## General risks

- The value of the funds and the income from them is not guaranteed and may fall as well as rise. You may get back less than you originally invested.
- Past performance is not a guide to future performance.
- You should note that your tax treatment in relation to any investments held outside an ISA will depend on your individual circumstances and may be subject to change in the future. Governments may change the tax rules which affect you or the funds in which you have invested.

## What are the risks specific to this fund?

- Where the funds invest in assets (including cash) which are denominated in currencies other than the base currency (pounds sterling) then currency exchange rate movements may cause the value of investments to fall as well as rise.
- If a fund's management charge is taken from its capital, then this may allow more income to be paid, however, it may also restrict capital growth or even result in capital erosion over time.
- This fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this fund.

## Important information
