The fund is permitted to invest over 35% of its assets in securities issued by a single local, national or supra national government. Each fund can invest entirely in units of collective investment schemes. Source: State Street Banque SA. The Fund performance figures take into account the annual management charges, but not the initial charges that would be payable. These charges have the effect of reducing the past performance figures shown above. Figures are on a single pricing basis and assume income is reinvested. Past performance is not a guide to future performance. The value of investments and any income from them can go down as well as up and is not guaranteed. This may be due to market fluctuations or changes in exchange rates, or both. This means that investors may not get back the original amount invested.
