I Class Shares: GVQ UK Focus Fund

ISIN: IE0033377494

GVQ Investment Funds (Dublin) plc

Objectives and Investment Policy

The investment objective of the GVQ UK Focus Fund ("Fund") is to maximise returns for investors, predominantly through capital growth. Essential features of the product which a typical investor should know:

- The Fund invests in the shares of up to 35 companies that are quoted on the UK stock markets.
- The Fund invests in companies based on their own merits, with no specific size or sector bias. Weightings in benchmark indices, such as the FTSE All-Share Index are not taken into account when constructing the portfolio.
- Stocks are selected using valuation techniques developed in the private equity industry rather than traditional financial metrics such as price/earnings ratios or dividend yields.
- Investments are chosen on a discretionary basis by the Investment Manager based on their assessment of likely future returns.
- The Fund typically invests in public companies for three or more years. As a result transaction costs are not expected to have a material impact on performance over time.

- The Fund does not use gearing or invest in derivatives or debt.
- The Fund's net asset value per share is published daily.
- Investors may sell shares on demand on a daily basis (but not on weekends or bank holidays in Ireland or UK). Orders received after 12pm are dealt on the next dealing day.
- Bought and sold shares are settled 4 business days after they are transacted.
- Income arising from the Fund is distributed through semi-annual dividend payments. Dividends payable to shareholders will be re-invested by subscription for additional shares of the same class unless a shareholder specifically requests otherwise.
- As with all investments in quoted equities, this Fund may not be appropriate for investors who are seeking a predictable capital return, or intend to invest over the short to medium term.
- For full investment objectives and policy details, please refer to the Investment Objective and Policy section in the Fund's Supplement to Prospectus which is available at www.gvqim.com.

Risk and Reward Profile

- The indicator is based upon historical data and may not be relied upon to gauge the future risk profile of the Fund.
- This risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.
- The Fund is in category 5 because of the medium range and frequency of price movements of the underlying investments the Fund invests in.

Investors may wish to take into account the following additional risks which are not adequately captured by the indicator:

- The Fund invests in a smaller number of companies and sectors than the market, creating concentration risk.
- There is some liquidity risk, as a significant level of investment is made in companies smaller than the average in the Index. These are likely to have a low level of liquidity in some circumstances.
- The Fund has no financial leverage or derivative risk.
- The performance of the Fund will depend on the skill and expertise of the Investment Manager. The loss of key personnel could affect the performance of the Fund.

For a complete overview of all risks attached to this Fund, investors should refer to the Risk Factors sections in the Fund's Prospectus and Supplement to Prospectus which is available at www.gvqim.com.
