

iShares MSCI Target UK Real Estate UCITS ETF GBP (Dist)

August Factsheet

Performance, Portfolio Breakdowns and Net Asset information as at: 31-Aug-2021

All other data as at 07-Sep-2021

For Investors in the UK. Investors should read the Key Investor Information Document and Prospectus prior to investing.

The Fund seeks to track the performance of an index composed of UK Real Estate Investment Trusts (REITs), property companies and liquid fixed income securities.

KEY BENEFITS

- 1 Targeted exposure to liquid real estate
- 2 Direct investment into UK Real Estate Investment Trusts (REITs), property companies and liquid fixed income securities.
- 3 Single country exposure with a focus on property

Key Risks: Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk. Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events. The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.

Key Risks Continued: Investments in property securities can be affected by the general performance of stock markets and the property sector. In particular, changing interest rates can affect the value of properties in which a property company invests. Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due. Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily. Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

GLOSSARY

Total Expense Ratio (TER): A measure of the total costs associated with managing and operating a fund. The TER consists primarily of the management fee plus other expenses such as trustee, custody, or operating expenses. It is expressed as a percentage of the fund's total net asset value.

Distribution yield: The distribution yield represents the ratio of distributed income over the last 12 months to the fund's current Net Asset Value.

Product Structure: Indicates whether the fund buys the actual underlying securities in the index (i.e. Physical) or whether the fund gains exposure to those securities by buying derivatives, such as swaps (known as 'Synthetic'). Swaps are a form of contract that promises to provide the return of the security to the fund, but the fund does not hold the actual security. This can introduce a risk that the counterparty defaults on the "promise" or contract.

Methodology: Indicates whether the product is holding all index securities in the same weight as the index (replicating) or whether an optimised subset of index securities is used (optimised/sampled) in order to efficiently track index performance.

SUSTAINABILITY CHARACTERISTICS

Sustainability Characteristics can help investors integrate non-financial, sustainability considerations into their investment process. These metrics enable investors to evaluate funds based on their environmental, social, and governance (ESG) risks and opportunities. This analysis can provide insight into the effective management and long-term financial prospects of a fund.

The metrics below have been provided for transparency and informational purposes only. The existence of an ESG rating is not indicative of how or whether ESG factors will be integrated into a fund. The metrics are based on MSCI ESG Fund Ratings and, unless otherwise stated in fund documentation and included within a fund's investment objective, do not change a fund's investment objective or constrain the fund's investable universe, and there is no indication that an ESG or Impact focused investment strategy or exclusionary screens will be adopted by a fund. For more information regarding a fund's investment strategy, please see the fund's prospectus.

| MSCI ESG Fund Rating (AAA-CCC) | A | MSCI ESG Quality Score (0-10) | 6.39 |
| MSCI ESG Quality Score - Peer Percentile | - | MSCI ESG % Coverage | 99.09% |
| Fund Lipper Global Classification | Equity Sector Real Estate UK | MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES) | 37.07 |
| Funds in Peer Group | 10 | | |

All data is from MSCI ESG Fund Ratings as of **06-Aug-2021**, based on holdings as of **30-Jun-2021**. As such, the fund's sustainable characteristics may differ from MSCI ESG Fund Ratings from time to time.

To be included in MSCI ESG Fund Ratings, 65% of the fund's gross weight must come from securities covered by MSCI ESG Research (certain cash positions and other asset types deemed not relevant for ESG analysis by MSCI are removed prior to calculating a fund's gross weight; the absolute values of short positions are included but treated as uncovered), the fund's holdings date must be less than one year old, and the fund must have at least ten securities. For newly launched funds, sustainability characteristics are typically available 6 months after launch.

ESG GLOSSARY:

MSCI ESG Fund Rating (AAA-CCC): The MSCI ESG Rating is calculated as a direct mapping of ESG Quality Scores to letter rating categories (e.g. AAA = 8.6-10). The ESG Ratings range from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).

MSCI ESG Quality Score - Peer Percentile: The fund's ESG Percentile compared to its Lipper peer group.

Fund Lipper Global Classification: The fund peer group as defined by the Lipper Global Classification.

Funds in Peer Group: The number of funds from the relevant Lipper Global Classification peer group that are also in ESG coverage.

MSCI ESG Quality Score (0-10): The MSCI ESG Quality Score (0 - 10) for funds is calculated using the weighted average of the ESG scores of fund holdings. The Score also considers ESG Rating trend of holdings and the fund exposure to holdings in the laggard category. MSCI rates underlying holdings according to their exposure to industry specific ESG risks and their ability to manage those risks relative to peers.

MSCI ESG % Coverage: Percentage of a fund's holdings that have MSCI ESG ratings data.

MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES): Measures a fund's exposure to carbon intensive companies. This figure represents the estimated greenhouse gas emissions per \$1 million in sales across the fund's holdings. This allows for comparisons between funds of different sizes.
