

Market Vectors Junior Gold Miners UCITS ETF

31 DECEMBER 2015

FUND DESCRIPTION

Market Vectors Junior Gold Miners UCITS ETF is a UCITS compliant exchange-traded fund (ETF) that invests in a portfolio of equity securities. The ETF aims to provide investment returns that closely track the performance of the Market Vectors Global Junior Gold Miners Index (MVGDXJTR).

Market Vectors Global Junior Gold Miners Index, a pure-play, global index that combines blue-chip and benchmark characteristics, is especially designed to underlie ETFs. The index tracks the performance of the most liquid junior companies in the global gold and silver mining industry that generate or intend to generate at least 50% of their revenues from this sector. The index is reviewed quarterly based on a strictly rules-based methodology which applies most stringent size and liquidity requirements. Please consult www.marketvectorsindices.com for index data and detailed methodology.

PERFORMANCE HISTORY (%)

| AS OF 31 DEC 2015 | 1 MO | YTD | 1 YR | 3 YR | 5 YR | ETF INCEPTION |
|-------------------|------|--------|--------|--------|--------|---------------|
| ETF (NAV) | 2.70 | -- | -- | -- | -- | -22.05 |
| MVGDXJTR (Index) | 2.79 | -19.15 | -19.15 | -37.03 | -32.52 | -21.76 |

Periods greater than one year are annualised.

The table presents past performance which is no guarantee of future results and which may be lower or higher than current performance.

Investment returns and ETF share values will fluctuate so that investors' shares, when redeemed, may be worth more or less than their original cost. ETF returns assume that dividends and capital gains distributions have been reinvested in the Fund at NAV but do not reflect the payment of transaction costs. An index's performance is not illustrative of the Fund's performance. Indices are not securities in which investments can be made.

The "Net Asset Value" (NAV) of a Market Vectors Exchange Traded Fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Please see the reverse side for important disclaimers.

Market Vectors Junior Gold Miners UCITS ETF (the Fund) is a sub-fund of Market Vectors UCITS ETFs plc. (the Umbrella Fund), organised under the laws of Ireland. This document is for illustrative purposes to Investors and their investment consultants and does not constitute legal, tax, or investment advice. You must therefore not rely on the content of this document when making any investment decisions. Any investment decision should be made on the basis of an understanding of the prospectus and the key investor information document ("KIID"), which is available at www.marketvectors-europe.com and Van Eck Global Investments Limited at its registered office at 25-28 North Wall Quay, Dublin 1, Ireland. Please read these documents before investing and take note of the risk factors. Note: no guarantee can be provided that the Fund will attain its objective. The value of an investment may decline as well as increase. All persons interested in investing in the Fund are recommended to seek advice from independent legal and tax advisors in order to ascertain whether the investment is appropriate to their own objectives.

You can lose money by investing in the Fund. Any investment in the Fund should be part of an overall investment program. An investment in the Fund may be subject to risks which include, among others, competitive pressures, dependency on the price of gold and silver bullion which may fluctuate substantially over short periods of time, periods of outperformance and underperformance of traditional investments such as bonds and stocks, and natural disasters, all of which may adversely affect the Fund. Foreign investments are subject to risks, which include changes in economic and political conditions, foreign currency fluctuations, changes in foreign regulations, and changes in currency exchange rates which may negatively impact the Fund's return. Smaller companies may be subject to elevated risks. The Fund's assets may be concentrated in a particular sector and may be subject to more risk than investments in a diverse group of sectors. Please see the prospectus and key investor information document for information on these as well as other risk considerations.

The IOPV is calculated by Solactive AG.
