

## KEY INVESTOR INFORMATION (KIID)

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Bond Corporate EUR Short Term, a Sub-Fund of Eurizon Fund

Class Unit: **R (EUR Accumulation, ISIN: LU0102684353)**

This Sub-Fund is managed by Eurizon Capital S.A., a company of Intesa Sanpaolo Group

### OBJECTIVES AND INVESTMENT POLICY

**Objectives** The Sub-Fund's Investment Manager, Eurizon Capital SGR S.p.A., will seek to achieve in the medium term an average return in excess of the return of a portfolio of short-term debt instruments denominated in Euro and issued by investment grade private companies represented by the benchmark.

**Benchmark** Bloomberg Barclays Euro Aggregate Corporate 1-3 Year Index®. *For designing portfolio and measuring performance.*

**Investment Policy** This Sub-Fund's net assets are invested mainly in high and medium quality ("investment grade") debt and debt-related instruments issued by private companies from any country and denominated in Euro.

The Sub-Fund may also invest up to 30% of its net assets in debt and debt-related instruments denominated in currencies other than Euro. If these currencies are non European currencies, then the currency risk will be hedged against Euro.

On an ancillary basis, the Sub-Fund may hold any other instruments, such as but not limited to UCITS (up to 10%), contingent convertible bonds (up to 10%) and cash, including term deposits with credit institutions.

The Sub-Fund may use derivatives financial instruments aiming at hedging risks, ensuring efficient portfolio management and/or

investing according to the Investment Policy. The use of derivatives financial instruments for investment purposes may amplify the up and down fluctuations of the Sub-Fund's Net Asset Value per Unit.

**Strategy** In actively managing the fund, the investment manager selects securities that appear to offer above average growth and income potential. The majority of the fund's securities will be components of and may have similar weightings to the benchmark depending on the investment manager's strategic or tactical views. Quantitative deviation limitations underlying the investment approach will restrict the extent to which the performance of the fund may deviate from the benchmark. The fund's exposure to securities, and thus its performance, are likely to slightly differ from those of the benchmark.

**Redemption** You may sell your units on demand at any time. The redemption orders are executed on the basis of the Net Asset Value per Unit of the day when the request is received in Luxembourg before the dealing deadline. The Net Asset Value per Unit is calculated daily.

**Distribution Policy** This Unit Class is not distributing dividends. Income from investments is reinvested.

### RISK AND REWARD PROFILE

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the sub-fund.
- The risk and reward category indicated is not guaranteed to remain unchanged and the categorisation may shift over time.
- The lowest category does not mean a risk free investment.

This Class of Unit is placed in the category 2 based on a simulated historical performance over the last five years.

This category reflects the exposure of the Sub-Fund to short-term fixed income instruments issued by investment grade companies.

Other materially relevant risks for this Sub-Fund that are not adequately captured in this synthetic indicator:

- counterparty risk: risk that a third-party with which the Sub-Fund entered into contracts in order to perform some operations may default on its obligations.
- credit risk: risk that the issuer of debt instruments fails to pay to the Sub-Fund interests and principal, even only in part.
- liquidity risk: risk that the sale of the financial instruments in which the Sub-Fund invests may be difficult depending on the features of these instruments themselves and/or on the market conditions when the sale is to be executed or on the lack of a sufficient number of potential buyers. The selling price may then be less than the value of a financial instrument.
