RIVOLI LONG SHORT BOND FUND, P UNITS (ISIN : FR0007066782)

This Fund is UCITS managed by RIVOLI FUND MANAGEMENT

• Objectives and Investment Policy

Key features of the UCITS :

- This Fund aims to achieve capital growth regardless of market conditions using quantitative investments techniques.
- The Fund targets absolute returns, which means that, according to the risk profile described in this prospectus, it will try to outperform the daily capitalized EONIA. The EONIA (Euro Overnight Index Average) index corresponds to the average overnight interest rates between banks in the euro zone.
- The Fund focuses on investing in the bond and interest rate French and international markets, portfolio allocation depending of the opportunities which arise in those markets.
- Subscription and redemption requests are accepted before 11.00pm each day by the institution responsible for managing the Fund's liabilities and are executed on the basis of that day's (D) net asset value, published on the following business day (D+1). For subscriptions and redemptions via Euroclear France, delivery-versus-payment takes place on D+1 and via Cedel, Clearstream and Euroclear Bank on D+2.

Other information :

- The Fund may invest in financial futures traded on French or foreign exchanges, or in forward financial instruments traded over-the-counter, according to the applicable laws, and within the limits described in "risk profile" provisions of this document.
- The Fund may enter into swap transactions and OTC transactions (CAP FLOOR, etc.).
- A maximum 10% of the Fund's assets will be invested in French or European UCITS and other investment Funds.
- This Fund may not be suitable for investors planning to withdraw their investment within three years.
- This Fund is an accumulation Fund.

• Risk and Reward Profile

Lower risk

Higher risk

Typically lower reward

Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- This synthetic risk and reward indicator is computed using a volatility that is consistent with the risk limit adopted by the UCITS.
- The risk limit adopted by the Fund is calculated using the probabilistic method (Value at Risk calculation) to calculate exposure to forward financial instruments. The Fund's Value at Risk (VaR) over a period of one month with a probability of 99% may not exceed 6%. This means that for a probability of 99%, the loss recorded over one month by a subscriber may not exceed 6%. Subscribers should note that this limit does not constitute a guarantee - it is merely an objective expressed in terms of probability.
- Historical data used to calculate this indicator may not be reliable indication for the future risk profile of the UCITS.
- Risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean « risk free ».
- The Fund's capital is not guaranteed.

Risk materially relevant to the Fund but not adequately captured by the indicator :

- **Market risk** : the investment process is essentially based on a statistical and quantitative analysis used to systematically generate buy and sell signals. The quality of the signals is assessed using simulations undertaken on historical data. Under no circumstances this is a guarantee of the Fund's future performance.
The Fund is a French Mutual Fund using derivatives products. Therefore, it bears the risks associated with these instruments, notably through volatility.
- The Fund also aims to generate performance by forecasting movements in certain markets in relation to others. The financial market movements may not correspond to the forecasts generated.
- **Credit risk** : The Fund is subject to a risk of default or of a downgrading of the issuers of financial instruments held in the portfolio, which could have a negative impact on the value of these instruments. This could lead to a corresponding fall in the Fund's net asset value.
- **Counterparty risk** : the counterparty risk is limited. The Fund may invest on international sovereign bond markets. In case of sovereign bonds, the counterparty risk does exist, but is very limited. Positions are also taken on futures markets. These markets are organized markets, in which the counterparty is a clearing house. The Fund may be exposed to counterparty risk due to the use of forward financial instruments or swaps concluded with a credit institution. The Fund would therefore be exposed to the risk that this institution may not honour its commitments under these instruments.

• Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Subscription charges	3,00%
Redemption charges	0,00%

This is the maximum that might be taken out of your money, before it is invested, and/or before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charges	1,50%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee :

Maximum 20% of the Fund's outperformance of the capitalized EONIA, deducted and calculated on an annual basis according to the High Water Mark principle. A provision for these fees is booked daily.

In the event of a negative performance the provision is reduced accordingly.

The **subscription** and **redemption charges** shown are maximum figures. In some cases you might pay less. You can find this out from your financial adviser.

The **ongoing charges** figure is based on expenses for the year ending, and can vary from year to year. It covers all the costs invoiced directly to the Fund.

It excludes:

- transaction fees. Transaction fees include intermediation costs (brokerage fees, stock exchange taxes, etc.) and an activity charge, where applicable, which may be charged by the custodian and management company in particular.
- performance fees
- portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units in another collective investment undertaking.

For more information concerning fees, charges and performances fee calculation methods, please refer to the prospectus, available on our website www.rivolifund.com

• Past performances

Past performance is not a reliable indicator of the future results. Performance may vary over time

These performances are computed after deducting all charges paid by the Fund.

Date of incorporation of Fund :
December 5th, 2001

Performance shown are calculated in Euro.

• Practical Information

Minimum subscription : 1 unit

Custodian, Institution responsible for the Fund's liabilities management and for centralising subscription/redemption orders : CACEIS Bank France

Administrative and accounting agent : CACEIS Bank..
