WHAT IS THIS PRODUCT?

This is a sub fund of Pictet (the "Fund") which is a mutual fund domiciled in Luxembourg and its home regulator is Commission de Surveillance du Secteur Financier (CSSF).

OBJECTIVES AND INVESTMENT STRATEGY

The sub fund aims to enable investors to benefit from growth in the European equities market by investing a minimum of two-thirds of its total assets in equities issued by companies that are headquartered in Europe or conduct the majority of their activity in Europe.

The sub fund's portfolio will be composed of a limited selection of securities that, in the opinion of the Managers, have the most favourable outlook. The sub fund will hold a diversified portfolio, generally composed of securities issued by listed companies. These securities may be ordinary or preference shares, convertible bonds and, to a lesser extent, warrants on transferable securities and options.

The sub fund may also invest in shares of companies that conduct activities in emerging or developing countries such as but not limited to Russia and Turkey. Emerging countries are defined as those considered, at the time of investing, as industrially developing countries by the International Monetary Fund, the World Bank, the International Finance Corporation (IFC) or one of the leading investment banks.

The sub fund may use financial derivative instruments (FDIs), such as convertible bonds, warrants, options or structured products primarily for efficient portfolio management and / or hedging purposes. However, the sub fund will not use FDIs extensively for investment purposes.

WHAT ARE THE KEY RISKS?

Investment involves risks. Please refer to the offering document for details including risk factors.

Equity Risk

- The equity markets may fluctuate significantly with prices rising and falling sharply, and this will have a direct impact on the sub fund's net asset value (NAV).

Risks associated with emerging markets

- The sub fund may have exposure to emerging markets (e.g. Russia and Turkey) which are generally considered to present a higher political risk. As a result, the sub fund's investments may be more volatile and/or less liquid.
- Because of relative lack of market regulations and the fact that laws on the ownership of securities may be vague and do not provide the same guarantees, the legal risks are generally considered to be higher than in more developed countries.

Currency Risk

- The sub fund may hold assets denominated in currencies other than its base currency. It may be affected by changes in exchange rates between the base currency and these other currencies or by changes to exchange control regulations. The conversion of the sub fund's assets from the denomination currency into the base currency is part of the sub fund's NAV calculation process. For instance, if the currency in which an asset is denominated depreciates against the sub fund's base currency, its equivalent value in the base currency will also depreciate.

Concentration Risk

- The sub fund may be more susceptible to any single economic, political or regulatory event than a diversified fund, because a relatively higher percentage of the sub fund's assets may be invested in the securities of a limited number of issuers and/or geographic zones (Europe in this case).

Investments into Europe

- As the sub fund's investments are concentrated in Europe, the sub fund may be more susceptible to fluctuations in value resulting from adverse conditions in the European region.

Risks relating to the use of FDIs

- The sub fund's use of FDIs may become ineffective in efficient portfolio management and / or hedging. The prices of FDIs (such as convertible bonds, warrants, options or structured products) can be volatile and the use of FDIs can entail various risks, including liquidity, legal and counterparty risks, especially when they are conducted over-the-counter. Also, the value of the FDIs may not correlate perfectly with the value of the underlying assets. As a result, the sub fund may suffer significant losses.

Investment Risk

- The sub fund's investment portfolio may fall in value and therefore your investment in the sub fund may suffer losses.

IS THERE ANY GUARANTEE?

This sub fund does not have any guarantees. You may not get back the full amount of money you invest.

WHAT ARE THE FEES AND CHARGES?
