## General risks

- The value of the funds and the income from them is not guaranteed and may fall as well as rise. You may get back less than you originally invested.
- Past performance is not a guide to future performance.

## What are the risks specific to this fund?

- The performance of the value of the Company and its funds is primarily a comparison of the net asset values per Share at the beginning and the end of a particular period of time. Hence, an investor in order to assess the actual performance of his investment in the Company must deduct from the performance declared at a certain time any subscription fee paid by him when making his investment in the Company.
- The value of an investment in the Company will be affected by fluctuations in the value of the currency of denomination of the relevant fund's Shares against the value of the currency of denomination of that fund's underlying investments. Adverse fluctuations in currency exchange rates can result in a decrease in return and in a loss of capital.
- The Horizon Pan European Equity Fund may use techniques and instruments for hedging purposes only to protect portfolios against currency fluctuation, market movements and interest rate risks. The use of any of these derivative instruments will not reach a volume which could endanger the spirit of the investment policy.
- Investors should note that in certain market conditions, securities held by the Horizon Pan European Equity Fund may not be as liquid as they would be in normal circumstances. If a security cannot be sold in a timely manner then it may be harder to attain a reasonable price and there is a risk that the price at which the security is valued may not be realisable in the event of sale. The Horizon Pan European Equity Fund may therefore be unable to readily sell such securities.
- This fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this fund.
