"A Class Accumulation Units", a unit class of Emerging Markets Equity Fund (the Fund), a sub-fund of Principal Global Investors Funds (the Trust) (ISIN: IE0002492894)

This Fund is managed by Principal Global Investors (Ireland) Limited (the Manager), part of The Principal Financial Group of companies

Objectives And Investment Policy

Investment Objective

The investment objective of the Fund is to seek capital growth over the medium to long term.

Investment Policy

The Fund invests principally in the equity securities of companies domiciled or with their core business in the world's emerging investment markets, which the Adviser believes are mispriced by the market and have the potential for significant growth.

Emerging markets include those countries identified as emerging markets by the International Finance Corporation, a division of the World Bank and other underdeveloped countries that the Adviser believes present attractive investment opportunities. Emerging markets include, but are not limited to, Argentina, Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Peru, Philippines, Poland, Portugal, Russia, Slovakia, South Africa, Taiwan, Thailand, Turkey and Venezuela.

While the Fund is primarily an emerging markets fund, the Fund may invest in securities issued in non-emerging markets. This includes where the Fund has invested in an emerging market but due to economic development, that market is no longer classified as an emerging market.

The Fund may also invest in a range of non-equity securities, including debt securities issued by companies in which the Fund can purchase equity securities, fixed interest and money market securities (such as government bonds and bank bills), and other collective investment schemes.

The Fund may also invest in real estate investment trusts (REITs) or other REIT-like structures which will be the equivalent of REITs. It may also invest in other Funds of the Unit Trust in order to obtain its objective.

The Fund may hold investments from time to time which are listed or traded in Russia.

You may buy or sell units on demand on each Dealing Day being a Business Day subject to the terms set out in the section entitled "Dealing Day of the Fund's supplement (which together with the prospectus constitutes the Prospectus).

The Fund will be managed without particular reference to a particular benchmark. The sub-investment adviser may make discretionary choices when deciding which investments should be held by the Fund subject to the Fund's objective and investment policy and restrictions.

Please see the section entitled Investment Objective, Policies, Strategy and Profile of a typical investor of the Prospectus where full details are disclosed.

Risk And Reward Profile

The Synthetic Risk and Rewards Indicator (SRRRI) identified by the above risk category shows where the Fund ranks in terms of potential risk and return. It is not a measure of the risk of capital loss but is based on the volatility of the returns (past performances). The lowest category does not mean a risk free investment.

If the Fund does not have a track record, the SRRRI has been calculated based on studies of how such investments have performed in the past and investors should note that historical data, such as is used for calculating this indicator, may not be a reliable indication of the future risk profile of this Fund.

The risk and reward category for this Fund is not guaranteed to remain unchanged, and may shift over time.

This Fund is ranked at 6 because funds of this type have experienced high rises and falls in value in the past.

The following are risks materially relevant that are not captured by the SRRRI:

- there are specific risks associated with the use of derivative instruments, including counterparty, position, liquidity, settlement, correlation and legal risk.
- there are specific risks associated with investments in emerging markets, including political, settlement, liquidity, currency, accounting standards and custodial/registration risk
- there may be corporate governance and investor protection issues associated with Russian investments
- the ability to trade REITs in the secondary market can be more limited than other stocks.

Further information may be found in the sections of the Prospectus and the Supplement entitled Risk Factors.

Any **entry** and **exit charges** shown are maximum figures, and in some cases investors may pay less. You can find out the actual charges from your financial adviser or distributor.

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.
