These financial ratios refer to the average of the equity holdings contained in the fund's portfolio and in the benchmark (if mentioned) respectively.

Investment Objective and Policy

To provide capital growth primarily through investment in equity securities of US large cap companies. Large cap companies are companies which, at the time of purchase, are considered to form the top 85% by market capitalisation of the US market.

Risk Considerations

The capital is not guaranteed. Investments denominated in a currency other than that of the share-class may not be hedged. The market movements between those currencies will impact the share-class. The fund will not hedge its market risk in a down cycle. The value of the fund will move similarly to the markets.

Benchmark	30.5	27.5	11.1	5.3	21.0

Performance over 5 years (%)

Past performance is not a reliable indicator of future results, prices of shares and the income from them may fall as well as rise and investors may not get back the amount originally invested.

All fund performance data are on a NAV to NAV basis, net income reinvested. Data is not available for the time periods with no % growth stated. In case a share class is created after the fund's launch date, a simulated past performance is used, based upon the performance of an existing share class within the fund, taking into account the difference in the ongoing charges and the portfolio transaction costs, and including the impact of any performance fees if applicable.

The fund performance is compared to the previous day's benchmark performance due to valuation time differences.
