General information	2
Annual report Deutsche Multi Opportunities (formerly: DWS Multi Opportunities)	4
Annual financial statements Investment portfolio and statement of income and expenses	8
Supplementary information Remuneration Disclosure	20
Information pursuant to Regulation (EU) 2015/2365	22
Report of the Réviseur d'Entreprises	28

General information

The fund described in this report is subject to the laws of Luxembourg.

Performance

The investment return, or performance, of a mutual fund investment is measured by the change in value of the fund's units. The net asset values per unit (= redemption prices) with the addition of intervening distributions which are, for example, reinvested free of charge within the scope of investment accounts at Deutsche Asset Management S.A., are used as the basis for calculating the value. Past performance is not a guide to future results.

The corresponding benchmark – if available – is also presented in the report. All financial data in this publication is as of December 31, 2016 (unless otherwise stated).

Sales prospectuses

Fund units are purchased on the basis of the current sales prospectus and management regulations as well as the key investor information document, in combination with the latest audited annual report and any semiannual report that is more recent than the latest annual report.

Issue and redemption prices

The current issue and redemption prices and all other information for unitholders may be requested at any time at the registered office of the Management Company and from the paying agents. In addition, the issue and redemption prices are published in every country of distribution through appropriate media (such as the Internet, electronic information systems, newspapers, etc.).

The following companies were renamed on March 17, 2016:

Deutsche Asset & Wealth Management Investment GmbH became Deutsche Asset Management Investment GmbH Deutsche Asset & Wealth Management International GmbH became Deutsche Asset Management International GmbH Deutsche Asset & Wealth Management Investment S.A. became Deutsche Asset Management S.A.

Renaming

The fund DWS Multi Opportunities was renamed Deutsche Multi Opportunities effective April 29, 2016.

(formerly: DWS Multi Opportunities)

Investment objective and performance in the reporting period

As a dynamic, multi-asset product, Deutsche Multi Opportunities (formerly: DWS Multi Opportunities) seeks to achieve the highest possible appreciation of capital in euro. In order to achieve this, the fund invests at least 51% of its assets in units in domestic and foreign equity funds, mixed securities funds, fixed-income securities funds, and nearmoney market securities funds. Moreover, the net assets of the fund may also be invested, inter alia, in equities, interest-bearing securities, equity certificates, convertible bonds, convertible debentures and warrant-linked bonds whose underlying warrants are on securities, warrants on securities, as well as in participation and dividendright certificates.

In the reporting period from the beginning of January 2016 through the end of December 2016, Deutsche Multi Opportunities operated in an environment that was characterized by low interest rates and pronounced volatility in the capital markets and recorded an appreciation of 6.3% per unit (LD unit class, BVI method), thus placing it ahead of its benchmark (+4.5%, both percentages in euro terms). The fund's outperformance of its benchmark is largely explained by the overweighting of high-yield bonds and by the investments in European equities in conjunction with a hedging of the British pound.

DEUTSCHE MULTI OPPORTUNITIES Performance since inception

"BVI method" performance, i.e., excluding the initial sales charge. Past performance is no guide to future results.

As of: December 31, 2016

Deutsche Multi Opportunities Performance of unit classes vs. benchmark (in euro)									
Unit class	ISIN	1 year	3 years	5 years					
Class LD	LU0989117667	6.3%	20.8%	22.7%1

Class NC	LU0989130413	5.9%	19.1%¹	-					
40% REXP, 25% N 25% MSCI World, 10% Euribor3M	• •	4.5%	21.2%	46.5%					

¹⁾ Class LD launched on December 17, 2013 / Class NC launched on January 13, 2014

