIONAL INFORMATION

I. The Company

The Company is an umbrella fund and offers investors the opportunity to invest in a range of Sub-Funds. Each Sub-Fund has its own specific investment objective and policy and an independent portfolio of assets.

The Company is a public limited liability company ("*Société Anonyme*") qualifying as a SICAV and is subject to the provisions of the Luxembourg law related to commercial companies of 10 August 1915, as amended from time to time, and the Law of 2010.

The Company was set up on 6 September 1993 under the Law of 30 March 1988 on undertakings for collective investment as "BBL (L) Invest". The name of the Company was lately changed from ING (L) to NN (L) with effect as of 7 April 2015. The Articles were modified several times; the last time as of 20 August 2018. The coordinated Articles were registered in the Luxembourg Trade and Companies Register, where they are available for inspection. Copies may be obtained free of charge upon request at the registered office of the Company.

The Articles may be amended from time to time in accordance with the quorum and majority requirements laid down by Luxembourg law and the Articles. The Prospectus, including the details of the Sub-Funds as described in detail in each Sub-Fund factsheet under "Investment objective and policy" may be amended from time to time by the Company's Board of Directors with the prior approval of the CSSF in accordance with Luxembourg law and regulations. The share capital of the Company will, at all times, be equal to the value of the net assets of the Sub-Funds. It is represented by bearer or registered Shares, all fully paid up, without par value.

Share capital variations are fully legal and there are no provisions requiring publication and entry in the Trade and Companies Register as prescribed for increases and decreases in the share capital of public limited companies (*Sociétés Anonymes*).

The Company may issue additional Shares at any time at a price set in compliance with the contents of Chapter IX "Shares", without any preference right being reserved for existing Shareholders.

The minimum capital is laid down in the Law of 2010. In case where one or several Sub-Funds of the Company hold Shares that have been issued by one or several other Sub-Funds of the Company their value will not be taken into account for the calculation of the net assets of the Company for the determination of the above mentioned minimum capital.

The consolidation currency of the Company is the Euro.

II. Risks linked to the investment universe: detailed description

General remarks regarding risks

Investments in the Shares are exposed to risks, which may include or be linked to equity, bond, currency, interest rate, credit, volatility and political risks. Each of these risks may also occur in conjunction with other risks. Some of these risk factors are described briefly below. Investors must have experience in investing in instruments used in the context of the investment policy described.

Investors must also be fully aware of the risks linked to investments in the Company's Shares and ensure that they consult their legal, tax and financial adviser, auditor or other

adviser in order to obtain complete information on (i) the appropriate nature of an investment in Shares, depending on

their personal financial and tax situation and on their particular circumstances, (ii) the information contained herein and (iii) the investment policy of the Sub-Fund (as described in the relevant factsheet for each Sub-Fund), before making any investment decision.

Apart from potential stock exchange profit, it is important to note that an investment in the Company also involves the risk of incurring stock exchange losses. Company Shares are securities whose value is determined on the basis of fluctuations in the price of the Transferable Securities held by the Company. The value of Shares may therefore go up or down in relation to their initial value.

There is no guarantee that the aims of the investment policy will be achieved.

Market risk

This is a general risk which affects all investments. Price for financial instruments are mainly determined by the financial markets and by the economic development of the issuers, who are themselves affected by the overall situation of the global economy and by the economic and political conditions prevailing in each relevant country (market risk).

Interest rate risk

Interest rates are determined by factors of supply and demand in the international money markets which are influenced by macro-economic factors, speculation and central bank and government policies or intervention. Fluctuations in short term and/or long term interest rates may affect the value of the Shares. Fluctuations in interest rates of the currency in which the Shares are denominated and/or fluctuations in interest rates of the currency or currencies in which the Sub-Fund's assets are denominated may affect the value of the Shares.

Currency risk

The value of investments may be affected by exchange rate fluctuations in the Sub-Funds where investments are allowed in a currency other than the Sub-Fund's Reference Currency.

Credit risk

Investors must be aware that any such investment may involve credit risks. Bonds and debt securities effectively involve issuer credit risk, which can be calculated using the issuer's credit rating. Bonds and debt securities issued by entities with a low rating are generally considered to have higher credit risk and issuer default probability than those issued by issuers with a higher rating. If the issuer of bonds or debt securities runs into financial or economic difficulty, the value of the bonds or debt securities (which may become null and void) and the payments made on account of these bonds or debt securities (which may become null and void) may be affected.

Risk of issuer default

In parallel to the general trends prevailing on the financial markets, developments particular to each issuer can affect the value of an investment. Even a careful selection of transferable securities cannot eliminate the risk of losses caused by the inability of an issuer to face its contractual payment obligations.

Liquidity risk

Liquidity risk may take two forms: asset liquidity risk and funding liquidity risk. Asset liquidity risk refers to the inability of a Sub-Fund to purchase or sell a security or position at its quoted price or market value due to such factors as a sudden change in the perceived value or

credit worthiness of the position, or due to adverse market conditions generally. Funding liquidity risk refers to the inability of a Sub-Fund to meet a redemption request, due to the inability of the Sub-Fund to sell securities or positions in order to raise sufficient cash to meet the redemption request. Markets where the Sub-Fund's securities are traded could also experience such adverse conditions as to cause stock-exchanges to suspend trading activities. Reduced liquidity due to these factors may have an adverse impact on the Net Asset Value of the Sub-Fund and on its ability to meet redemption requests in a timely manner.

Risks arising from investments in Currency Hedged, and Duration Hedged Share-Classes

Currency Hedged and Duration Hedged Share-Classes will make use of derivative financial instruments to achieve the stated objective of the specific Share-Class, and which can be distinguished by making reference to Currency Hedged or Duration Hedged Share-Classes. Investors in such Share-Classes may be exposed to additional risks, such as market risk, compared with the main Share-Class of the respective Sub-Fund depending on the level of the hedge performed. Additionally, the changes in the Net Asset Value of these Share-Classes may not be correlated with the main Share-Class of the Sub-Fund.

Risk on cross liabilities for all Share-Classes (Standard, Currency Hedged, Duration hedged)

The right of Shareholders of any Share-Class to participate in the assets of the Sub-Fund is limited to the assets of the relevant Sub-Fund and all the assets comprising a Sub-Fund will be available to meet all of the liabilities of the Sub-Fund, regardless of the different amounts stated to be payable on the separate Share-Classes. Although the Company may enter into a derivative contract in respect of a specific Share-Class, any liability in respect of such derivative transaction will affect the Sub-Fund and its Shareholders as a whole, including Shareholders of non-Currency Hedged and non-Duration Hedged Share-Classes. Investors should be aware that this may lead the Sub-Fund to hold larger cash balances than would be the case in the absence of such active Share-Classes.

Risks arising from investments in derivatives (including Total Return Swaps)

The Company may use various derivative instruments to reduce risks or costs or to generate additional capital or income in order to meet the investment objectives of a Sub-Fund. Certain Sub-Funds may also use derivatives extensively and/or for more complex strategies as further described in their respective investment objectives. While the prudent use of derivatives can be beneficial, derivatives also involve risks different from, and, in certain cases, greater than, the risks associated with more traditional investments. The use of derivatives may give rise to a form of leverage, which may cause the Net Asset Value of these Sub-Funds to be more volatile and/or change by greater amounts than if they had not been leveraged, since leverage tends to exaggerate the effect of any increase or decrease in the value of the respective Sub-Funds' portfolio securities.

Before investing in Shares, investors must ensure to understand that their investments may be subject to the following risk factors relating to the use of derivative instruments:

- **Market risk:** Where the value of the underlying asset of a derivative instrument changes, the value of the instrument will become positive or negative, depending on the performance of the underlying asset. For non-option derivatives the absolute size of the fluctuation in value of a derivative will be very similar to the fluctuation

in value of the underlying security or reference index. In the case of options, the absolute change in value of an option will not necessarily be similar to the change in value of the underlying because, as explained further below, changes in options values are dependent on a number of other variables.

- **Liquidity risk:** If a derivative transaction is particularly large or if the relevant market is illiquid, it may not be possible to initiate a transaction or liquidate a position at an advantageous price (however, a Sub-Fund will only enter into OTC derivative contracts if it is allowed to liquidate such transactions at any time at fair value).
- **Counterparty risk:** When OTC derivative contracts are entered into, the Sub-Funds may be exposed to risks arising from the solvency and liquidity of its counterparties and from their ability to respect the conditions of these contracts. The Company on behalf of the Sub-Funds may enter into forwards, options and swap contracts, or use other derivative techniques, each of which involves the risk that the counterparty will fail to respect its commitments under the terms of each contract. The counterparty risk associated with any of the Share-Classes of the Sub-Fund is borne by the Sub-Fund as a whole. In order to mitigate the risk, the Company will ensure that the trading of bilateral OTC derivative instruments is conducted on the basis of the following criteria:
 - Only high quality counterparties are selected for the trading of bilateral OTC derivative instruments. In principle, a bilateral OTC derivative counterparty must at least have an investment grade rating by Fitch, Moody's and/or Standard & Poor's, be structured as a public limited liability company, and have its parent company registered office located in OECD countries;
 - Bilateral OTC derivatives are traded only if covered by a robust legal framework, typically an International Swap and Derivative Association Inc. (ISDA) master agreement and a Credit Support Annex (CSA);
 - With the exception of the short-term currency forward contracts used for Share-Class hedging, bilateral OTC financial derivative instruments should be covered by a collateral process conducted on a NAV frequency basis;
 - The creditworthiness of the counterparties should be reassessed at least annually;
 - All policies in relation to the trading of bilateral OTC derivative instruments should be reviewed at least annually;
 - The counterparty risk to a single counterparty is maximised to 5% or 10% of net assets as is defined under Chapter III "Investments restrictions", Section B "Investments limits", point 2.
- **Settlement risk:** Settlement risk exists when a derivative instrument is not settled in a timely manner, thereby increasing counterparty risk prior to settlement and potentially incurring funding costs that would otherwise not be experienced. Should the settlement never occur the loss incurred by the Sub-Fund will correspond to the difference in value between the original and the replacement contracts. If the original transaction is not replaced, the loss incurred by the Sub-Fund will be equal to the value of the contract at the time it becomes void.
- **Other risks:** Other risks in using derivative instruments include the risk of mispricing or improper valuation. Some derivative instruments, in particular OTC derivative instruments, do not have prices observable on an exchange and so involve the use of formulae, with prices of underlying securities or reference indices obtained from other sources of market price data. OTC options involve the use of models, with assumptions, which increases the risk of pricing errors. Improper valuations could result in increased cash payment requirements to counterparties or a loss of value to the Sub-Funds. Derivative instruments do

not always perfectly or even highly correlate or track the value of the assets, rates or Indices they are designed to track. Consequently, the Sub-Funds' use of derivative instruments may not always be an effective means of, and sometimes could be counterproductive to, furthering the Sub-Funds' investment objective. In adverse situations, the Sub-Funds' use of derivative instruments may become ineffective and the Sub-Funds may suffer significant losses.

A non-exhaustive list of the derivative instruments most commonly used by the relevant Sub-Funds is set out below:

- **Equity Index, Single Stock, Interest Rate and Bond Futures:** Futures contracts are forward contracts, meaning they represent a pledge to make a certain economic transfer at a future date. The exchange of value occurs by the date specified in the contract. The majority of contracts have to be cash settled and where physical delivery is an option the underlying instrument is actually rarely exchanged. Futures are distinguished from generic forward contracts in that they contain standardised terms, trade on a formal exchange, are regulated by overseeing agencies, and are guaranteed by clearing firms. Also, in order to ensure that payment will occur, futures have both an initial margin and a margin requirement which moves in line with the market value of the underlying asset that must be settled daily. The main risk to the buyer or seller of an exchange-traded future consists in the change in value of the underlying reference Index/security/contract/bond.
- **Foreign Exchange Contracts:** These contracts involve the exchange of an amount in one currency for an amount in a different currency on a specific date. Once a contract has been transacted the value of the contract will change depending on foreign exchange rate movements and, in the case of forwards, interest rate differentials. To the extent that such contracts are used to hedge non-base currency foreign currency exposures back to the base currency of the Sub-Fund, there is a risk that the hedge may not be perfect and movements in its value may not exactly offset the change in value of the currency exposure being hedged. Since the gross amounts of the contract are exchanged on the specified date, there is a risk that if the counterparty with whom the contract has been agreed goes into default between the time of payment by the Sub-Fund but before receipt by the Sub-Fund of the amount due from the counterparty, then the Sub-Fund will be exposed to the counterparty risk of the amount not received and the entire principal of a transaction could be lost.
- **Interest Rate Swaps:** An interest rate swap is an OTC agreement between two parties which normally involves exchanging a fixed interest amount per payment period for a payment that is based on a floating rate index. The notional principal of an interest rate swap is never exchanged, only the fixed and floating amounts. Where the payment dates of the two interest amounts coincide there is normally one net settlement. The market risk of this type of instrument is driven by the change in the reference indices used for the fixed and floating legs. Each party to the interest rate swap bears the counterpart's credit risk and collateral is arranged to mitigate this risk.
- **Credit Default Swaps (CDSs):** Credit default swaps are bilateral financial contracts in which one counterparty (the "protection buyer") pays a periodic fee in return for a contingent payment by the other counterparty (the "protection seller") following a credit event of a reference issuer. The protection buyer acquires the right to exchange particular bonds or loans issued by the reference issuer with the protection seller for its or their

par value, in an aggregate amount up to the notional value of the contract, when a credit event occurs. A credit event is commonly defined as bankruptcy, insolvency, receivership, material adverse restructuring of debt, or failure to meet payment obligations when due. A credit default swap allows the transfer of default risk and carries a higher risk than direct investments in bonds. If the credit event does not occur the buyer pays all the required premiums and the swap terminates on maturity with no further payments. The risk of the buyer is therefore limited to the value of the premiums paid. The market for credit default swaps may sometimes be more illiquid than bond markets. A Sub-Fund entering into credit default swaps must at all times be able to meet redemption requests.

