FinEx Tradable Russian Corporate Bonds UCITS ETF (the "Fund") USD Share Class (ISIN: IE00B84D7P43)

The Fund is a sub-fund of FinEx Funds plc (the "Company")

Objectives and Investment Policy

The Fund seeks to deliver the performance of the Barclays EM Tradable Russian Corporate Bond (EMRUS) Index (the "Index"). It does this by investing in bonds which are included in the Index. Bonds are a debt instrument in which an investor loans money to an entity that borrows the funds for a defined period of time at a fixed interest rate. If such bonds are not available, the Fund will invest in comparable bonds with the aim of delivering the performance of the Index as closely as possible.

Investors other than authorised participants may not buy shares directly from the Fund but may buy and sell shares daily through an authorised participant. Shares may be bought from and sold directly to the Fund by authorised participants on each business day in accordance with the conditions detailed in the prospectus and supplement for the Fund. In exceptional circumstances, secondary market investors will be permitted to redeem their shares directly from the Company in accordance with the redemption procedure set out in the prospectus, subject to any applicable laws and relevant charges.

The Index is designed to measure the performance of shorter maturity liquid Eurobonds from Russian corporate entities. The base currency of the Fund is US Dollars.

The Fund intends, at the discretion of the directors, to distribute income and dividends.