Investment policy in the reporting period

On the equities side, the portfolio management mainly invested in stocks of companies from the industrial countries, especially from Europe and the United States. In terms of sector allocation, the equity portfolio was essentially broadly diversified. With this orientation, the fund participated in an overall positive performance of the equity markets. The strongly weighted European stocks in the portfolio profited especially from a continuation of the extremely expansionary monetary policy on the part of the European Central Bank (ECB)

and solid economic performance. However, the Brexit vote in the United Kingdom as well as concerns regarding the stability of the European banking sector adversely affected prices at times. In addition, the slowdown in economic growth in China temporarily put pressure on prices in the international equity markets. This was also true for U.S. equities, which, however, were also able to record a solid price development in light of robust economic performance in the United States and, after the presidential election, profited in particular from the anticipated positive

[&]quot;BVI method" performance, i.e., excluding the initial sales charge. Past performance is no guide to future results.

As of: December 31, 2016

effects of the announced tax reduction and economic stimulus programs. The investments in the commodity and energy sectors, which benefited from a rise in commodity prices, also made a significantly positive contribution to the performance of Deutsche Multi Opportunities. Due to its hedging of the British pound, which had devalued noticeably against the euro, the fund was also able to participate in a price rise for the UK equities held in the portfolio (particularly exporting pharmaceutical companies). These profited from an expected increase in sales as a result of the weaker currency. In contrast, the early exposure to European banks had a dampening effect on performance against the backdrop of the low interest rate environment and emerging concerns about the European banking sector.

In the area of bond investments, the fund had a global orientation in the reporting period. In terms of the issuer structure, the portfolio management invested, inter alia, in corporate bonds and high-yield bonds from the industrial countries as well as in bonds from the emerging markets. The fund thus participated in the volatile but overall favorable performance of these bond investments, accompanied by further declines in yields to, in some cases, already historically low yield levels. Against the backdrop of the recovery in commodity prices and greater interest from investors in higher-yielding bonds, the positions

in high-yield bonds from the energy and commodity sectors made a positive contribution to fund performance, especially in the first quarter of 2016. In addition, the shortening of the duration on the bond side proved advantageous, especially toward the end of the reporting period. However, the emerging market bonds in local currency that were held in the portfolio turned in a belowaverage performance, as these were noticeably impacted by the outcome of the U.S. presidential election.

Composition of the reference portfolio (according to CSSF circular 11/512)

50% MSCI - Europe Ex Uk, 50% MSCI World

Market risk exposure (value-at-risk) (according to CSSF circular 11/512)

Lowest market risk exposure	%	26.714
Highest market risk exposure	%	55.388
Average market risk exposure	%	39.368

The values-at-risk were calculated for the period from January 1, 2016, through December 31, 2016, using the VaR method of historical simulation with a 99% confidence level, a 10-day holding period and an effective historical observation period of one year. The risk in a reference portfolio that does not contain derivatives is used as the measurement benchmark. Market risk is the risk to the fund's assets arising from an unfavorable change in market prices. The Company determines the potential market risk by means of the <u>relative value-at-risk</u> <u>approach</u> as defined in CSSF circular 11/512.

In the reporting period, the average leverage effect from the use of derivatives was 0.5, whereby the total of the nominal amounts of the derivatives in relation to the fund's assets was used for the calculation (sum-of-notional approach).

The gross exposure generated via derivatives pursuant to point 40 a) of the "Guidelines on ETFs and other UCITS issues" of the European Securities and Markets Authority (ESMA) totaled EUR 1,361,931,320.51 as of the reporting date.

Notes on valuation

The Management Company determines the net asset values per unit and performs the valuation of the assets of the fund. The basic provision of price data and price validation are performed in accordance with the method introduced by the Management Company on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the fund prospectus.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between State Street Bank Luxembourg as external price service provider and the Management Company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Investments reported in this report are not valued at derived market values.

The management fee/all-in fee rates in effect as of the reporting date for the investment fund units held in the securities portfolio are shown in parentheses. A plus sign means that a performance-based fee may also be charged. As the fund held units of other investment funds (target funds) in the reporting period, further costs, charges and fees may have been incurred at the level of these individual target funds. No initial sales charges or redemption fees were paid in the reporting period.