- **Total Return Swaps (TRS):** These contracts represent a combined market and credit default derivative and their value will change as a result of fluctuations in interest rates as well as credit events and credit outlook. A TRS involves that receiving the total return is similar in risk profile to actually owning the underlying reference security. Furthermore, these transactions may be less liquid than interest rate swaps as there is no standardisation of the underlying reference index and this may adversely affect the ability to close out a TRS position or the price at which such a close out is transacted. The swap contract is an agreement between two parties and therefore each party bears the other's counterparty risk and collateral is arranged to mitigate this risk. All the revenues arising from TRS will be returned to the relevant Sub-Fund.
- **Exchange-traded and OTC Options:** options are complex instruments whose value depends on many variables including the strike price of the underlying (versus the spot price both at the time the option is transacted and subsequently), the time to maturity of the option, the type of option (European or American or other type) and volatility among others. The most significant contributor to market risk resulting from options is the market risk associated with the underlying when the option has an intrinsic value (i.e. it is 'in-the-money'), or the strike price is near the price of the underlying ('near-the money'). In these circumstances the change in value of the underlying will have a significant influence on the change in value of the option. The other variables will also have an influence, which will likely be greater the further away the strike price is from the price of the underlying. Unlike exchange traded option contracts (which are settled through a clearing firm), OTC option contracts are privately negotiated between two parties and are not standardised. Further, the two parties must bear each other's credit risk and collateral is arranged to mitigate this risk. The liquidity of an OTC option can be less than an exchange traded option and this may adversely affect the ability to close out the option position, or the price at which such a close out is transacted.

Risks arising from the use of SFTs (including Securities Lending Transactions, Repurchase Transactions and Reverse Repurchase Transactions)

Securities Lending Transactions, Repurchase Transactions and Reverse Repurchase Transactions involve certain risks. There is no assurance that a Sub-Fund will achieve the objective for which it entered into such a transaction. In the event of a counterparty default or an operational difficulty, securities lent may be recovered late and only in part which might restrict the Sub-Fund's ability to complete the sale of securities or to meet redemption requests. The Sub-Fund's exposure to its counterparty will be mitigated by the fact that the counterparty will forfeit its collateral if it defaults on the transaction. If the collateral is in the form of securities, there is a risk that when it is sold it will realize insufficient cash to settle the counterparty's debt to the Sub-Fund or to purchase replacements for the securities that were lent to the counterparty. In the event that the Sub-Fund reinvests cash collateral, there is a risk that the investment will earn less than the

interest that is due to the counterparty in respect of that cash and that it will return less than the amount of cash that was invested. There is also a risk that the investment will become illiquid, which would restrict the Sub-Fund's ability to recover its securities on loan, which might restrict the Sub-Fund's ability to complete the sale or to meet redemption requests.

Risk arising from investments in Asset-Backed Securities (ABS) and Mortgage-Backed Securities (MBS)

Asset-backed securities may include asset pools in credit card loans, auto loans, residential and commercial mortgage loans collateralised mortgage obligations and collateralised debt obligations, agency mortgage pass-through securities and covered bonds. These securities may be subject to greater credit, liquidity and interest rate risk compared to other fixed income securities such as corporate issued bonds. ABS and MBS entitle the holders to receive payments that are primarily dependent upon the cash flow arising from a specified pool of financial assets.

ABS and MBS are often exposed to extension and prepayment risks that may have a substantial impact on the timing and size of the cash flows paid by the securities and may negatively impact the returns of the securities.

Risk arising from investments in Convertible Securities

A convertible security is generally a debt obligation, preferred stock or other equivalent security that pays interest or dividends and may be converted by the holder within a specified period of time into common stock. The value of convertible securities may rise and fall with the market value of the underlying stock or, like a debt security, vary with changes in interest rates and the credit quality of the issuer. A convertible security tends to perform more like a stock when the underlying stock price is high relative to the conversion price (because more of the security's value resides in the option to convert) and more like a debt security when the underlying stock price is low relative to the conversion price (because the option to convert is less valuable). Because its value can be influenced by many different factors, a convertible security is not as sensitive to interest rate changes as a similar non-convertible debt security, and generally has less potential for gain or loss than the underlying stock.

Risk arising from investments in contingent convertible bonds ("Cocos")

Contingent convertible securities are a form of hybrid debt security that are intended to either automatically convert into equity or have their principal written down upon the occurrence of certain 'triggers' linked to regulatory capital thresholds or where the issuing banking institution's regulatory authorities considers this to be necessary. CoCos will have unique equity conversion or principal write-down features which are tailored to the issuing banking institution and its regulatory requirements. Some additional risks associated with CoCos are set forth below:

- Trigger level risk: Trigger levels differ and determine exposure to conversion risk depending on the capital structure of the issuer. The conversion triggers will be disclosed in the prospectus of each issuance. The trigger could be activated either through a material loss in capital as represented in the numerator or an increase in risk weighted assets as measured in the denominator.
- Capital structure inversion risk: Contrary to classic capital hierarchy, CoCos investors may suffer a loss of capital when equity holders do not, e.g. when a high trigger principal write-down CoCos is activated. These cuts

against the normal order of capital structure hierarchy where equity holders are expected to suffer the first loss. This is less likely with a low trigger CoCos when equity holders will already have suffered loss. Moreover, high trigger CoCos may suffer losses not at the point of gone concern but conceivably in advance of lower trigger CoCos and equity.

- Liquidity and concentration risks: In normal market conditions CoCos comprise mainly realisable investments which can be readily sold. The structure of the instruments is innovative yet untested. In a stressed environment, when the underlying features of these instruments will be put to the test, it is uncertain how they will perform. In the event a single issuer activates a trigger or suspends coupons it is not known whether the market will view the issue as an idiosyncratic or systemic event. In the latter case, potential price contagion and volatility to the entire asset class is possible. Furthermore, in an illiquid market, price formation may be increasingly stressed. While diversified from an individual company perspective the nature of the universe means that the fund may be concentrated in a specific industry sector and the Net Asset Value of the Sub-Fund may be more volatile as a result of this concentration of holdings relative to a Sub-Fund which diversifies across a larger number of sectors.
- Valuation risk: the attractive return on this type of instrument may not be the only criterion guiding the valuation and the investment decision. It should be viewed as a complexity and risk premium, investors have to fully consider the underlying risks.
- Call extension risk: as CoCos can be issued as perpetual instruments, investors may not be able to recover their capital if expected on call date or indeed at any date.
- Risk of coupon cancellation: with certain types of CoCo Bonds, the payment of coupons is discretionary and may be cancelled by the issuer at any time and for an indeterminate period.

Risk arising from investments in distressed and default securities

Distressed securities may be defined as debt securities that are officially in restructuring or in payment default and whose rating (by at least one of the major rating agencies) is lower than CCC-. Investment in distressed securities may cause additional risks for a Sub-Fund. Such securities are regarded as predominantly speculative with respect to the issuer's capacity to pay interest and principal or maintain other terms of the offer documents over any long period of time. They are generally unsecured and may be subordinated to other outstanding securities and creditors of the issuer. Whilst such issues are likely to have some quality and protective characteristics, these are outweighed by large uncertainties or major risk exposure to adverse economic conditions. Therefore, a Sub-Fund may lose its entire investment, may be required to accept cash or securities with a value less than its original investment and/or may be required to accept payment over an extended period of time. Recovery of interest and principal may involve additional cost for the relevant Sub-Fund. Under such circumstances, the returns generated from the relevant Sub-Fund's investments may not compensate the shareholders adequately for the risks assumed.

Risk arising from Rule 144A securities

Rule 144A securities are US securities transferable via a private placement regime (i.e. without registration with the Securities and Exchange Commission), to which a "registration right" registered under the Securities Act may be attached, such registration rights providing for an exchange right into equivalent debt securities or into equity shares. The selling of such Rule 144A securities is restricted to qualified institutional buyers (as defined by the Securities Act). The advantage for investors may be higher returns due to lower administration charges. However, dissemination of secondary market transactions in Rule 144A securities is restricted and only available to qualified institutional buyers. This might increase the volatility of the

security prices and, in extreme conditions, decrease the liquidity of a particular Rule 144A security.

Risk arising from investments in the emerging markets

A Sub-Fund may invest in less developed or emerging markets. These markets may be volatile and illiquid and the investments of the Sub-Fund in such markets may be considered speculative and subject to significant delays in settlement. Practices in relation to settlement of securities transactions in emerging markets involve higher risks than those in developed markets, in part because the Sub-Fund will need to use brokers and counterparties which are less well capitalised, and custody and registration of assets in some countries may be unreliable. Delays in settlement could result in investment opportunities being missed if a Sub-Fund is unable to acquire or dispose of a security. The risk of significant fluctuations in the net asset value and of the suspension of redemptions in those Sub-Funds may be higher than for Sub-Funds investing in major world markets. In addition, there may be a higher than usual risk of political, economic, social and religious instability and adverse changes in government regulations and laws in emerging markets and assets could be compulsorily acquired without adequate compensation. The assets of a Sub-Fund investing in such markets, as well as the income derived from the Sub-Fund, may also be affected unfavourably by fluctuations in currency rates and exchange control and tax regulations and consequently the net asset value of Shares of that Sub-Fund may be subject to significant volatility. Some of these markets may not be subject to accounting, auditing and financial reporting standards and practices comparable to those of more developed countries and the securities markets of such countries may be subject to unexpected closure.

Risk arising from investments in Russia

Investments in Russia are currently subject to certain heightened risks with regard to the ownership and custody of securities. In Russia this is evidenced by entries in the books of a company or its registrar. No certificates representing ownership of Russian companies will be held by the Depositary or any correspondent or in an effective central depository system. As a result of this system, the lack of state regulation or enforcement and the concept of fiduciary duty not being well established, the Company could lose its registration and ownership of Russian securities through fraud, negligence or even mere oversight by management, without satisfactory legal remedy, which may lead to Shareholders suffering a dilution or loss of investment.

Some Sub-Funds may invest a significant portion of their net assets in securities or corporate bonds issued by companies domiciled, established or operating in Russia as well as, as the case may be, in debt securities issued by the Russian government as described in more detail in the relevant Sub-Fund factsheets. Investments in Transferable Securities and Money Market Instruments which are not listed on stock exchanges or traded on a Regulated Market or on another Regulated Market in a Member or other State within the meaning of the Law of 2010 which include Russian Transferable Securities and Money Market Instruments may not exceed 10% of the assets of the relevant Sub-Funds. The Russian markets might indeed be exposed to liquidity risks, and liquidation of assets could therefore sometimes be lengthy or difficult. However, investments in Transferable Securities and Money Market Instruments which are listed or traded on the "Moscow Interbank Currency Exchange – Russian Trade System" (MICEX-RTS) are not limited to 10% of the assets of the relevant Sub-Funds as such markets are recognized as Regulated Markets.

Risks linked with dealing in fixed income investments through Bond Connect

To the extent permitted by the investment policy of a Sub-Fund, fixed-income investments in China may be made through Bond Connect. Investing in such market is subject to the risks of investing in Emerging Markets, including some of the risks disclosed in the section "Risks linked with dealing in securities in China via Stock Connect", specifically "c. Difference in trading day and trading hours", "f. Trading costs", "g. RMB Currency Risk", "k. Local market rules, foreign shareholding restrictions and disclosure obligations" and "l. Tax considerations". Potential investors must be aware that Bond Connect is in a development stage, hence some regulations are untested and subject to change, which may adversely affect the Sub-Fund.

Risks arising from investments in China via Stock Connect

In addition to the risks mentioned under section "Risk arising from investments in the emerging markets", investments in China A-Shares are subject to additional risk factors. In particular, Shareholders should note that Stock Connect is a new trading programme. The relevant regulations are untested and subject to change. Stock Connect is subject to quota limitations which may restrict the Sub-fund's ability to deal via Stock Connect on a timely basis. This may impact the Sub-fund's ability to implement its investment strategy effectively. Shareholders should note further that under the relevant regulations a security may be recalled from the scope of Stock Connect or may be suspended. This may adversely affect the Sub-fund's ability to meet its investment objective, e.g. when the Investment Manager wishes to purchase a security which is recalled from the scope of Stock Connect.

a. Quotas used up

When the respective aggregate quota balance for Northbound Trading is less than the daily quota, the corresponding buy orders will be suspended on the next trading day (sell orders will still be accepted) until the aggregate quota balance returns to the daily quota level. Once the daily quota is used up, acceptance of the corresponding buy orders will also be immediately suspended and no further buy orders will be accepted for the remainder of the day. Buy orders which have been accepted will not be affected by the using up of the daily quota, while sell orders will be continued to be accepted. Depending on the aggregate quota balance situation, buying services will be resumed on the following trading day.

Under current Mainland rules a single foreign investor's shareholding in a listed company (including via other investment schemes like QFII and RQFII) is not allowed to exceed 10% of the company's total issued Shares, while all foreign investors' shareholding in the A-Shares of a listed company is not allowed to exceed 30% of its total issued shares. If the aggregate foreign shareholding exceeds the 30% threshold, the concerned SICAV and/or Sub-Fund will be requested to sell the shares on a last-in-first-out basis within five trading days.

