The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

NB - OPPORTUNITY FUND, class A LU0256571018

a sub-fund of NB

This sub-fund is managed by GNB - International Management S.A..

Objectives and investment policy

Objectives

To achieve the most efficient portfolio diversity (in terms of underlying assets, issuers, sectors, geographies and maturity profiles), trying to replicate the performance of the index EURIBOR 3M + 3.00%.

Investment policy

Diversified portfolio (among issuers and countries) invested directly in transferable securities such as Equities and Corporate Bonds of international issuers and expressed in international currencies. The sub-fund is also allowed to invest up to 100% in Asset Backed Securities (ABS) rated or not rated. The investments through shares/units of target UCI's are limited to 10% of the net assets.

On an ancillary basis, the sub-fund may also invest in short term debt instruments, transferable securities embedding a derivative instrument and Additional Tier-1 (AT1) instruments / contingent convertible (Co-Cos). The investment in CoCos is limited to a maximum of 20% of its NAV.

Financial derivatives such as call options, interest rate swaps, forward

exchange contracts and equity swap transactions may be used for hedging purpose and/or for the purpose of efficient portfolio management.

The sub-fund is actively managed. While the sub-fund compares its performance against the EURIBOR 3M + 3%, it does not try to copy this reference index and freely selects the securities that it invests in. The deviation with this reference index can be material.

These units are capitalisation units. Income and capital gains are reinvested.

The investor may in principle subscribe, convert and redeem units on each bank business day in Luxembourg.

The NAV of this sub-fund is denominated in EUR.

Recommendation

The sub-fund is suitable for investors who want to achieve long-term capital growth and who can afford to set aside the capital for at least 3-5 years.

Risk and reward profile

What does this synthetic indicator mean?

- The calculation of the risk indicator is based on historical data which may not be a reliable indication of the future risk profile of the sub-fund.
- The risk category shown is not guaranteed to remain unchanged. The sub-fund's risk indicator may shift over time.
- The lowest category of the risk indicator does not mean a risk-free investment.
- The sub-fund NB - OPPORTUNITY FUND is classified in category 4 because the value of the unit may be subject to medium variations and consequently the risk of loss and the opportunity of gain may be moderate.

Which risks are not included in this synthetic indicator?

- Risks of political, economic, judicial or fiscal nature (specifically when considering the possibility of investing in emerging markets countries).
- *Operational Risk*: Risk of loss resulting from inadequate or failed internal processes, people and systems, or from external events. This risk also includes custodian risk as investments held in custody might be withdrawn from the access of the fund to as a result of the insolvency, infringements of a duty of care or mis-

conduct by the custodian or a sub-custodian.

- *Concentration Risk*: Can arise as a result of concentrating the investment in certain asset classes or markets.
- *Use of Derivatives Techniques*: Derivative contracts may be used to increase or reduce the market exposure. The additional exposure created through the use of derivatives may not exceed the total net assets of the fund.
- *Liquidity Risk*: Some investments made by the sub-fund may be highly illiquid. There is a risk that the sub-fund may be unable to realize its investment objectives by selling these assets at attractive prices or at the appropriate times or in response to changing market conditions, or will otherwise be unable to complete a favorable exit strategy.
- *Credit (default) Risk*: Some securities such as ABS and other structured products may bear additional credit / default risk due to the fact that these products are usually issued / guaranteed by entities different from the issuers of the underlying assets of these products. This additional risk may not be accurately captured by the SRR.
- *Contingent Convertible Securities Risk*: The investment in contingent convertible bonds ("CoCos") as well as other hybrid securities may expose the fund to equity related risks following a conversion to equity and or loss of capital associated with principal "write-down" features.
