Investment objective: The Sub-Fund aims to provide current income while seeking to maintain a low volatility of principal.

Investment policy: The Sub-Fund pursues an actively-managed investment strategy.

Investor profile: Typical investors in the Sub-Fund are expected to be investors who want to take broad market exposure to short duration debt securities and who are looking for potentially higher returns than a money market fund and are prepared to incur a higher level of risk in order to achieve this, including the volatility of investments in such debt securities.

PERFORMANCE DISCLOSURES

Past performance is not a guide to current and future performance. The value of your investments and any income from them may fall as well as rise and you may not get back the full amount you invested.

Source: J.P. Morgan Asset Management. Share class performance is shown based on the NAV (net asset value) of the share class with income (gross) reinvested including actual ongoing charges excluding any entry and exit fees. Performance is shown based on the NAV which may not be the same as the market price of the ETF. Individual shareholders may realise returns that are different to the NAV based returns.

The return of your investment may change as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation.

Indices do not include fees or operating expenses and you cannot invest in them.

The benchmark is for comparative purposes only unless specifically referenced in the Sub-Funds' Investment Objective and Policy.

See the material risks, general disclosures and definitions on page 2.

Key risks

The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. These risks are typically increased for below investment grade

debt securities which may also be subject to higher volatility and lower liquidity than investment grade debt securities. The credit worthiness of unrated debt securities is not measured by reference to an independent credit rating agency. Asset-backed, collateralised loan obligations and mortgage-backed securities may be less liquid than other securities in which the Sub-Fund will invest,

subject to adverse changes to interest rates and to the risk that the payment obligations relating to the underlying assets are not met. The Sub-Fund may be concentrated in the banking industry and in the UK sectors, markets and/or currency. As a result, the Sub-Fund may be more volatile than more broadly diversified funds.