Furthermore, SSE and SZSE impose a daily price limit on trading of stocks and mutual funds with a daily price up/down cap of 10% and 5% for stocks under special treatment. At times with higher price fluctuations, investors must be aware that trading of highly volatile stocks might be suspended.

b. The recalling of eligible stocks and trading restrictions

A stock may be recalled from the scope of eligible stocks for trading via Stock Connect for various reasons, and in such event the stock can only be sold but is restricted from being bought. This may affect the investment portfolio or strategies of the Investment Manager. Under Stock Connect, the Investment Manager will only be allowed to sell China A-Shares but restricted from further buying if: (i) the China A-Share subsequently ceases to be a constituent stock of the relevant Indices; (ii) the China A-Share is subsequently under "risk alert"; and/or (iii) the corresponding H share of the China A-Share subsequently ceases to be traded on SEHK.

c. Difference in trading day and trading hours

Due to differences in public holiday between Hong Kong and Mainland China or other reasons such as bad weather conditions, there may be a difference in trading days and trading hours in the SSE, SZSE and SEHK markets. Stock Connect will only operate on days when all markets are open for trading and when banks in all markets are open on the corresponding settlement days. So it is possible that, for instance, there are occasions when it is a normal trading day for the Mainland China market but it is not possible to carry out any China A-Shares trading in Hong Kong.

d. Restriction on day trading

With a few exceptions, day (turnaround) trading is generally not permitted on the China A-Share market. If a Sub-fund buys Stock Connect securities on a dealing day (T), the Sub-fund may not be able to sell the Stock Connect securities until on or after T+1 day.

e. Not protected by Investor Compensation Fund

Investment through Northbound trading under the Stock Connect is conducted through brokers, and is subject to the risks of default by such brokers' in their obligations. Investments of the Sub-Fund conducted through Northbound trading is not covered by the Hong Kong's Investor Compensation Fund, which has been established to pay compensation to investors of any nationality who suffer pecuniary losses as a result of default of a licensed intermediary or authorised financial institution in relation to exchange-traded products in Hong Kong. Since default matters in Northbound trading via Stock Connect do not involve products listed or traded in SEHK or Hong Kong Futures Exchange Limited, they are not covered by the Investor Compensation Fund. Therefore the Sub-Fund is exposed to the risks of default of the broker(s) it engages in its trading in A-Shares through Stock Connect.

f. Trading costs

In addition to paying trading fees and stamp duties in connection with China A-Shares trading, the Sub-funds carrying out Northbound Trading should also take note of any new portfolio fees and taxes which would be determined by the relevant authorities.

g. RMB Currency Risk

In accordance with their respective investment policy, the Sub-Funds may participate in the offshore RMB market which allows investors to freely transact CNH outside of mainland China. The CNH exchange rate is a managed floating exchange rate based on market supply and demand with reference to a basket of foreign currencies. The daily trading price of CNH against other major currencies in the inter-bank foreign exchange market is allowed to float within a narrow band around the central parity published by the PRC. RMB is currently not freely convertible and convertibility from CNH to CNY is a managed currency process subject to foreign exchange control policies of and repatriation restrictions imposed by the government of the PRC in coordination with the Hong Kong Monetary Authority (HKMA).

Under the prevailing regulations in the PRC, the value of CNH and CNY may be different due to a number of factors including without limitation those foreign exchange control policies and repatriation restrictions and therefore is subject to fluctuations. Furthermore, it is possible that the availability of CNH may be reduced and payments be delayed due to regulatory restrictions imposed by the government of the PRC.

h. Beneficial owner of China A-Shares under the scope of the Stock Connect programme

China A-Shares Shares will be held following settlement by brokers or custodians as clearing participants in accounts in the Hong Kong Central Clearing and Settlement System ("CCASS") maintained by the Hong Kong Securities and Clearing Corporation Limited ("HKSCC") as central securities depository in Hong Kong and Nominee holder. HKSCC in turn holds China A-Shares of all its participants through a "single Nominee omnibus securities account" in its name registered with ChinaClear, the central securities depository in Mainland China. Because HKSCC is only a Nominee holder and not the beneficial owner of China A-Shares, in the unlikely event that HKSCC becomes subject to winding up proceedings in Hong Kong, Shareholders should note that China A-Shares will not be regarded as part of the general assets of HKSCC available for distribution to creditors even under PRC law. However, HKSCC will not be obliged to take any legal action or enter into court proceedings to enforce any rights on behalf of investors in China A-Shares in Mainland China. Foreign investors like the concerned Sub-funds investing through the Stock Connect holding China A-Shares through HKSCC are the beneficial owners of the assets and are therefore eligible to exercise their rights through the Nominee only.

i. Pre-trade check

PRC law provides that SSE and/or SZSE may reject a sell order if an investor does not have sufficient available China A-Shares in its account. SEHK will apply a similar check on all sell orders of Stock Connect securities on the Northbound Trading link at the level of SEHK's registered exchange participants ("Exchange Participants") to ensure there is no overselling by any individual exchange participant ("Pre-Trade Checking"). In addition, Stock Connect investors will be required to comply with any requirements relating to Pre-Trade Checking imposed by the applicable regulator, agency or authority with jurisdiction, authority or responsibility in respect of Stock Connect ("Stock Connect Authorities").

This Pre-Trade Checking requirement may require a pre-trade delivery of the Stock Connect securities from a Stock Connect investor's domestic custodian or sub-custodian to the Exchange Participant which will hold and safe keep such securities so as to ensure that they can be traded on a particular trading day. There is a risk that creditors of the Exchange Participant may seek to assert that such securities are owned by the Exchange Participant and not the Stock Connect investor, if it is not made clear that the Exchange Participant acts as a custodian in respect of such securities for the benefit of the Stock Connect investor. When a Sub-Fund trades China A-Shares through a broker who is an Exchange Participant and uses the sub-custodian as a clearing agent, no pre-trade delivery of securities is required and the above risk is mitigated.

j. Execution issues

Stock Connect trades may, pursuant to the Stock Connect rules, be executed through one or multiple brokers that may be appointed by the SICAV for Northbound Trading. Given the Pre-Trade Checking requirements and hence the pre-trade delivery of Stock Connect securities to an Exchange Participant, the Investment Manager may determine that it is in the interest of a Sub-Fund that it only executes Stock Connect trades through a broker who is affiliated to the SICAV's sub-custodian that is an Exchange Participant. In that situation, whilst the Investment Manager will be cognisant of its best execution obligations it will not have the ability to trade through multiple brokers and any switch to a new broker will not be possible without a commensurate change to the SICAV's sub-custody arrangements.

k. Local market rules, foreign shareholding restrictions and disclosure obligations

Under Stock Connect, China A-Shares listed companies and trading of China A-Shares are subject to market rules and disclosure requirements of the China A-Shares market. Any changes in laws, regulations and policies of the China A-Shares market or rules in relation to Stock Connect may affect share prices.

Under the current PRC rules, once an investor holds up to 5% of the shares of a company listed on the SSE and /or the SZSE, the investor is required to disclose its interest within three working days during which no trading of the shares of the company can be made. Furthermore, according to PRC Securities Law a shareholder of 5% or more of the total issued shares of a PRC listed company ("major shareholder") has to return any profits obtained from the purchase and sale of shares of such PRC listed company if both transactions occur within a six-month period. In the event that the Sub-Fund becomes a major shareholder of a PRC listed company by investing in China A-Shares via Stock Connect, the profits that the Sub-Fund may derive from such investments may be limited, and thus the performance of the Sub-Fund may be adversely affected. According to existing Mainland China practices, the Sub-Funds as beneficial owners of China A-Shares traded via Stock Connect cannot appoint proxies to attend shareholders' meetings on its behalf.

l. Tax considerations

The MOF, CSRC and SAT temporarily introduced a PRC corporate income tax exemption on capital gains derived by Hong Kong and overseas investors on the trading of A-Shares through the Stock Connect.

The duration of the period of temporary exemption was not stated and is subject to termination by the PRC tax authorities with or without notice.

If the exemption is removed or modified, there is a risk that PRC tax authorities may seek to collect tax on capital gains realized on the Sub-Fund's PRC investments. If the temporary exemption is withdrawn, the Sub-Fund would be subject to PRC taxation in respect of gains on its investments, directly or indirectly, and the resultant tax liability would be eventually borne by investors.

Depending on the availability of an applicable tax treaty, a tax liability may be mitigated and if so, such benefits will be passed to investors.

Shareholders should seek their own tax advice on their position with regard to their investment in any Sub-Fund.

m. Clearing, settlement and custody risks

HKSCC and ChinaClear have established the clearing links between the two exchanges and each will become a participant of the other to facilitate clearing and settlement of cross-border trades. For cross-border trades initiated in a market, the clearing house of that market will on one hand clear and settle with its own clearing participants, and on the other hand undertake to fulfil the clearing and settlement obligations of its clearing participants with the counterparty clearing house. Hong Kong and overseas investors which have acquired Stock Connect securities through Northbound Trading should maintain such securities with their brokers' or custodians' stock accounts with CCASS (operated by HKSCC).

n. Order priority

Trade orders are entered into China Stock Connect System ("CSC") based on time order. Trade orders cannot be amended,

but may be cancelled and re-entered into the CSC as new orders at the back of the queue. Due to quota restrictions or other market intervention events, there can be no assurance that trades executed through a broker will be completed.

o. Risk of ChinaClear default

ChinaClear has established a risk management framework and measures that are approved and supervised by the CSRC. Pursuant to the General Rules of CCASS, if ChinaClear (as the host central counterparty) defaults, HKSCC will, in good faith, seek recovery of the outstanding Stock Connect securities and monies from ChinaClear through available legal channels and through ChinaClear's liquidation process, if applicable.

HKSCC will in turn distribute the Stock Connect securities and/or monies recovered to clearing participants on a pro-rata basis as prescribed by the relevant Stock Connect authorities. Although the likelihood of a default by ChinaClear is considered to be remote, the Sub-Fund should be aware of this arrangement and of this potential exposure before engaging in Northbound Trading.

p. Risk of HKSCC default

A failure or delay by the HKSCC in the performance of its obligations may result in a failure of settlement, or the loss, of Stock Connect securities and/or monies in connection with them and the Sub-Fund and its investors may suffer losses as a result.

q. Ownership of Stock Connect securities

Stock Connect securities are uncertificated and are held by HKSCC for its accountholders. Physical deposit and withdrawal of Stock Connect securities are not available under the Northbound Trading for the Sub-Funds. The Sub-Fund's title or interests in, and entitlements to Stock Connect securities (whether legal, equitable or otherwise) will be subject to applicable requirements, including laws relating to any disclosure of interest requirement or foreign shareholding restriction. It is uncertain whether the Chinese courts would recognise the ownership interest of the investors to allow them standing to take legal action against the Chinese entities in case disputes arise.

The above may not cover all risks related to Stock Connect and any above mentioned laws, rules and regulations are subject to change. This is a complex area of law and Shareholders should seek independent professional advice.

III. Investment restrictions

In the interests of Shareholders and in order to ensure a wide diversification of the risks, the Company undertakes to comply with the following rules:

A. Eligible investments

1. The Company may invest the assets of each Sub-Fund in:

- a. Transferable Securities and Money Market Instruments admitted to or dealt in on a Regulated Market within the meaning of Directive 2004/39/EC of the European Parliament and of the Council of 21 April 2004 on the Markets in Financial Instruments, as amended and supplemented;
- b. Transferable Securities and Money Market Instruments which are dealt in on another market of a Member State of the European Union which is regulated, operates regularly, is recognised and open to the public;
- c. Transferable Securities and Money Market Instruments admitted to official listing on a stock exchange in a country which is not a member of the EU or dealt in on another market of a country which is not a Member State and that is regulated, operates regularly, is recognised and open to the

- public, insofar as the stock exchange or market is located in a Member State of the Organisation for Economic Cooperation and Development (OECD) or in any other country in Europe, North America, South America, Africa, Asia and Oceania;
- d. newly issued Transferable Securities and Money Market Instruments, provided that:
 - i. the issue conditions include an undertaking that an application will be made for official listing on a stock exchange or another regulated market that operates regularly, is recognised and open to the public and provided that it is located in a Member State of the Organisation for Economic Cooperation and Development (OECD) or in any other country in Europe, North America, South America, Africa, Asia and Oceania;
 - ii. the listing is secured within one year of issue at the latest;
 - e. units of UCITS authorised according to the UCITS Directive and/or other collective investment undertakings within the meaning of Article 1 Par (2), lit. a) and b) of the Directive whether located in a Member State or otherwise, provided that:
 - i. these UCIs are authorised in accordance with the legislation requiring that such undertakings are subject to supervision which the Luxembourg Financial Supervisory Authority (*Commission de Surveillance du Secteur Financier* – CSSF) considers equivalent to that prescribed under EU legislation, and that cooperation between the authorities is sufficiently guaranteed;
 - ii. the level of protection for unitholders of these other UCIs is equivalent to that provided for unitholders of a UCITS and, in particular, that the rules on the segregation of assets, borrowing, lending and short sales of Transferable Securities and Money Market Instruments are equivalent to the requirements of the UCITS Directive;
 - iii. the business of the other UCIs is reported in semi-annual and annual reports to enable an assessment to be made of the assets and liabilities, income and operations over the reporting period;
 - iv. the proportion of assets of these UCITS or other UCIs in which units are to be acquired, which, in accordance with their Articles can be globally invested in units of other UCITS or UCIs, does not exceed 10%;
 - f. deposits with credit institutions which are repayable on demand or which may be withdrawn, and maturing in no more than 12 months, provided that the credit institution has its registered office in a Member State of the European Union or, if the registered office of the credit institution is located in another country, provided that it is subject to prudential rules considered by the CSSF as equivalent to those laid down under the EU legislation;
 - g. derivative financial instruments, including equivalent instruments involving cash settlements, traded on a regulated market referred to in (a), (b) and (c) above and/or derivative financial instruments dealt in over-the-counter ("OTC derivatives"), provided that:
 - i. the underlying consists of instruments covered by this point 1, or indices, interest rates, foreign exchange rates or currencies, in which the UCITS may invest according to its investment objectives;
 - ii. the counterparties to OTC derivative transactions are first-class financial institutions specialised in these types of transactions provided that they are also subject to prudential supervision; and
 - iii. the OTC derivatives are subject to reliable and verifiable valuation on a daily basis and can be sold, liquidated or closed by an offsetting transaction at any time at their fair value at the Company's initiative.
 - h. Money Market Instruments other than those dealt in on a regulated market, which are liquid and have a value that can be accurately determined at any time, provided that the issue or issuer of these instruments is subject to regulations intended to protect investors and their savings, and provided that these instruments are:
 - i. issued or guaranteed by a central, regional or local government authority, by a central bank of a Member State of the European Union, the European Central Bank, the European Union or the European Investment Bank, a non-member State of the European Union or, in the case of a Federal State, by a member of the federation, or by an international public body to which one or more Member States of the European Union belong, or
 - ii. issued by a company whose securities are dealt in on the regulated markets referred to in (a), (b) and (c) above, or
 - iii. issued or guaranteed by an institution subject to prudential supervision, in accordance with criteria defined by European Community law, or by an institution which is subject to and complies with prudential rules which the CSSF considers to be at least as stringent as those prescribed by EU legislation, or
 - iv. issued by other entities belonging to categories approved by the CSSF, provided that investments in such instruments are subject to rules for protecting investors which are equivalent to those stipulated above in bullets (i, ii, iii) and provided that the issuer is a company whose capital and reserves amount to at least ten million euro (EUR 10,000,000) and which presents and publishes its annual accounts in accordance with the Fourth Directive 78/660/EEC, or is an entity which, within a group of companies that includes one or more listed companies, is dedicated to financing the group, or is an entity which is dedicated to financing securitisation vehicles backed by bank financing;
 - i. Shares issued by one or several other Sub-Funds of the Company provided that:
 - i. the target Sub-Fund does not, in turn, invest in the Sub-Fund invested in this target Sub-Fund;
 - ii. no more than 10% of the assets of the target Sub-Fund whose acquisition is contemplated may be invested pursuant to its investment objectives in Shares of other target Sub-Funds of the Company;
 - iii. voting rights attached to the relevant Shares are suspended for as long as they are held by the investing Sub-Fund and without prejudice to the appropriate processing in the accounts and periodic reports;
 - iv. for as long as the target Sub-Fund's Shares are held by the investing Sub-Fund their value will not be taken into

consideration for the calculation of the net assets of the Company for the purpose of verifying the minimum threshold of the net assets imposed by the Law of 2010;

- v. there is no duplication of management, subscription or redemption fees between those at the level of the Sub-Fund having invested in the target Sub-Fund and this target Sub-Fund;
 - j. units of a master UCITS or a master Sub-Fund of such UCITS.
2. In addition, the Company:
- a. may invest up to a maximum of 10% of its net assets in Transferable Securities and Money Market Instruments other than those referred to under point 1 above;
 - b. may not acquire precious metals or certificates representing precious metals;
3. The Company may, on an ancillary basis, hold cash for each Sub-Fund.

