Objectives & Investment Policy

The primary investment objective is high current income with capital appreciation as a secondary objective. The Sub-Fund seeks to achieve these objectives primarily through investment in a portfolio of transferable debt securities of issuers in emerging markets throughout the world. In accordance with the principle of risk diversification, the Sub-Fund will invest at least two-thirds of its net assets in emerging market debt securities. The remainder of its assets may be invested in transferable equity and debt securities of corporate and government issuers, preferred stock and in cash equivalents including Money Market. Up to 10% of the net assets of the Sub-Fund may be invested in units of investment funds. The Sub-Fund is eligible for target funds. The Sub-Fund will not invest more than 10% of its net assets in securities not listed on a stock exchange or dealt in on another regulated market. The Sub-Fund may invest all of its net assets in debt securities rated below investment grade or, if unrated, determined by the Investment Manager to be of comparable quality. The Sub-Fund will be subject

to greater risk than a fund investing in high quality bonds or a fund investing in established economies. Fund management is responsible for selecting the individual securities. The Fund may make use of derivatives transactions to reduce any losses or to achieve higher growth. The investor's horizon should be long-term. Returns may be distributed. Investors are entitled to request redemption of shares from the Management Company on each Valuation Day. However, we may suspend redemptions in exceptional circumstances if suspension is deemed necessary in consideration of investor interests. Fees for the purchase and sale of securities shall be paid by the Sub-Fund. These fees are incurred in addition to the percentages listed under "Charges" and may negatively impact Sub-Fund returns. For share classe A (EUR) of the Sub-Fund, a currency hedge at share class level is implemented by PGIM Fixed Income. The hedge is implemented under consideration of the opinion of the European Securities and Markets Authority with the reference ESMA34-43-296 share classes of UCITS.

Risk and Reward Profile

Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may shift over time. Even the lowest category does not mean 'risk free'. The fund has been categorized SRRI 4 because its net asset value shows moderate volatility leading to adequate probabilities for losses as well as gains. Risks that could significantly affect fund performance and are not necessarily fully reflected in the risk and reward rating include: Liquidity Risk - Investing in securities that cannot easily be sold at full value increases the risk that the Fund may have to suspend the redemption of its shares. Issuer Risk - Bonds owned by the Fund may lose some or all of their value if the financial health of the

bonds issuers declines or fails. The Fund will invest in debt securities rated below investment grade and in unrated securities of comparable quality. High yield bonds tend to be more volatile than higher-rated fixed income securities, so are more likely to react to developments affecting market and credit risk. Unrated securities may be more thinly traded than comparable rated securities.