Footnotes

- Does not include positions with a negative balance, if such exist.
- These securities are completely or partly lent as securities loans.

Transactions completed during the reporting period that no longer appear in the investment portfolio

Net change in unrealized appreciation	EUR EUR EUR EUR	31 540 351.79 228 704 548.99 -218 184 941.07 10 519 607.92 42 059 959.71 59 238 915.81					

Note: the net change in unrealized appreciation (depreciation) is calculated by subtracting the total of all unrealized appreciation (depreciation) at the end of the fiscal year from the total of all appreciation (depreciation) at the beginning of the fiscal year. Total unrealized appreciation (depreciation) includes positive (negative) differences resulting from the comparison of the values recognized for the individual assets as of the reporting date with their respective acquisition costs.

Unrealized appreciation/depreciation is shown without income adjustment.

Total expense ratio / Transaction costs

BVI total expense ratio (TER)

The total expense ratio(s) for the unit class(es) was/were:

Class FC 0.71% p.a., Class LD 1.32% p.a., Class NC 1.72% p.a.

The TER expresses total expenses and fees (excluding transaction costs) as a percentage of the fund's average net assets for a given fiscal year.

As well, the additional income from securities lending resulted in a performance-based fee of

Class FC 0.016%, Class LD 0.016%, Class NC 0.016%

of the average net asset value of the respective unit class.

The fund invested more than 20% of its assets in target funds. Further costs, charges and fees were incurred at the level of the target funds. If the target funds publish a TER themselves, this will be taken into account at fund level (synthetic TER) in accordance with the CSSF circular 03/122 of the Luxembourg supervisory authority. If a TER is not published at target fund level, the all-in fee/management fee is used for the calculation. The synthetic TER was:

Class FC 0.99%, Class LD 1.60%, Class NC 2.00%.

Transaction costs

The transaction costs paid in the reporting period amounted to EUR 3,940,902.56.

The transaction costs include all costs that were reported or settled separately for the account of the fund in the reporting period and are directly connected to the purchase or sale of assets. Any financial transaction taxes which may have been paid are included in the calculation.

Transactions processed for the account of the fund's assets via closely related companies (based on major holdings of the Deutsche Bank Group)

The share of transactions conducted for the account of the investment fund's assets via brokers that are closely related companies and persons (share of 5% and above), amounted to 18.29% of all transactions. The total volume was EUR 836,514,385.23.

^{*} Additional information is provided in the sales prospectus.

Supplementary information

Remuneration Disclosure

The Deutsche Asset Management S.A. ("the Company") is a subsidiary in Deutsche Bank Group ("Deutsche Bank"). The businesses of Deutsche Bank encompass a wide range of products and services incorporating investment, corporate and retail banking as well as asset management in all regions across the world. The institution at the highest level of consolidation of Deutsche Bank Group is Deutsche Bank AG.

Deutsche Bank AG is subject to the EU's Capital Requirements Directive (CRD) and the Capital Requirements Regulation (CRR) as a credit institution and is supervised by the European Central Bank (ECB). Deutsche Bank AG has established a compensation framework applying to the whole Deutsche Bank Group (excluding Postbank), which therefore also applies to the Company. For further information on the remuneration system of Deutsche Bank Group as provided below, please refer to the Deutsche Bank Group Compensation Report, which is part of the Financial Report.¹⁾

Governance Structure

Deutsche Bank AG is managed by its Management Board. It is overseen by the Supervisory Board which has established a Compensation Control Committee (CCC). The CCC is, inter alia, responsible for monitoring the compensation system of the Group's employees and its appropriateness. The Management Board of Deutsche Bank AG has established the Senior Executive Compensation Committee (SECC) which has the mandate to develop sustainable compensation principles, to prepare recommendations on Total Compensation levels and to ensure appropriate compensation governance and oversight. Furthermore, a Compensation Officer for Deutsche Bank Group was appointed who independently monitors the appropriateness of the employee's compensation systems on a regular basis.

