# AXA World Funds - Euro Credit Plus

A Sub-Fund of AXA World Funds SICAV
Share class: AXA World Funds - Euro Credit Plus E Capitalisation EUR (ISIN : LU0189846529)
*This Sub-Fund is managed by AXA Funds Management S.A., part of the AXA IM Group*

## Objective and Investment Policy

### Investment Objective

The Sub-Fund seeks to achieve a mix of income and capital growth by investing mainly in investment grade and high yield debt securities in Euros, over a medium term period.

### Investment Policy

The Sub-Fund is actively managed in order to capture opportunities in the Euro investment grade and high yield market. The following investment decisions are undertaken after comprehensive macroeconomic and microeconomic analysis of the market:
- sector allocation
- geographical allocation
- credit curve positioning (the credit curve illustrates the relationship between investment term and credit yield)
- issuer selection
- instrument selection

The Sub-Fund invests:
- at least two thirds of its total assets in Euro denominated corporate and government bonds issued in OECD countries, with 30% maximum of its total assets rated between BB+ and B- by Standard & Poor's or equivalent rating by Moody's or Fitch (the arithmetic average of available ratings from Standard & Poor's, Moody's and Fitch will be considered). In case of downgrade below B- by Standard & Poor's or equivalent rating by Moody's or Fitch (the lowest rating will be considered), securities will be sold within 6 months
- up to one third of its total assets in money market instruments
- up to one quarter of its total assets in convertible securities
- up to one tenth of its total assets in equity and equity related instruments

The Sub-Fund will not invest in securities rated CCC+ or below by Standard & Poor's or equivalent rating by Moody's or Fitch (the lowest rating will be considered).
The selection of credit instruments is not exclusively and mechanically based on their publicly available credit ratings but also on an internal credit or market risk analysis. The decision to buy or sell assets is also based on other analysis criteria of the Investment Manager.
The Sub-Fund may invest up to 10% of net assets in contingent convertible bonds (CoCos).
Within the limit of 200% of the Sub-Fund's net assets, the investment strategy may be achieved by direct investments and/or through derivatives, especially by entering into Credit Default Swaps. Derivatives may also be used for hedging purposes.
