KEY RISKS ASSOCIATED WITH THIS FUND

- ICVC investments should generally be regarded as long-term investments and should normally be held for at least five years.
- There is no guarantee that the Fund will achieve its objective.
- This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.
- The Fund may use derivatives to reduce costs and/or the overall risk of the Fund (i.e. Efficient Portfolio Management (EPM)). Derivatives involve a level of risk, however, for EPM, they should not increase the overall riskiness of the Fund.
- The Fund may invest in emerging markets. These markets have additional risks due to less developed market practices.
- The Fund may invest in small companies which may be riskier and less liquid (i.e. harder to sell) than large companies. This means that their share prices may have greater fluctuations.
- The Fund takes its charges from the income of the Fund in the first instance. The impact of Fund charges may be material on the value of any income you receive from your investment. There is potential for capital erosion if insufficient income is generated by the Fund to cover these charges.
- A complete description of the risk factors is set out in the Prospectus in the section entitled "Risk Factors".

Before subscribing, investors should read the most recent Prospectus, financial reports and KIID for each fund in which they want to invest. Go to www.bnymellonim.com
