The Fund is managed by Pictet Asset Management (Europe) S.A. (the "Management Company"), part of the Pictet group

Objectives and investment policy

OBJECTIVE

To increase the value of your investment.

PORTFOLIO ASSETS

The Compartment gains exposure to a broad range of alternative investment strategies, such as long/short equity, market neutral and fixed income arbitrage, by investing in hedge funds that have relatively low volatility. Underlying assets can be of any country, sector and currency. Investments in other funds may incur a duplication of certain fees.

DERIVATIVES AND STRUCTURED PRODUCTS

The Compartment may also use derivatives to reduce various risks (hedging) and for efficient portfolio management, and may use derivatives and structured products to gain exposure to portfolio assets.

INVESTMENT PROCESS

In actively managing the Compartment, the investment manager uses a combination of market analysis and research to build a multi-strategy portfolio that it believes offers an optimal, risk-adjusted return. It focuses on selecting strategies that have low correlation with each other as well as to traditional asset classes. It methodically exercises voting rights and may engage with the funds' managers in order to positively influence environmental, social, and governance (ESG) practices. The investment manager may invest in funds with any ESG profile.

Terms to understand

Derivatives Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

Fixed income arbitrage A strategy that seeks to exploit inefficiencies in the pricing of bonds.

Long/short strategies Strategies that use both long and short positions. A long position (such as ownership) benefits from a rise in a security's value, a short position benefits from a decline in value.

Market neutral strategies Strategies that seek to capture only the underlying performance of a given set of investments by netting out the effects of overall market performance.

Structured products Securities similar to derivatives, but with defined risk or performance characteristics.

Other characteristics

Designed for Investors who understand the risks of this compartment and plan to invest for 4 years or more. This is an accumulation share class, meaning any income earned is retained in the share price. It is also a hedged share class, which means that it is designed to reduce, but not cancel out, the currency risk between the Compartment currency and the Share Class currency. Orders to buy, switch or redeem shares are ordinarily processed every month.

Risk and reward profile

The Share Class is assigned to this risk category because of the price variations resulting from its currency and the nature of the Fund's investments and strategy. The risk category shown is based on historical data and may not be a reliable indication for the future risk profile of the Share Class. It is not a target or a guarantee and may change over time. The lowest category does not mean a risk-free investment. The Fund offers no capital guarantee or asset protection measures. The Fund may be exposed to the following risks which are not adequately captured by the synthetic risk indicator and may negatively impact its value:

- **Financial Derivatives risk:** the leverage resulting from derivatives amplifies losses in certain market conditions.
- **Liquidity risk:** markets with low volumes result in difficulties valuing and/or trading some assets.
- **Counterparty risk:** losses occur when a counterparty does not honour its obligations related to contracts such as over-the-counter derivatives.
- **Operational risk:** losses resulting from human errors, system failures, incorrect valuation and safekeeping of assets.
- **Sustainability risk:** ESG related risk events or conditions could cause a material negative impact on the value of the investment if they were to occur.

Further information can be found in the prospectus.

Charges

The charges you pay are used to cover the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The **entry, conversion and exit charges** shown are maximum figures. In some cases you may pay less. You can find this out from your financial adviser or fund distributor.

The **ongoing charges** figure is based on expenses for the period ending on 31 December 2021. This figure may vary from year to year. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment undertaking.

For more information on charges, please refer to the "Fund Expenses" section of the Fund's prospectus available on assetmanagement.pictet