B. Investment limits

1. The Company may not invest:
 - a. more than 10% of the net assets of each Sub-Fund in Transferable Securities or Money Market Instruments issued by the same entity;
 - b. more than 20% of the net assets of each Sub-Fund in deposits placed with the same entity.
2. The Company's counterparty risk in an OTC derivative transaction may not exceed 10% of the net assets of each Sub-Fund when the counterparty is a credit institution referred to in Part III "Additional information", Chapter III "Investment restrictions", Section A "Eligible Investments", point 1 (f), or 5% of the net assets of the relevant Sub-Fund in other cases.
3.
 - a. The total value of Transferable Securities and Money Market Instruments of each issuer in which more than 5% of the net assets of a given Sub-Fund is invested may not exceed 40% of the value of these net assets; this restriction does not apply to deposits with credit institutions subject to prudential supervision and to OTC derivative transactions with these institutions;
 - b. Notwithstanding the individual limits laid down in points 1 and 2 above, the Company may not combine:
 - i. investments in Transferable Securities or Money Market Instruments issued by a single entity,
 - ii. deposits made with a single entity, and/or
 - iii. risks arising from OTC derivative transactions undertaken with a single entity,
 that amount to more than 20% of the net assets of each Sub-Fund.
 - c. The limit of 10% laid down in point 1 (a) above may be increased to a maximum of 35% if the Transferable Securities or Money Market Instruments are issued or guaranteed by a Member State of the European Union, by its local public authorities, by a non-Member State or by an international public body to which one or more Member States belong.

- d. The limit of 10% laid down in point 1 (a) above may be increased to a maximum of 25% for certain bonds if they are issued by a credit institution which has its registered office in a Member State of the European Union and is subject by law to special public supervision designed to protect bondholders. In particular, the proceeds resulting from the issue of these bonds must be invested, in accordance with the Law, in assets which, during the entire validity of the bonds, sufficiently cover the liabilities arising there from and that in the event of the issuer's default are assigned with priority to the repayment of capital and the payment of accrued interest. Where the Company invests more than 5% of the net assets of a Sub-Fund in the bonds referred to in this paragraph and issued by a single issuer, the total value of said investments may not exceed 80% of the value of the net assets of the relevant Company Sub-Fund.
 - e. The Transferable Securities and Money Market Instruments covered by point 3 (c) and (d) above are not taken into account in the 40% limit mentioned in point 3 (a);
 - f. The limits stipulated in points 1, 2 and 3 (a), (b), (c) and (d) above may not be combined; consequently, investments in Transferable Securities or Money Market Instruments issued by a single entity, in deposits or derivative instruments with this entity in compliance with points 1, 2 and 3 (a), (b), (c) and (d) above may not in aggregate exceed 35% of the net assets of the relevant Company Sub-Fund.
4. Companies grouped for the purpose of consolidating their accounts, within the meaning of Directive 83/349/EEC of 13 June 1983 or in accordance with recognised international accounting rules, are treated as a single entity when calculating the limits specified above.
 5. The Company is authorised for each of its Sub-Funds to make cumulative investments in Transferable Securities and Money Market Instruments within the same group up to a limit of 20% of its net assets.
 6.
 - a. By derogation to the above limits, and without prejudice to the limits laid down in point 9 below, the limits set out in points 1 to 5 above are raised to a maximum of 20% for investments in equities and/or bonds issued by a single entity when the aim of the Sub-Fund's investment policy is to replicate the composition of a certain equity or bond Index which is recognised by the CSSF on the following basis:
 - i. the composition of the Index is sufficiently diversified;
 - ii. the Index constitutes a representative Benchmark of the market to which it refers;
 - iii. it is published in an appropriate manner.
 - b. The limit set out above is raised to 35% when it proves to be justified by exceptional market conditions, particularly in regulated markets where certain Transferable Securities or Money Market Instruments are highly dominant. The investment up to this limit is only permitted for a single issuer.
 7. **as an exception to the limits set out in points 1 to 5 above, the Company is authorised to invest, following the principle of risk diversification, up to 100% of the net assets of each Sub-Fund in Transferable Securities and Money Market Instruments issued or guaranteed by a Member State of the European Union or the Organisation for Economic Cooperation and Development (OECD), by local public authorities of a Member State of the European Union, or by international public bodies to which one or more Member States of the European Union belong, provided that the Transferable Securities and Money Market Instruments foreseen hereunder are comprised of at least six different issues**

and that the Transferable Securities and Money Market Instruments of any such single issue do not exceed 30% of the net assets of the relevant Sub-Fund.

8.

- a. The Company may, for each Sub-Fund, acquire the units of UCITS and/or other UCIs referred to in Part III "Additional information", Chapter III "Investment restrictions", Section A "Eligible Investments", point 1 (e), provided that no more than 20% of its net assets are invested in a single UCITS or other UCI. For the purposes of applying this investment limit, each Sub-Fund of a UCI with multiple Sub-Funds is to be regarded as a separate issuer, provided that the principle of segregation of the liabilities of the different Sub-Funds in relation to third parties is ensured.
- b. Investments made in units of UCIs other than UCITS may not in aggregate exceed 30% of the net assets of each Sub-Fund. Where the Company has acquired units of UCITS and/or other UCIs, the assets of the respective UCITS or other UCIs are not combined for the purposes of the limits laid down in points 1, 2, 3, 4 and 5 above.
- c. Where the Company invests in the units of other UCITS and/or other UCIs which are managed, directly or by delegation, by the same Management Company or by any other company to which the Management Company is linked through common management or control, or through a substantial direct or indirect holding, the said Management Company or other company may not charge subscription or redemption fees on the Company's investment in the units of such other UCITS and/or UCIs.

9. For all the Sub-Funds, the Company may not acquire:

- a. shares with voting rights that would enable it to exert a significant influence on the management of an issuer;
- b. moreover, the Company may not acquire more than:
 - i. 10% of the non-voting shares of a single issuer;
 - ii. 10% of the bonds of a single issuer;
 - iii. 25% of the units of a single UCITS and/or other UCI;
 - iv. 10% of the Money Market Instruments of any single issuer.

The limits laid down above in bullets (ii, iii, iv) may be disregarded at the time of acquisition if, at that time, the gross amount of the bonds or Money Market Instruments, or the net amount of the securities issued, cannot be calculated.

The restrictions set out under letters a. and b. above do not apply to:

- i. Transferable Securities and Money Market Instruments issued or guaranteed by a Member State of the European Union or its local public authorities;
- ii. Transferable Securities and Money Market Instruments issued or guaranteed by a State that is not a member of the European Union;
- iii. Transferable Securities and Money Market Instruments issued by international public bodies of which one or more Member States of the European Union are members;

- iv. shares held by the Company in the capital of a company of a non-Member State of the European Union that primarily invests its assets in the securities of issuers of that State where, under the legislation of that State, such an investment constitutes the only way in which the Company can invest in the securities of issuers of that state. This derogation only applies, however, on condition that the investment policy of the company of the non-Member State of the European Union complies with the limits laid down in the provisions contained in Section B, with the exception of points 6 and 7. Should the limits set out in Section B be exceeded, with the exception of the limits set out in points 6, 7 and 9, Article 49 of the Law of 2010 will apply by analogy;
- v. shares held by one or more investment companies in the capital of subsidiary companies carrying out, exclusively on their behalf, management, advisory and marketing activities in the country in which the subsidiary is located, in regard to the redemption of units at unitholders' request.

10. Regarding derivative transactions, the Company will comply with the limits and restrictions set out in Part III "Additional information", Chapter IV "Techniques and instruments" hereafter.

The Company need not comply with the investment limits set out above when exercising subscription rights attached to Transferable Securities or Money Market Instruments which form part of the assets of its Sub-Funds.

If the limits are exceeded for reasons beyond the Company's control or as a result of the exercise of subscription rights, the Company must, through its sales transactions, have as its priority objective the regularisation of that situation, bearing Shareholders' interests in mind.

Insofar as an issuer is a legal entity with multiple Sub-Funds in which the assets of a Sub-Fund are exclusively liable for the rights of investors in relation to this Sub-Fund and for those of creditors whose financial claim arises from the creation, operation or liquidation of this Sub-Fund, each Sub-Fund is to be considered as a separate issuing entity for the purposes of the application of the rules of risk spreading specified in this title B, with the exception of points 7 and 9.

The above investment limits generally apply insofar as the Sub-Fund factsheets do not stipulate more stringent rules.

In case more stringent rules are stipulated, these rules are not required to be adhered to in the last one month before the liquidation or merger of the Sub-Fund.

C. Borrowings, loans and guarantees

1. The Company is not authorised to borrow. As an exception, the Company may borrow up to 10% of its net assets provided that such borrowings are of a temporary nature.
2. However, the Company may acquire foreign currency by means of a back-to-back loan for each Sub-Fund.
3. The Company may not enter into short sales of Transferable Securities, Money Market Instruments or other financial instruments mentioned in Part III "Additional information", Chapter III "Investment restrictions", Section A "Eligible Investments" point 1 (e), (f) and (g).
4. The Company may not grant credit or provide guarantees to third parties. This restriction will not prevent the relevant undertakings from acquiring Transferable Securities, Money Market Instruments or other financial instruments as referred to in Part III "Additional information", Chapter III "Investment restrictions", Section A "Eligible Investments" point 1 (e), (g) and (h) and which are not fully paid up.

IV. Techniques and instruments

A. General provisions

1. For the purpose of efficient portfolio management and/or to protect their assets and commitments, the Company, the Management Company or the Investment Manager, as the case may be, may arrange for the Sub-Funds to make use of techniques and instruments relating to Transferable Securities and Money Market Instruments.

- a. In the case of investments in financial derivatives, the overall risk for the underlying instruments may not exceed the investment limits set forth under the section entitled "Investment Limits" above. Investments in Index-based derivatives need not be taken into account in the case of the investment limits set forth in the points 1, 2, 3, 4 and 5 under Part III "Additional information", Chapter III "Investment restrictions", Section B "Investment Limits" above.

- b. When a transferable security or Money Market Instrument embeds a derivative, the latter must be taken into account when complying with the rules set forth under this section.

The risks are calculated taking into account guidelines provided in the Law of 2010, and related regulations or circulars issued by the CSSF. As for the global exposure relating to financial derivative instruments it may be calculated through the Value at Risk ("VaR") methodology or the commitment approach.

2. The Management Company will calculate the global exposure of each Sub-Fund in accordance with relevant laws and regulations. The Management Company will use for each Sub-Fund either the commitment approach, the relative Value-at-Risk approach or the absolute Value-at-Risk approach. For those Sub-Funds for which either the relative Value-at-Risk approach or the absolute Value-at-Risk approach is used, the expected maximum level of leverage is outlined in the table below. For those Sub-Funds for which the relative Value-at-Risk approach is used, the respective reference portfolio is additionally outlined below.

The expected level of leverage is expressed as the ratio between the market risk exposure of the Sub-Fund's positions and its net asset value. The ratio is expressed as a percentage calculated in accordance with the commitment method ("net approach") and the sum of notional method ("gross approach"). While the net approach takes into account netting and hedging arrangements, the gross approach does not take into account such arrangements, hence triggering results that are generally higher and not necessarily representative from an economic exposure point of view. Irrespective of the approach used, the expected level of leverage is an indicator and not a regulatory limit. A Sub-Fund's level of leverage may be higher than the expected level as long as it remains in line with its risk profile and complies with its VaR limit. Depending on market movements, the expected level of leverage may vary over time. In case no derivatives positions are included in the portfolio, the base value for the leverage is "0" (i.e. 0%).

The expected leverage is a measure which aims to approximate the impact of the use of derivatives instruments on the overall market risk of a given Sub-Fund. For a complete picture of the risk profile associated to each Sub-Fund, please refer to the risk profile section disclosed in each Sub-Fund's Factsheet.

3. Under no circumstances will the use of transactions with respect to derivative instruments or other techniques and financial instruments cause the Company, the Management Company or the Investment Manager, as the case may be, to deviate from the investment policy set forth for each Sub-Fund in this prospectus.

Shareholders are informed that, in accordance with Regulation (EU) No 2015/2365, information regarding the type of assets that can be subject to TRS and SFTs, as well as the maximum and expected proportion that can be subject to them are disclosed in the table attached as [Appendix I](#) to this Prospectus.

