Equity Emerging Markets Smart Volatility, a Sub-Fund of Eurizon Fund

Class Unit: **R (EUR Accumulation, ISIN: LU0090981274)**

This Sub-Fund is managed by Eurizon Capital S.A., a company of Intesa Sanpaolo Group

OBJECTIVES AND INVESTMENT POLICY

Objectives The Sub-Fund's Investment Manager, Eurizon Capital S.A., will seek to achieve over time a return in excess of the return of a portfolio of stocks listed on emerging markets through a quantitative investment approach aimed at providing a better risk adjusted return profile than the benchmark.

Benchmark MSCI Emerging Markets Index® (Net Total Return).
For designing portfolio and measuring performance.

Investment Policy This Sub-Fund's net assets are invested mainly in equity and equity-related instruments listed on the leading securities markets in the Emerging Countries or traded on another regulated market in these countries.

The Sub-Fund may invest in the Russian markets, Russian Trading System Stock Exchange (RTS Stock Exchange) and Moscow Interbank Currency Exchange (MICEX).

Investments are selected with the objective to build a diversified and risk balanced portfolio by generally overweighting stocks that are expected to deliver less volatile returns, and underweighting stocks that are expected to deliver more volatile returns.

On an ancillary basis, the Sub-Fund may hold any other instruments, such as but not limited to UCITS (up to 10%) and cash, including term deposits with credit institutions.

The Sub-Fund intends to invest a part of its net assets in A-shares dealt in on the Shanghai and Shenzhen stock exchanges, through the Hong Kong Stock Connect programs.

The Sub-Fund may use derivatives financial instruments aiming at hedging risks, ensuring efficient portfolio management and/or investing according to the Investment Policy. The use of derivatives financial instruments for investment purposes may amplify the up and down fluctuations of the Sub-Fund's Net Asset Value per Unit.

Strategy In actively managing the fund, the investment manager uses a quantitative approach to select securities that appear to have lower volatility. The majority of the fund's securities will be components of and may have similar weightings to the benchmark depending on market conditions. Quantitative deviation limitations underlying the investment approach will restrict the extent to which the performance of the fund may deviate from the benchmark. The fund's exposure to securities, and thus its performance, are likely to moderately differ from those of the benchmark.

Redemption You may sell your units on demand at any time. The redemption orders are executed on the basis of the Net Asset Value per Unit of the day when the request is received in Luxembourg before the dealing deadline. The Net Asset Value per Unit is calculated daily.

Distribution Policy This Unit Class is not distributing dividends. Income from investments is reinvested.
