Barings Developed and Emerging Markets High Yield Bond Fund - Class A EUR Inc

ISIN: (IE0004851808) a sub fund of Baring Global Umbrella Fund

The Fund is a Unit Trust. Baring International Fund Managers (Ireland) Limited are the Managers of the Fund.

Objective & Investment Policy

Objective: To provide a high level of income.

Investment Policy: To invest in non investment grade bonds (which are loans that pay a rate of interest for a set period of time) issued by governments and companies of member states of the Organisation for Economic Co-operation and Development (OECD) and of any emerging market countries.

The bonds will be non investment grade securities (rated between BB + and B-) as determined by Standard & Poor's or another international ratings agency (or the manager where no agency rating is provided). Up to 10% of its value can be held in bonds rated lower than B-. Bonds are rated to indicate the probability that the issuer will repay the loan. Investment grade bonds are considered to have a lower risk of the issuer not repaying the loan.

The Fund may invest in derivatives (such as futures, options and swaps) which are linked to the rise and fall of other assets. The Fund may use these derivatives to generate additional capital or income for the Fund and also to protect against currency movements.

The Fund may invest in emerging markets (e.g. China, Hungary and Malaysia) which are countries whose economies are still developing.

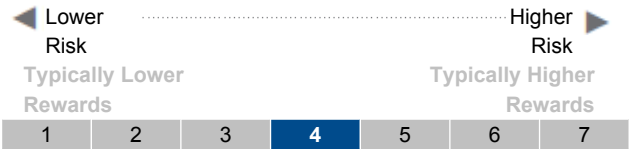

Distribution Policy: Any income generated will be automatically reinvested in more units of the same class unless payment is specifically requested.

Dealing Frequency: Normally 12 noon (Irish time) Monday to Friday unless it is an Irish or UK public holiday.

Minimum recommended holding term: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full details on the Objective, Investment Policy and the Distribution Policy please refer to the prospectus.

Risk and Reward Profile

The indicator above is not a measure of the risk of capital loss, but a measure of the Fund's price movement over time, the higher the number the greater the price movement both up and down. It is calculated using historical data and is not a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. The lowest category does not mean a risk-free investment. The Fund is classified in the category indicated above due to the nature of its investments which include the risks listed below. There is no capital guarantee. The value of investments and the income from them may go down as well as up and investors may not get back the amount they invest.

- Changes in exchange rates can have the effect of increasing or decreasing the value of the Fund and any income generated.
- There is no guarantee that a bond issuer will pay the interest due or repay the loan. Bond values are likely to fall if interest rates rise.
- Where a bond market has a low number of buyers and/or a high number of sellers, it may be harder to sell fund investments at an anticipated price or in a timely manner. This could have a negative impact on the value of your investment. In extreme conditions, this could affect the Fund's ability to meet investors' redemption requests.
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract will achieve its intended outcome. The use of derivatives can increase the amount by which the Fund's value rises and falls and could expose the Fund to losses that are significantly greater than the cost of the derivative as a relatively small movement may have a larger impact on derivatives than the underlying assets.
- Emerging market countries may have less developed regulation and face more political, economic or structural challenges than developed countries. This means your money is at greater risk.
- The fees and expenses are paid out of capital. This will constrain capital growth and may erode capital.
- Losses may occur if an organisation through which we buy an asset (such as a bank) fails to meet its obligations.