B. Restrictions on SFTs (including Securities Lending Transactions, Repurchase Transactions and Reverse Repurchase Transactions)

For the purpose of generating additional capital or income for reducing its costs or risks, the Company may, with respect to the assets of each Sub-Fund, engage in SFTs provided that these transactions comply with applicable laws and regulations, including CSSF Circular 08/356 and CSSF Circular 14/592, as they may be amended or supplemented from time to time.

In case a Sub-Fund enters into SFTs, it has to be ensured that at any time the full amount of cash or any security that has been lent or sold can be recalled and any securities lending and/or repurchase agreement entered into can be terminated. It shall also be ensured that the amount of transactions is kept at a level such that the Sub-Fund is able, at all times, to meet its redemption obligations towards its shareholders. Furthermore, the use of SFTs should not result in a change of the investment objective of the Sub-Fund nor add substantial supplementary risks in comparison to the risk profile as stated in the Sub-Fund factsheet.

All the revenues arising from SFTs are returned to the participating Sub-Fund. The Management Company performs the oversight of the program and Goldman Sachs International Bank is appointed as the Company's securities lending agent. Goldman Sachs International Bank is neither related to the Management Company nor related to the Depositary.

Each Sub-Fund may lend/sell the securities included in its portfolio to a borrower/buyer (the "counterparty") either directly or through a standardised lending system organised by a recognised clearing institution or through a lending system organised by a financial institution subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by European Community Law and specialised in this type of transactions. The counterparty must be of high quality and meet the requirements of a "financial counterparty" pursuant to article 3 of Regulation (EU) 2015/2365 (i.e. the counterparty must at least have an investment grade rating by Fitch, Moody's and/or Standard & Poor's, be structured as a public limited liability company, and have its parent company registered office located in OECD countries) and be subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by European Community Law. In case the aforementioned financial institution acts on its own account, it is to be considered as counterparty in the securities lending/repurchase agreement. Further information on the counterparty(ies) is made available in the Annual Report which can be obtained free of charges from the registered office of the Company.

C. Management of collateral for OTC Derivative Transactions (including Total Return Swaps) and SFTs (including Securities Lending Transactions, Repurchase Transactions and Reverse Repurchase Transactions)

In order to reduce counterparty risk arising from the use of OTC derivative transactions and SFTs, a guarantee ("collateral") system may be put in place with the counterparty. Such collateral process will comply with applicable laws and regulations, including CSSF Circular 08/356 and CSSF Circular 14/592, as they may be amended or supplemented from time to time.

The Company must proceed on a daily basis to the valuation of the collateral received with exchange (including variation margins) performed on a daily basis. It is to be noticed that there is at least two Business Days' operational delay between the derivative exposure and the amount of collateral received or posted in relation to that exposure.

The collateral must normally take the form of:

1. Liquid assets which include not only cash and short term bank certificates, but also Money Market Instruments;
2. Bonds issued or guaranteed by a highly rated country;
3. Bonds issued or guaranteed by first class issuers offering an adequate liquidity, or
4. Shares admitted to or dealt in on a regulated market of a highly rated country, on the condition that these shares are included in a main Index.

Each Sub-Fund must make sure that it is able to claim its rights on the collateral in case of the occurrence of an event requiring the execution thereof. Therefore, the collateral must be available at all times, either directly or through the intermediary of a first class financial institution or a wholly-owned subsidiary of this institution, in such a manner that the Sub-Fund is able to appropriate or realise the assets given as collateral, without delay, if the counterparty does not comply with its obligations.

The Company will ensure that the collateral received under OTC derivative transactions and SFTs meet the following conditions:

1. Assets received as collateral will be at the market price. In order to minimize the risk of having the value of the collateral held by a Sub-Fund being less than the exposure to the counterparty, a prudent haircut policy is applied both to collateral received in the course of OTC derivatives and SFTs. A haircut is a discount applied to the value of a collateral asset and intends to absorb the volatility in the collateral value between two margin calls or during the required time to liquidate the collateral. It embeds a liquidity element in terms of remaining time to maturity and a credit quality element in terms of the rating of the security. The haircut policy takes account of the characteristics of the relevant asset class, including the credit standing of the issuer of the collateral, the price volatility of the collateral and potential currency mismatches. Haircuts applied to cash, high-quality government bonds and corporate bonds typically range from 0-15% and haircuts applied to equities from 10 – 20%. In exceptional market conditions a different level of haircut may be applied. Subject to the framework of agreements in place with the relevant counterparty, which may or may not include minimum transfer amounts, it is intended that any collateral received shall have a value, adjusted in the light of the haircut policy, which equals or exceeds the relevant counterparty exposure where appropriate.
2. Collateral received must be sufficiently liquid (e.g. first-class government bonds or cash) so that it can be sold quickly at a price that is close to its pre-sale valuation.
3. Collateral received will be held by the Depositary or by a sub-custodian of the Company provided the Depositary has delegated the custody of the collateral to such sub-

custodian and that the Depositary remains liable if the collateral is lost by the sub-custodian.

4. Collateral received will comply with the diversification and correlation requirements specified in CSSF Circular 14/592. During the duration of the agreement, the non-cash collateral cannot be sold, reinvested or pledged. Cash received as collateral may be reinvested, in compliance with the diversification rules specified in the Art. 43 (e) of the afore mentioned CSSF Circular exclusively in eligible risk free assets, mainly short-term money market funds (as defined in the Guidelines on a Common Definition of European Money Market Funds) and overnight deposits with entities prescribed in Article 50 (f) of the UCITS Directive; on a residual basis, in high quality government bonds.

Further information on the collateral received by each sub-fund is made available in the Annual Report which can be obtained free of charges from the registered office of the Company.

D. Pooling

For the purpose of efficient portfolio management, the Management Company may choose, where the investment policies of a Sub-Fund so permit, to co-manage part or all of the assets of two or more Sub-Funds within or outside the Company. In such cases, assets of different Sub-Funds will be managed in common. The assets under co-management are referred to as a "pool", whereby such pools are, however, exclusively used for internal management purposes. These pooling arrangements are an administrative device designed to reduce operational charges and other expenses while allowing wider diversification of the investments. Pooling arrangements do not change the legal rights and obligations of Shareholders. The pools do not constitute separate entities and are not directly accessible to investors. Each of the co-managed Sub-Funds shall remain entitled to its specific assets. Where the assets of more than one Sub-Fund are pooled, the assets attributable to each participating Sub-Fund will initially be determined by reference to its initial allocation of assets to such a pool. Thereafter, the composition of the assets will vary according to additional allocations or withdrawals. The assets of each Sub-Fund are clearly identifiable and are ring-fenced such that in the event of a Sub-Fund being liquidated, the value of such assets can be determined. The entitlement of each participating Sub-Fund to the co-managed assets applies with regard to each individual asset of such a pool. Additional investments made on behalf of the co-managed Sub-Funds shall be allocated to such Sub-Fund in accordance with their respective entitlement, whereas assets sold shall be levied similarly on the assets attributable to each participating Sub-Fund. Swinging Single Pricing (in accordance with the provisions of Part III: Additional Information, Chapter X. Net Asset Value) may be applied. The board of directors of the Company shall resolve on the use of pooling, and will define the limits thereof.

V. Management of the Company

A. Designation of a Management Company

The Company has appointed NN Investment Partners Luxembourg S.A. to act as its Management Company according to the Law of 2010 which responsibilities include, but are not limited to, the day to day operations of the Company and collective portfolio management of the assets of the Company.

NN Investment Partners Luxembourg S.A. has been incorporated in the form of a public limited company (*société anonyme*) in compliance with the Law of 10 August 1915 on commercial companies, as amended. NN Investment Partners Luxembourg S.A. was established for an indefinite period by deed dated 4 February 2004 and published in the Mémorial C on 25 February 2004. Its registered office is situated at 3, rue Jean Piret,

L-2350 Luxembourg. The company was registered under number B 98 977 in the Trade and Companies Register of the District Court of Luxembourg. As at 28 February 2018 its fully paid up capital amounted to EUR 125,000 the shares are fully paid-up.

The Board of Directors of the Management Company is composed as follows:

- **Mr Georges Wolff**
Chairman
Country Manager
NN Investment Partners Luxembourg S.A.
3, rue Jean Piret – L-2350 Luxembourg
- **Mr Erno Berkhoult**
Head of Finance
NN Investment Partners Luxembourg S.A.
3, rue Jean Piret – L-2350 Luxembourg
- **Mrs Corine Gerardy**
Chief Operating Officer
NN Investment Partners Luxembourg S.A.
3, rue Jean Piret – L-2350 Luxembourg
- **Mr Dirk Zunker**
Head of Legal & Compliance
NN Investment Partners Luxembourg S.A.
3, rue Jean Piret – L-2350 Luxembourg
- **Mr Bob van Overbeek**
Head of Technology & Operations
NN Investment Partners (the "Group")
65 Schenkade, The Hague 2595 AS, The Netherlands

The Board of Directors of the Management Company has appointed the following persons as conducting officers of the Company:

- **Mrs Corine Gerardy**
Chief Operating Officer
NN Investment Partners Luxembourg S.A.
3, rue Jean Piret – L2350 Luxembourg
- **Mr Georges Wolff**
Country Manager
NN Investment Partners Luxembourg S.A.
3, rue Jean Piret – L2350 Luxembourg
- **Mr Erno Berkhoult**
Head of Finance
NN Investment Partners Luxembourg S.A.
3, rue Jean Piret – L-2350 Luxembourg
- **Mr Mathieu d'Alés**
Head of Risk Management
NN Investment Partners Luxembourg S.A.
3, rue Jean Piret – L2350 Luxembourg

The corporate object of NN Investment Partners Luxembourg S.A. is the collective portfolio management of Luxembourg and/or foreign UCITS approved in accordance with the Law of 2010 as well as other Luxembourg or foreign UCIs which do not fall within the scope of this directive, with the management of its own assets remaining an ancillary activity. The activities of collective portfolio management of UCITS and UCIs include in particular:

1. Portfolio management: in this respect, NN Investment Partners Luxembourg S.A. may, on behalf of the UCITS and/or other UCIs under management, provide advice and recommendations regarding the investments to be made,

enter into contracts, purchase, sell, exchange and deliver any Transferable Securities and any other assets, and may exercise the voting rights attached to the Transferable Securities constituting the assets of such UCITS and/or other UCIs on their behalf. This list is not exhaustive but rather indicative. In the context of exercising voting rights, the Management Company has adopted a voting policy which can be obtained free of charge upon request at the registered office of the Management Company or which can be consulted on the following website:

<https://www.nnip.com/corporate/LU/en/About-us/Our-policies.htm>

2. Central administration of UCITS and UCIs: this consists in carrying out the tasks listed in annex II of the Law of 2010 on undertakings for collective investment, in particular, valuating the portfolio and determining the value of shares and/or units of UCITS and UCIs, the issue and redemption of shares and/or units of UCITS and UCIs, maintaining the register of UCITS and UCIs and keeping records of transactions. This list is not exhaustive but rather indicative.
3. Marketing shares/units of UCITS and UCIs in Luxembourg or abroad.

In compliance with the legislation and regulations currently in force and with the approval of the Board of Directors of the Company, the Management Company is authorised to delegate all or part of its duties to other companies that it deems appropriate, on condition that the Management Company remains responsible for the acts and omissions of these delegates as regards the tasks entrusted to them, as if these acts and omissions had been carried out by the Management Company itself.

The Management Company has adopted a remuneration policy and report detailing the general remuneration principles, governance, as well as the remuneration of identified staff and relevant quantitative information which may be obtained free of charge upon request at the registered office of the Management Company or consulted on the following website:

<https://www.nnip.com/corporate/LU/en/About-us/Our-policies.htm>

When establishing and applying the remuneration policy, the Management Company shall comply with the following principles, among others:

1. the remuneration policy and practice is consistent with sound and effective risk management and does not encourage risk taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the UCITS that the Management Company manages;
2. the remuneration policy is in line with the business strategy, objectives, values and interests of the Management Company and the UCITS that it manages and of the investors in such UCITS, and includes measures to avoid conflicts of interest;
3. the assessment of performance is set in a multi-year framework appropriate to the holding period recommended to the investors of the UCITS managed by the Management Company in order to ensure that the assessment process is based on the longer-term performance of the UCITS and its investment risks and that the actual payment of performance-based components of remuneration is spread over the same period; and
4. the fixed and variable components of total remuneration are appropriately balanced and the fixed component represents a sufficiently high proportion of the total remuneration to

allow the operation of a fully flexible policy on variable remuneration components.

The remuneration policy might be subject to adjustments due to anticipated regulatory developments in the area of remuneration.

The Management Company is currently managing the following common fund (FCP):

- NN (L) Institutional.

In addition, the Management Company is also currently managing investment companies with variable share capital (SICAVs).

B. Management fee/ fixed service fee

1. In accordance with the terms and conditions of the nomination of NN Investment Partners Luxembourg S.A. by the Company, the latter will pay NN Investment Partners Luxembourg S.A. an annual management fee calculated on the average net assets of the Sub-Fund, as described in the factsheet relating to each Sub-Fund. This fee is payable monthly in arrears.
2. As set out above in Part I "Essential information regarding the Company", Chapter IV "Fees, expenses and taxation", Section A "Fees payable by the Company", a fixed service fee structure has been put in place.

VI. (Sub-) Investment Managers

For the purpose of efficiency the Management Company may delegate at its own expense, while still retaining responsibility, control and coordination, the portfolio management activities of the different Sub-Funds to third parties ("Investment Manager").

The role of an Investment Manager is to pursue the investment policy of the Sub-Funds in accordance with the respective Sub-Funds' investment objectives and policy, to manage the day-to-day business of the portfolio (under the supervision, control and responsibility of the Management Company) and to provide other related services. Investment Managers are at all times subject to the investment objectives and policy set out in the Prospectus for each Sub-Fund, the investment restrictions, the Articles and any other applicable legal restrictions.

An Investment Manager has full investment discretion over the assets of a Sub-Fund. An Investment Manager may use and select brokers of its own choosing to settle transactions and may, at its own expense and responsibility, consult or delegate duties to third parties. In principle, an Investment Manager bears all expenses it incurs in connection with the services it provides for a Sub-Fund.