The annual central and independent internal review of the remuneration system concluded its design to be appropriate and no significant irregularities were recognized.

Compensation Structure

The employees of Deutsche Bank Group and of the Company are subject to the compensation standards and principles as outlined in the Group Compensation Strategy and the Compensation Policy. Both policies are reviewed on an annual basis. As part of the Compensation Strategy, Deutsche Bank Group, including the Company, employs a Total Compensation philosophy, which comprises Fixed Pay and Variable Compensation.

In 2016, Deutsche Bank introduced a new compensation framework to align employee compensation even more closely with Deutsche Bank's strategic and business objectives, while reducing complexity at the same time. The new compensation framework also puts a stronger emphasis on Fixed Pay over Variable Compensation and aims to ensure that these components are appropriately balanced.

Fixed Pay is used to compensate employees for their skills, experience and competencies, commensurate with the requirements, size and scope of their role. The appropriate level of Fixed Pay is determined with reference to the prevailing market rates for each role, internal comparisons and applicable regulatory requirements.

Variable Compensation has the advantage of being able to differentiate between individual performance and drive behaviour through appropriate incentive systems that can positively influence culture. It also allows for flexibility in the cost base. Under the new compensation framework, Variable Compensation generally consists of two elements – the "Group Component" and the "Individual Component".

In particular, one of the overarching goals of the new compensation framework is to strengthen the link between Variable Compensation and the performance of the Group. To that end, it was decided to align the "Group Component" directly and comprehensible for the employees to Deutsche Bank's achievements in reaching its strategic targets. To assess progress towards the strategic aspirations, the Management Board of Deutsche Bank AG has decided to utilise four Key Performance Indicators (KPIs) that are significant metrics for the capital, risk, cost and revenue profile: Common EquityTier 1 (CET1) capital ratio (fully loaded), Leverage ratio, Adjusted cost base (without Postbank and Non-Core Operations Unit) and Post-tax return on tangible equity (ROTE).

Depending on eligibility, the "Individual Component" is delivered either in the form of Individual Variable Compensation or a Recognition Award. Whereas the "Group Component" links to Group performance, Individual Variable Compensation takes into consideration a number of financial and non-financial factors. These include the applicable divisional performance, the employee's individual performance and conduct, relativities within the employee's peer group and retention considerations. The Recognition Award program is targeted at non-tariff employees at the lower hierarchy levels. It provides the opportunity to acknowledge and reward outstanding contributions made by the target population in a transparent and timely manner. Generally, there are two nomination cycles per year.

Under the new compensation framework, there continues to be no guarantee of Variable Compensation in an existing employment relationship.

Compensation for 2016

Deutsche Bank has a robust methodology in place, aimed at ensuring that the determination of Variable Compensation reflects the risk-adjusted performance as well as the capital position of Deutsche Bank and its divisions. The total amount of Variable Compensation is primarily driven by (i) Group affordability (i.e. what "can Deutsche Bank award in alignment with regulatory requirements) and (ii) Group strategy (what "should" Deutsche Bank award in order to provide an appropriate compensation while protecting the long-term health of the franchise).

For 2016, the Management Board of Deutsche Bank AG decided to only award a limited pool of Variable Compensation given the operating environment. Specifically, the Management Board decided that Deutsche Bank's senior employees (Corporate Titles 'Vice President', 'Director' and 'Managing Director') would only receive a "Group Component" but no "Individual Component". For 2016, the Management Board of Deutsche Bank AG determined a target achievement rate of 50 % with regard to KPIs of the "Group Component".

