

Key investor information

This document provides you with key investor information about this fund. It is not a marketing document. The information that it contains is being provided to you in accordance with a legal obligation, in order to help you understand what an investment in this fund involves, and the related risks. You are advised to read it so you can make an informed decision on whether or not to invest.

SYCOMORE SELECTION MIDCAP (Unit Class R) ISIN FR0010376368

Fund managed by Sycomore Asset Management, UCITS V

OBJECTIVE AND INVESTMENT POLICY

The aim of the Fund is to outperform its benchmark index, the MSCI EMU SMID Cap Net Return index (dividends reinvested), over a minimum investment period of five years, using a multi-thematic socially responsible investment process, in conjunction with the United Nations Sustainable Development Goals (SDGs). This objective complies with the provisions of article 9 of the SFDR (Regulation 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial services sector).

The Fund's investment strategy is based on a net asset exposure of 60% to 100% to Eurozone equities. These equities are selected based on a thorough fundamental analysis of companies, without sector restrictions but with a capitalisation constraint, with 51% of net assets at all times exposed to shares of companies capitalising less than 7 billion euros. It aims to identify quality companies whose market valuation is not representative of their intrinsic value as determined by the management team.

The ESG (Environment, Social, Governance) analysis, rating and selection process is a fully integrated component in the fundamental analysis of companies in our investment universe and covers at least 90% of the Fund's net assets (excluding cash and UCIs). This analysis and rating, conducted according to our proprietary 'SPICE' (Suppliers & Society, People, Investors, Clients, Environment) methodology, aims in particular to understand the distribution of value created by a company among its stakeholders (investors, environment, clients, employees, suppliers and civil society), our conviction being that equitable distribution is an important factor in a company's development. This work has a decisive impact on the risk premium and the price targets thus estimated. The management team also relies on SRI exclusions (no investments in activities with a proven negative impact on society or the environment), a thematic approach (predominance of themes such as energy transition, circular economy, health, nutrition and well being, digital and communication), shareholder engagement (promotion of the company's ESG practices through voting in general meetings), best in universe approaches (selection of the best issuers in the investment universe) and best effort (investment in companies making visible efforts in sustainable development, even though they might not yet be among the best in the ESG investment universe). The fund's eligible investment universe is thus reduced by at least 20% compared to the initial universe, i.e. equities listed on European

Union markets. More detailed information on this subject is available in the Fund's prospectus and in our Commitment Policy, which is available at www.sycomore-am.com.

The Fund is actively managed and the portfolio structure does not reflect the composition of the aforementioned benchmark. Each company's weighting in the portfolio is thus fully independent of the same company's weighting in the benchmark.

In addition to its equity investments, the Fund may invest in the following financial instruments:

- Bonds, including convertible bonds and other euro-denominated debt securities, without sector or regional restrictions, with a minimum rating of BBB-; exposure to these financial instruments may not exceed 25% of the Fund's net assets.
- Money market instruments, up to 25% of net assets for public or private issuers with a rating of at least BBB from Standard & Poor's (or equivalent from Fitch Ratings or Moody's) for Fund cash management purposes.
- Financial futures traded on regulated and/or over-the-counter markets to hedge or increase the exposure of the portfolio to equity markets up to a limit of 100% of net assets, without exceeding portfolio exposure limits.
- French or European coordinated UCITS, for Fund cash management purposes, or to supplement direct equity investments (up to 10% of assets).

Benchmark index | MSCI EMU SMID Cap Net Return (with dividends reinvested)

Allocation of distributable sums | Accumulation

Deadline for centralisation of subscription/redemption orders | The deadline for centralisation of subscription and redemption orders (expressed in number of units or in cash value) at BNP Paribas Securities Services is daily at 12:00 pm Paris time, on each day that the net asset value is determined (D) and then executed at an unknown price on the basis of the net asset value calculated on the following day (D+1). The resulting payments are made on the second following business day (D+2).

RISK AND REWARD PROFILE

The level 6 risk and reward indicator mainly reflects the exposure of the Fund to the equity markets in which it is invested.

- The historical data used to calculate the synthetic indicator cannot be considered as a reliable indication of the future risk profile of this fund.
- The lowest category does not mean "risk-free".
- The risk category associated with this fund is not guaranteed, and may change over time.

Significant risks not taken into account in the indicator:

Credit risk | Given that the Fund may have an exposure of up to 25% to money market and/or fixed income instruments and/or money market UCITS. It is possible that the issuer of a debt security (sovereign, corporate) may not be able to honour its debt or that its rating may be downgraded, resulting in a drop in the Fund's net asset value.

Liquidity risk | Given the low market capitalisation of some companies in which the Fund may invest. Buying or selling those securities may take up to several weeks as there are a limited number available for sale or purchase in the market. Price variations in these securities, both up as well as down, may also be sharper and more sudden than for large capitalisations, and may therefore have a greater impact on the Fund's net asset value.

Guarantee | The capital of the Fund is not guaranteed.

CHARGES

The charges and commissions paid cover the operating costs of the Fund, including the cost of marketing and distributing the units. These fees reduce the potential growth of the investment.

One-off fees charged before or after investment	
Entry charge	3.00%
Exit charge	None
Conversion charge	None
<i>The percentage indicated is the maximum that can be levied from your capital prior to its investment or before income from your investment is distributed.</i>	
Annual charges levied by the fund	
Ongoing charges	2.05%*
Charges levied by the fund under certain specific conditions	
Performance fee	0.50%**
Method: 15.00% including tax above the MSCI EMU SMID Cap Net Return index (dividends reinvested).	

The entry and exit charges shown are maximum figures; in some cases the investor pays less. Your financial advisor or distributor can provide you with information concerning the amount you will effectively pay for entry and exit charges.

*The ongoing charges figure is based on expenses for the previous financial year. Information on the charges applied since this date is available in the prospectus.

This percentage may vary from one year to the next.

It excludes:

- performance fees;
- intermediation fees, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another UCI.

** **Performance fees:** Financial year ended 30/06/2021. The outperformance generated by the Fund on a given date is understood to be the positive difference between the net assets, before charging any eventual performance fee for the Fund, and the assets of an imaginary UCI, realising the performance of its benchmark index and recording the same pattern of subscriptions and redemptions as the actual Fund on the same date. If this difference is negative, this amount represents an underperformance that will have to be offset in the following years before it can again be provisioned for the performance fee. On each net asset value (NAV) calculation date, the outperformance fee is subject to a provision if the net assets, before charging any eventual performance fee for the Fund, are higher than that of the imaginary UCI over the observation period. In the event of underperformance, a write-back of the provision is carried out that is limited to the existing allocation. In the event of redemptions during the period, the share of the constituted provision corresponding to the number of shares redeemed shall be definitively acquired and taken by the Manager.

For further information concerning the charges, please refer to the fees and commissions section of the Fund's prospectus, available on our website, www.sycomore-am.com.

PAST PERFORMANCE

Past performance is not a reliable indicator of future performance.

The performance presented in this chart is inclusive of all charges.

Performance prior to 10 August 2020 was achieved using a different investment strategy than the one currently in force.

Fund inception date | 2003

Launch date of Unit Class R | 03/01/2006

Base currency | Euro (EUR)