In case a Sub-Fund's portfolio management activities are delegated or the Investment Manager has delegated his duties to one or more Sub-Investment Manager(s) the name(s) of the respective (Sub-) Investment Managers are indicated in the respective Sub-Fund's factsheet. The full names of the (Sub-) Investment Managers are listed in Part I "Essential Information regarding the Company".

VII. Depositary, Registrar and Transfer Agent, Paying Agent and Central Administrative Agent

A. Depositary

The Company appointed Brown Brothers Harriman (Luxembourg) S.C.A. ("BBH") as the depositary of its assets (the "Depositary") pursuant to the terms of a depositary agreement, as amended from time to time (the "Depositary Agreement"). BBH is registered with the Luxembourg Company Register (RCS) under number B-29923 and has been incorporated under the laws of Luxembourg on 9 February 1989. It is licensed to carry out banking activities under the terms of the Luxembourg law of 5

April 1993 on the financial services sector, as amended and supplemented from time to time. BBH is a bank organised as a *société en commandite par actions* in and under the laws of the Grand Duchy of Luxembourg and maintains its registered office at 80 Route d'Esch, L-1470, Luxembourg.

BBH has established adequate corporate governance and employs detailed corporate policies requiring all lines of business to have policies and procedures to comply with applicable laws and regulations. BBH's governance structure and policies are defined and monitored by its board of managers, its executive committee (including the authorised management), as well as internal compliance, internal audit and risk management functions.

BBH shall take all reasonable steps to identify and mitigate potential conflicts of interest. These steps include the implementation of its conflicts of interest policies that are appropriate for the scale, complexity and nature of its business. This policy identifies the circumstances that give rise or may give rise to a conflict of interest, and includes the procedures to be followed and measures to be adopted in order to manage any conflict of interest. A conflict of interest register is maintained and monitored by the Depositary.

As BBH also acts as Registrar and Transfer Agent, Paying Agent and Central Administrative Agent for the Company, appropriate policies and procedures have been established and are maintained by BBH relating to the management of conflicts of interest that may arise through the provision of its services to the Company as Depositary, Registrar and Transfer Agent, Paying Agent and Central Administrative Agent.

BBH has implemented appropriate segregation of activities between the depositary and the administrative services, including escalation processes and governance. For this purpose, the depositary function is hierarchically and functionally segregated from the administration and registrar services unit.

According to BBH's conflicts of interest policy, all material conflicts of interest involving internal or external parties shall be promptly disclosed, escalated to senior management, registered, mitigated and/or prevented. In the event a conflict of interest may not be avoided, BBH shall maintain and operate effective organizational and administrative arrangements in order to take all reasonable steps to properly (i) disclose conflicts of interest to the Company as well as (ii) manage and monitor such conflicts.

BBH ensures that all employees are informed, trained and advised of applicable conflicts of interest policies and procedures and that duties and responsibilities are segregated appropriately to prevent issues.

The Depositary shall assume its functions and responsibilities as a fund depositary in accordance with the provisions of Depositary Agreement, the Law of 2010 and applicable Luxembourg laws, rules and regulations regarding (i) the safekeeping of financial instruments of the Company to be held in custody and the supervision of other assets of the Company that are not held or capable of being held in custody, (ii) the monitoring of the Company's cash flow and (iii) the following oversight duties:

- i. ensuring that the sale, issue, repurchase, redemption and cancellation of the Shares are carried out in accordance with the Articles and applicable Luxembourg laws, rules and regulations;
- ii. ensuring that the value of the Shares is calculated in accordance with the Articles and applicable Luxembourg laws, rules and regulations;
- iii. ensuring that in transactions involving the Company's assets any consideration is remitted to the Company within the usual time limits;
- iv. ensuring that the Company's income is applied in accordance with the Articles and applicable Luxembourg laws, rules and regulations; and

- v. ensuring that instructions from the Company did not conflict with the Articles and applicable Luxembourg laws, rules and regulations.

The Depositary should hold in custody all financial instruments that can be physically delivered to it, as well as all financial instruments of the Company that:

- can be registered or held in an account directly or indirectly in the name of the Depositary;
- are only directly registered with the issuer itself or its agent in the name of the Depositary;
- are held by a third party to whom safekeeping functions are delegated.

The Depositary should ensure that the custody risk is properly assessed, that due-diligence and segregation obligations have been maintained throughout the whole custody chain, to make sure that financial instruments held in custody are subject to due care and protection at all times.

The Depositary should at all times have a comprehensive overview of all assets that are not financial instruments to be held in custody and must verify the ownership and maintain a record of all assets for which it is satisfied that the Company holds ownership.

In accordance with its oversight obligations, the Depositary shall set up appropriate procedures to verify on an ex-post basis that the Company's investments are consistent with the investment objectives and policies of the Company and Sub-Funds as described in the Prospectus and the Articles and to ensure that the relevant investment restrictions are complied with.

The Depositary shall also properly monitor the Company's cash flows so as to ensure, inter alia, that all payments made by, or on behalf of, investors upon the subscription of the Shares of the Company have been received, and that all the cash has been booked in one or more account(s) opened at an eligible banking institution.

In accordance with the provisions of the Depositary Agreement, the Law of 2010 and applicable Luxembourg laws, rules and regulations, the Depositary may, subject to certain conditions and in order to effectively conduct its duties, delegate to one or more correspondents appointed by the Depositary from time to time, part or all of its safe-keeping duties with regard to the financial instruments to be held in custody (i.e. financial instruments that can be registered in a financial instrument account opened in the Depositary's books and all financial instruments that can be physically delivered to the Depositary). For this purpose, the Depositary has established and maintains appropriate procedures designed to select, monitor and supervise the highest quality third-party provider(s) in each market, in accordance with local laws and regulations. A list of such correspondents (and, if applicable their sub-delegates) as well as the conflicts of interest which may result from such a delegation shall be available to shareholders upon request or can be consulted on the following websites:

<https://nnip.com/private/LU/en/About-us/Policies/Subcustodian-and-Contracting-Party-Regulators.htm>

or

<https://nnip.com/institutional/LU/en/About-us/Policies/Subcustodian-and-Contracting-Party-Regulators.htm>

The list of correspondents may be updated from time to time.

When selecting and appointing a correspondent, the Depositary shall exercise all due skill, care and diligence as required by applicable Luxembourg laws, rules and regulations to ensure that it entrusts the Company's assets only to a correspondent who may provide an adequate standard of protection. The Depositary shall also periodically assess whether correspondents fulfill applicable legal and regulatory requirements and shall exercise

ongoing supervision over each correspondent to ensure that the obligations of the correspondents continue to be appropriately discharged.

Where the laws of a third country requires that certain financial instruments be held in custody by a local entity and no local entities satisfy the delegation requirements laid down in the Law of 2010, the Depositary may delegate its functions to such a local entity only to the extent required by the laws of the third country and only for as long as there are no local entities that satisfy the delegation requirements. The Depositary's liability shall not be affected by any such delegation. The Depositary is liable to the Company or its Shareholders pursuant the provisions of applicable Luxembourg laws, rules and regulations.

A potential risk of conflicts of interest may occur in situations where the correspondents may enter into or have a separate commercial and/or business relationship with the Depositary in parallel to the safekeeping delegation relationship. In the conduct of its business, conflicts of interest may arise between the Depositary and the correspondent. Where a correspondent shall have a group link with the Depositary, the Depositary undertakes to identify potential conflicts of interests arising from that link, if any, and to take all reasonable steps to mitigate those conflicts of interest.

The Depositary does not anticipate that there would be any specific conflicts of interest arising as a result of any delegation to any correspondent. The Depositary will notify the Company or the Management Company of any such conflict should it so arise.

To the extent that any other potential conflicts of interest exist pertaining to the Depositary, they have been identified, mitigated and addressed in accordance with the Depositary's policies and procedures.

Updated information on the Depositary's custody duties and conflicts of interest that may arise may be obtained, free of charge and upon request, from the Depositary.

The Law of 2010 provides for a strict liability of the Depositary in case of loss of financial instruments held in custody. In case of loss of these financial instruments, the Depositary shall return financial instruments of identical type of the corresponding amount to the Company unless it can prove that the loss is the result of an external event beyond its reasonable control, the consequences of which would have been unavoidable despite all reasonable efforts to the contrary. Shareholders are informed that in certain circumstances financial instruments held by the Company with respect to the Company will not qualify as financial instruments to be held in custody (i.e. financial instruments that can be registered in a financial instrument account opened in the Depositary's books and all financial instruments that can be physically delivered to the Depositary), so that the Depositary will be liable to the Company or the Shareholders for the loss suffered by them as a result of the Depositary's negligent or intentional failure to properly fulfil its obligations pursuant to applicable Luxembourg laws, rules and regulations.

Pursuant to the Depositary Agreement, BBH will receive a fee payable by each of the Company Sub-Funds as indicated in Part I, Chapter IV "Fees, expenses and taxation", Section A "Fees payable by the Company".

B. Registrar and Transfer Agent

Brown Brothers Harriman (Luxembourg) S.C.A. ("BBH"), as Registrar and Transfer Agent of the Company, is, in particular, responsible for the processing of the issue and sale of the Company's Shares, maintaining the register of Shareholders and the transfer of the Company's Shares to Shareholders, agents and third parties.

The investor acknowledges and agrees that its data will be shared on a cross-border basis and among various entities within BBH group for them to perform the required services. The investor's

consent to process its data on a cross-border basis may include the processing of data to entities situated in countries outside of the European Economic Area which may not have the same data protection laws as the Grand Duchy of Luxembourg. The process of data to the aforementioned entities may transit via and/or be processed in countries which may not have data protection requirements deemed equivalent to those prevailing in the European Economic Area.

C. Paying Agent

As Paying Agent, Brown Brothers Harriman (Luxembourg) S.C.A. ("BBH") is responsible for the distribution of income and Dividends to the Shareholders.

D. Central Administrative Agent

The Company has appointed the Management Company as its Central Administration Agent. In this capacity the Management Company is responsible for all administrative duties required by Luxembourg law, in particular for the registration of the Company, for the preparation of documentation, for drawing up distribution notifications, for processing and dispatching the Prospectus and the Key Investor Information Document, for preparing financial statements and other investor relations documents, for liaising with the administrative authorities, the investors and all other relevant parties. The responsibilities of the Management Company in that regard also include bookkeeping and calculation of the Net Asset Value of the Company's Shares, the processing of applications for subscription, redemption and conversion of Shares, accepting payments, the safekeeping of the Company's register of shareholders, and preparation and supervision of the mailing of statements, reports, notices and other documents to Shareholders.

In addition to its function as Depositary, the Management Company has outsourced to Brown Brothers Harriman (Luxembourg) S.C.A. ("BBH") also substantial functions of central administration and other duties, particularly fund accounting, the calculation of the Net Asset Value as well as the subsequent monitoring of investment limits and restrictions.

VIII. Distributors

The Company may enter into agreements with Distributors to market and place Shares of each of the Sub-Fund's in different countries worldwide, with the exception of such countries where such activity is prohibited.

The Company and the Distributors will ensure that they fulfil all obligations imposed on them by laws, regulations and directives on combating money laundering and take steps, to the extent possible, that these obligations are adhered to.

IX. Shares

The share capital of the Company is at all times equal to the assets represented by the outstanding Shares of the different Company Sub-Funds.

Any natural person or legal entity may acquire Company Shares in accordance with the provisions of Part I "Essential Information regarding the Company", Chapter III "Subscriptions, redemptions and conversions".

The Shares are issued without nominal value and must be fully paid up upon subscription. When new Shares are issued, existing Shareholders do not benefit from any preferential subscription rights.

The Board of Directors may issue one or more Share-Classes for each Sub-Fund. These may be reserved for a particular group of

investors, e.g. investors from a specific country or region or Institutional Investors.

The Share-Classes may differ from another one with regard to their cost structure, the initial investment amount, the Reference Currency in which the Net Asset Value is expressed or any other feature in accordance with the provisions of Part II, Chapter "Share-Classes". The Company's Board of Directors may impose initial investment obligations with regard to investments in a certain Share-Class, a specific Sub-Fund or in the Company.

Other Share-Classes may be created by the Company's Board of Directors which decides on their names and features. These other Share-Classes are specified in each of the Sub-Fund factsheets containing these new Share-Classes.

Reference Currency is the reference currency of a Sub-Fund (or a Share-Class thereof, if applicable) which, however does not necessarily correspond to the currency in which the Sub-Fund's net assets are invested at any point in time. Where currency is used in the name of the Sub-Fund, this merely refers to the Reference Currency of the Sub-Fund and does not indicate a currency bias within the portfolio. Individual Share-Classes may have different currency denominations which denote the currency in which the Net Asset Value per Share is expressed. These differ from Hedged Share-Classes.

Whenever Dividends on distribution Shares are distributed, the portion of net assets of the Share-Class to be allocated to distribution Shares will subsequently be reduced by an amount equal to the amounts of the Dividends distributed, thus leading to a decrease in the percentage of net assets allocated to distribution Shares, whereas the portion of the net assets allocated to capitalisation Shares will remain the same.

Any payment of Dividends results in an increase in the ratio between the value of capitalisation Shares and the value of distribution Shares of the Share-Class and Sub-Fund concerned. This ratio is known as parity.

Within a single Sub-Fund, all the Shares have equal rights with regard to Dividends as well as liquidation and redemption proceeds (subject to the respective rights of distribution and capitalisation Shares, taking the parity at the time into account).

The Company may decide to issue fractional Shares. These fractional Shares do not confer any voting rights upon their holders, but do enable them to participate pro rata in the net assets of the Company. Only full Shares, regardless of their value, carry a voting right.

The Company draws the Shareholders attention to the fact that any Shareholder will only be able to fully exercise his shareholder's rights directly against the Company, notably the right to participate in the general meetings, if the investor is registered in its own name in the Company's shareholder register. In cases where an investor invests in the Company through an intermediary investing into the Company in his own name but on behalf of the investor, it may not always be possible for the Shareholder to exercise certain shareholder rights directly against the Company. Investors are advised to take advice on their rights.

Shares will be issued in registered form. Shares for any Share-Class of the Company will no longer be issued in physical form. Shares may also be held and transferred through accounts maintained with clearing systems.