Identification of Material Risk Takers

In accordance with the Law as of 17 December 2010 on Undertakings for Collective Investments (as subsequently amended) in conjunction with the guidelines on sound remuneration policies under UCITS published by the European Securities and Markets Authority (ESMA), the Company has identified individuals who have a material impact of the Company's risk profile (Material Risk Takers). At least 40 % of the Variable Compensation for Material Risk Takers is deferred. Additionally, at least 50 % of both, the upfront and the deferred provision which ensure an appropriate expost risk adjustment. In case the Variable Compensation is lower than EUR 50,000, the Material Risk Takers receive their entire Variable Compensation in cash without any deferral.

Aggregate Compensation Information for the Company for 2016

Number of employees on an annual average	136
Total Compensation	EUR 10,375,011
Fixed Pay	EUR 10,017,020
Variable Compensation	EUR 357,991
Total Compensation for Senior Management ¹⁾	EUR 894,775
Total Compensation for other Material Risk Takers ²⁾	EUR 0
Total Compensation for Control Function employees ³⁾	EUR 223,641

¹⁾ Senior Management refers to the Members of the Management Board of the Company. In case that Members of Senior Management receive their compensation completely or partly from other companies in the Deutsche Bank Group, such compensation is included in the amount of Total Compensation. The above mentioned amount includes EUR 272,417 which was paid by other companies of Deutsche Bank Group. Members of the Management Board meet the definition of managers, too. Apart from the Members of Senior Management, no further managers have been identified.

managers have been identified.

²⁾ Apart from the Members of the Senior Management, no further Material Risk Takers and / or individuals in the same remuneration bracket have been identified.

In case that Control Function employees receive their compensation completely or partly from other companies in the Deutsche Bank Group, such compensation is included in the amount of Total Compensation. The above mentioned amount includes EUR 17,876 which was paid by other companies of Deutsche Bank Group.

To the unitholders of Deutsche Multi Opportunities (formerly: DWS Multi Opportunities) 2, Boulevard Konrad Adenauer 1115 Luxembourg, Luxembourg

REPORT OF THE RÉVISEUR D'ENTREPRISES AGRÉÉ

We have audited the accompanying financial statements of Deutsche Multi Opportunities (formerly: DWS Multi Opportunities), which comprise the statement of net assets, the statement of investments in the securities portfolio and other net assets as of December 31, 2016, the statement of income and expenses and the statement of changes in net assets for the fiscal year then ended, as well as a summary of significant accounting policies and other explanatory notes to the financial statements.

Responsibility of the Management Board of the Management Company for the financial statements

The Management Board of the Management Company is responsible for the preparation and proper overall presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation of financial statements and for the internal controls considered necessary to enable the financial statements to be prepared such that they are free from material misstatement, irrespective of whether this is due to fraud or error.

Responsibility of the Réviseur d'Entreprises agréé

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing as adopted by the Commission de Surveillance du Secteur Financier for Luxembourg. Those standards require that we comply with professional conduct requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing audit procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the judgment of the Réviseur d'Entreprises agréé, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the Réviseur d'Entreprises agréé considers internal control relevant to the entity's preparation and proper overall presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of evaluating the effectiveness of the entity's internal control.

An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Management Board of the Management Company, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Audit opinion

In our opinion, the financial statements give a true and fair view of the financial position of Deutsche Multi Opportunities (formerly: DWS Multi Opportunities) as of December 31, 2016, and of the results of its operations and changes in its net assets for the fiscal year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation of financial statements.

Other information

The Management Board of the Management Company is responsible for the other information. The other information comprises the information that is contained in the annual report but excluding the financial statements and our Report of the Réviseur d'Entreprises agréé on these financial statements.

Our audit opinion on the financial statements does not cover the other information and we do not provide assurances of any kind in relation to this information.

In connection with the audit of the financial statements, it is our responsibility to read the other information and to assess whether there is a material discrepancy between this information and the annual financial statements or the findings obtained during the audit or also whether the other information appears to be materially misrepresented in some other way. If, based on the work that we carry out, we draw the conclusion that the other information contains material misstatements, we are obliged to report this matter. We have nothing to report in this regard.
