This Product Highlights Sheet ("PHS") is an important document.

- It highlights the key terms and risks of this investment product and complements the prospectus of the Fund dated 2 July 2013 (the "<u>Prospectus</u>")¹.
- It is important to read the Prospectus before deciding whether to purchase units in the Fund. If you do not have a copy, please contact us to ask for one.
- You should not invest in the Fund if you do not understand it or are not comfortable with the accompanying risks.
- If you wish to purchase the units in the Fund, you will need to make an application in the manner set out in the Prospectus. Units of the Fund can also be purchased or traded on the SGX-ST as set out in the Prospectus.

Lyxor UCITS ETF China Enterprise (HSCEI) (the "Fund")

- for the minimum recommended investment period of more than five years;
 which has a high equity risk profile and exposure to, *inter alia*, market risks linked to
- movements (including declines) in the Benchmark Index;
- which net asset value ("<u>NAV</u>") may have a high volatility due to the potential volatility of the Benchmark Index; and
- which will invest in financial derivative instruments such as swap transactions for investment, hedging and/or efficient portfolio management. Prospectus for further information.

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

are able and willing to invest in a product:

- You are investing in Class USD units (the "<u>Units</u>") of the Fund, which is an exchange traded fund constituted in France and is an Undertaking for Collective Investments in Transferable Securities ("<u>UCITS</u>") Part IV scheme that aims to track the Benchmark Index by using a synthetic replication strategy (please see the "Investment Strategy" section below for further details).
- The Benchmark Index is calculated and published by the Hang Seng Indexes Company Limited. It consists of the main Chinese securities known as "H-shares". The Benchmark Index is a net total return index (which means that the withholding tax applicable to the dividends is taken into account in the index methodology) based on the weighting of each security according to its stock market capitalisation. Each security's influence on the benchmark index is therefore proportional to its stock market capitalisation.
- The Manager reserves the discretion to pay out income distributions to the unitholders. There can be no assurance that the Manager will declare dividends or make distributions.

	T

	the Prospectus for further
	information.
Market and Credit Risks	
• Market prices for the Units may be different from their NAV	
o Units are transacted on the SGX-ST on a willing-buyer-willing-seller basis at market	
prices throughout the trading day.	
• The price of any Units traded on the SGX-ST will depend, amongst other things, on	
market supply and demand, movements in the value of the Benchmark Index, prevailing financial market, corporate, economic and political conditions.	
 As market prices of Units may sometimes trade above or below the NAV of the Fund, 	
there is a risk that Holders may not be able to buy or sell at a price close to the NAV.	
• You are exposed to risk linked to the country in which the Fund invests or is	
exposed to	
o Investment of the Fund in China or its exposure to this market means that the net asset	
value of the Fund and its trading prices will be affected by movements or downturns in	
this market.	
• The Fund's exposure to the China market (which is an emerging market) may also entail	
a greater risk of potential loss than investments or exposure to developed markets.	
Liquidity Risks	
 Units can be redeemed at NAV only through Participating Dealers Investors who wish to redeem their Units at NAV must approach a Participating Dealer to 	
apply to the Manager to redeem the Units on their behalf. If they approach a broker or	
dealer who is not a Participating Dealer, that broker or dealer will have to place	
redemption orders through a Participating Dealer. In such a case there may be additional	
charges to such investor.	
Redemptions are subject to a minimum amount	
• There is a minimum amount of EUR 100,000 for redemption of Units in cash being	
imposed by the Fund on a Participating Dealer.	
The secondary market may be illiquid	
• You can sell your Units on the SGX-ST. However, you may not be able to find a buyer on	
the SGX-ST when you wish to sell your Units. While the Fund intends to appoint at least	
one market maker to assist in creating liquidity for investors, liquidity is not guaranteed	
 and trading of Units on the SGX-ST may be suspended in various situations. If the Units are delisted from the SGX-ST or if the CDP is no longer able to act as the 	
depository for the Units listed on the SGX-ST, the Units in the investors' securities	
accounts with the CDP or held by the CDP may be repurchased (compulsorily or	
otherwise) by the designated Market Maker or otherwise at a price calculated by	
reference to the NAV of the Fund calculated as of a certain number of day(s) following	
the last trading day of the Fund on the SGX-ST (or such other day as may be determined	
by the Manager in consultation with the SGX-ST and/or the CDP).	
Product-Specific Risks	T
• You are exposed to counterparty risk related to the swap agreements entered into by	
the Fund and risks relating to swap agreements	
• The Fund currently enters into swap agreements with a swap counterparty. There is a	
risk that the swap counterparty may default on its obligations under the swap agreements which may cause the Fund to incur significant losses. However the Fund is subject to a	
maximum single counterparty risk exposure of 10% of its NAV under the UCITS directive.	
• If the swap counterparty defaults on its obligations, the NAV of the Fund may be	
adversely affected by fluctuations in the Basket of Balance Sheet Assets (which may not	
comprise shares that make up the Index) during the period where an alternative swap	
counterparty is being sought for the Fund. There is also a possibility that the swap	
transactions may be terminated under certain circumstances.	
You are exposed to foreign exchange risk and currency risk	
o Currency risk related to the Fund and Benchmark Index: The NAV of the Fund could	
decrease while the value of the Benchmark Index increases due to exchange rate	
fluctuations in the Hong Kong dollar (being the currency of the Benchmark Index) and the	
USD (being the currency in which the NAV of the Units is denominated and the SGX-ST	
listing currency of the Units).	
 If your functional currency is in SGD, you will be exposed to further foreign exchange risks on your investment in the Fund. 	
• The Fund, Manager, Depository and the current swap counterparty are not
