Man GLG Income Fund

MONTHLY SUMMARY REPORT: 30 APRIL 2020

FUND DESCRIPTION

The Fund seeks to achieve a level of income (gross of fees) above the FTSE All-Share (NDTR) Index over 1 year rolling periods and to outperform (NDTR) the FTSE Index over the long term (over 5 year rolling periods). To achieve this objective, the Fund will invest at least 80% of its assets, directly or indirectly, in equities relating to companies that either have their registered office in the UK; carry out a predominant proportion of their business activity in the UK market; and/or are listed on a UK stock exchange. The Investment Adviser seeks to identify companies trading below the Investment Adviser's estimation of the value of their tangible assets (physical and measurable assets that are used in a company's operations such as property, plant, and equipment) or their replacement cost, or whose profit streams (which focuses on the cash generated for shareholders) the Investment Adviser considers to be undervalued.

A complete description of fund aims is set out in the fund's prospectus.

FUND RISKS

The value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested. Prior to investing in the Fund investors should carefully consider the risks associated with investing, whether the Fund suits their investment requirements and whether they have sufficient resources to bear any losses which may result from an investment in the Fund. Investors should only invest if they understand the terms on which the Fund is offered. Investors should consider the following risks and where appropriate seek professional advice before investing: Market Risk, Counterparty Risk, Currency Risk, Liquidity Risk, Financial Derivatives Instruments, Single Region/ Country Risk. More details can be found in the risk glossary.

Prior to making investments investors should read and consider the fund's offering documents

RISK GLOSSARY

Market Risk - The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets. Therefore, the value of

Counterparty Risk - The Fund will be exposed to credit risk on counterparties with which it trades in relation to on-exchange traded instruments such as futures and options and where applicable, 'over-the-counter' ("OTC", "non-exchange") transactions. OTC instruments may also be less liquid and are not afforded the same protections that may apply to participants trading instruments on an organised exchange.

Currency Risk - The value of investments designated in another currency may rise and fall due to exchange rate fluctuations. Adverse movements in currency exchange rates may result in a decrease in return and a loss of capital. It may not be possible or practicable to successfully hedge against the currency risk exposure in all circumstances

Liquidity Risk - The Fund may make investments or hold trading positions in markets that are volatile and which may become illiquid. Timely and cost efficient sale of trading positions can be impaired by decreased trading volume and/or increased price volatility. Financial Derivatives Instruments - The Fund may invest in financial derivative instruments ("FDI") (instruments whose prices are dependent on one or more

underlying asset) typically for hedging purposes. The use of FDI involves additional risks such as high sensitivity to price movements of the asset on which it is based. The use of FDI may multiply the gains or losses.

Single Region/Country Risk - The Fund is a specialist country-specific or geographic regional fund, the investment carries greater risk than a more internationally diversified portfolio.

A complete description of risks is set out in the Fund's prospectus.

Performance Fee The payminvestmer Position Concentration The propo Quartile Ranking Quartile ratio 4, with	s based on expenses and may vary from year to year. It includes management fees but excludes performance fees (where applicable) plio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another sub-fund. es you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce tial growth of your investment.
Position Concentration The propo Quartile Ranking Quartile ratio 4, with	a fund's position in line with its chosen reference index. Overweight means a fund holds more of a certain security than the reference underweight means a fund holds less of a certain security compared to its reference index.
Quartile Ranking Quartile ratio 4, with	ent made to an Investment Manager if certain performance levels are achieved (often over and above any levels set out in the tobjective) within a set time period. Please refer to the fund's prospectus for a complete description.
to 4, with	rtion of a portfolio's net asset value represented by the largest (e.g. 5/10/20) positions.
Redemption Fee This is the	ankings are a measure of how well a fund has performed against a group of similarly categorised funds. The rankings range from 1 1 representing the fund's performance being in the top 25% of funds in its sector.
neuempuon i ee inis is uie	maximum amount by which your investment may be reduced prior to the proceeds being paid out.
or market	an area of the economy in which businesses share the same or a related product or service. It can also be thought of as an industry that shares common operating characteristics. Dividing an economy into different pieces allows for more in-depth analysis of the as a whole.
companie	oup of funds which have a similar investment objective or invest in the same type of assets. These are organised by independent s such as the Investment Association in the UK. The average performance of a sector is often used to compare with the performance ridual fund in the sector.
Ratio is th greater th	e Ratio is a measure for calculating risk-adjusted return, and has become the industry standard for such calculations. The Sharpe e average return earned in excess of the risk-free rate per unit of volatility or total risk. The higher the ratio the better, with a number an 1 usually considered good, a number greater than 2 considered very good and a ratio of 3 or higher considered excellent. As it is te measure of risk-adjusted return, negative Sharpe Ratios can be misleading and are therefore shown as N/A.
Indicator (SRRI) categorise over a 5-y	on the Key Investor Information Document (KIID), the SRRI is a measure of the overall risk and reward profile of a fund. Funds are ad on a scale from 1 to 7 where 1 is the lowest risk and 7 is the highest. Typically, the SRRI is derived from the volatility of past returns ear period. Investors should be aware the indicator is based on historical data and may not be a reliable indication of the future risk he Fund. The lowest category does not mean risk free.
	or similar factor that is part of a target a fund manager has set for a fund's performance to match or exceed (including anything used nance fee calculation). By default this is also a comparator.
Tracking Error Tracking e	error is a measure of the divergence between a portfolio's returns and the benchmark or index against which it is managed.
YTD Year-to-d	

Active share is a measure of the percentage of stock holdings in a manager's portfolio that differ from the reference index.

Important information

This material is of a promotional nature.

The Fund is a sub-fund of Man UK ICVC, domiciled in the United Kingdom and registered with the Financial Conduct Authority. Full details of the Fund objectives, investment policy and risks are located in the Prospectus which is available with the Key Investor Information Document in English and in an official language of the jurisdictions in which the Fund is registered for public sale, together with the Report and Accounts of the UCITS. The Fund's documentation are available free of charge from the local information/paying agent, from authorised distributors and from www.man.com.

In order to fulfil the fund's objectives the Prospectus allows the manager the ability to invest principally in units of other collective investment schemes, bank deposits, derivatives contracts designed with the aim of gaining short term exposure to an underlying stock or index at a lower cost than owning the asset, or assets aiming to replicate a stock or debt securities index.

The value of an investment and any income derived from it can go down as well as up and investors may not get back their original amount invested. Alternative investments can involve significant additional risks.

This material is for information purposes only and does not constitute an offer or invitation to invest in any product for which any Man Group plc affiliate provides investment advisory or any other services. Prior to making any investment decisions, investors should read and consider the fund's offering documents.

Opinions expressed are those of the author as of the date of their publication, and are subject to change.

Some statements contained in these materials concerning goals, strategies, outlook or other non-historical matters may be "forward-looking statements" and are based on current indicators and expectations at the date of their publication. We undertake no obligation to update or revise them. Forward-looking statements are subject to risks and uncertainties that may cause actual results to differ materially from those implied in the statements.

Distribution of this material and the offer of shares may be restricted and the minimum subscription amount may be higher in certain jurisdictions. The product(s) mentioned within this material (i) may not be registered for distribution in your jurisdiction, and (ii) may only be available to professional or otherwise qualified investors or entities. It is important that distributors and/or potential investors are able to ensure compliance with local regulations prior to making a subscription. Please refer to the offering documentation for additional information.
