Opportunities

- + High return potential of stocks in the long run
- + Investments specifically in the Asian-Pacific stock market
- + Particular potential of investments in developing countries
- + Currency gains against investor currency possible
- + Broad diversification across numerous securities
- + Possible extra returns through single security analysis and active management

Risks

- High volatility of stocks, losses possible. The volatility of fund unit prices may be strongly increased.
- Underperformance of the Asian-Pacific stock market possible
- Investments in developing countries subject to high risk of volatility and losses
- Currency losses against investor currency possible
- Limited participation in the yield potential of single securities
- Success of single security analysis and active management not guaranteed

FOR FUND DISTRIBUTORS AND PROFESSIONAL INVESTORS ONLY

¹ Calculated at the net asset value, excl. front-end load, distributions reinvested. Calculation according to method as defined by BVI, the German Fund Companies Association. Past performance is not a reliable indicator of future results. **Any front-end loads reduce the capital employed and the performance.**

² Measure of the proportion of fund assets that is invested differently from the benchmark.

³ The dividend yield corresponds to the expected dividend divided by the current price of the share, expressed as a percentage. (eDiv/share price) where: eDiv = product of the last dividend payment and the number of expected dividend payments per year (e.g. the expected dividend for a share with quarterly dividend payment corresponds to the dividend for the last quarter times four). The dividend yield depends both on the amount of the dividend and the current price of the share. Both these key variables may be subject to constant change. The dividend yield is only a snapshot based on the current amount of the dividend and the current share price; **as a result, it is not suitable as an indicator of the future performance of an equity fund.**

⁴ Any front-end load charged at the acquisition of the fund units may accrue in full to the sales partner. The exact amount shall be mentioned by the sales partner during the investment advice talks. This also applies to any trail fees paid by the Management Company to the sales partner from the management fee.

⁵ The administration fee applies a flat rate to certain fund expenses that have so far been charged separately to the Fund's assets and which are included in the TER.

⁶ TER (Total Expense Ratio): Total cost (except transaction costs) charged to the fund during the last financial year.

Data as per 28/06/2013, Source: Allianz Global Investors

Disclaimer

Investing involves risk. The value of an investment and the income from it may fall as well as rise and investors may not get back the full amount invested. Allianz Asia Pacific Equity is a sub-fund of Allianz Global Investors Fund SICAV, an open-ended investment company with variable share capital organised under the laws of Luxembourg. **The volatility of the fund unit prices may be strongly increased. Past performance is not a reliable indicator of future results. If the currency in which the past performance is displayed differs from the currency of the country in which the investor resides, then the investor should be aware that due to the exchange rate fluctuations the performance shown may be higher or lower if converted into the investor's local currency.** This is for information only and not to be construed as a solicitation or an invitation to make an offer, to conclude a contract, or to buy or sell any securities.