In accordance with the Luxembourg law of 28 July 2014 relating to the immobilisation of bearer shares and units and the holding of the register of registered shares and of the register of immobilised bearer shares, physical bearer shares that have not been deposited at the latest on 18 February 2016 have been cancelled and the proceeds related to such cancellation have been deposited with the *Caisse de Consignation*.

X. Net Asset Value

The Net Asset Value of the Shares of each Share-Class for each Sub-Fund of the Company will be expressed in the currency decided upon by the Company's Board of Directors. In principle, this Net Asset Value will be determined at least twice a month.

The Company's Board of Directors will decide the Valuation Days and the methods used to publish the Net Asset Value, in accordance with the legislation in force.

The Company intends not to calculate the Net Asset Value of a Sub-Fund on days where a substantial part of the underlying assets of such Sub-Fund cannot be properly priced due to dealing restrictions or closure of one or several relevant markets. A list of non Valuation Days will be available from the Management Company on request.

1. The Company's assets include:
 - a. all cash in hand or on deposit, including any interest accrued and outstanding;
 - b. all bills and promissory notes receivable and receivables, including any outstanding proceeds for sales of securities;
 - c. all securities, equities, bonds, term bills, debenture stocks, options or subscription rights, warrants, Money Market Instruments and any other investments and Transferable Securities held by the Company;
 - d. all dividends and distributions payable to the Company either in cash or in the form of stocks and shares (the Company may, however, make adjustments to take account of any fluctuations in the market value of Transferable Securities caused by practices such as ex-dividend or ex-right trading);
 - e. all interest accrued and to be received on any interest-bearing securities belonging to the Company, unless this interest is included in the principal amount of such securities;
 - f. the Company's formation costs, to the extent that these have not yet been amortised;
 - g. all other assets of whatever nature, including the proceeds of swap transactions and advance payments.
2. The Company's liabilities include:
 - a. all borrowings, bills due and accounts payable;
 - b. all known liabilities, whether due or not, including all matured contractual liabilities payable either in cash or in the form of assets, including the amount of any Dividends declared by the Company but not yet paid;
 - c. all provisions for capital gains tax and income tax up to the Valuation Day and any other provisions authorised or approved by the Board of Directors;
 - d. all of the Company's other liabilities regardless of their nature with the exception of those represented by shares of the Company. In order to determine the amount of such liabilities the Company will take into account all expenses payable by the Company which will include formation costs, fees payable to the Management Company, fees payable to Investment Managers or advisors, accountants, the Depositary and correspondents, the central administrative agent, registrar, transfer agent and Paying Agents, Distributors and permanent representatives based in the countries in which the Company is registered and any other agent employed by the Company, costs related to legal assistance and auditing services, promotion, printing,

reporting and publishing expenses, including the cost of advertising, preparing and printing prospectuses, Key Investor Information Documents, explanatory memoranda, registration statements, annual and semi-annual reports, taxes or other levies, and all other operating expenses, including fees for buying and selling assets, interest, bank and brokerage charges, postage, telephone and telex charges, unless already covered under the Fixed Service Fee. The Company may calculate administrative fees and other expenses of a regular or recurring nature in advance on the basis of an estimated figure for one year or other periods and may fix, in advance, proportional fees for any such periods.

3. The value of assets will be determined as follows:

- a. any cash in hand or on deposit, lists of bills for discount, bills and sight bills, receivables, prepaid expenses, cash dividends and interest declared or accrued as aforesaid and not yet received will be valued taking their full value into account, unless it is unlikely that such amount will be paid or received in full, in which case the value thereof will be determined by applying a discount that the Company's Board of Directors deems appropriate in order to reflect the true value of the asset;
- b. the valuation of Company assets will, for Transferable Securities and Money Market Instruments or derivatives admitted to an official stock exchange or traded on any other regulated market, be based on the last available price on the principal market on which these securities, Money Market Instruments or derivatives are traded, as provided by a recognised listing service approved by the Company's Board of Directors. If such prices are not representative of the fair value, these securities, Money Market Instruments or derivatives as well as other authorised assets will be valued on the basis of their foreseeable sale prices, as determined in good faith by the Company's Board of Directors;
- c. securities and Money Market Instruments which are not listed or traded on any regulated market will be valued based on the last available price, unless such price is not representative of their true value; in this case, the valuation will be based on the foreseeable sale price of the security, as determined in good faith by the Company's Board of Directors;
- d. the amortised cost valuation method may be used for short-term Transferable Securities of certain Sub-Funds of the Company. This method involves valuing a security at its cost and thereafter assuming a constant amortisation to maturity of any discount or premium regardless of the impact of fluctuating interest rates on the market value of the security. While this method provides a fair valuation, the value determined by amortised cost may sometimes be higher or lower than the price the Sub-Fund would receive if it were to sell the securities. For some short-term Transferable Securities, the return for a Shareholder may differ somewhat from the return that could be obtained from a similar Sub-Fund which values its portfolio securities at their market value.
- e. the value of investments in investment funds is calculated on the last available valuation. Generally, investments in investment funds will be valued in accordance with the methods laid down for such investment funds. These valuations are usually provided by the fund administrator or the agent in charge of valuations of this investment fund. To ensure consistency in the valuation of each Sub-Fund, if the time at which the valuation of an investment fund was calculated does not coincide with the Valuation

Day of the Sub-Fund in question, and such valuation is determined to have changed substantially since its calculation, the Net Asset Value may be adjusted to reflect these changes as determined in good faith by the Company's Board of Directors.

- f. the valuation of swaps is based on their market value, which itself depends on various factors such as the level and volatility of the underlying Indices, market interest rates or the residual duration of the swap. Any adjustments required as a result of issues and redemptions will be carried out by means of an increase or decrease in the swaps, traded at their market value.
- g. the valuation of derivatives traded over-the-counter (OTC), such as futures, forwards or options not traded on a stock exchange or another regulated market, will be based on their net liquidation value determined in accordance with the policies established by the Company's Board of Directors, in a manner consistently applied for each type of contract. The net liquidation value of a derivative position corresponds to the unrealised profit/loss with respect to the relevant position. This valuation is based on or controlled by the use of a model recognised and commonly practiced on the market.
- h. the value of other assets will be determined prudently and in good faith by the Company's Board of Directors in accordance with generally accepted valuation principles and procedures.

The Company's Board of Directors may, at its own discretion, authorise an alternative valuation method to be used if it considers that such a valuation better reflects the fair value of any asset of the Company.

The valuation of the Company's assets and liabilities expressed in foreign currencies will be converted into the Reference Currency of the Sub-Fund concerned, based on the last known exchange rate.

All regulations will be interpreted and valuations carried out in accordance with generally accepted accounting principles.

Adequate provisions will be established for each Sub-Fund for the expenses incurred by each Sub-Fund of the Company and any off-balance sheet liabilities shall be taken into account in accordance with fair and prudent criteria.

For each Sub-Fund and for each Share-Class, the Net Asset Value per Share will be determined in the calculation currency of the Net Asset Value of the relevant class, by a figure obtained by dividing, on the Valuation Day, the net assets of the Share-Class concerned, comprising the assets of this Share-Class less any liabilities attributable to it, by the number of Shares issued and outstanding for the Share-Class concerned.

If several Share-Classes are available for a Sub-Fund, the Net Asset Value per Share of a given Share-Class will at all times be equal to the amount obtained by dividing the portion of net assets attributable to this Share-Class by the total number of Shares of this Share-Class issued and outstanding.

Any share that is in the process of being redeemed pursuant to Chapter III "Subscriptions, redemptions and conversions" of Part I of the prospectus ("Essential information regarding the Company") will be treated as an issued and existing share until the close of the Valuation Day applicable to the redemption of this share and, until such time as the redemption is settled, it will be deemed a Company liability.

Any Shares to be issued by the Company in accordance with subscription requests received shall be treated as being issued with effect from the close of the Valuation Day on which their issue price was determined, and this price will be treated as an

amount payable to the Company until such time as it is received by the latter.

Insofar as possible, any purchases or sales of Transferable Securities contracted by the Company will be processed on the Valuation Day.

Transactions, including transactions in kind, in or out of a Sub-Fund can create "dilution" of a Sub-Fund's assets because the price at which an investor subscribes or redeems Shares in a Sub-Fund may not entirely reflect the dealing and other costs that arise when the Investment Manager has to trade in securities to accommodate cash inflows and outflows. In order to mitigate this effect and enhance the protection of existing Shareholders, the mechanism known as Swinging Single Pricing ("SSP") may be applied at the discretion of the Board of Directors for each of the Sub-Funds of the Company. By applying the SSP mechanism, the Net Asset Value of the relevant Sub-Fund may be adjusted by an amount (the "Swing Factor") to compensate expected transaction costs resulting from the difference between capital inflows and outflows (the "Net Capital Flows"). In case of Net Capital Inflows the Swing Factor may be added to the respective Sub-Fund's Net Asset Value to reflect subscriptions made whereas in case of Net Capital Outflows the Swing Factor may be deducted from the respective Sub-Fund's Net Asset Value to reflect redemptions requested. In both cases, the same Net Asset Value applies to all subscribing and redeeming investors on a particular date.

In principle, the Swing Factor will not exceed 1.50% of the respective Sub-Fund's Net Asset Value except for Sub-Funds investing in fixed income instruments which may apply a maximum Swing Factor of 3.00%.

Each Sub-Fund may apply a different Swing Factor subject to the maximum Swing Factor set out above and level of threshold. In case the Net Capital Flow exceeds a predefined percentage of a Sub-Fund's Net Asset Value (the "threshold") SSP will automatically be triggered. The level of thresholds, if and when applicable, will be decided on the basis of certain parameters which may include the size of the Sub-Fund, the liquidity of the underlying market in which the respective Sub-Fund invests, the cash management of the respective Sub-Fund or the type of instruments that are used to manage Net Capital Inflows/Outflows. The Swing Factor is, amongst others, based on the estimated transaction costs of the financial instruments in which the respective Sub-Fund may invest. The different levels of thresholds and Swing Factors are reviewed on a regular basis and may be adjusted. For an individual Sub-Fund an applicable threshold could mean SSP is not or rarely applied. All Sub-Funds except NN (L) Euro Liquidity apply the SSP mechanism.

The current levels of thresholds and Swing Factors for each Sub-Fund are disclosed and updated on the website: www.nnip.com.

The Company's net assets will be in principle equal to the sum of the net assets of all the Sub-Funds, where applicable converted into the Company's consolidation currency, on the basis of the last known exchange rates.

In the absence of bad faith, gross negligence or manifest error, any decision regarding the calculation of the Net Asset Value taken by the Company's Board of Directors, or by any bank, company or other organisation appointed by the Company's Board of Directors for the purpose of calculating the Net Asset Value, shall be final and bind the Company and present, former or future Shareholders.

XI. Temporary suspension of the calculation of the Net Asset Value and resulting suspension of dealing

The Board of Directors is authorised to temporarily suspend the calculation of the Net Asset Value per Share of one/ several Sub-

Funds or Share-Classes and/or the issue, redemption and conversion of Shares in the following cases:

1. in the event of the closure, for periods other than normal holidays, of a stock exchange or other regulated market that operates regularly, is recognised and open to the public and provides the listings for a significant portion of the assets of one or more Sub-Funds, or in the event that transactions on such markets are suspended, subject to restrictions or impossible to execute in the required quantities;
2. where there is a breakdown in the methods of communication normally used to determine the value of investments of the Company or the current value on any investment exchange or when, for any reason whatsoever, the value of investments cannot be promptly and accurately ascertained;
3. where exchange or capital transfer restrictions prevent the execution of transactions on behalf of one or more Sub-Funds or where purchases and sales made on its behalf cannot be executed at normal exchange rates;
4. where factors relating inter alia to the political, economic, military or monetary situation, and which are beyond the control, responsibility and operational ability of the Company, prevent it from disposing of its assets and determining their Net Asset Value in a normal or reasonable way;
5. following any decision to dissolve one, several or all Sub-Funds of the Company;
6. where the market of a currency in which a significant portion of the assets of one or more Sub-Funds is expressed is closed for periods other than normal holidays, or where trading on such a market is either suspended or subject to restrictions;
7. to establish exchange parities in the context of a contribution of assets, split or any restructuring operation, within or by one or more Sub-Funds;
8. in case of a merger of a Sub-Fund with another Sub-Fund of the Company or of another UCITS or UCI (or a Sub-Fund thereof), provided such suspension is in the best interest of the Shareholders;
9. in case of a feeder Sub-Fund of the Company if the net asset calculation of the master Sub-Fund or the master UCITS is suspended.

Furthermore, in order to prevent Market Timing opportunities arising when a Net Asset Value is calculated on the basis of market prices which are no longer up-to-date, the Board of Directors is authorised to temporarily suspend the issue, redemption and conversion of Shares of one or several Sub-Funds.

In all the above cases, the requests received will be executed at the first Net Asset Value applicable upon the expiry of the suspension period.

In exceptional circumstances which may have an adverse effect on the interests of Shareholders, in the event of large volumes of subscription, redemption or conversion requests or in the event of a lack of liquidity on the markets, the Company's Board of Directors reserves the right to set the Net Asset Value of the Company Shares only after carrying out the required purchases and sales of securities on behalf of the Company. (For redemptions, "large volumes" shall mean that the total value of Shares in all redemption requests in one Dealing Day exceeds 10% of the total net asset value of the Sub-Fund on the same Dealing Day.) In this case, any subscriptions, redemptions and conversions simultaneously pending will be executed on the basis of a single Net Asset Value.

The temporary suspension of the calculation of the Net Asset Value and resulting suspension of dealing of Shares of one or

more Sub-Funds will be announced by any appropriate means and more specifically by publication in the press, unless the Company's Board of Directors feels that such a publication is not useful in view of the short duration of the suspension.

Such a suspension decision will be notified to any Shareholders requesting the subscription, redemption or conversion of Shares.

XII. Periodic reports

Annual reports, including accounting data, will be certified by the Auditor. Annual and semi-annual reports will be made available to Shareholders at the registered office of the Company.

The annual reports will be published within four months of the end of the financial year.

