

# BlackRock Absolute Return Bond Fund Class D ACCU GBP

## APRIL 2019 FACTSHEET

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 30-Apr-2019. All other data as at 14-May-2019.

For Investors in the UK. Investors should read the Key Investor Information Document and Prospectus prior to investing.

### FUND OVERVIEW

The Fund aims to achieve a positive absolute return for investors regardless of market movements and, as such, the Fund will not be managed against any fixed income benchmark. The Fund will be managed with the aim of delivering absolute (more than zero) returns on a 12 month basis in any market conditions. However, an absolute return is not guaranteed over a 12 month or any period and the Fund may experience periods of negative return. The Fund's capital is at risk. The Fund primarily aims to gain investment exposure to fixed income (FI) securities, FI-related securities and money-market instruments (MMIs) issued by, or giving exposure to, companies, governments, government agencies and supranationals (i.e. the International Bank for Reconstruction and Development) worldwide. The Fund can use derivatives as part of its investment strategy. This can increase the overall risk profile of the Fund.

### GROWTH OF HYPOTHETICAL 10,000 GBP

The figures shown relate to past performance. Past performance is not a reliable indicator of current or future results and should not be the sole factor of consideration when selecting a product or strategy. Unit Class performance displayed in British Pound. Source: BlackRock. Performance is shown on a bid price basis, with net income reinvested, net of fees. The figures shown relate to past performance.

### 12 MONTH PERFORMANCE PERIODS - TO LAST QUARTER END

	31/3/2014- 31/3/2015	31/3/2015- 31/3/2016	31/3/2016- 31/3/2017	31/3/2017- 31/3/2018	31/3/2018- 31/3/2019	2018 Calendar Year
Share Class	0.19%	-0.37%	2.53%	2.28%	-0.36%	-1.61%

The figures shown relate to past performance. Past performance is not a reliable indicator of current or future results and should not be the sole factor of consideration when selecting a product or strategy. Unit Class performance is calculated using bid prices, with income reinvested, in British Pound, net of fees. Source: BlackRock.

### CUMULATIVE & ANNUALISED PERFORMANCE

	Cumulative (%)					Annualised (% p.a.)		
	1m	3m	6m	YTD	1 Year	3 Years	5 Years	Since Inception
Share Class	0.27%	0.81%	0.90%	1.54%	-0.18%	1.44%	0.90%	1.50%

The figures shown relate to past performance. Past performance is not a reliable indicator of current or future performance and should not be the sole factor of consideration when selecting a product or strategy. Share Class and Benchmark performance displayed in GBP, hedged fund benchmark performance is displayed in GBP. Performance is shown on a Net Asset Value (NAV) basis, with gross income reinvested where applicable. The return of your investment may increase or decrease as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation. **Key Risks Continued:** Typically, when interest rates rise, there is a corresponding decline in the market value of bonds. Credit risk refers to the possibility that the issuer of the bond will not be able to repay the principal and make interest payments. The Fund invests in fixed interest securities issued by companies. There is a risk of default where the issuing company may not pay income or repay capital to the Fund when due. The Fund uses derivatives as part of its investment strategy including the establishment of both 'long' and 'synthetic short' positions and the creation of market leverage for the purposes of increasing the economic exposure of a Fund beyond the value of its net assets. The Manager employs a risk management process to oversee and manage derivative exposure within the Fund. However, the use of derivatives in this manner may have the effect of increasing the overall risk profile of the Fund. Investors should understand that the Fund is not guaranteed to produce a positive return and as an absolute return product, performance may not move in line with general market trends or fully benefit from a positive market environment.

## GLOSSARY

- Effective Duration:** A measure of price sensitivity of a bond to changes in interest rates. The Modified Duration of the fund is calculated as the average of the underlying bonds' modified duration values, adjusted to take account of their relative weight (size) within the fund.
- Ongoing Charge:** is a figure representing all annual charges and other payments taken from the fund.
- Quartile Rank:** categorises a fund into four equal bands based on their performance over a specified period within the relevant Morningstar's sector. The top or first quartile contains the top 25% of funds, through to the bottom or 4th quartile which contains the bottom 25% of funds.
- SRRI:** is a value based on the volatility of the fund, which gives an indication of the overall risk and reward profile of the Fund.

- Nominal Weighted Average Life (WAL):** A bond's maturity is the length of time until the principal amount of the bond is to be repaid. WAL of the fund is calculated as the average of the underlying bonds' maturities, adjusted to take account of their relative weight (size) within the fund.
- Yield To Worst:** The lowest potential yield that can be received on a bond without the issuer actually defaulting. The yield to worst is calculated by making worst-case scenario assumptions on the issue by calculating the returns that would be received if provisions are used by the issuer.
- A short position is the sale of a borrowed security, commodity or currency with the expectation that the asset will fall in value. Whereas a Long position is the buying of a security such as a stock, commodity or currency, with the expectation that the asset will rise in value. A fund has a net long exposure if the percentage amount invested in long positions exceeds the percentage amount invested in short positions, and has a net short position if short positions exceed long positions.
- Performance Fee:** is charged on any returns that, subject to a High Water Mark, the Fund achieves above it's performance fee benchmark. Please refer to the Prospectus for further information.
