

Premier UK Growth Fund

C share class (Income Shares)

Fund & fund manager ratings

Investment objective

To achieve capital growth.

The full investment objective and policy, which outline all the eligible investments, are available in the Fund's [prospectus](#).

Investment overview

The Fund sits in the Investment Association UK All Companies sector, which means the Fund is required to invest at least 80% of its assets in UK company shares (equities) and has a primary objective of achieving capital growth.

The Fund aims to deliver long term growth by investing in an actively managed portfolio of principally UK listed company shares. The Fund will include investments in the largest 100 companies listed on the London Stock Exchange, as well as medium sized companies (the next 250 largest companies) and smaller companies.

Please note there is no guarantee that the Fund will achieve its objective.

Jon Hudson joined Premier in 2007 and has worked as an investment manager and analyst in the UK equity team since 2013. Benji has worked in Premier's UK equity team as an investment manager and analyst since he joined Premier in 2014.

More information

Charges taken from income: The fund's charges will be taken from income generated by the fund in the form of interest or dividends. If there is not enough income to cover the charges, the rest of the charges will be taken from the fund's capital which could result in capital erosion or constrain capital growth.

Ongoing charges figure (OCF): This figure is designed to provide investors with the most accurate measure of what it costs to invest in a fund over a year. The OCF includes the fee paid to Premier Asset Management for the management of the fund (known as the annual management charge), with the remainder of the OCF covering costs that have to be paid to external companies for other services relating to the ongoing administration and management of a fund. This includes fees paid to the depositary, custodian, regulator, auditor and administrator. The OCF is not paid directly by investors; instead the fee is deducted from the value of the fund and reflected in the fund's share price. Accurate as at **31 May 2019**.

Annual management charge (AMC): This is expressed as a percentage of the value of your investment and pays for the different costs associated with managing your investment each year.

Initial charge: This is a one-off charge taken from your money prior to investment in shares in a fund. The initial charge has been waived by Premier Asset Management until further notice. However, if you have invested via a financial adviser, the initial charge may still apply and be paid to your adviser.

General risks

All types of investment carry a degree of risk and it is important that you understand and are comfortable with the level of risk to which your capital could be exposed. We recommend that you consult with a financial adviser if unsure in any way.

There is the potential for loss of your original investment. The amount of investment risk will depend on the fund's risk profile. We would typically expect investments that are perceived as lower risk to offer less potential for loss but with potentially lower returns, whereas we would expect higher risk investments to generate higher returns albeit with the extra risk of potential loss over the long-term. However, there are no guarantees as to how an investment will perform in the future.

Inflation could erode the relative value of your investment.

There is a risk that financial markets will fall, affecting the value of your investment.

There is no guarantee that the investment objective of the fund will be achieved.

Past performance of a fund is not a guide to future returns. The price of shares and any income from them can go down as well as up and there is the possibility of a loss to your original investment.

The levels of taxation and of relief from taxation will depend upon individual circumstances.

There may be a variation in the performance between funds with similar objectives due to the different assets selected. Performance of a fund will be affected by the fund manager's investment decisions.

If you withdraw part of your investment to supplement the income paid out to you, there is an increased risk that the residual amount of your investment will be less than your original investment when you decide to sell.

Other risks

The fund may invest directly into, or be exposed to via its underlying investments, a variety of assets which carry specific risks which could impact the returns from your fund. The main risks are summarised here, with further detail available in the fund's prospectus.

Equities: As an asset class, equities can experience high levels of fluctuation in prices.

Geographic concentration: Funds that have a strong focus on a particular country or region, can carry a higher risk than funds with a more diversified portfolio.

Inflation: Higher inflation can negatively impact investment markets, in particular, fixed interest securities such as government bonds and corporate bonds.

Interest rate: Unexpected movements in interest rates will affect all types of assets, in particular, fixed interest securities such as government bonds and corporate bonds. If interest rates go up, the value of the bond may fall, and vice versa.

Legal/tax: Arising from a change in legal/tax regulations or the application of them.

Liquidity: During difficult market conditions, securities may become more difficult to sell and buy at a desired price.

Operational: Processes, systems and controls can fail. This is more likely to happen with more complex products or investments in overseas markets, such as emerging market countries, which may not have the same level of safekeeping, infrastructure or controls as more developed markets.

Smaller companies: Investment in smaller companies is typically higher risk than investment in larger companies.

Ratings, awards and other information

The methodology and calculations used by the companies or organisations that provide the fund or fund manager awards and ratings are not verified by Premier Asset Management and we therefore are unable to accept responsibility for their accuracy. Ratings and awards should not be relied upon for making an investment decision, nor are they an indication, promise or guarantee of future performance of a fund or fund manager.

The Defaqto 2019 Diamond Rating is based on the class C shares for the Fund. Defaqto is an independent researcher of financial products and is not authorised to provide financial advice. Premier Asset Management does not have any influence or control over the Defaqto Diamond Ratings or the methodology used to create them. We are therefore unable to guarantee their accuracy or that these will not change in the future, or that Premier Asset Management will continue to use Defaqto ratings in the future.

Premier Fund Managers Limited (registered no. 02274227) and Premier Portfolio Managers Limited (registered no. 01235867) are authorised and regulated by the Financial Conduct Authority. Registered address: Eastgate Court, High Street, Guildford, GU1 3DE. Premier Asset Management is the marketing name used for the two companies.

Glossary

Accounting date: the date that a fund's annual and interim report are prepared at.

Accumulation shares: Your share of the net income is automatically reinvested on your behalf. The amount of the reinvested income is reflected in the increased price of each accumulation share.

Capital growth: the increase in value of your original investment. Investments can potentially grow with or without dividends (income) reinvested.

Equities: another name for shares in a company.

Investment Association (IA): the IA is the trade association that represents the UK investment management industry.

IA sectors: to help with comparisons between the thousands of funds available, funds are categorised into different groups or sectors, organised and reviewed by the Investment Association (IA).

IA UK All Companies sector: Funds which invest at least 80% of their assets in UK equities which have a primary objective of achieving capital growth.

Income shares: if you select this type of share, any income made by the fund is paid out to you.

ISA: This stands for Individual Savings Account and is a type of tax-free scheme, set up by the government, designed to help people make the most of their savings and investments. All income and gains from an ISA investment are exempt from UK Income Tax and Capital Gains Tax. HM Revenue and Customs sets the maximum amounts that you are allowed to invest into an ISA each tax year.
