

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. This information is required by law to help you to understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Forintrenta

Sub-fund of KBC Renta

Capitalisation: LU0145230578 (ISIN-code for Capitalisation shares)

managed by KBC Asset Management S.A.

OBJECTIVES AND INVESTMENT POLICY

KBC Renta Forintrenta aims to generate a return by investing chiefly in securities denominated in Hungarian forint, preferably bonds issued by companies and/or governments.

Targeting emerging markets, the fund may invest 100% of its assets in bonds and debt instruments with an investment grade credit rating*, i.e. lower than BBB-/Baa3 (long term), A3/F3/P3 (short term) from Standard & Poor's or an equivalent rating from Moody's or Fitch.

The fund can invest a maximum 10% of its assets in bonds and debt instruments that have not received a rating from the aforementioned agencies.

If an investment in securities denominated in Hungarian forint seems inappropriate at a certain time, the fund can decide to invest temporarily in securities denominated in other currencies.

The fund's reference index is JP Morgan GBI Hungary Unhedged HUF.. The compartment has the objective of outperforming the reference index.

The sub-fund is actively managed and does not set out to track the benchmark index. The benchmark is used for measuring the fund's portfolio in terms of performance and composition. The majority of the fund's bond holdings will be components of the benchmark. The manager may use discretionary powers to invest in bonds not included in the benchmark index in order to benefit from the sub-fund's specific investment opportunities.

The sub-fund's investment policy restricts the extent to which the portfolio holdings may deviate from the benchmark. This deviation is measured by means of the tracking error, which indicates volatility in the performance difference between the sub-fund and its benchmark. The tracking error is set at 1.00 %. Investors should be aware that the actual tracking error may vary depending on market conditions. A fund that deviates less from the benchmark is less likely to outperform it.

The fund reinvests any income received in the manner set out in the prospectus (for more details, see section 6 of the prospectus).

Orders for fund units are executed daily (for more details see section 15.3,16,17 of the prospectus).

Investors may on request receive reimbursement of their UCITS units on any day (for more information, see section 17 of the prospectus).

RISK AND REWARD PROFILE

This figure is based on data from the past, which is not always a reliable indication of risk and return in the future.

The risk and reward indicator is assessed regularly and can therefore go up or down.

The lowest figure does not mean that the investment is entirely free of risk. However, it does indicate that, compared with the higher figures, this product will generally provide a lower, but more predictable return. While the figure gives an indication of the return the fund might generate, it also indicates the risk involved. The higher the figure, the greater the potential return, but also the more difficult it is to predict this return. You might even sustain a loss.

The figure has been calculated from the viewpoint of an investor in Hungarian forint.

Why does this fund have a risk and reward indicator of 3?

3 is typical for bond funds, which tend to have an indicator of 3 or 4. Bond funds are generally less sensitive to the markets than equity funds, which tend to have an indicator of 6 or even 7 in some cases. The value of bond funds is especially sensitive to changes in interest rates, since the interest on these bonds is fixed in advance and does not go up when market rates increase.

Moreover, an investment in this fund involves:

- A moderate level of inflation risk: there is no protection against an increase of the inflation.
- A high level of credit risk: a substantial part of the assets can be invested in bonds with a lower level of creditworthiness. Consequently there is a significant risk that an issuer can no longer meet its obligations. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- A high level of concentration risk: there is a concentration of investments in Hungary.

There is no capital protection.

CHARGES

These charges are used to cover, among other things, the management costs of the fund, including marketing and distribution expenses. They reduce the investment's ability to grow. You can find additional information on the charges in sections 15.2 and 17 of the prospectus and the information for this sub-fund in the prospectus.

One-off charges taken before or after you invest

Entry charge	2.50%	This is the <i>maximum</i> that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. In some cases you will pay less. For more information on the actual entry and exit charges, please contact your financial adviser or distributor.
Exit charge	1.000%	
Switching from one sub-fund to another		If you would like to exchange your units in this sub-fund* for units in another sub-fund, you will be charged a fee in certain cases (for more information, see section 16 of the prospectus).

Charges taken from the fund over a year

Ongoing charge	1.27%	The figure for the ongoing charge is based on the charges for the year ending on 30 September 2020. This figure does not include transaction charges, except if the fund pays entry or exit charges when units in other funds are bought or sold, and may change from year to year.
----------------	-------	---

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

PAST PERFORMANCE

Past performance should not be seen as a good indicator of future performance.

The calculation of past performance includes all charges and fees, except taxes and entry and exit charges.

Current benchmark composition: JP Morgan GBI Hungary Unhedged HUF

The Fund does not intend to track the Reference Benchmark.

Start year: 2003

Currency: Hungarian forint
