

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

DB Platinum Commodity Euro

Share Class: R1C-A (ISIN: LU0229883953), (WKN: A0HMMV), (Currency: EUR)

a sub fund of DB Platinum. The Fund is managed by DWS Investment S.A., part of the DWS Group.

Objectives & Investment Policy

The aim is for your investment to reflect the performance of the Deutsche Bank Commodity Euro Index™ (Index) which reflects the performance of 12 commodities (such as oil, copper, corn) from 4 sectors (energy, base metals, precious metals, agriculture). The commodities' weighting within the Index is adjusted every month to underweight relatively more expensive commodities, and overweight relatively cheaper commodities, based on historical prices. The Index comprises financial contracts (futures) to buy or sell commodities at a fixed price in the future. The futures (other than natural gas futures) are selected by Deutsche Bank AG every month according to "Optimum Yield" rules which seek to minimise potential losses and maximise potential gains which arise from replacing futures which are about to expire with futures which expire at a later date. Natural gas futures are swapped every month for futures

with a remaining 4 month term. The effect of Dollar-Euro exchange rate fluctuations is partially reduced in the Index.

The Index is calculated on a "total return" basis by adjusting it daily to add the rate of interest payable on 91 day US Treasury Bills (US government debt).

An annual fee of 1.1% is deducted from the Index.

To achieve the aim, the Fund will buy tradeable debt (bonds) of investment grade and/or invest in cash deposits and enter into financial contract(s) (derivative(s)) with Deutsche Bank relating to the bonds/deposits and the Index, in order to obtain the return on the Index.

No dividends will be paid on your shares.

You may redeem your investment on demand on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 5 because of the high range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund does not invest directly in the components of the Index and its returns will be dependent on the performance of the bonds of investment grade and/or cash deposits and the performance of the derivatives used.

The Fund will enter into a derivative with a counterparty (initially Deutsche Bank). If the counterparty fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss.

DWS entities and related companies may act in several roles in relation to the Fund such as distributor and management company which may involve conflicts of interest.

The Fund may invest in bonds the value of which depends on the issuer being able to make its payments. There is always a risk that the issuer will fail to do so which may result in your investment suffering a loss.

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

The Fund provides exposure to commodities. Commodity prices react, among other things, to economic factors such as changing supply and demand relationships, weather conditions and other natural events, the agricultural, trade, fiscal, monetary, and other policies of governments and other unforeseeable events all of which may affect your investment.

The Index is rules-based and is not capable of being adjusted to take into account changing market circumstances. As a result you might not benefit from any such change.

The Index may also be subject to disruption or adjustment events which may prevent its calculation or lead to adjustments to the rules of the index which may cause your investment to suffer losses.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest		The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser or distributor.
Entry charge	5.00%	
Exit charge	None	
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).		The ongoing charges figure is based on expenses for the year ending October 2018. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.
Charges taken from the Fund over a year		
Ongoing charges	2.16%	
Charges taken from the Fund under certain specific conditions		More detailed charges information may be found in the "Fees and Expenses" section of the prospectus.
Performance fee	None	

Past Performance

Please be aware that past performance is not a reliable indicator of future results.

The fees for the ongoing Fund charges are included in the calculation of past performance. The entry/exit fees are excluded from the calculation of past performance.

The Fund was launched in 2005 and the share class was launched in 2006.

Past performance has been calculated in EUR.
