

## KEY INVESTOR INFORMATION

*This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.*

### UBAM - Local Currency Emerging Market Bond, a sub-fund of UBAM

**Class: AC USD (Capitalisation) LU0244150230**

UBAM is a SICAV managed by UBP Asset Management (Europe) S.A.

### Objectives and investment policy

The Fund seeks to grow your capital and generate income primarily by investing in bonds issued in emerging countries and expressed in emerging market currencies. It is an actively-managed, well-diversified portfolio, mainly made up of securities whose value is expressed in emerging market currencies. This Fund's performance can therefore be affected by fluctuations in these currencies against the US Dollar. The Fund's value is calculated and expressed in US Dollars.

The currency risk in relation to the base currency USD is not hedged.

To achieve its aims the Fund invests primarily in bonds issued in local currencies by the governments of and companies in emerging markets. Some of these issuers may be considered high-quality, with a low risk of defaulting on their interest payments, while other issuers are companies or governments that may be considered at higher risk. The Fund can also use complex derivatives, primarily to hedge risks. Investors in the Fund can redeem their units on any business day in Luxembourg, although we recommend a holding period of at least three years.

Any income received by the Fund is reinvested (capitalisation share class).

### Risk and reward profile

With lower risk, With higher risk,

←————→

potentially lower rewards potentially higher rewards

This indicator represents the annual historical volatility of the Fund over a 5-year period.

Risk Category 4 reflects average/moderate potential gain and/or loss for the portfolio.

This is due to investments in bonds on the emerging market.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

**Emerging market risk:** The Fund invests in developing overseas markets which carry a higher risk than investing in larger established markets. Investments in emerging markets are likely to experience greater rises and falls in value and may suffer trading problems. A Fund which invests in emerging markets rather than more developed countries may encounter difficulties when buying and selling investments. Emerging markets are also more likely to experience political uncertainty and investments held in these countries may not have the same protection as those held in more developed countries.

**Currency risk:** The Fund invests in overseas markets. It can be affected by changes in exchange rates which may cause the value of your investment to decrease or increase.

**Liquidity risk:** Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices.

**Credit risk:** The Fund invests in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer. The risk of default is usually greatest with bonds that are rated as sub-investment grade.

**Counterparty risk:** As the Fund uses over-the-counter derivatives, there is a risk that the counterparty to the transactions will wholly or partially fail to honour its contractual obligations. This may result in a financial loss to the Fund.

Full details of risks are disclosed in the chapter "Risk Factors" in the prospectus.

## Charges

The charges and commissions are used to cover the Fund's operating costs, including marketing and distribution of shares. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	3.00%
Exit charge	None

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

### Charges taken from the Fund over a year

Ongoing charges	2.12%
-----------------	-------

### Charges taken from the Fund under certain specific conditions

Performance fee

None

The entry and exit charges shown are maximum rates. In certain cases, the charges paid may be lower. Your financial advisor or distributor can inform you of the associated entry and exit charges.

Ongoing charges are based on the charges for the previous year, ending on 31 December 2015. This percentage may vary from year to year. It excludes outperformance charges and intermediation charges, with the exception of entry and exit charges paid by the Fund when it buys or sells shares of another Fund.

**For more information about Fund charges, please refer to the relevant sections of the prospectus, which is available at [www.ubp.com](http://www.ubp.com).**

## Past performance

The performance figures shown in the bar chart are not a reliable indication of future performance.

Annualised performance is calculated after deducting all charges taken from the Fund.

Fund creation date: 21/02/2006

Share class launch date: 21/02/2006

Share class currency: USD