Semi-annual reports will be published within two months of the end of the half year.

These periodic reports contain all the financial information relating to each of the Sub-Funds, the composition and evolution of their assets and their consolidated situation, expressed in Euro, as well as the relevant information on remuneration.

XIII. General meetings

The annual general meeting of Shareholders shall be held in Luxembourg, either at the Company's registered office or at any other location in Luxembourg specified in the convening notice, at the fourth Thursday of January at 14:00 p.m. CET each calendar year. If this day is not a Business Day the annual general meeting shall be held on the next following Business Day. The annual general meeting may be held abroad if the Board of Directors, acting with sovereign powers, decides that exceptional circumstances warrant this.

Other general meetings, for one or several Sub-Funds, may be held at the place and on the date specified in the convening notice.

The convening notices for every general meeting shall contain the agenda and shall take the form of announcements filed with the RCS and published on the RESA and in a newspaper published in Luxembourg at least fifteen (15) days before the meeting. The convening notices shall be communicated to registered Shareholders at least eight (8) days before the meeting. Such communication shall be made by post unless the addressees have individually agreed to receive the convening notice by way of another facsimile electronic or physical mean of communication (including, but limited to fax, telex or e-mail). No proof shall be given that this formality has been complied with.

Where all the Shares are in registered form, the Company may for any general meeting communicate the convening notices at least eight (8) days before the meeting by registered letters only, without prejudice to other physical or electronic means of communication which need to be accepted on an individual basis by their addressees and to warrant notification. The provisions prescribing the publication of the convening notices on the RESA or in a Luxembourg newspaper shall not apply in such case.

In case a Sub-Fund of the Company invests in shares issued by one or several other Sub-Funds of the Company the voting rights attached to the relevant Shares are suspended for as long as they are held by the investing Sub-Fund and without prejudice to the appropriate processing in the accounts and periodic reports.

The convening participation, quorum, execution and majority required for any general meeting are those stipulated in the Luxembourg Law of 10 August 1915, as amended and in the Company's Articles.

XIV. Dividends

The general meeting will set the amount of the Dividend on the recommendation of the Company's Board of Directors, within the framework of the legal limits and those of the Articles in this regard, it being understood that the Company's Board of Directors may decide to distribute interim Dividends.

It may be decided to (1) distribute realised capital gains and other income, (2) unrealised capital gains and (3) capital in accordance with Article 31 of the Law of 2010.

Under no circumstances distributions may be made if doing so would result in the net assets of all the Sub-Funds of the Company falling below EUR 1,250,000 which is the legally required minimum capital. In accordance with the Law, the Board of Directors will determine the dates and places where the Dividends will be paid and the manner in which their payment will be announced to Shareholders.

Dividends not claimed within five years of the Payment Date shall be forfeited and will revert to the Share-Class(es) issued in respect of the relevant Sub-Fund of the Company.

If Dividends paid by a "Y" Share-Class are reinvested, the respective Shareholder will receive additional Shares free of the Contingent Deferred Sales Charge. These additional Shares will not be taken into account for the calculation of the Contingent Deferred Sales Charge in case of redemption.

XV. Liquidations, mergers and contributions of Sub-Funds or Share-Classes

The Board of Directors may decide each time (i) the value of the net assets of any Share-Class within a Sub-Fund has decreased to, or has not reached, minimum level for such Sub Fund, or such Share-Class, to operate in an economically efficient manner, or (ii) in case of a substantial modification in the political, economic or monetary situation, or (iii) as a matter of economic rationalization to:

- a) redeem all the Shares of the relevant Share-Class or Share-Classes of the Sub-Fund at the net asset value per share (taking into account actual realization prices of investments and realization expenses) calculated on the Valuation Day at which such decision shall take effect,
- b) convert one or several Share-Class(es) at the net asset value per share calculated on the Valuation Day which such conversion shall take effect (the "Conversion Date"), into another Share-Class(es) within the same Sub-Fund or with another Sub-Fund. In such case the Shareholders will be informed in writing by the Company, by a notice sent to the holders of the relevant Share-Class(es) at least one (1) month before the proposed Conversion Date. The Shareholders will have at least one (1) month to redeem their Shares, free of charges. At the Conversion Date the Shareholders who didn't redeem their Shares, will receive new Share-Classes types issued at the net asset value per share calculated on that Valuation Day.

In accordance with the Law the Company must inform the (registered) Shareholders in writing of the reasons and the redemption/conversion procedure before the compulsory redemption/convention enters into force. If decision is made to liquidate a Sub-Fund or a Share-Class, such notice will be released through registered letter. Unless decided in the interest of, or in order to ensure equal treatment between Shareholders, the Shareholders of the Sub-Fund or the Share-Class concerned may continue to request the redemption/conversion of their Shares free of charge (but taking into account the costs of liquidation as well as the sale prices of investments and expenses relating thereto) prior the effective date of the compulsory redemption/conversion. The issue of Shares will be suspended as

soon as the decision is taken to liquidate a Sub-Fund or a Share-Class.

Notwithstanding the powers conferred on the Company's Board of Directors by the preceding paragraph, the general meeting of Shareholders of any one Share-Class or all Share-Classes issued in any Sub-Fund may, under all circumstances and upon proposal by the Company's Board of Directors, redeem all the Shares of the relevant class or classes issued in this Sub-Fund and refund to the Shareholders the Net Asset Value of their Shares (taking into account the sale prices of investments and expenses relating thereto) calculated on the Valuation Day on which such decision takes effect. There will be no quorum requirements for such general meetings of Shareholders and resolutions may be passed by a simple majority vote of those present or represented and voting at such meetings.

Assets which could not be distributed to their beneficiaries upon implementation of the redemption will be deposited with the custodian bank of the Company for a period of six (6) months thereafter; after such period, the assets will be deposited with the Luxembourg Caisse de Consignation on behalf of the persons entitled thereto.

Under the same circumstances as specified in the first paragraph and subject to the provisions of the Law of 2010 as well as applicable Luxembourg regulations, the Board of Directors may decide to allocate/merge the assets and liabilities of any Share-Class or Sub-Fund (the "Merging Sub-Fund/Share-Class") (1) with another Share-Class or Sub-Fund within the Company or (2) with another Share-Class or Sub-Fund of another UCITS governed by the provisions of the UCITS Directive (the "Receiving Sub-Fund/Share-Class") and to transfer the asset and liabilities of the Merging Sub-Fund/Share-Class into the new or existing Receiving Sub-Fund/Share-Class (following a split or consolidation, if necessary, and the payment of any amounts corresponding to fractional Shares to Shareholders). The Shareholders of the Merging Sub-Fund/Share-Class will be notified in accordance with the provisions of the laws and, notably, in conformity with the CSSF Regulation 10-5 of the CSSF, as amended, at least one (1) month before the effective date of the merger, in order to enable Shareholders of the Merging Sub-Fund/Share-Class to request redemption of their Shares, free of charge, during such period, it being understood that the merger will take effect five (5) business days after the expiry of such notice period. Shareholders of the Merging Sub-Fund/Share-Class who have not requested redemption will be transferred as of right to the Receiving Sub-Fund/Share-Class.

A merger that has as a result that the Company ceases to exist needs to be decided at a general meeting of Shareholders. There will be no quorum requirements for such general meetings of Shareholders and resolutions may be passed by a simple majority vote of those present or represented and voting at such meetings.

XVI. Dissolution of the Company

The Company may at any time be dissolved by a resolution of the general meeting of Shareholders subject to the quorum and majority requirements, as provided for under the law.

Any decision to dissolve the Company, together with the liquidation procedures, will be published in the RESA and in two newspapers with sufficiently wide distribution, at least one of which will be a Luxembourg daily newspaper.

As soon as the general meeting of Shareholders has decided to dissolve the Company, the issue, redemption and conversion of Shares will be prohibited, any such transactions being rendered void.

Whenever the share capital would fall below two-thirds of the minimum capital required by law, the question of the dissolution of the Company should be referred to the general meeting by the

Board of Directors. The general meeting, for which no quorum shall be required, shall decide by simple majority of the votes of the shares represented at the meeting.

The question of the dissolution of the Company shall further be referred to the general meeting whenever the share capital falls below one-fourth of the minimum capital.

In such an event the general meeting shall be held without any quorum requirement and the dissolution may be decided upon by the Shareholders holding one-fourth of the votes of the Shares represented at the meeting.

The meeting must be convened so that it is held within a period of forty days from ascertainment that the net assets of the Company have fallen below two-thirds or one-fourth of the legal minimum, as the case may be.

In the event of the dissolution of the Company, the liquidation shall be carried out by one or more liquidators, who may be natural persons or legal entities and who shall be appointed by the general meeting of Shareholders. The latter will determine their powers and compensation.

The liquidator(s) shall convene the general meeting of shareholders so that it is held within a period of one month where shareholders representing one tenth of the corporate capital require them to do so by means of a written request with an indication of the agenda.

The liquidation will take place in accordance with the Law of 2010 on undertakings for collective investment, specifying the distribution amongst the Shareholders of the net liquidation proceeds after deduction of liquidation costs; the liquidation proceeds shall be distributed to Shareholders in proportion to their rights, taking parities into due consideration.

On completion of the liquidation of the Company, the sums that have not been claimed by the Shareholders will be paid into the *Caisse des Consignations*.

XVII. Prevention of money laundering and the financing of terrorism

Within the context of the fight against money laundering and the financing of terrorism, the Company and/or the Management Company will ensure that the relevant Luxembourg legislation is complied with and that the identification of subscribers will be carried out in Luxembourg in accordance with the regulations currently in force in the following cases:

1. in the event of direct subscription to the Company;
2. in the event of subscription through a financial sector professional residing in a country that is not subject to identification requirements equivalent to Luxembourg standards with regard to the fight against money laundering and the financing of terrorism;
3. in the event of subscription through a subsidiary or branch whose parent company is subject to identification requirements equivalent to those under Luxembourg law, if the law applicable to the parent company does not oblige it to ensure compliance with these provisions for its subsidiaries and branches.

Furthermore, the Company must identify the source of the funds in the event that the sources are financial establishments that are not subject to identification requirements equivalent to those required under Luxembourg law. Subscriptions may be temporarily blocked until the source of the funds has been identified.

It is generally accepted that financial sector professionals residing in countries that have adhered to the conclusions of the GAFI report (*Groupe d'Action Financière sur le blanchiment de capitaux* – Financial Action Task Force on Money Laundering) are deemed

to have identification requirements equivalent to those required by Luxembourg law.

XVIII. Conflicts of Interests

The Management Company, the Investment Managers and any investment advisers, the Depositary, the Paying Agent, the Central Administrative Agent, the Registrar and Transfer Agent, together with their subsidiaries, directors, managers or Shareholders (collectively the “Parties”) are, or may be, involved in other professional and financial activities that are liable to create a conflict of interests with the management and administration of the Company. This includes the management of other funds, the purchase and sale of securities, brokerage services, custody of securities and the fact of acting as a director, manager, advisor or representative of other funds or companies in which the Company may invest.

Each Party respectively undertakes to ensure that the execution of their obligations vis-à-vis the Company is not compromised by such involvement. In the event that a conflict of interests becomes apparent, the Directors and the Party concerned undertake to resolve this in an equitable manner within a reasonable period of time and in the interests of the Shareholders.

No conflict of interests has been identified between the Company and the Parties.

The Company applies the Conflicts of Interest Policy of the Management Company which is available for consultation on the website www.nnip.com.

XIX. Nominees

If a Shareholder subscribes for Shares through a particular Distributor, the Distributor may open an account in its own name and have the Shares registered exclusively in its own name acting as Nominee or in the name of the investor. In case the Distributor acts as Nominee all subsequent applications for subscription, redemption or conversion and other instructions must then be made through the relevant Distributor. Certain Nominees may not offer their clients all the Sub-Funds or Share-Classes or the option to make subscriptions or redemptions in all currencies. For more information on this, the clients concerned are invited to consult their Nominee.

Furthermore, the intervention of a Nominee is subject to compliance with the following conditions:

1. investors must have the possibility of investing directly in the Sub-Fund of their choice without using the Nominee as an intermediary;
2. contracts between the Nominee and investors must contain a termination clause that confers on the investor the right to claim, at any time, direct ownership of the securities subscribed through a Nominee.

It is understood that the conditions laid down in 1 and 2 above will not be applicable in the event that the use of the services of a Nominee is essential, and even mandatory, for legal, regulatory or restrictive practice reasons.

In the event that a Nominee is appointed, it must apply the procedures for fighting money laundering and the financing of terrorism as laid out in Chapter XVII above.

Nominees are not authorised to delegate all or part of their duties and powers.

XX. Stock Exchange Listing

The Company's Board of Directors may authorise the listing of Shares of any Sub-Fund of the Company on the Luxembourg Stock

Exchange or on other exchanges for trading on organized markets. However, the Company is aware that – without its approval – Shares of Sub-Funds were being traded on certain markets at the time of the printing this Prospectus. It cannot be ruled out that such trading will be suspended in the short term or that Shares in Sub-Funds will be introduced to other markets or are already being traded there.

The market price of Shares traded on exchanges or on other markets is not determined exclusively by the value of the assets held by the Sub-Fund; the price is also determined by supply and demand. For this reason, the market price may deviate from the Share Price per Share determined for a Share-Class.

Appendix I: Assets subject to TRS and SFT - Table

In accordance with Regulation (EU) No 2015/2365, information regarding the type of assets that can be subject to TRS and SFTs, as well as the maximum and expected proportion that can be subject to them, are disclosed in the following table. It is to be noticed that the maximum and expected proportions of TRS are calculated as a contribution to each Sub-Fund's global exposure using the sum of notional method ("gross approach"), hence without taking into account any netting arrangement. The expected and maximum levels of TRS and SFTs are indicators and not regulatory limits. A Sub-Fund's use of TRS and/or SFTs may temporarily be higher than the levels disclosed in the below table as long as it remains in line with its risk profile and complies with its global exposure's limit.

n°	Sub-Fund Name	Type of assets subject to SFTs	Type of assets subject to TRS	Expected Sec. Lending (Market value)	Max. Sec. Lending (Market value)	Expected Repo (Market value)	Max.
