#### Quick facts

**Management company:** Franklin Templeton International Services S.à r.l.

**Investment manager:** Franklin Advisers, Inc., United States of America (internal delegation)

**Custodian:** J.P. Morgan Bank Luxembourg S.A.

**Base currency:** USD

**Financial year end of this Fund:** 30 June

**Dealing frequency:** Every Hong Kong Business Day

**Minimum Investment:** USD 1,000 [initial] and USD 500 [subsequent purchases] or equivalent

**Dividend policy:** Dividends, if declared, will be reinvested unless indicated by you in the application form to be paid out. Subject to any legal and regulatory requirements, the Fund may at its discretion pay dividends out of the capital or out of gross income of the Fund while paying all or part of the Fund's fees and expenses out of the capital of the Fund, which results in effectively paying dividends out of capital. The Fund may amend such distribution policy subject to the SFC's prior approval and by giving not less than one month's prior notice to investors. Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share.

#### What is this product?

This is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is Commission de Surveillance du Secteur Financier ("CSSF").

#### Objective and Investment Strategy

Franklin U.S. Small-Mid Cap Growth Fund (the "Fund") aims to increase the value of its investments over the medium to long term.

The Fund invests principally in:

- equity securities issued by small- and mid-sized companies, located in, or doing significant business in, the U.S.
- The average market capitalisation of the investments in the Fund is typically around USD7 billion.

*The Fund can invest to a lesser extent in:*

- *equity securities issued by large-sized companies with a market capitalisation in excess of USD25 billion, located in, or doing significant business in, the U.S. that were purchased when the market capitalisation was less than USD25 billion. It is the manager's intention to sell such securities when they are perceived to have grown too large for this type of fund.*

*The investment team focuses on high-quality companies that it believes have the potential for sustainable growth.*

*The Fund does not intend to invest extensively or primarily in financial derivative instruments for investment purposes.*

### **What are the key risks?**

**Investment involves risks. Please refer to the offering document for details including the risk factors.**

- **Equity risk:** *Equity and equity-linked securities are subject to significant price movements due to various economic, political, market and issuer-specific factors. Such changes may adversely affect the value of equities regardless of issuer-specific performance. Additionally, different industries, financial markets and securities can react differently to these changes. Such fluctuations of the Fund's value are often exacerbated in the short-term. Financial markets trends (including feared or actual failures in the banking system) may also cause large fluctuations in the prices of such securities. As a result, the Fund may be adversely affected.*
- **Liquidity risk:** *The Fund may not be able to easily sell securities due to adverse market conditions or reduced value or creditworthiness of issuers in which it invests. Requests for redemption of shares, which are not listed, may be deferred or suspended. Reduced liquidity due to these factors may have an adverse impact on the net asset value of the Fund and on the ability of the Fund to meet redemption requests in a timely manner.*
- **Growth stocks risk:** *Growth stocks can be more volatile and may be more expensive, relative to earnings, than the market in general. The Fund may be adversely affected by the greater volatility of investments in such stocks.*
- **Small- and mid-sized companies risk:** *Stocks of small- and mid-sized companies tend to be less liquid and more volatile than larger, more recognized companies, which results in higher risk for the Fund. The value and performance of the Fund may be adversely affected as a result.*
- **Single market risk:** *By being concentrated in one market, the Fund could suffer greater volatility compared to funds that follow a more diversified policy. The value and performance of the Fund may be adversely affected as a result.*
- **Dividend policy risk:** *The Fund's dividend policy allows for payment of dividends out of capital or effectively out of capital. Where this is done, it amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share.*

### **Is there any guarantee?**

*This Fund does not have any guarantees. You may not get back the full amount of money you invest.*
