Investment objective: To provide long-term capital growth by investing primarily in companies of the emerging markets of central, eastern and southern Europe, Middle East and Africa.

Investor profile: This is an equity fund investing in European, Middle Eastern and African emerging markets. Whilst the long-term growth potential of these emerging market equities make this fund very attractive for investors looking for high investment returns, investors in the Sub- Fund need to be comfortable with the additional political and economic risks associated with emerging market investments. The fund may, therefore, be suitable for investors who already have a globally diversified portfolio and now want to expand into riskier assets in order to potentially boost returns. Because emerging stock markets are very volatile, investors should also have a five-to-ten year investment horizon.

Fund manager(s) Oleg Biryulyov EMEA Equity Team	Share class currency USD	Domicile Luxembourg
Client portfolio manager(s) Claire Peck Luke Richdale	Fund assets USD 298.2m	Entry/exit charges Entry charge (max) 0.00% Exit charge (max) 0.00%

PERFORMANCE DISCLOSURES

Past performance is not a guide to current and future performance. The value of your investments and any income from them may fall as well as rise and you may not get back the full amount you invested.

Source: J.P. Morgan Asset Management. Share class performance is shown based on the NAV (net asset value) of the share class with income (gross) reinvested including actual ongoing charges excluding any entry and exit fees. Indices do not include fees or operating expenses and you cannot invest in them.

See the material risks, general disclosures and definitions on page 2.

Key risks

Because the Sub-Fund is aggressively managed, volatility may be high as the Sub-Fund may take larger position sizes, may have high turnover of holdings and at times may have a significant exposure to certain areas of the market. The value of equity securities may go down as well

as up in response to the performance of individual companies and general market conditions. Emerging markets may be subject to increased risks, including less developed custody and settlement practices, higher volatility and lower liquidity than non emerging market securities. The Sub-Fund may be concentrated in industry sectors and/or countries and as a result, may be

more volatile than more broadly diversified funds. Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging that may be used to minimise the effect of currency fluctuations may not always be successful.

GENERAL DISCLOSURES

Before investing, obtain and review the current prospectus, Key Investor Information Document (KIID) and any applicable local offering document. These documents, as well as the annual and semi-annual reports and the articles of incorporation, are available free from your financial adviser, your J.P. Morgan Asset Management regional contact, the fund's issuer (see below) or at www.jpmmam.lu.
